Price 30 cents

Vol. 17—No. 1

Section 10

10.1

The first part of the report is devoted to a description of the work done during the period covered by the report. It is divided into two main parts, the first of which deals with the work done in the laboratory and the second with the work done in the field.

The second part of the report is devoted to a description of the results obtained during the period covered by the report. It is divided into two main parts, the first of which deals with the results obtained in the laboratory and the second with the results obtained in the field.

The third part of the report is devoted to a description of the conclusions drawn from the work done during the period covered by the report. It is divided into two main parts, the first of which deals with the conclusions drawn from the work done in the laboratory and the second with the conclusions drawn from the work done in the field.

The fourth part of the report is devoted to a description of the work done during the period covered by the report. It is divided into two main parts, the first of which deals with the work done in the laboratory and the second with the work done in the field.

The fifth part of the report is devoted to a description of the results obtained during the period covered by the report. It is divided into two main parts, the first of which deals with the results obtained in the laboratory and the second with the results obtained in the field.

The sixth part of the report is devoted to a description of the conclusions drawn from the work done during the period covered by the report. It is divided into two main parts, the first of which deals with the conclusions drawn from the work done in the laboratory and the second with the conclusions drawn from the work done in the field.

The seventh part of the report is devoted to a description of the work done during the period covered by the report. It is divided into two main parts, the first of which deals with the work done in the laboratory and the second with the work done in the field.

The eighth part of the report is devoted to a description of the results obtained during the period covered by the report. It is divided into two main parts, the first of which deals with the results obtained in the laboratory and the second with the results obtained in the field.

The ninth part of the report is devoted to a description of the conclusions drawn from the work done during the period covered by the report. It is divided into two main parts, the first of which deals with the conclusions drawn from the work done in the laboratory and the second with the conclusions drawn from the work done in the field.

The tenth part of the report is devoted to a description of the work done during the period covered by the report. It is divided into two main parts, the first of which deals with the work done in the laboratory and the second with the work done in the field.

The eleventh part of the report is devoted to a description of the results obtained during the period covered by the report. It is divided into two main parts, the first of which deals with the results obtained in the laboratory and the second with the results obtained in the field.

## REFINED PETROLEUM PRODUCTS

JANUARY, 1962

Three major changes in concept affecting the data presented in this report are being introduced with this issue. The first involves the method of accounting for imports; the second concerns the treatment of Natural Gas Processing Plants and their products; the third affects the method of reporting Inter-provincial transfers. These three changes are reviewed below.

### Imports

Prior to January 1962, 'Imports' represented imports for the current month as reported by respondent refiners and distributors (see Refiners and Distributors in Directory at back of this report) plus an adjustment calculated to allow for the imports of products accounted for by non-reporting firms.

Commencing with the January 1962 issue, the procedure for handling 'Imports' is revised. Under this revised procedure the volume of imports not accounted for by refiners and distributors is obtained by a canvass of a small number of importers not previously surveyed (see list of Importers in Directory at back of this report). By this method it is estimated that 90 - 95 (plus) per cent of the total imports unreported by refiners and distributors are accounted for.

### Natural Gas Processing Plants

The statistical procedures leading to the development of a net sales figure for Liquefied Petroleum Gases and Petrochemical Feed Stock shown in Table 3 in effect prior to January 1962 were designed to accommodate two classes of product as follows:

- (a) LPG's and Petrochemical Feed Stock with result naturally as products of crude oil in the refinery runs.

The net sales component of this class of product was introduced into the tabulations shown in Table 3 through the line "Refinery production - from crude". Firms reporting this class of product comprise, of course, oil companies operating refineries designed to recover these products and are included in the list of firms classed as Refiners and Distributors carried in the Directory at the back of this report.

- (b) LGP's and Petrochemical Feed Stock which are recovered in the operation of natural gas processing plants.

The introduction of this component into the net sales figures for these products shown in Table 3 has presented a major problem.

- (1) Prior to January 1962, supplementary details relating to these products produced in the natural gas processing plants operated by oil companies classed as refiners were introduced into Table 2 and Table 3 as part of the regular reporting procedure by the reporting companies themselves and, therefore, were automatically reflected in the net sales figures shown in Table 3.
- (2) The final component of the net sales figure for LPG's and Petrochemical Feed Stock, representing volumes of these products produced in the natural gas processing plants by companies other than those classed as refiners, was introduced by the Dominion Bureau of Statistics through a special procedure based on data supplied in reports filed by natural gas processing plants other than those operated by firms classed as refiners.

Commencing with January 1962, data relating to LPG's and Petrochemical Feed Stock presented in Table 2 and Table 3 reflect only those volumes referred to in (a) and (b) 1 above, that is the products of refinery runs plus LPG's and Petrochemical Feed Stock accounted for by those oil companies classed as refiners who operate natural gas processing plants. Residual volumes of these products referred to in (b) 2 above are being reported in Table 5. If desired, figures shown in Table 3 and Table 5 for LPG's and Petrochemical Feed Stock may be added together in order to arrive at an approximately comparable total to that shown for these products prior to January 1962. Unfortunately, only figures on an overall total basis are available at this time; there being no breakdown of LPG's and Petrochemical Feed Stock in Table 5.

### Net Transfers - Inter-provincial

With the increased interest in gross flow of product rather than net total, a change is being instituted in the report (and reporting requirements) whereby product movement is to be reported on a gross basis. The flow is to be accommodated by the use of two categories -

Transfers In  
Transfers Out

instead of Net Transfers.

TABLE 1. Crude Oil Received by Canadian Refineries, January, 1962 with Comparative Totals for January, 1961

|                                | Received at refineries located in |                  |                  |                  |                  |                                   |                            | Canada            |                   |
