NOTE: 1. These figures represent production by the principal manufacturers, which normally account for 85 per cent of the total Canadian output of concrete products and have not been expanded.

2. Up until March, 1957, statistics on cement and concrete products were combined in a single Memorandum under the title of "Cement and Cement Products". Commencing with March, 1957, these data are being released as separate Memoranda under the titles of "Cement" which is prepared by the Mineral Statistics Section and the present "Concrete Products" prepared by the Metal and Chemical Products Section.

Prepared in the Metal and Chemical Products Section, Industry and Merchandising Division.
