CONSUMPTION OF PETROLEUM FUELS, 1952

Deliveries of heavy and medium fuel oils (Nos. 4, 5 and 6) to Canadian users totalled 1,418 million gallons in 1952, according to reports received from refiners and distributors. About 34 per cent of this total was used in industrial plants as fuel or as material, 16 per cent was used under oil refinery boilers, 20 per cent by railways, 17 per cent for ships' bunkers, 12 per cent for heating residences and commercial buildings and for lighting and cooking, and 1 per cent by electric light plants.

Consumption or deliveries of furnace oils and other light fuel oils amounted to 837 million gallons of which 86 per cent was for heating homes and commercial buildings, 12 per cent for industrial purposes and just 2 per cent for other uses.

Deliveries of diesel fuel totalled 321 million gallons of which 32 per cent was used by tractors and other motor vehicles, 16 per cent by ships, 16 per cent by industrial concerns, 23 per cent by railways, 5 per cent by electric light plants, 3 per cent for heating homes, etc., and 5 per cent for other purposes.

Deliveries of stove oil, kerosene and illuminating oil, and tractor fuel, amounted to 350 million gallons of which 88 per cent was for heating, lighting and cooking, 6 per cent for use in tractors, 2 per cent for industrial purposes and 4 per cent for other uses.

Imports of petroleum fuels in 1951, by firms included in this survey, included 252 million gallons of heavy fuel oil, 258 million gallons of furnace oils and other light fuel oils, 69 million gallons of diesel fuel, 96 million gallons of stove oil and kerosene, and 231,717 tons of petroleum coke.

Gasoline consumption has not been included in this survey but, from other studies, it appears that the total usage in Canada in 1952 totalled 2,343 million gallons of motor gasoline and 87 million gallons of aviation gasoline.

Data given in this report have been compiled from reports submitted by refiners, dealers and large consumers of petroleum fuels.

Total deliveries of fuel oils, furnace oils, stove oil, kerosene, etc., for heating residences and buildings (other than industrial plants), and for cooking and lighting, were as follows during the past eighteen years.

Year	Millions of gallons	Year	Millions of gallons	
1935	132.2	1944	125.3
