### NOTICE

It has been the practice of the Bureau of Statistics, since 1920, to issue an annual printed report on the Mineral Production of Canada. This report was comprised to a large extent of the data which had already been issued in bulletin form as statistics for each industry were completed. The final report was necessarily late in being issued, and its main use was for library purposes and for historical research. It also had the advantage of having complete statistics of the Canadian Mining Industry for a year in one volume.

Such a procedure necessitated the preparation of new manuscript, duplication of proof-reading, and extra costs in type-setting and printing. In order to avoid this extra cost, a system has been devised whereby libraries and other similar organizations may file the separate reports in a ring binder as issued, and if they so desire, may have them bound in a volume when the series for the year is complete.

The reports have been paged in such a manner that when bound they will correspond to the chapters of the annual printed report hitherto issued, but which has been discontinued.

The following reports will constitute the complete volume on Mineral Statistics of Canada:

- A General Review of the Mining Industry, 25¢.
- B The Gold Mining Industry, 50¢.
- C The Silver-Lead-Zinc Mining Industry, 30¢.
- D The Nickel-Copper Mining, Smelting and Refining Industry, 25¢.
- E The Miscellaneous Metal Mining Industry, 30¢.
- F The Non-ferrous Smelting and Refining Industry, 25¢.
- G The Coal Mining Industry, 75¢.
- H The Natural Gas and Crude Petroleum Industry, 25¢.
- I The Asbestos Mining Industry, 25¢.
- J The Feldspar and Quartz Mining Industry, 25¢.
- K The Gypsum Industry, 15¢.
- L The Peat Industry, 25¢.
- M The Salt Industry, 25¢.
- N The Talc and Soapstone Industry, 25¢.
- O The Miscellaneous Non-Metal Mining Industry, 30¢.
- P The Cement Manufacturing Industry, 25¢.
- Q The Clay and Clay Products Industry, 25¢.
- R The Lime Industry, 25¢.
- S The Sand and Gravel Industry, 25¢.
- T The Stone Industry, 35¢.

## THE LIME INDUSTRY 1950

Producers' shipments of lime during 1950 were recorded at 1,124,188 short tons valued at \$12,281,084 compared with 1,018,823 tons worth \$11,309,820 in the preceding year.

Quicklime shipped or used totalled 885,219 tons of which 791,399 tons were used for chemical and industrial purposes and 93,820 tons for building and other uses. Hydrated lime used in chemical and industrial plants amounted to 116,510 tons and the building and agricultural trades purchased 122,459 tons.

Stone used in the production of lime in Canada includes, calcium, high calcium and dolomitic varieties of limestone. It is

estimated that 1,928,127 tons of limestone were burned in 1950. Lime is also recovered as a by-product from chemical plants.

The industry employed 1,133 persons to whom \$2,760,960 were paid in salaries and wages. Fuel cost \$3,146,214 and 14,881,613 k.w.h. of electricity cost \$117,146. The value of process supplies and containers totalled \$789,328.

The data in this report refer to lime produced from Canadian limestone. There was an additional production of 19,277 tons of lime valued at \$187,266 from imported limestone.

Of this latter amount, 299,218 tons of quicklime were consumed in Ontario; 89,373 tons of quicklime in Quebec and the balance, 33,058 tons of quicklime and 6,477 tons of hydrated lime in other provinces.

1. Not necessarily consumed in provinces where produced; includes by-product lime.

1. Not necessarily consumed in provinces where produced; includes by-product lime.

Note. Of the total quantity of 1,124,188 tons of lime produced, 492,201 tons were consumed by the producers themselves. Of this latter amount, 313,984 tons of quicklime were consumed in Ontario; 129,927 tons of quicklime and 4,000 tons of hydrated in Quebec and the balance, 39,200 tons of quicklime and 5,090 tons of hydrated, in other provinces.
