PRODUCTION AND SALES OF RADIO RECEIVING SETS IN CANADA

APRIL, MAY AND JUNE, 1935.

Production of radio receiving sets in Canada during the second quarter of 1935 numbered 24,711 units compared with outputs of 25,453 units in the corresponding months of 1934 and 23,573 units in the first quarter of this year. Output for the current quarter included 14,143 standard broadcast sets, 8,166 multi or selective wave sets and 2,402 all wave sets.

Sales by the producers during April, May and June numbered 23,811 sets valued at list prices at \$1,843,392 as compared with sales of 17,599 sets and 14,084 sets during the second quarters of 1934 and 1933, respectively. Compared with figures for the second quarter of last year, data for the period under review indicated an improvement in the demand for radio receivers in all areas except in the Maritimes where sales dropped to 1,035 from 1,096 and in British Columbia where they declined to 1,308 from 1,637. Factory sales in Ontario advanced to 13,432 from 9,392, in Saskatchewan and Alberta to 2,831 from 1,285, in Quebec to 3,979 from 3,254, and in Manitoba to 1,226 from 935.

Inventories of radio receivers in the hands of the manufacturers on June 30, 1935, were reported as amounting to 14,536 of the standard broadcast band type, 15,800 multi or selective wave and 7,432 all wave, to make a total inventory of 37,768 receivers. On March 31, 1935, inventories amounted to 37,398 sets.
