MOTOR VEHICLE TRAFFIC ACCIDENTS

JANUARY - MARCH 1967

The motor vehicle traffic accidents referred to in this report are those occurring on public roads and streets, including boulevards and paths adjacent to the travelled portions. Non-traffic accidents are those occurring on private property or elsewhere not on a public way and are excluded from this report. The information contained in this series is based on police records. When only property damage is involved, reportable accidents are based on a minimum of \$100 damage in all provinces and territories.

The number of deaths from motor vehicle traffic accidents as reported in this publication will not necessarily agree with the number of deaths reported in the publication of the Vital Statistics Section of the Bureau. The material in this report is based on compilations made by provincial authorities from police department accident reports, while the Vital Statistics report bases its figures on medical certificates of cause of death, obtained from official provincial death records. Differences may also occur in the geographic distribution of deaths because, in this publication, deaths are recorded according to the province in which the accidents actually occurred regardless of the nationalities or places of residence of the persons killed, while in the Vital Statistics report deaths of Canadian residents only are counted by province of residence, regardless of whether the accident or death took place in Canada or the United States. The interval which sometimes elapses between the date of the accident and the date of death and some minor variations in definitions also account for some further differences in the number of deaths between these series.

During the first three months of 1967, motor vehicle traffic accidents in Canada numbered 116,080 of which 707 were fatal accidents, 21,878 were non-fatal injury accidents and 93,495 resulted in property damage only. The number of accidents reported for the quarter were higher in all regions compared to the same period last year. Property damage from all accidents (excluding Quebec) was in excess of \$38.1 million.

The number of persons killed during the period numbered 835. Quebec and Saskatchewan reported decreases in fatalities compared with the first quarter of 1966, with New Brunswick remaining unchanged at 29 deaths. Persons injured in all provinces numbered 31,919 with all reporting authorities, except Newfoundland, Quebec and the Yukon and Northwest Territories showing increases from the previous year.
