THE LIME INDUSTRY

1951

During 1951 the producers of lime shipped 1,241,641 tons valued at \$14,082,520, compared with 1,124,188 tons worth \$12,281,084 in 1950.

Quicklime, shipped or used, totalled 982,689 tons, of which 885,654 tons were used for chemical and industrial purposes and 97,035 tons were used for building and other purposes. Hydrated lime used by industrial and chemical plants amounted to 135,531 tons and 122,821 tons were sold to the building and agricultural trades.

Stone used in the production of lime in Canada included calcium, high calcium and dolomitic varieties of limestone. It is estimated that 2,164,298 tons of limestone were burned in

1951. Lime is also recovered as a by-product from chemical plants.

The industry employed 1,096 persons, to whom \$3,053,802 were distributed in salaries and wages. Fuel cost \$3,223,936 and 16,986,599 k.w.h. of electricity were purchased for \$134,785. The industry generated 3,365,850 k.w.h. of electricity for its own use. Process supplies and containers used were valued at \$921,266.

The data in this report refer to lime produced from Canadian limestone. There was an additional production of 17,777 tons of lime valued at \$181,771 from imported limestone.
