MONTHLY REPORT

ON

COAL AND COKE STATISTICS FOR CANADA

February, 1926

Published by Authority of the Hon. J. A. Robb, M.P.,
Acting Minister of Trade and Commerce

OTTAWA
P. A. ACLAND
PRINTER TO THE KING'S MOST EXCELLENT MAJESTY
1926

LIST OF PUBLICATIONS

PREPARED IN THE

MINING, METALLURGICAL AND CHEMICAL BRANCH DOMINION BUREAU OF STATISTICS

MINERAL PRODUCTION (Mining and Metallurgy).

General Reports—

Preliminary Reports (semi-annual) on the Mineral Production of Canada.

Annual Report on the Mineral Production of Canada. (In one volume).

PART ONE—PRODUCTION STATISTICS—General Statistical Review of the Mineral Production of Canada.

Metals.—Aluminium—Antimony—Arsenic—Chromite—Cobalt—Copper—Gold—Iron Ore—Iron, Pig—Lead—Mercury—Molybdenum—Nickel—Platinum and Palladium—Silver—Tin—Zinc.

Non-Metals.—Abrasiyes—Actinolite—Asbestos—Barytes—Coal—Coke—Feldspar—Fluorspar—Graphite—Gypsum—Iron Oxides—Magnesite—Magnesium Sulphate—Mica—Mineral Water—Natrolunite—Natural Gas—Peat—Petroleum—Phosphate—Pyrites—Quartz—Salt—Sodium Carbonate—Sodium Sulphate—Talc.

Structural Materials and Clay Products.—Cement—Clay and Clay Products—Lime—Sand and Gravel—Sand-Lime Brick—Slate—Stone.

PART TWO—GENERAL STATISTICS.—Text and tables presenting general reviews of the mineral industry in Canada (a) by provinces; (b) by industries.

PART THREE—DIRECTORY.—List showing the names, head office and mine or plant addresses of all concerns operating in the mineral industry in Canada, arranged in alphabetical order by industrial groups.

Coal—

Monthly Report on Coal and Coke Statistics for Canada.

General review for the month with tables showing comparative data for the month and year to date, output by coal-mining districts and by provinces, imports and exports by ports and by kinds of coal. In this report there is also a section showing statistics on production, imports and exports of coke for the month and year to date by provinces.

Annual Report on Coal Statistics for Canada.

Text and tables showing, for Canada, and for each of the coal-producing provinces, historical and current data on output, tonnage lost, disposition of coal from mines, domestic and foreign shipments, exports and imports by ports, consumption of coal, prices, employment, salaries and wages paid, power equipment, capital investment, etc.

Bulletins—

(a) PRODUCTION—

Metals.—Arsenic—Cobalt—Copper—Gold—Iron Ore—Lead—Nickel—Metals of the Platinum Group—Silver—Zinc—Miscellaneous Non-Ferrous Metals including Aluminium, Antimony, Chromite, Manganese, Mercury, Molybdenum, Tin, Tungsten.

Non-Metals.—Asbestos—Coal—Feldspar—Gypsum—Iron Oxides—Mica—Natural Gas—Petroleum—Quartz—Salt—Talc and Soapstone—Miscellaneous Non-Metallic Minerals including Actinolite, Barytes, Corundum, Fluorspar, Graphite, Grindstones, Magnesite, Magnesium Sulphate, Mineral Waters, Natrolunite, Peat, Phosphate, Pyrites, Sodium Carbonate, Sodium Sulphate, Tripolite.

Structural Materials.—Cement—Clay and Clay Products—Lime—Sand and Gravel—Stone and Slate.

(b) ANNUAL INDUSTRIAL REVIEWS—

The Gold Industry—Copper-Gold-Silver Industry—Nickel-Copper Industry—Silver-Cobalt Industry—Silver-Lead-Zinc Industry.

(c) ANNUAL PROVINCIAL REVIEWS ON THE MINERAL INDUSTRY—

Nova Scotia—New Brunswick—Quebec—Ontario—Manitoba—Saskatchewan—Alberta—British Columbia—Yukon.

SEE BACK COVER FOR PUBLICATIONS ON MANUFACTURES BASED CHIEFLY ON MINERALS

DOMINION BUREAU OF STATISTICS

R. H. COATS, B.A., F.S.S., (Hon.) F.R.S.C., Dominion Statistician.

S. J. COOK, B.A., A.I.C., F.C.I.C., Chief of the Mining, Metallurgical and Chemical Branch.

COAL STATISTICS FOR CANADA

FEBRUARY, 1926

The output of coal from Canadian mines during February was 13 per cent less than the production for the preceding month, and 14 per cent less than the average for February in the past five years. The figures were 1,068,184 tons in February as against 1,225,988 tons in January and an average of 1,305,376 tons for the month during the five preceding years.

New Brunswick was the only coal-producing province of the Dominion which showed a gain in output in February over the preceding month, and Saskatchewan was the only coal-producing province which showed an increase over the average for the month in the five preceding years.

Comparison of February and January figures covering the total importation of coal showed a decrease of 15 per cent. Imports in February amounted to 825,503 tons as compared with 968,475 tons in January and the five-year average for February of 1,169,603 tons. February tonnage was therefore 30 per cent lower than the five-year average for the month. Receipts of coal from Great Britain during the month amounted to 17,840 tons. For the first two months of 1926 the total amount of coal imported into Canada was 1,793,978 tons, or 28 per cent below the preceding five-year average for the period.

Imports of anthracite totalled 29,565 tons in February. This was 45,865 tons below the tonnage imported in January and about 91 per cent below the five-year average for the month. Anthracite imported during the month included 6,014 tons from the United States, 17,840 tons from Great Britain, and 5,711 tons of briquettes from Germany. Total imports included 26,615 tons of egg, grate and stove sizes, and 2,950 tons of buckwheat and rice sizes. Entries through the ports of Ontario accounted for 4,660 tons; Manitoba cleared 1,469 tons; the balance came in through the ports of eastern Canada. The total amount of anthracite imported during the two months ending February, 1926, was 104,995 tons, a decrease of 84 per cent below the five-year average for the period.

All the bituminous coal imported during February came from the United States and amounted to 795,938 tons which was 97,107 tons below the tonnage imported in January and about 6 per cent below the five-year average for the month. During January, 1,111 tons were imported from Great Britain. Entries through the ports of Ontario accounted for 679,581 tons; Quebec, 79,413 tons; Manitoba, Alberta, Saskatchewan and British Columbia, 25,354 tons; and the Maritime provinces cleared 11,590 tons. The total amount of bituminous coal imported during the two months ending February, 1926, was 1,688,983 tons, a decrease of 7 per cent below the five-year average for the period.

Exports of Canadian coal for the month of February were 46 per cent lower than in January. The quantities were: February, 35,517 tons; January, 65,047 tons; there was thus a decrease of 29,530 tons. Exports from the eastern provinces totalled only 4,362 tons; these from the western provinces amounted to 31,155 tons. Comparison of February exports with the preceding five-year average showed a decrease of 65 per cent. Total exports for the first two months of the calendar year amounted to 100,564 tons or 58 per cent less than the five-year average.

Computed from figures on output, imports and exports the quantity of coal made available for consumption was 13 per cent below the figures for the previous month. During February, the total was 1,858,170 tons, as against 2,129,416 tons made available during the month of January; in comparison with the five-year average for the month, the February available tonnage was lower by 22 per cent. The total coal made available for consumption during the twelve months ending February 28, 1926, was 28,462,490 tons as compared with 29,266,824 tons a year ago.

Men employed in the coal mines of Canada during February, numbered 25,653, of whom 19,413 worked underground and 6,240 on surface, as compared with a total of 28,682 in January of whom 22,075 worked underground and 6,607 on surface. Production per man was 41.6 tons in February as against 42.6 tons per man in January. During February, the production per man-day was 2.5 tons, the same as in January. The tonnage lost (Table No. 5) was largely due to "lack of orders."

EXPLANATORY NOTES ON THE TABLES

The figures in this report for the current month are the latest available at the time of printing; where necessary, figures printed in previous report have been revised; finally revised data for the year are given in the *Annual Report on Coal Statistics*.

Output—

The output of coal from each district or county is shown for the current month, and the average output from each district for the same month in the five years 1921-1925 has been computed as a basis for comparison. The total output during the calendar year to date and the average output during the corresponding period of the five years, 1921-1925, are also tabulated. The percentage relations between the corresponding items are shown.

Imports—

Imports of anthracite and bituminous coal are given separately for each Customs port of entry and for each province, the data showing the quantity imported during the current month, and for comparison the average quantity imported during the same month of the five years 1921-1925. The total importations of each kind of coal during the calendar year to date, and during the corresponding period of the five years 1921-1925, are also given; the percentage relations between these data have been computed. With regard to the table of imports it is to be noted that the data given are not comparable with the import statistics published in the "*Monthly Reports of the Trade of Canada*". The quantity of coal shown as imported represents the total amount of coal from the United States, Great Britain and other countries arriving at each port during the month. There is thus included some coal which has not been cleared from Customs while the "*Monthly Reports of the Trade of Canada*" show only the quantity of coal actually cleared from Customs for consumption in Canada. It often happens that large quantities of bituminous coal are brought into Canada but are not cleared from Customs until required for use owing to the fact, that there is a duty of 50 cents a ton collected on all bituminous coal imported.

Exports—

Exports of Canadian coal by ports of exit are shown. These data do not show the province of origin but only the port of exit. Coal mined in one province is sometimes shown as exported from another province, a notable instance being that the bulk of coal exported from the province of Alberta is shipped through the Customs ports of Fernie and Cranbrook in British Columbia.

Coal Made Available for Consumption in Canada—

In Table No. 2 the total quantities of coal mined in each month have been added to the total quantities imported. From this aggregate there has been deducted the quantity of Canadian coal exported during the month. The amount remaining is the tonnage of coal made available for consumption during each of the months reported.

Tonnage Lost—

A plan has been worked out by the Bureau which is now being applied in every coal-producing province, and the following outline of the procedure is given, in order that the reader may clearly understand how the data in Table 4 were obtained.

For each month the actual output and the actual number of days' work done by all employees on the colliery pay-rolls are determined and from these two figures the output per man-day is deduced. The number of individual shifts lost by the men whose names are on the colliery pay-roll for the month is recorded, and the total number of shifts so lost is multiplied by the actual tonnage produced per man-day during the month. This lost tonnage plus the actual output of the mine during the month is regarded as the possible output and the percentages given in Table 4 showing the proportions produced and lost, are computed from these figures. The tonnage lost is thus analyzed according to the cause of loss and the percentage figures are included in the table.

Table 1.—Summary of the Principal Coal Statistics for Canada

(Short tons)

	(1) Month of February, 1926	(2) Month of January, 1926	(3) 5-year average for month 1921-25	(4) Calendar year to date 1926	(5) 5-year average for period 1921-25	Per cent of (1) to (2)	Per cent of (1) to (3)	Per cent of (4) to (5)
OUTPUT.....	1,068,184	1,225,988	1,305,376	2,294,172	2,798,183	87	86	82

COKE STATISTICS FOR CANADA.

FEBRUARY, 1926

Production of by-product and gas-house coke in Canada during February amounted to 166,012 tons, an increase of 6.6 per cent over the total for January and nearly 62 per cent over the output of 102,686 tons in February of last year. Coke plants in eastern Canada produced 54,749 tons as compared with 60,510 tons in January; Ontario ovens yielded 89,520 tons as against 74,655 tons in the previous month, and the production from western plants was slightly higher at 21,743 tons.

Bituminous coal used for coke-making in February totalled 251,585 tons as compared with 239,750 tons in January. Imported coal used for this purpose amounted to 163,196 tons as against 150,520 tons in January, while Canadian coal used totalled 88,389 tons as against 89,230 tons in the previous month. Coke plants in Ontario, Quebec and Manitoba used imported coal only; Nova Scotia used Canadian coal chiefly and British Columbia used about 1 ton of imported coal to every 3 tons of Canadian coal carbonized.

Imports of coke into Canada declined to 73,796 tons from 114,724 tons in January, and exports were slightly higher at 4,449 tons as against 3,237 tons in the previous month. The apparent consumption of coke in Canada amounted to 235,359 tons as against 267,187 tons in January and 164,673 tons in February, 1925.

During the month 17,460 tons of coke were used in the coking plants, 63,141 tons were delivered to associated metallurgical works, and 88,170 tons were sold, making a total disposition of 168,771 tons as compared with 159,980 tons in January. Sales of coke increased to 88,170 tons from 71,660 tons in January.

Consumers in Ontario used 158,115 tons; in Nova Scotia, 36,863 tons; in Quebec, 19,797 tons; in British Columbia, 17,094 tons; in Manitoba, 3,127 tons and in New Brunswick, 363 tons.

Coke charged to iron blast furnaces in Canada during the month totalled 56,987 tons as compared with 63,478 tons in January.

LIST OF PUBLICATIONS

PREPARED IN THE

MINING, METALLURGICAL AND CHEMICAL BRANCH DOMINION BUREAU OF STATISTICS

STATISTICS OF MANUFACTURES—based chiefly on minerals.

General reports on the sections of manufactures covered by the Mining, Metallurgical and Chemical Branch are issued as follows:—

Annual Printed Reports—

Iron and Steel and Their Products: Pig iron and Ferro-Alloys—Steel and Rolled Products — Castings and Forgings — Boilers and Engines — Agricultural Implements — Machinery — Automobiles — Auto Accessories — Bicycles — Railway Rolling Stock — Wire and Wire Goods — Sheet Metal Products — Hardware and Tools — Miscellaneous Iron and Steel Products.

Manufactures of Non-Ferrous Metals: Aluminium Ware—Brass and Copper Products—Lead, Tin and Zinc Products—Manufactures of the Precious Metals—Electrical Apparatus and Supplies—Miscellaneous Non-Ferrous Metal Products.

Manufactures of Non-Metallic Minerals: Aerated Waters—Asbestos and Allied Products—Cement Products and Sand-Lime Brick—Coke and By-Products—Glass (blown, cut, ornamental, etc.)—Illuminating and Fuel Gas—Monumental and Ornamental Stone—Petroleum Products—Miscellaneous Non-metallic Mineral Products, including (a) Artificial Abrasives, (b) Abrasive Products, (c) Artificial Graphite and Electrodes, (d) Fuel Briquettes, (e) Gypsum Products, (f) Mica Products.

Chemicals and Allied Products: Coal Tar and its Products—Acids, Alkalies, Salts and Compressed Gases—Explosives, Ammunition, Fireworks and Matches—Fertilizers—Medicinal and Pharmaceutical Preparations—Paints, Pigments and Varnishes—Soaps, Washing Compounds and Toilet Preparations—Inks, Dyes and Colours—Wood Distillates and Extracts—Miscellaneous Chemical Products, including (a) Adhesives, (b) Baking Powder, (c) Boiler Compounds, (d) Celluloid Products, (e) Flavouring Extracts, (f) Insecticides, (g) Polishes and Dressings, (h) Sweeping Compounds, (i) Chemical Products, n.e.s.

Annual Bulletins.—In addition to the foregoing printed reports, a series of bulletins is issued annually, each of which presents the principal statistics relative to production: (a) in a particular industry, e.g. Automobiles—Petroleum Products, etc., (b) in each of the four main groups of industries. These are published in mimeograph form from time to time during the year as the necessary material becomes available.

Monthly—

Production of Iron and Steel in Canada.

Coke Statistics for Canada.

SPECIAL REPORTS.—

Report on the Consumption of Prepared Non-Metallic Minerals in Canada.

Report on the Consumption of Mine and Mill Materials in Canada.

Annual Summary Report on the Mineral Industry and the Manufacturing Industries Related Thereto.

SEE INSIDE FRONT COVER FOR PUBLICATIONS ON THE MINERAL INDUSTRY
