CANADIAN PACIFIC RAILWAY COMPANY

1923 - 1956

REVENUES, EXPENSES, ETC.

This report presents a thirty-four year statistical history of the Canadian Pacific Railway Company and its leased railway lines for the years 1923-1956. These data are presented on a basis comparable throughout with the consolidated reports made since 1932. Prior to that date a consolidated report could not readily be compiled from the published data without duplicating certain facts, because individual reports were submitted for several railways which were operated separately. The dates from which each of these leased lines was included in the Canadian Pacific Railway Company's reports are shown in a footnote to Table 2. New leases were concluded during the period covering the lines of the Lacombe and North Western and Algoma Eastern Railway Companies and the operating results thereof are included from March 1, 1928, and July 1, 1931, respectively.

Table 1 shows the capital of the Canadian Pacific Railway Company outstanding on December 31st of each year, 1922 to 1956. In order to arrive at the aggregate capital invested in the System it is necessary to add to the amounts in Table 1 the

capital of leased railways on which the Canadian Pacific pays rental to others and also the Federal, Provincial and Municipal subsidies in aid of construction.

The Canadian Pacific operated a total road mileage of 17,145.8 at December 31, 1956. Of this, over 6,115.4 miles or 35.7 p.c. were operated under lease or contract. The latter mileage may be classified into four main groups, A to D:

Group A—In this group are the leased railways whose interest bearing securities are owned by the Canadian Pacific and whose capitalization is therefore indirectly embraced in Table 1.

Group B—For railways presented in the table below the rental paid for leased railway properties represents an amount equal to interest on securities or dividends on capital stock of the lessor companies. The principal amount of such securities and capital stock outstanding with the public is shown in addition to particulars of mileage and rental.

1. Mileage includes New Brunswick and Canada Railroad and Houlton Branch.

Group C — In the following cases the rental paid for leased railway properties is a fixed rental.

1. See group B. Rental is a fixed rent plus interest on securities.
 2. 5.1 miles of industrial track.

Group D — In the following cases the rental paid is based on gross or net earnings.

C	50.3	71,716
D	160.0	209,596
Total	2,899.1	1,835,593

In computing a total capitalization of the system it would be quite appropriate to add to the total shown in Table 1 the outstanding capital of group B and an estimate of the capital of groups C and D based on the annual rental; the fluctuations in group D, due to variations in earnings, would be a small percentage of the total.

Subsidies—The Canadian Pacific Railway and other companies now comprising the system were granted subsidies from the federal government, provinces and municipalities in the form of cash and expenditures on construction. These are summarized in the following table. Amounts shown under the caption "Canadian Pacific Railway Company" are those taken to account by the Company, while amounts under the heading "Other Companies" represent aid received by others than the Canadian Pacific Railway.

No value has been computed for land grants, which are listed in acres.

Minneapolis, St. Paul & Sault Ste. Marie Railway Company ¹	5½	\$ 1,224,382

1. Predecessor of Minneapolis, St. Paul and Sault Ste. Marie Railroad Company. This issue payable in United States currency.

The Minneapolis, St. Paul and Sault Ste. Marie Railway Company (Soo Line), was reorganized during 1944. Under the authority of the plan of reorganization approved by the Interstate Commerce Commission and the Court, the reorganization managers created a new company, the Minneapolis, St. Paul and Sault Ste. Marie Railroad Company to take over the property of the Minneapolis, St. Paul and Sault Ste. Marie Railway Company as from September 1, 1944.

In accordance with the plan, the Canadian Pacific received in bonds and stock of the new company, at the values ascribed to them by the Interstate Commerce Commission in the distribution of the new capitalization, a total of \$18,975,296; in stocks of affiliates of the old company, \$1,750,000; in bonds of the Wisconsin Central Railway Company, \$5,732,291; and in cash, \$1,564,494. Investments in the old company of \$18,409,642 and advances of \$24,618,041 were surrendered or written off resulting in a net reduction in book valuation of \$15,005,602. This was charged against the Investment Reserve built up in prior years to provide for this contingency. (See note 6).

Reorganization of the Duluth, South Shore and Atlantic Railway Company and Mineral Range Railroad Company was effected as from November 1, 1949. The new company, named Duluth, South Shore and Atlantic Railroad Company, was formed, under the plan of reorganization approved by the Interstate Commerce Commission and the Court, under the laws of the State of Minnesota.

The initial capitalization of the new company consisted, in accordance with the plan, of \$5 million First Mortgage 4% Income bonds and \$10.5 million Common Stock, represented by 210,000 shares of a

stated value of \$50 per share. The Canadian Pacific Railway Company received \$4,141,200 of the bonds, all of the stock, and \$1,161,102 in cash. The new stock and bonds were recorded in the accounts of the company at \$13,572,136, that being the remaining book value of investments in, and advances to, the old companies after credit was given for the amount of the above mentioned cash payment.

The Wisconsin Central Railway Company was reorganized in 1954 and a new company named The Wisconsin Central Railroad Company was formed. Allotted to the Canadian Pacific Railway Company were \$1,575,000 First Mortgage Bonds, \$10,345,000 General Mortgage Income Bonds, 84,841 shares of the new common stock and \$777,000 in cash. The Interstate Commerce Commission granted the Canadian Pacific Railway Company authority to assume control of the reorganized company on May 27, 1954.

Table 2 shows the operating results of the system during the thirty-four year period, 1923 to 1956 adjusted, as explained in footnote (2), to be comparable throughout with data prepared for and presented in the "Duff Report" (1931-2) which put the Canadian Pacific and Canadian National accounts on bases as nearly similar as possible. Consequently, operating revenues and expenses will not agree with these accounts as shown in the annual reports of the company.

Table 3 shows year by year the receipts from issue of securities and net income from operation.

Table 4 shows the disposal of the money received, as covered by Table 3. The difference between these tables and Table 3 of the Canadian

National Report is that in the Canadian Pacific Report "Net change in working capital—other balance sheet accounts" is included in Table 4 instead of in Table 3. It is unimportant whether they are treated as receipts or expenditures as only net changes are shown.

Table 5 shows the principal operating statistics of the system. Consolidated payroll data for 1923, 1924 and 1925 were not available, but all other statistics are on a comparable basis throughout and also are generally comparable with corresponding

data for the Canadian National Railways. Employees include railway employees and also express, news, and commercial telegraph employees (but exclude those of hotel and other outside operations) and total pay roll data apply to these employees. Pay roll charged to operating expenses does not include pay roll charged to capital but does include total "Stores Department" pay roll. In the latter respect it varies from the figure shown in the companion study of the Canadian National Railways for the period 1923-1956.
