ANNUAL

THE CONCRETE PRODUCTS INDUSTRY

1959

Published by Authority of
The Honourable George Hees, Minister of Trade and Commerce

DOMINION BUREAU OF STATISTICS

Industry and Merchandising Division

October, 1961
6523-553

Price 50 cents

PUBLICATIONS

The results of the annual Census of Industry are published by the Dominion Bureau of Statistics in a series of industry reports which are released each year as the compilations are completed. Reports for industries in the **Non-Metallic Mineral Products Major Group** are listed below, along with current and annual publications of related interest. Similar reports are issued for other industries. A complete catalogue of publications of the Bureau is available on request from the Information Services Division, Dominion Bureau of Statistics, Ottawa, or from the Queen's Printer, Ottawa.

A — Annual

M — Monthly

| Catalogue number | Title | Price |
|------------------|---|---------------|
| 44-201 | Non-Metallic Mineral Products — General Review (A) | .50 |
| 44-202 | The Artificial Abrasives Industry (A) | .50 |
| 44-203 | The Asbestos Products Industry (A) | .25 |
| 44-204 | The Cement Manufacturing Industry (A) | .50 |
| 44-205 | The Concrete Products Industry (A) | .50 |
| 44-207 | The Glass and Glass Products Industry (A) | .50 |
| 44-208 | The Gypsum Industry (A) | .50 |
| 44-206 | The Clay and Clay Products Industry (A) | .50 |
| 44-209 | The Lime Industry (A) | .50 |
| 26-214 | The Salt Industry (A) | .50 |
| 26-217 | The Stone Industry (A) | .50 |
| 44-210 | The Miscellaneous Non-Metallic Mineral Products Industry (A) | .25 |
| <hr/> | | |
| 26-001 | Asbestos (M) | per year 1.00 |
| 26-007 | Canada's Leading Minerals (M) | per year 1.00 |
| 26-009 | Salt (M) | per year 1.00 |
| 44-001 | Cement (M) | per year 1.00 |
| 44-002 | Concrete Products (M) | per year 1.00 |
| 44-003 | Gypsum Products (M) | per year 1.00 |
| 44-004 | Mineral Wool (M) | per year 1.00 |
| 44-005 | Products Made from Canadian Clays (M) | per year 1.00 |
| 47-001 | Asphalt and Vinyl-Asbestos Floor Tiles (M) | per year 1.00 |
| 31-201 | General Review of the Manufacturing Industries (A) | 2.00 |
| 31-001 | Inventories, Shipments and Orders in Manufacturing Industries (M) | per year 4.00 |
| 65-004 | Trade of Canada — Exports (M) | per year 7.50 |
| 65-007 | Trade of Canada — Imports (M) | per year 7.50 |

Remittances should be in the form of cheque or money order, made payable to the Receiver General of Canada and forwarded to the Information Services Division, Dominion Bureau of Statistics, or to the Queen's Printer, Ottawa, Canada.

SYMBOLS

The interpretation of the symbols used in the tables throughout this publication is as follows:

- ... figures not available.
- ... figures not appropriate or not applicable.
- nil or zero.
- P preliminary figures.

EXPLANATORY NOTES

This report is one in a series of about 130 publications which present the results of the 1959 Census of Manufactures. Most reports in this series refer to specific industries, but there are summary reports for Canada and the provinces and for major industry groups. An annual Census of Manufactures has been carried out by the Dominion Bureau of Statistics since 1916.

Industry statistics given in these reports refer to number of establishments, employees, salaries and wages, cost of materials, supplies, fuel and electricity, gross value of shipments, inventories and value added by manufacturing. Details of materials used and products shipped are also given. Descriptions of the principal industry statistics, with special reference to 1959 are as follows:

Period Covered

Firms are asked to submit figures for the calendar year, if at all possible, and most reports are on this basis. Financial year reports for periods differing from the calendar year are accepted in instances where the firms find it impossible to supply calendar year data from accounting records. However the data on employees, salaries and wages are requested on a calendar year basis in all cases.

Establishment

Data for the annual census is collected on an establishment basis. A firm with more than one plant is required to file a report for each plant. In most cases an establishment is a complete factory. Sometimes, however, a plant is divided into two or more establishments when it carries out operations classifiable to different industries and when separate accounting records are available. Usually the statistics for an establishment relate only to the manufacturing activities. Other activities such as construction at the plant by its own employees, wholesale or retail activities carried on at the plant location, etc., are not included. Plants engaged solely in repair work (except in the case of furniture, shipbuilding, boat building, aircraft and railway rolling stock industries) are not included but plants occupied in assembling parts into complete units are included.

Employees

Administrative and office employees include all executives and supervisory officials such as presidents, vice-presidents, secretaries, treasurers, etc., together with managers, professional and technical employees, superintendents and factory supervisors above the working foremen level and clerical employees. Working owners and partners are also included in this category.

Production and related workers include all other factory workmen whether paid on a monthly, weekly, hourly or piece-work basis. Working foremen doing work similar to that of the employees they supervise are included, as are maintenance, warehousing and delivery staffs. Employees on new construction work, in retail or wholesale operations, on outside piece work etc., are not included.

Production workers are reported by months, an average for the year being obtained by summing the monthly figures and dividing by twelve. This procedure is followed even though the plant did not operate in all months. Figures on employment refer to calendar years whether or not some establishments reported other data on a financial year basis.

Salaries and Wages

Salaries and wages refer to gross earnings of the employees described above, including salaries, wages, commissions, bonuses, the value of room and board where provided, deductions for income tax and social services such as sickness and unemployment insurance, pensions, etc., as well as any other allowances forming part of the employees' wages. Payments for overtime are included.

Salaries refer to amounts paid to administrative and office employees. Withdrawals by working owners or partners for normal living expenses for self and family are included but not their withdrawals for income tax. Wages refer to the amounts paid to production and related workers as defined above. Data on earnings refer to the calendar year whether or not some establishments reported other data on a financial year basis.

Cost of Fuel and Electricity

Figures for fuel refer to amounts actually used, (including fuel used in cars and trucks), not to purchases unless the quantities are the same. Values refer to the laid-down cost at the works, including freight, duty, etc.

Materials and Supplies Used

Figures represent quantities and laid-down cost values, at the works, of materials and supplies actually used during the year whether purchased from others or received as transfers from other plants of the reporting company. Amounts paid to other manufacturers for work done on materials owned by the reporting company are included. Returnable containers or any other items charged to capital account are not included. Fuels are not included. Goods bought from others or received as transfers from other plants of reporting companies for resale without further processing are not included. Maintenance and repair supplies not chargeable to capital account are included.

Factory Shipments

Factory shipments refer to shipments of goods made from own materials either in the reporting plant or by other manufacturers on the basis of a charge to the reporting plant for work done. All products and by-products shipped from the establishment are included whether for domestic use, export, or for government departments. Transfer shipments to sales outlets, distributing warehouses or to other manufacturing units of the reporting firm are included. Goods bought or received as transfers and resold without further processing are not included. Values are computed on f.o.b. plant or

plant warehouse basis, and do not include sales tax or excise duties. Values of containers not returnable are included. Amounts received in payment for work done on materials owned by others are included.

In a few industries such as shipbuilding, aircraft, etc., where work on principal products extend over a relatively long period, the value of production is recorded rather than the value of shipments. For those industries production is computed from the value of deliveries of complete units during the year plus the value of work done during the year on unfinished units less the value of work done in previous years on finished units delivered in the year under review.

Inventories

Values represent the book values of manufacturing inventories owned and held at the reporting plant. Figures include inventories held in warehouses or selling outlets which have been included with plant operations for purposes of reporting shipments.

Value Added by Manufacturing

Figures are computed from value of shipments plus or minus changes in inventories of finished goods and goods in process less cost of materials, fuel and electricity. This figure is sometimes referred to as net production.¹

Standard Industrial Classification

The Standard Industrial Classification Manual, prepared by the Dominion Bureau of Statistics, provides for 135 three-digit industries in the manufacturing sector, arranged in 17 major groups. Reporting establishments are classified or allotted to specific industries on the basis of the value of principal products made or shipped.

Short Forms

Between 1949 and 1957, in an effort to ease the reporting burden for smaller firms, a short form was used asking for the total value of shipments only or, in a few cases where losses of detail were significant, for quantities and values of principal products. For purposes of publication, missing data were estimated on the basis of appropriate ratios. In general the cut-off point for these short forms was set at \$50,000 value of shipments. About 40% of the total number of establishments reported on the short form and accounted for less than 3 per cent of the total value of shipments.

In 1958, in order to establish a new base year, the small firms were asked to report all items of principal statistics together with some detail on materials and products.

¹ To arrive at the National Accounts concept of "gross domestic product at factor cost", it would be necessary to subtract also the cost of office supplies used, advertising, insurance and other goods and services obtained from other businesses. Data on these inputs are not collected on the annual Census of Manufactures. Value added figures for "The primary industries and construction" are published in D.B.S. publication 61-202, *Survey of Production*.

For the 1959 Census, the short form was used again, but further steps were taken to ease the respondents' burden. First, the general limit for short forms was raised to \$100,000 value of shipments. In addition, a new intermediate form was developed. This form is a shortened version of the long form in that most of the general questions were pared down and the detailed lists of materials and products were limited to the more important items. The general limits for firms in this category were set at between \$100,000-\$500,000 value of shipments, but in the case of both the short and intermediate forms there were lower cut-offs for a number of industries in which the smaller firms accounted for a larger share of total shipments. On the other hand, limits were raised where this could be done without a significant loss of coverage. On most of the short forms for 1959, in addition to total value of shipments, data on principal products were requested. In a few industries, where loss of employment and earnings data were considered too large because of higher cut-offs, a question on total payroll was placed on the short form.

The intermediate and long forms provide complete data for the compilation of all elements of principal industry statistics and the details of materials and products. The one-page short form, although containing data on principal products and total value of shipments, does not request information on other elements of principal statistics such as value of inventories, materials, fuel and electricity and, in most cases, employment and salaries and wages, nor does it contain detailed data on volume and value of materials used. For purposes of compiling aggregates of principal statistics by industry and by geographic location, the missing data for each establishment were estimated for 1959 by using, in general, ratios based on the change in the value of shipments between 1958 and 1959. The proportion of the estimated data was generally less than 5 per cent of the total in each category of principal statistics.

The general request for the principal items of products on the short form for 1959 permitted a fairly complete compilation of the detailed quantities and values of commodity shipments. In the case of the detailed quantities and values of materials, fuel and electricity, however, and the monthly distribution of production workers, only the totals of data actually reported on the intermediate and long forms are contained in published reports and no attempt was made as in past years to estimate the generally small proportion of individual totals represented by detailed items omitted from the short forms.

The new approach has relieved an additional 12,000 establishments from filling out the regular long form. Establishments now receiving the short form number in excess of 20,000 and account for more than 54 per cent of the total number of establishments and a little more than 3 per cent of the total value of shipments.

THE CONCRETE PRODUCTS INDUSTRY

1959

Factory shipments of manufactured concrete products in Canada during 1959 were valued at \$207,906,250 compared with \$186,235,051 during 1958.

A total of 682 plants operated in this industry during 1959, there being 274 in Ontario, 226 in Quebec, 62 in British Columbia, 47 in Alberta, 20 in Saskatchewan, 16 in Manitoba, 15 in New Brunswick, 13 in Nova Scotia, 6 in Newfoundland and 3 in Prince Edward Island. The Ontario plants accounted for 44 per cent of the total shipments; establishments in Quebec contributed 30 per cent; works in Alberta and British Columbia accounted for 11 per cent and 6 per cent respectively with the remaining 9 per cent being distributed among the

other provinces. Products included ready-mixed concrete worth \$99,926,979; concrete pipe of all kinds worth \$28,014,490; gravel blocks at \$30,147,716; cinder blocks at \$2,484,711; other light aggregate blocks at \$7,195,415; artificial stone at \$7,964,543; concrete bricks at \$6,174,849; and other items such as laundry tubs, burial vaults, chimney blocks, etc.

Data shown in this report reflect the operations of firms primarily concerned with the manufacture of concrete products. Figures on cement work undertaken by firms classified for statistical purposes in the area of "Construction" are not included. The latter type of work has been covered in the annual survey of construction.

**TABLE 1. Principal Statistics of the Concrete Products Industry, Significant Years 1929-59
and by Provinces, 1958 and 1959**

| Year and province | Establishments | Employees | Salaries and wages | Cost of fuel and electricity at plant | Cost at plant of materials used | Value added by manufacturer ¹ | Gross selling value of products ¹ |
|----------------------------|----------------|---------------|--------------------|---------------------------------------|---------------------------------|--|--|
| | | | | | | | number |
| | | | | | | | dollars |

| Canada | 682 | 12,566 | 50,099,502 | 6,892,702 | 99,828,430 | 102,590,965 | 207,906,250 |

¹ Due to lack of inventory data, figures for value added by manufacture prior to 1954 were obtained by subtracting the cost of materials used, including fuel and electricity, from the total value of factory shipments. In 1954 and 1955 the "Value added" adjustment incorporated the increase or decrease to shipments values resulting from changes in the value of inventories over the period. For these two years, the adjustments that were made used only the change in finished product inventory owned by manufacturers. Beginning with 1956 the calculation of the "Value added" figure was further adjusted to take into account the "Goods in process" as well as the finished goods held at plant or plant warehouse.

Note: Profits or losses cannot be calculated from above figures as data are not available for general expense items, such as interest, rent, depreciation, taxes, insurance, advertising, etc.

NON-METALLIC MINERAL PRODUCTS

TABLE 2. Inventories,¹ 1959

| | Raw materials and supplies | Goods in process | Finished goods of own manufacture | Total |
|----------------------------|----------------------------------|---------------------|---|------------|
| dollars | | | | |

| British Columbia | 230,297 | 9,487 | 844,916 | 1,084,700 |
| Canada | 7,265,612 | 549,556 | 11,144,627 | 18,959,795 |

¹ (a) Book value of all manufacturing inventories owned and held at plant and plant warehouses.

(b) Beginning with 1954, information on the value of year-end inventory holdings at plant and plant warehouses is being collected as part of the annual Census of Industry. These data were formerly collected by a separate survey. The summarized results for the Concrete Products Industry for the year under review are shown in the above table.

(c) The opening inventory for 1959 does not necessarily agree with the closing inventory for 1958 because of the addition of new plants, the transfer of plants to other industries, plants going out of business, etc. However, the value added figures for the previous year have not been recalculated to allow for the changes mentioned above.

TABLE 3. Products Made in the Concrete Products Industry, 1958 and 1959

| Product | 1958 | | 1959 | |
|---|----------|----------------------------------|-------------|----------------------------------|

TABLE 11. Production Workers, by Months, in the Concrete Products Industry, 1959

| Month | Establishments reporting monthly detail ¹ | | Establishments reporting quarterly detail ² | |
|---|--|--------|--|--------|
| | Male | Female | Male | Female |
| January | 6,054 | 36 | | |
| February | 6,224 | 34 | | |
| March | 6,746 | 39 | 1,012 | 4 |
| April | 7,501 | 50 | | |
| May | 8,136 | 56 | | |
| June | 8,555 | 59 | 1,597 | 7 |
| July | 8,916 | 57 | | |
| August | 9,044 | 58 | | |
| September | 8,954 | 48 | 1,519 | 8 |
| October | 8,575 | 39 | | |
| November | 7,875 | 32 | | |
| December | 6,651 | 30 | 969 | 6 |
| Average for establishments reporting monthly detail | | | 7,717 | 48 |
| Average for establishments reporting quarterly detail | | | 1,253 | 7 |
| Average estimated for small establishments ³ | | | 925 | 1 |
| Average for all establishments | | | 9,895 | 56 |

¹ The number of production workers, by months, was collected only for establishments generally reporting value of shipments of \$200,000 and over.

² The number of production workers, by quarters, was collected only for establishments generally reporting value of shipments between \$50,000 and \$200,000.

³ For establishments generally reporting value of shipments of less than \$50,000, no data on number of workers were collected. Average was estimated by using change in value of shipments to arrive at value of payroll which was then used in conjunction with estimated average earnings to arrive at number of workers.

TABLE 12. Fuel and Electricity Used in the Concrete Products Industry, 1959

| Kind | | Quantity | Cost at plant |
|---|---------------|------------|---------------|
| | | | \$ |
| 1. Establishments reporting commodity detail:¹ | | | |
| Bituminous coal: | | | |
| (a) From Canadian mines | ton | 4,849 | 64,449 |
| (b) Imported | " | 12,140 | 185,711 |
| Anthracite coal | " | 205 | 2,885 |
| Coke | " | 267 | 5,073 |
| Gasoline (including gasoline used in cars and trucks) ... | Imp. gal. | 9,603,586 | 3,337,995 |
| Fuel oil including kerosene or coal oil | " | 7,969,465 | 1,160,287 |
| Wood | cord | 41 | 548 |
| Gas: | | | |
| (a) Liquefied petroleum gases | Imp. gal. | 219,373 | 37,907 |
| (b) Other manufactured gas | 1,000 cu. ft. | 1,039 | 1,618 |
| (c) Natural gas | " | 538,298 | 210,618 |
| Other fuel | | .. | 82,144 |
| Electricity purchased | kwh. | 54,210,056 | 917,742 |
| Steam purchased | | .. | 104,150 |
| 2. Establishments reporting group detail:² | | | |
| Cost of fuel | | .. | 393,959 |
| Cost of electricity | | .. | 136,007 |
| 3. Estimate for establishments for which no data were collected:³ | | | |
| Cost of fuel and electricity | | .. | 251,609 |
| 4. All establishments: | | | |
| Total cost of fuel and electricity | | .. | 6,892,702 |

¹ Establishments generally reporting value of shipments of \$200,000 and over.² Establishments generally reporting value of shipments between \$50,000 and \$200,000.³ Establishments generally reporting value of shipments of less than \$50,000.

TABLE 13. Capital and Repair Expenditures in the Concrete Products Industry, 1955-59

| Year | Capital expenditures | | Sub-total | Repair expenditures | | Sub-total | Total capital and repair expenditures |
|----------------------|----------------------|-------------------------|-----------|---------------------|-------------------------|-----------|---------------------------------------|
| | Construction | Machinery and equipment | | Construction | Machinery and equipment | | |
