Vol. 11, No. 12

REFINED PETROLEUM PRODUCTS

December, 1956

Output of refined petroleum products in Canada during December, 1956 totalled 21,024,819 barrels compared with 18,530,464 barrels in December, 1955. The total for the month under review included 7,660,704 barrels of motor gasoline, 36,049 barrels of aviation gasoline, 4,683,824 barrels of heavy fuel oil (Nos. 4, 5 and 6), 1,766,848 barrels of diesel fuel, 3,768,034 barrels of light fuel oil, 1,150,737 barrels of kerosene and stove oil (No. 1 fuel oil), 66,387 barrels of tractor fuel, 292,763 barrels of aviation turbine fuel, 1,599,473 barrels of naphtha specialties, and other refinery products such as lubricating oils, asphalt, coke, liquefied petroleum gases, etc.

Refineries in Canada used 20,874,648 barrels of crude oil during December, 1956, compared with 18,227,159 barrels in December, 1955. Receipts of crude oil during the current month totalled 19,887,880 barrels, including 8,695,363 barrels of imported oil and 11,192,517 barrels from Canadian sources of supply. Inventories of crude at the end of the month amounted to 21,494,134 barrels compared with 20,237,417 barrels on the corresponding date of last year. These figures include stocks held at the field, in pipeline systems and in refineries.

Net sales of liquid petroleum fuels in Canada, as computed from production, imports, exports, changes in inventories, etc., were as follows in December, 1956, comparable figures for corresponding month of 1955 in brackets, all figures being in barrels of 35 Imperial gallons: Naphtha specialties, 88,234 (88,853); aviation gasoline 243,809 (222,365); motor gasoline, 6,154,102 (5,510,082); tractor fuel, 281 (792); aviation turbine fuel, 192,527 (170,089); kerosene and stove oil (No. 1 fuel oil), 2,520,669 (2,416,831); diesel fuel, 1,621,921 (1,295,179); light fuel oil (Nos. 2 and 3), 7,400,110 (7,027,223); and heavy fuel oil (Nos. 4, 5 and 6), 4,969,739 (4,824,271).

- NOTE: 1. It is the practice of the external Trade Section to close off their records for a particular month with entries received at Ottawa on the last working day; accordingly, there may be some carry-over into the next month. That is to say, imports during the last few days of a month at customs' ports such as Halifax, Vancouver, Montreal, etc., do not reach Ottawa in time for inclusion in the month's figures but are carried over into the totals for the following month. Figures shown in Table 3 have been adjusted by examining the individual customs' invoices and by pulling back any such carry-over; Table 3, therefore, shows totals for the full month. For this reason the figures differ slightly from the figures shown in the above table.
2. The above procedure applied to the tabulation up to and including April, 1956; since then, however, due to the lateness of the availability of the import data, this procedure has been discontinued and the import figures shown in Table 3 are unadjusted totals based on Table 4.
3. The External Trade Section makes no distinction in some cases between imports of finished motor gasoline, lube oils and greases and certain kinds of blending stocks. This has resulted in some duplication in the "Net Sales" figures for motor gasoline, lube oils and greases as the amount of blending stock in some cases has been also reported by companies as imports under "Blending stocks used". In order to allow for this duplication, it has been necessary to reduce imports shown in Table 3 for motor gasoline, lube oils and greases.
4. The Ontario blending stock figures for lube oil and greases shown for the current month include adjustments for the full year as well as actual reported December figures.
