DOMINION BUREAU OF STATISTICS

MINERAL PRODUCTION (Mining and Metallurgy).

General Reports—

Preliminary Reports (semi-annual) on the Mineral Production of Canada.

Annual Report on the Mineral Production of Canada. (In one volume).

PART ONE—PRODUCTION STATISTICS—General Statistical Review of the Mineral Production of Canada.

Metals.—Aluminium—Antimony—Arsenic—Chromite—Cobalt—Copper—Gold—Iron Ore—Iron, Pig—Lead—Mercury—Molybdenum—Nickel—Platinum and Palladium—Silver—Tin—Zinc.

Non-Metals.—Abrasives—Actinolite—Asbestos—Barytes—Coal—Coke—Feldspar—Fluorspar—Graphite—Gypsum—Iron Oxides—Magnesite—Magnesium Sulphate—Mica—Mineral Water—Natrolunite—Natural Gas—Peat—Petroleum—Phosphate—Pyrites—Quartz—Salt—Sodium Carbonate—Sodium Sulphate—Talc.

Structural Materials and Clay Products.—Cement—Clay and Clay Products—Lime—Sand and Gravel—Sand-Lime Brick—Slate—Stone.

PART TWO—GENERAL STATISTICS.—Text and tables presenting general reviews of the mineral industry in Canada (a) by provinces; (b) by industries.

PART THREE—DIRECTORY.—List showing the names, head office and mine or plant addresses of all concerns operating in the mineral industry in Canada, arranged in alphabetical order by industrial groups.

Coal—

Monthly Report on Coal and Coke Statistics for Canada.

General review for the month with tables showing comparative data for the month and year to date, output by coal-mining districts and by provinces, imports and exports by ports and by kinds of coal. In this report there is also a section showing statistics on production, imports and exports of coke for the month and year to date by provinces.

Annual Report on Coal Statistics for Canada.

Text and tables showing, for Canada, and for each of the coal-producing provinces, historical and current data on output, tonnage lost, disposition of coal from the mines, domestic and foreign shipments, exports and imports by ports, consumption of coal, prices, employment, salaries and wages paid, power equipment, capital investment, etc.

Bulletins—

(a) PRODUCTION—

Metals.—Arsenic—Cobalt—Copper—Gold—Iron Ore—Lead—Nickel—Metals of the Platinum Group—Silver—Zinc—Miscellaneous Non-Ferrous Metals including Aluminium, Antimony, Chromite, Manganese, Mercury, Molybdenum, Tin, Tungsten.

Non-Metals.—Asbestos—Coal—Feldspar—Gypsum—Iron Oxides—Mica—Natural Gas—Petroleum—Quartz—Salt—Talc and Soapstone—Miscellaneous Non-Metallic Minerals including Actinolite, Barytes, Corundum, Fluorspar, Graphite, Grindstones, Magnesite, Magnesium Sulphate, Mineral Waters, Natrolunite, Peat, Phosphate, Pyrites, Sodium Carbonate, Sodium Sulphate, Tripolite.

Structural Materials.—Cement—Clay and Clay Products—Lime—Sand and Gravel—Stone and Slate.

(b) ANNUAL INDUSTRIAL REVIEWS—

The Gold Industry—Copper-Gold-Silver Industry—Nickel-Copper Industry—Silver-Cobalt Industry—Silver-Lead-Zinc Industry.

(c) ANNUAL PROVINCIAL REVIEWS ON THE MINERAL INDUSTRY—

Nova Scotia—New Brunswick—Quebec—Ontario—Manitoba—Saskatchewan—Alberta—British Columbia—Yukon.

R. H. COATS, B.A., F.S.S., (Hon.) F.R.S.C., Dominion Statistician.

S. J. COOK, B.A., A.I.C., F.C.I.C., Chief of the Mining, Metallurgical and Chemical Branch.

COAL STATISTICS FOR CANADA

JANUARY, 1926

Canada's coal output for January was considerably lower than the total recorded for the previous month. The January output was 1,223,648 tons, a decrease of 22 per cent from the production of 1,560,975 tons in December. The loss in tonnage was general throughout the coal-producing provinces and was due principally to lack of orders.

Exports of Canadian coal totalled 65,047 tons in January as against 116,585 tons in December and 138,720 tons, the preceding five-year average for the month of January. Nova Scotia and New Brunswick accounted for exports of 21,748 tons, while the exportations from the western provinces amounted to 43,299 tons.

Anthracite imports into Canada during January consisted of 65,848 tons from Great Britain and 9,582 from the United States. Of this amount 71,312 tons were of egg, nut, grate and stove sizes and 4,118 tons of buckwheat and rice sizes. In December anthracite amounting to 46,309 tons was imported from Great Britain and 13,089 tons from the United States. Bituminous coal to a total of 893,045 tons was brought into Canada during the month. Of this quantity 891,934 tons came from the United States and 1,111 tons from Great Britain. During the month of December receipts of bituminous coal were: from the United States, 1,284,918 tons, and from Great Britain, 2,908 tons. Entries through Ontario ports were as follows: anthracite 3,210 tons; bituminous 744,907 tons; Quebec entries were 45,837 tons anthracite, and 117,305 tons bituminous; Manitoba customs ports accounted for 856 tons anthracite and 17,439 tons bituminous; eastern provinces brought in 20,397 tons anthracite and 9,675 tons bituminous; while the western provinces imported 5,130 tons anthracite and 3,719 tons bituminous.

During January the quantity of coal made available for consumption in Canada (computed from figures on output, imports and exports) was 2,127,076 tons, or 26 per cent lower than the December total of 2,791,614 tons. In relation to the five-year average (1921 to 1925) for January, the tonnage made available during the month under review decreased 21 per cent.

Coinciding with the decline in the output of coal in Canada there was a falling-off in the number of men employed: the total for the month was 28,682, consisting of 22,075 underground and 6,607 surface employees. In the previous month employment was furnished 29,732 men, of whom 22,944 worked underground and 6,788 on surface. The production per man-day was similar to that recorded for December, namely 2.5 tons, while the total production per man was only 42.6 tons in January as compared with 52.3 in December.

EXPLANATORY NOTES ON THE TABLES

The figures in this report for the current month are the latest available at the time of printing; where necessary, figures printed in previous report have been revised; finally revised data for the year are given in the *Annual Report on Coal Statistics*.

Output—

The output of coal from each district or county is shown for the current month, and the average output from each district for the same month in the five years 1921-1925 has been computed as a basis for comparison. The total output during the calendar year to date and the average output during the corresponding period of the five years, 1921-1925, are also tabulated. The percentage relations between the corresponding items are shown.

Imports—

Imports of anthracite and bituminous coal are given separately for each Customs port of entry and for each province, the data showing the quantity imported during the current month, and for comparison the average quantity imported during the same month of the five years 1921-1925. The total importations of each kind of coal during the calendar year to date, and during the corresponding period of the five years 1921-1925, are also given; the percentage relations between these data have been computed. With regard to the table of imports it is to be noted that the data given are not comparable with the import statistics published in the *"Monthly Reports of the Trade of Canada"*. The quantity of coal shown as imported represents the total amount of coal from the United States, Great Britain and other countries arriving at each port during the month. There is thus included some coal which has not been cleared from Customs while the *"Monthly Reports of the Trade of Canada"* show only the quantity of coal actually cleared from Customs for consumption in Canada. It often happens that large quantities of bituminous coal are brought into Canada but are not cleared from Customs until required for use owing to the fact, that there is a duty of 50 cents a ton collected on all bituminous coal imported.

Exports—

Exports of Canadian coal by ports of exit are shown. These data do not show the province of origin but only the port of exit. Coal mined in one province is sometimes shown as exported from another province, a notable instance being that the bulk of coal exported from the province of Alberta is shipped through the Customs ports of Fernie and Cranbrook in British Columbia.

Coal Made Available for Consumption in Canada—

In Table No. 2 the total quantities of coal mined in each month have been added to the total quantities imported. From this aggregate there has been deducted the quantity of Canadian coal exported during the month. The amount remaining is the tonnage of coal made available for consumption during each of the months reported.

Tonnage Lost—

A plan has been worked out by the Bureau which is now being applied in every coal-producing province, and the following outline of the procedure is given, in order that the reader may clearly understand how the data in Table 4 were obtained.

For each month the actual output and the actual number of days' work done by all employees on the colliery pay-rolls are determined and from these two figures the output per man-day is deduced. The number of individual shifts lost by the men whose names are on the colliery pay-roll for the month is recorded, and the total number of shifts so lost is multiplied by the actual tonnage produced per man-day during the month. This lost tonnage plus the actual output of the mine during the month is regarded as the possible output and the percentages given in Table 4 showing the proportions produced and lost, are computed from these figures. The tonnage lost is thus analyzed according to the cause of loss and the percentage figures are included in the table.

Table 1.—Summary of the Principal Coal Statistics for Canada

(Short tons)

	(1) Month of January, 1926	(2) Month of December, 1925	(3) 5-year average for month 1921-25	(4) Calendar year to date 1926	(5) 5-year average for period 1921-25	Per cent of (1) to (2)	Per cent of (1) to (3)	Per cent of (4) to (5)

COKE STATISTICS FOR CANADA.

JANUARY, 1926

Production of coke in Canada during January amounted to 155,700 tons as compared with 152,173 tons in December, and 101,132 tons in January of last year. Coke plants in eastern Canada had an output of 60,510 tons as compared with 62,436 tons in December; Ontario ovens yielded 74,655 tons as against 69,569 tons in the previous month; while the production from western plants remained the same at 20,535 tons.

Imports of coke into Canada dropped from 131,276 tons in December to 114,724 tons during January, which with the production of 155,700 tons made a total supply of 270,424 tons for the month. But exports amounted to 3,237 tons, so the apparent consumption of coke in Canada during January stood at 267,187 tons, or about 4 per cent less than in December when 279,648 tons were made available for use.

Ontario was the principal user, consuming 174,663 tons; Nova Scotia used 40,425 tons; Quebec, 30,709 tons; British Columbia, 15,323 tons; Manitoba, 5,658 tons and New Brunswick, 409 tons.

During the month 21,051 tons of coke were used in the coking plants, 67,269 tons were delivered to associated metallurgical works, and 71,660 tons were sold, making a total disposition of 159,980 tons for the month. Sales of coke in January totalled 71,660 tons as compared with 65,069 tons in December and 53,956 tons in January, 1925.

Bituminous coal used for coke-making in January totalled 239,750 tons as compared with 231,359 tons in December. Imported coal used for this purpose amounted to 150,520 tons as against 139,496 tons in December, while Canadian coal used, declined to 89,230 tons from 91,863 tons in the previous month.

Coke charged to iron blast furnaces in Canada during the month totalled 63,478 tons as compared with 59,972 tons in December.

LIST OF PUBLICATIONS

PREPARED IN THE MINING, METALLURGICAL AND CHEMICAL BRANCH DOMINION BUREAU OF STATISTICS

STATISTICS OF MANUFACTURES—based chiefly on minerals.

General reports on the sections of manufactures covered by the Mining, Metallurgical and Chemical Branch are issued as follows:—

Annual Printed Reports—

Iron and Steel and Their Products: Pig iron and Ferro-Alloys—Steel and Rolled Products — Castings and Forgings — Boilers and Engines — Agricultural Implements — Machinery — Automobiles — Auto Accessories — Bicycles — Railway Rolling Stock — Wire and Wire Goods — Sheet Metal Products — Hardware and Tools — Miscellaneous Iron and Steel Products.

Manufactures of Non-Ferrous Metals: Aluminium Ware—Brass and Copper Products—Lead, Tin and Zinc Products—Manufactures of the Precious Metals—Electrical Apparatus and Supplies—Miscellaneous Non-Ferrous Metal Products.

Manufactures of Non-Metallic Minerals: Aerated Waters—Asbestos and Allied Products—Cement Products and Sand-Lime Brick—Coke and By-Products—Glass (blown, cut, ornamental, etc.)—Illuminating and Fuel Gas—Monumental and Ornamental Stone—Petroleum Products—Miscellaneous Non-metallic Mineral Products, including (a) Artificial Abrasives, (b) Abrasive Products, (c) Artificial Graphite and Electrodes, (d) Fuel Briquettes, (e) Gypsum Products, (f) Mica Products.

Chemicals and Allied Products: Coal Tar and its Products—Acids, Alkalies, Salts and Compressed Gases—Explosives, Ammunition, Fireworks and Matches—Fertilizers—Medicinal and Pharmaceutical Preparations—Paints, Pigments and Varnishes—Soaps, Washing Compounds and Toilet Preparations—Inks, Dyes and Colours—Wood Distillates and Extracts—Miscellaneous Chemical Products, including (a) Adhesives, (b) Baking Powder, (c) Boiler Compounds, (d) Celluloid Products, (e) Flavouring Extracts, (f) Insecticides, (g) Polishes and Dressings, (h) Sweeping Compounds, (i) Chemical Products, n.e.s.

Annual Bulletins.—In addition to the foregoing printed reports, a series of bulletins is issued annually, each of which presents the principal statistics relative to production: (a) in a particular industry, e.g. Automobiles—Petroleum Products, etc., (b) in each of the four main groups of industries. These are published in mimeograph form from time to time during the year as the necessary material becomes available.

Monthly—

Production of Iron and Steel in Canada.

Coke Statistics for Canada.

SPECIAL REPORTS.—

Report on the Consumption of Prepared Non-Metallic Minerals in Canada.

Report on the Consumption of Mine and Mill Materials in Canada.

Annual Summary Report on the Mineral Industry and the Manufacturing Industries Related Thereto.

SEE INSIDE FRONT COVER FOR PUBLICATIONS ON THE MINERAL INDUSTRY
