ON

COAL AND COKE STATISTICS FOR CANADA

March, 1926

Published by Authority of the Hon. J. A. Robb, M.P., Acting Minister of Trade and Commerce

OTTAWA
F. A. ACLAND
PRINTER TO THE KING'S MOST EXCELLENT MAJESTY
1926

LIST OF PUBLICATIONS

PREPARED IN THE

MINING, METALLURGICAL AND CHEMICAL BRANCH DOMINION BUREAU OF STATISTICS

MINERAL PRODUCTION (Mining and Metallurgy).

General Reports-

Preliminary Reports (semi-annual) on the Mineral Production of Canada.

Annual Report on the Mineral Production of Canada. (In one volume).

PART ONE - PRODUCTION STATISTICS - General Statistical Review of the Mineral Production of Canada.

Metals.—Aluminium—Antimony—Arsenic—Chromite—Cobalt — Copper—Gold—Iro Ore—Iron, Pig—Lead—Manganese—Mercury—Molybdenum—Nickel—Platinan and Palladium—Silver—Tim—Zinc.

Non-Metals.—Abrasives—Actinolite—Asbestos — Barytes — Coal — Coke — Feidspar — Fluorspar — Graphite — Gypsum — Iron Oxides — Magnesite — Magnesium Sulphate — Mica — Mineral Water — Natro-Alunite — Natural Gas — Peat — Petroleum — Phosphate — Pyrites — Quartz — Salt — Sodium Carbonate — Sodium Sulphate — Talc and Soapstone.

Structural Materials and Clay Products.—Cement — Clay and Clay Products — Lime —

Sand and Gravel - Sand-Lime Brick - Slate - Stone.

PART TWO-GENERAL STATISTICS.—Text and tables presenting general reviews of the mineral industry in Canada (a) by provinces; (b) by industries.

PART THREE-DIRECTORY .- List showing the names, head office and mine or plant addresses of all concerns operating in the mineral industry in Canada, arranged in alphabetical order by industrial groups.

Coal-

Monthly Report on Coal and Coke Statistics for Canada.

General review for the month with tables showing comparative data for the month and year to date, output by coal-mining districts and by provinces, imports and exports by ports and by kinds of coal. In this report there is also a section showing statistics on production, imports and exports of coke for the month and year to date by provinces.

Annual Report on Coal Statistics for Canada.

Text and tables showing, for Canada, and for each of the coal-producing provinces historical and current data on output, tonnage lost, disposition of coal from the mines, domestic and foreign shipments, exports and imports by ports, consumered of coal, prices, employment, salaries and wages paid, power equipment, capital investment, etc.

Bulletins-

Metals.—Arsenic — Cobalt — Copper — Gold — Iron Ore — Lead — Nickel — Metals of the Platinum Group — Silver — Zinc — Miscellaneous Non-Ferrous Metals including Aluminium, Antimony, Chromite, Manganese, Mercury, Molybdenum, Tin, Tungsten.

Non-Metals.—Asbestos — Coal — Feldspar — Gypsum — Iron Oxides — Mica — Natural Gas — Petroleum — Quartz — Salt — Talc and Soapstone — Miscellaneous Non-Metallic Minerals including Actinolite, Barytes, Corundum, Fluorspar, Graphite, Grindstones, Magnesite, Magnesium Sulphate, Mineral Waters, Natroalumite, Peat, Phosphate, Pyrites, Sodium Carbonate, Sodium Sulphate, Tripolite.

Structural Materials.—Cement—Clay and Clay Products—Lime—Sand and Gravel— Stone and Slate.

(b) ANNUAL INDUSTRIAL REVIEWS-The Gold Industry—Copper-Gold-Silver Industry—Nickel-Copper Industry—Silver-Cobalt Industry—Silver-Lead-Zine Industry.

(c) Annual Provincial Reviews on the Mineral Industry-Nova Scotia-New Brunswick-Quebec-Ontario-Manitoba-Saskatchewan-Alberta British Columbia-Yukon.

DOMINION BUREAU OF STATISTICS

R. H. COATS, B.A., F.S.S., (Hon.) F.R.S.C., Dominion Statistician.

S. J. COOK, B.A., A.I.C., F.C.I.C., Chief of the Mining, Metallurgical and Chemical Branch.

COAL STATISTICS FOR CANADA

MARCH, 1926

The output of coal from Canadian mines during March was 1 per cent less than the production for the preceding month, and 18 per cent less than the average for March in the past five years. The figures were 1,065,561 tons in March as against 1,072,452 tons in February and and average of 1,291,108 tons for the month during the five preceding years.

Nova Scotia, New Brunswick and British Columbia showed a gain in output over the preceding month, but Saskatchewan was the only coal-producing province which showed an increase over the average for the month in the five preceding years.

Comparison of March and February figures covering the total importation of coal showed an increase of 63 per cent. Imports in March amounted to 1,345,657 tons as compared with \$15,503 tons in February and the five-year average for March of 1,446,909 tons. March tonnage was therefore 7 per cent lower than the five-year average for the month. Receipts of coal from Europe consisted of 48,263 tons from Great Britain and 17,689 tons of briquettes from Germany; the remainder, amounting to 1,279,705 tons came from the United States. For the first three months of 1926 the total amount of coal imported into Canada was 3,139,635 tons, or 21 per cent below the preceding five-year average for the period.

Imports of anthracite totalled 377,956 tons in March. This was 348,391 tons above the tonnage imported in February and about 4 per cent below the five-year average for the month. Anthracite imported during the month included 312,004 tons from the United States, 48,263 tons from Great Britain, and 17,689 tons of briquettes from Germany. Total imports included 348,521 tons of egg, grate and stove sizes, and 29,435 tons of buckwheat and rice sizes. Entries through the ports of Ontario accounted for 219,253 tons; British Columbia cleared 56 tons, the balance came in through the ports of eastern Canada. The total amount of anthracite imported during the three months ending March, 1926, was 482,951 tons, a decrease of 54 per cent below the five-year average for the period.

All the bituminous coal imported during March came from the United States and amounted to 966,461 tons which was 171,655 tons above the tonnage imported in February and about 8 per cent below the five-year average for the month. In addition, 1,240 tons of lignite were imported. Entries through the ports of Ontario accounted for 804,476 tons; Quebec, 122,538 tons; Manitoba, Alberta, Saskatchewan and British Columbia, 25,535 tons which included the 1,240 tons of lignite imported into British Columbia; and the Maritime provinces cleared 15,151 tons. Bituminous coal imported during the three months ending March, 1926, totalled 2,652,723 tons, a decrease of 8 per cent below the five-year average for the period. Lignite imported during the same period amounted to 3,961 tons.

Exports of Canadian coal for the month of March were 76 per cent above the figures for the preceding month. The quantities were: March 62,695 tons; February 35,517 tons; there was thus an increase of 27,178 tons. Exports from the eastern provinces amounted to 14,307 tons; those from the western provinces totalled 48,388 tons. Comparison of March exports with the preceding five-year average showed a decrease of 61 per cent. Total exports for the first three months of the calendar year amounted to 163,259 tons or 59 per cent less than the five-year average.

Computed from figures on output, imports and exports, the quantity of coal made available for consumption was 26 per cent above the figures for the previous month. During March, the total was 2,348,523 tons, as against 1,862,438 tons made available during the month of February; in comparison with the five-year average for the month, the March available tonnage was lower by 9 per cent. The total coal made available for consumption during the twelve months ending March, 1926, was 29,072,379 tons as compared with 27,918,334 tons a year ago.

Men employed in the coal mines of Canada during March, numbered 24,065, of whom 18,207 worked underground and 5,858 on surface, as compared with a total of 25,653 in February of whom 19,413 worked underground and 6,240 on surface. Production per man was 44·3 tons in March as against 41·6 tons per man in February. During March, the production per manday was 2·4 tons, as against 2·5 tons in February. The tonnage lost (Table No. 4) was largely due to "lack of orders."

EXPLANATORY NOTES ON THE TABLES

The figures in this report for the current month are the latest available at the time of printing; where necessary, figures printed in previous report have been revised; finally revised data for the year are given in the Annual Report on Coal Statistics.

Output-

The output of coal from each district or county is shown for the current month, and the average output from each district for the same month in the five years 1921-1925 has been computed as a basis for comparison. The total output during the calendar year to date and the average output during the corresponding period of the five years, 1921-1925, are also tabulated. The percentage relations between the corresponding items are shown.

Imports-

Imports of anthracite and bituminous coal are given separately for each Customs port of entry and for each province, the data showing the quantity imported during the current month, and for comparison the average quantity imported during the same month of the five years 1921-1925. The total importations of each kind of coal during the calendar year to date, and during the corresponding period of the five tions of each kind of coal during the calendar year to date, and during the corresponding period of the five years 1921-1925, are also given; the percentage relations between these data have been computed. With regard to the table of imports it is to be noted that the data given are not comparable with the imports statistics published in the "Monthly Reports of the Trade of Canada". The quantity of coal shown as imported represents the total amount of coal from the United States, Great Britain and other countries arriving at each port during the month. There is thus included some coal which has not been cleared from Customs while the "Monthly Reports of the Trade of Canada" show only the quantity of coal actually cleared from Customs for consumption in Canada. It often happens that large quantities of historical states and the state of the state of the coales have the coales of the canada actually cleared from Customs for consumption in Canada. bituminous coal are brought into Canada but are not cleared from Customs until required for use owing to the fact, that there is a duty of 50 cents a ton collected on all bituminous coal imported.

Exports-

Exports of Canadian coal by ports of exit are shown. These data do not show the province of origin but only the port of exit. Coal mined in one province is sometimes shown as exported from another province, a notable instance being that the bulk of coal exported from the province of Alberta is shipped through the Customs ports of Fernie and Cranbrook in British Columbia.

Coal Made Available for Consumption in Canada—

In Table No. 2 the total quantities of coal mined in each month have been added to the total quantities imported. From this aggregate there has been deducted the quantity of Canadian coal exported during the month. The amount remaining is the tonnage of coal made available for consumption during each of the months reported.

Tonnage Lost-

A plan has been worked out by the Bureau which is now being applied in every coal-producing province, and the following outline of the procedure is given, in order that the reader may clearly understand

how the data in Table 4 were obtained.

For each month the actual output and the actual number of days' work done by all employees on the colliery pay-rolls are determined and from these two figures the output per man-day is deduced. The number of individual shifts lost by the men whose names are on the colliery pay-roll for the month is recorded, and the total number of shifts so lost is multiplied by the actual tonnage produced per man-day during the month. This lost tonnage plus the actual output of the mine during the month is regarded as the possible output and the percentages given in Table 4 showing the proportions produced and lost. are computed from these figures. The tonnage lost is thus analyzed according to the cause of loss and the percentage figures are included in the table.

TOTAL FOR CANADA	62,695	159,760	39	163,259	398,767	. 41

COKE STATISTICS FOR CANADA.

MARCH, 1926

Production of by-product and gas-house coke in Canada during March amounted to 152,480 tons, a decrease of 8 per cent from the total for February, but an increase of 13,697 tons or 10 per cent over the output in March of last year. Coke plants in Ontario produced only 75,730 tons as compared with 89,520 tons in February; eastern Canada plants yielded 53,386 tons as against 54,749 tons in the previous month, and the output from western ovens was a little higher at 23,364 tons.

For the first three months of the year, the cumulative production was 474,192 tons as comred with 342,601 tons for the first quarter of last year. Cumulative figures showed a general vance in output in all producing areas.

Imports of coke into Canada during March rose to 102,485 tons from 73,796 tons in February and exports were also higher at 5,332 tons as against 4,449 tons in the preceding month. The apparent consumption of coke in Canada during the month of March was 249,633 tons as compared with 235,359 tons in February and 200,364 tons in March of last year. For the first three months of the year, the apparent consumption in Canada was 752,179 tons as compared with 532,317 tons in the same period of last year.

Bituminous coal used for coke-making totalled 237,565 tons in March as against 251,585 tons in February. Imported coal used for this purpose amounted to 151,005 tons as against 163,196 tons in February, while Canadian coal used totalled 86,560 tons as against 88,389 tons in the previous month. The maritime provinces used Canadian coal only; Quebec, Ontario and Manitoba used United States coal only, and British Columbia used about 1 ton of United States coal to every 9 tons of coal from Canadian mines.

During March 18,919 tons of coke were used in the coking plants, 67,967 tons were delivered to associated metallurgical works, and 65,619 tons were sold making a total disposition of 152,505 tons as compared with 168,771 tons in February and 142,879 tons in March of last year.

LIST OF PUBLICATIONS

PREPARED IN THE

MINING, METALLURGICAL AND CHEMICAL BRANCH DOMINION BUREAU OF STATISTICS

STATISTICS OF MANUFACTURES—based chiefly on minerals.

General reports on the sections of manufactures covered by the Mining, Metallurgical and Chemical Branch are issued as follows:—

Annual Printed Reports-

Iron and Steel and Their Products: Pig iron and Ferro-Alloys—Steel and Rolled Products — Castings and Forgings — Boilers and Engines — Agricultural Implements — Machinery — Automobiles — Auto Accessories — Bicycles — Railway Rolling Stock — Wire and Wire Goods — Sheet Metal Products — Hardware and Tools — Miscellaneous Iron and Steel Products.

Manufactures of Non-Ferrous Metals: Aluminium Ware—Brass and Copper Products—Lead, Tin and Zinc Products—Manufactures of the Precious Metals—Electrical Apparatus and Supplies—Miscellaneous Non-Ferrous Metal Products.

Manufactures of Non-Metallic Minerals: Aerated Waters—Asbestos and Allied Products—Cement Products and Sand-Lime Brick—Coke and By-Products—Glass (blown, cut, ornamental, etc.)—Illuminating and Fuel Gas—Monumental and Ornamental Stone—Petroleum Products—Miscellaneous Non-metallic Mineral Products, including (a) Artificial Abrasives, (b) Abrasive Products, (c) Artificial Graphite and Electrodes, (d) Fuel Briquettes, (e) Gypsum Products, (f) Mica Products.

Chemicals and Allied Products: Coal Tar and its Products—Acids, Alkalies, Salts and Compressed Gases—Explosives, Ammunition, Fireworks and Matches—Fertilizers—Medicinal and Pharmaceutical Preparations—Paints, Pigments and Varnishes—Soaps, Washing Compounds and Toilet Preparations—Inks, Dyes and Colours—Wood Distillates and Extracts—Miscellaneous Chemical Products, including (a) Adhesives, (b) Baking Powder, (c) Boiler Compounds, (d) Celluloid Products, (e) Flavouring Extracts, (f) Insecticides, (g) Polishes and Dressings, (a) Sweeping Compounds, (i) Chemical Products, n.e.s.

Annual Bulletins.—In addition to the foregoing printed reports, a series of bulletins is issued annually, each of which presents the principal statistics relative to production: (a) in a particular industry, e.g. Automobiles—Petroleum Products, etc., (b) in each of the four main groups of industries. These are published in mimeograph form from time to time during the year as the necessary material becomes available.

Monthly-

Production of Iron and Steel in Canada.

Coke Statistics for Canada.

Automobile Statistics for Canada.

SPECIAL REPORTS .-

Report on the Consumption of Prepared Non-Metallic Minerals in Canada.

Report on the Consumption of Mine and Mill Materials in Canada.

Annual Summary Report on the Mineral Industry and the Manufacturing Industries
Related Thereto.
