Mineral Production

THE LIME INDUSTRY IN CANADA, 1946

Production of lime in Canada amounted to 840,799 tons valued at \$7,074,940 in 1946 compared with 832,253 tons worth \$6,525,038 in 1945, an increase of only 1 per cent in tonnage but 8.4 per cent in value. This year's output, which was the first annual production to exceed 7 million dollars in valuation, included 684,674 tons of quicklime and 156,125 tons of hydrated lime valued respectively at \$5,778,243 and \$1,296,697. About 92 per cent of the quicklime and 49 per cent of the hydrated lime were used by chemical and other industrial plants and 8 per cent and 51 per cent respectively, were used by the building trade and for agriculture.

Stone used in the production of lime in Canada includes calcium, high calcium and dolomitic varieties of limestone. It is estimated that 1,487,000 tons of limestone were consumed in the production of lime in 1946. In addition, a considerable tonnage of lime was recovered as a by-product from chemical and allied plants.

In 1946 there were 41 active plants in this industry and the average number of employees for the year was 944. Expenditures by the operators included \$1,667,157 for salaries and wages, \$1,955,428 for fuel and electricity, and \$209,385 for containers and process supplies.

The imports of lime during 1946 totalled 7,618 tons valued at \$50,093 and the exports amounted to 24,673 tons worth \$279,620.
