MONTHLY REPORT

ON

COAL AND COKE STATISTICS FOR CANADA

November, 1925

Published by Authority of the Hon. J. A. Robb, M.P.,
Acting Minister of Trade and Commerce

OTTAWA
F. A. ACLAND
PRINTER TO THE KING'S MOST EXCELLENT MAJESTY
1926

LIST OF PUBLICATIONS

PREPARED IN THE

MINING, METALLURGICAL AND CHEMICAL BRANCH DOMINION BUREAU OF STATISTICS

MINERAL PRODUCTION (Mining and Metallurgy).

General Reports—

Preliminary Reports (semi-annual) on the Mineral Production of Canada.

Annual Report on the Mineral Production of Canada. (In one volume).

PART ONE—PRODUCTION STATISTICS—General Statistical Review of the Mineral Production of Canada.

Metals.—Aluminium—Antimony—Arsenic—Chromite—Cobalt—Copper—Gold—Iron Ore—Iron, Pig—Lead—Mercury—Molybdenum—Nickel—Platinum and Palladium—Silver—Tin—Zinc.

Non-Metals.—Abrasives—Actinolite—Asbestos—Barytes—Coal—Coke—Feldspar—Fluorspar—Graphite—Gypsum—Iron Oxides—Magnesite—Magnesium Sulphate—Mica—Mineral Water—Natrol—Alunite—Natural Gas—Peat—Petroleum—Phosphate—Pyrites—Quartz—Salt—Sodium Carbonate—Sodium Sulphate—Talc.

Structural Materials and Clay Products.—Cement—Clay and Clay Products—Lime—Sand and Gravel—Sand-Lime Brick—Slate—Stone.

PART TWO—GENERAL STATISTICS.—Text and tables presenting general reviews of the mineral industry in Canada (a) by provinces; (b) by industries.

PART THREE—DIRECTORY.—List showing the names, head office and mine or plant addresses of all concerns operating in the mineral industry in Canada, arranged in alphabetical order by industrial groups.

Coal—

Monthly Report on Coal and Coke Statistics for Canada.

General review for the month with tables showing comparative data for the month and year to date, output by coal-mining districts and by provinces, imports and exports by ports and by kinds of coal. In this report there is also a section showing statistics on production, imports and exports of coke for the month and year to date by provinces.

Annual Report on Coal Statistics for Canada.

Text and tables showing, for Canada, and for each of the coal-producing provinces, historical and current data on output, tonnage lost, disposition of coal from the mines, domestic and foreign shipments, exports and imports by ports, consumption of coal, prices, employment, salaries and wages paid, power equipment, capital investment, etc.

Bulletins—

(a) PRODUCTION—

Metals.—Arsenic—Cobalt—Copper—Gold—Iron Ore—Lead—Nickel—Metals of the Platinum Group—Silver—Zinc—Miscellaneous Non-Ferrous Metals including Aluminium, Antimony, Chromite, Manganese, Mercury, Molybdenum, Tin, Tungsten.

Non-Metals.—Asbestos—Coal—Feldspar—Gypsum—Iron Oxides—Mica—Natural Gas—Petroleum—Quartz—Salt—Talc and Soapstone—Miscellaneous Non-Metallic Minerals including Actinolite, Barytes, Corundum, Fluorspar, Graphite, Grindstones, Magnesite, Magnesium Sulphate, Mineral Waters, Natrol—alunite, Peat, Phosphate, Pyrites, Sodium Carbonate, Sodium Sulphate, Tripolite.

Structural Materials.—Cement—Clay and Clay Products—Lime—Sand and Gravel—Stone and Slate.

(b) ANNUAL INDUSTRIAL REVIEWS—

The Gold Industry—Copper-Gold-Silver Industry—Nickel-Copper Industry—Silver-Cobalt Industry—Silver-Lead-Zinc Industry.

(c) ANNUAL PROVINCIAL REVIEWS ON THE MINERAL INDUSTRY—

Nova Scotia—New Brunswick—Quebec—Ontario—Manitoba—Saskatchewan—Alberta—British Columbia—Yukon.

SEE INSIDE BACK COVER FOR PUBLICATIONS ON MANUFACTURES BASED CHIEFLY ON MINERALS

DOMINION BUREAU OF STATISTICS

R. H. COATS, B.A., F.S.S., (Hon.) F.R.S.C., Dominion Statistician.

S. J. COOK, B.A., A.I.C., F.C.I.C., Chief of the Mining, Metallurgical and Chemical Branch.

COAL STATISTICS FOR CANADA

NOVEMBER, 1925

The output of coal from Canadian mines during November was 5 per cent greater than the production for the preceding month, and equal to the average for November in the past five years. The figures were 1,649,686 tons in November as against 1,570,379 tons in October, and an average of 1,642,786 tons for the month during the five preceding years.

Alberta and Saskatchewan were the only coal-producing provinces of the Dominion which showed gains in output in November over the preceding month, while Nova Scotia and Saskatchewan showed increases over the average for the month in the five preceding years. British Columbia's production of coal was just equal to the average for the month in the five preceding years.

Comparison of November and October figures covering the total importation of coal from the United States and Great Britain showed a decrease of 16 per cent. Imports in November amounted to 1,387,373 tons as compared with 1,658,501 tons in October and the five-year average for November of 1,974,196 tons. November tonnage was therefore 30 per cent lower than the five-year average for the month. Receipts of coal from Great Britain during the month amounted to 34,727 tons. For the first eleven months of 1925 the total amount of coal imported into Canada was 15,485,211 tons, or 8 per cent below the preceding five-year average for the period.

Imports of anthracite totalled 57,427 tons in November. This was 94,833 tons below the tonnage imported in October and about 86 per cent below the five-year average for the month. Anthracite imported from the United States amounted to 30,477 tons while 26,950 tons came from Great Britain. The imported coal included 51,278 tons of egg, grate and stove sizes, and 6,149 tons of buckwheat and rice sizes. Of the total anthracite imported during November, entries through the ports of Ontario accounted for 22,237 tons; Manitoba cleared 7,994 tons; and Saskatchewan, 117 tons; the balance came in through the ports of eastern Canada. The total amount of anthracite imported during the eleven months ending November, 1925 was 3,739,346 tons, a decrease of 4 per cent below the five-year average for the period.

Exports of Canadian coal for the month of November were 17 per cent lower than in October. The quantities were: November 82,946 tons; October 99,846 tons. Comparison of the November exports with the preceding five-year average showed a decrease of 36 per cent. Exports from the eastern provinces totalled only 23,748 tons; those from the western provinces amounted to 59,198 tons; there was thus a decrease of 16,900 tons below the total for October. Total exports for the year to date amounted to 669,325 tons or 59 per cent less than the five-year average.

Computed from figures on output, imports and exports, the quantity of coal made available for consumption was 6 per cent below the figures for the previous month. During November, the total was 2,954,113 tons, as against 3,129,034 tons made available during the month of October, but in comparison with the five-year average for the month, the November available tonnage was lower by 16 per cent. The total coal made available for use in the first eleven months of 1925 amounted to 26,367,076 tons. For the twelve months ending November 30th, the total coal made available for consumption was 29,191,246 tons, as compared with the total of 29,615,318 tons a year ago.

Men employed in the coal mines of Canada during November numbered 29,321 of whom 22,603 worked underground and 6,718 on surface as compared with a total of 27,407 in October, of whom 21,050 worked underground and 6,357 on surface. Production per man was 56.2 tons in November as against 57.0 tons per man in October. During November, the production per man-day was 2.6 tons, as compared with 3.5 tons in October. The tonnage lost (Table No. 5) was largely due to "lack of orders," "absenteeism," and "other causes."

EXPLANATORY NOTES ON THE TABLES

Output—

The output of coal from each district or county is shown for the current month, and the average output from each district for the same month in the five years 1920-1924 has been computed as a basis for comparison. The total output during the calendar year to date and the average output during the corresponding period of the five years, 1920-1924, are also tabulated. The percentage relations between the corresponding items are shown.

Imports—

Imports of anthracite and bituminous coal are given separately for each Customs port of entry and for each province, the data showing the quantity imported during the current month, and for comparison the average quantity imported during the same month of the five years 1920-1924. The total importations of each kind of coal during the calendar year to date, and during the corresponding period of the five years 1920-1924, are also given; the percentage relations between these data have been computed. With regard to the table of imports it is to be noted that the data given are not comparable with the imports statistics published in the "*Monthly Reports of the Trade of Canada*". The quantity of coal shown as imported represents the total amount of coal from the United States arriving at each port during the month. There is thus included some coal which has not been cleared from Customs while the "*Monthly Reports of the Trade of Canada*" show only the quantity of coal actually cleared from Customs for consumption in Canada. It often happens that large quantities of bituminous coal are brought into Canada but are not cleared from Customs until required for use owing to the fact that there is a duty of 50 cents a ton collected on all bituminous coal imported.

Exports—

Exports of Canadian coal by ports of exit are shown. These data do not show the province of origin but only the port of exit. Coal mined in one province is sometimes shown as exported from another province, a notable instance being that the bulk of coal exported from the province of Alberta is shipped through the Customs ports of Fernie and Cranbrook in British Columbia.

Coal Made Available for Consumption in Canada—

In Table No. 2 the total quantities of coal mined in each month have been added to the total quantities imported. From this aggregate there has been deducted the quantity of Canadian coal exported during the month. The amount remaining is the tonnage of coal made available for consumption during each of the months reported.

Tonnage Lost—

A plan has been worked out by the Bureau which is now being applied in every coal-producing province, and the following outline of the procedure is given, in order that the reader may clearly understand how the data in Table 5 were obtained.

For each month the actual output and the actual number of days' work done by all employees on the colliery pay-rolls are determined and from these two figures the output per man-day is deduced. The number of individual shifts lost by the men whose names are on the colliery pay-roll for the month is recorded, and the total number of shifts so lost is multiplied by the actual tonnage produced per man-day during the month. This lost tonnage plus the actual output of the mine during the month is regarded as the possible output and the percentages given in Table 5 showing the proportions produced and lost, are computed from these figures. The tonnage lost is thus analyzed according to the cause of loss and the percentage figures are included in the tables.

Table 1.—Summary of the Principal Coal Statistics for Canada

(Short Tons)

	(1) Month of November, 1925	(2) Month of October, 1925	(3) 5-year average for month 1920-24	(4) Calendar year to date 1925	(5) 5-year average for period 1920-24	Per cent of (1) to (2)	Per cent of (1) to (3)	Per cent of (4) to (5)

COKE STATISTICS FOR CANADA.

NOVEMBER, 1925

Production of coke in Canada during the month of November amounted to 156,182 tons, a decrease of 3 per cent from the record monthly production for the year in October when the output totalled 161,414 tons. Coke produced in the eastern provinces rose to 60,089 tons from 56,714 tons in October; the output of the western ovens remained about the same at 19,220 tons; but the Ontario production dropped 10 per cent to 76,873 tons.

Consumption of Canadian coal for coke-making remained about the same as in the preceding month at 84,190 tons but imported coal used declined to 153,033 tons from 163,660 tons in October. The total consumption of coal for coke-making was thus 237,223 tons in November as compared with 248,050 tons in October. Each short ton of coal charged to the ovens returned 1,317 pounds of coke, an average yield of 65.85 per cent.

Because producers of pig iron are the principal users of coke, the production of coke parallels closely the output of pig iron. A decline of 7 per cent in pig iron production in November led to a drop in the coke output but this was partially offset by increased demands for domestic use. Coke used during November in metallurgical works operated by coke producers declined 12 per cent to 79,259 tons; coke used in the coking plants was also slightly less at 18,794 tons; but coke sold rose to 62,793 tons from 58,118 tons in October making a total disposition by producers of 161,026 tons in November as compared with 168,183 tons in the preceding month.

Imports of coke into Canada in November declined to 81,609 tons from 94,213 tons in October while exports fell 41 per cent to 2,432 tons. Adding the tonnage imported to the Canadian production and deducting the exports, the apparent consumption in November was 235,359 tons as compared with 251,478 tons in October.

During the eleven months ending November, 568,897 tons of Canadian coal and 1,441,970 tons of imported coal were converted into 1,318,943 tons of coke. In the same time imports of coke totalled 721,151 tons making a total supply of 2,040,094 tons, and as exports amounted to 40,591 tons there remained 1,999,503 tons available for consumption in Canada.

Coke charged to iron blast furnaces in November amounted to 77,848 tons, and for the eleven months ending November totalled 576,622 tons.

LIST OF PUBLICATIONS

PREPARED IN THE

MINING, METALLURGICAL AND CHEMICAL BRANCH DOMINION BUREAU OF STATISTICS

STATISTICS OF MANUFACTURES—based chiefly on minerals.

General reports on the sections of manufactures covered by the Mining, Metallurgical and Chemical Branch are issued as follows:—

Annual Printed Reports—

Iron and Steel and Their Products: Pig iron and Ferro-Alloys—Steel and Rolled Products — Castings and Forgings — Boilers and Engines — Agricultural Implements — Machinery — Automobiles — Auto Accessories — Bicycles — Railway Rolling Stock — Wire and Wire Goods — Sheet Metal Products — Hardware and Tools — Miscellaneous Iron and Steel Products.

Manufactures of Non-Ferrous Metals: Aluminium Ware—Brass and Copper Products—Lead, Tin and Zinc Products—Manufactures of the Precious Metals—Electrical Apparatus and Supplies—Miscellaneous Non-Ferrous Metal Products.

Manufactures of Non-Metallic Minerals: Aerated Waters—Asbestos and Allied Products—Cement Products and Sand-Lime Brick—Coke and By-Products—Glass (blown, cut, ornamental, etc.)—Illuminating and Fuel Gas—Monumental and Ornamental Stone—Petroleum Products—Miscellaneous Non-metallic Mineral Products, including (a) Artificial Abrasives, (b) Abrasive Products, (c) Artificial Graphite and Electrodes, (d) Fuel Briquettes, (e) Gypsum Products, (f) Mica Products.

Chemicals and Allied Products: Coal Tar and its Products—Acids, Alkalies, Salts and Compressed Gases—Explosives, Ammunition, Fireworks and Matches—Fertilizers—Medicinal and Pharmaceutical Preparations—Paints, Pigments and Varnishes—Soaps, Washing Compounds and Toilet Preparations—Inks, Dyes and Colours—Wood Distillates and Extracts—Miscellaneous Chemical Products, including (a) Adhesives, (b) Baking Powder, (c) Boiler Compounds, (d) Celluloid Products, (e) Flavouring Extracts, (f) Insecticides, (g) Polishes and Dressings, (h) Sweeping Compounds, (i) Chemical Products, n.e.s.

Annual Bulletins.—In addition to the foregoing printed reports, a series of bulletins is issued annually, each of which presents the principal statistics relative to production: (a) in a particular industry, e.g. Automobiles—Petroleum Products, etc., (b) in each of the four main groups of industries. These are published in mimeograph form from time to time during the year as the necessary material becomes available.

Monthly—

Production of Iron and Steel in Canada.

Coke Statistics for Canada.

SPECIAL REPORTS.—

Report on the Consumption of Prepared Non-Metallic Minerals in Canada.

Report on the Consumption of Mine and Mill Materials in Canada.

Annual Summary Report on the Mineral Industry and the Manufacturing Industries Related Thereto.
