MOTOR VEHICLE TRAFFIC ACCIDENTS

JANUARY - MARCH 1969

The motor vehicle traffic accidents referred to in this report are those occurring on public roads and streets, including boulevards and paths adjacent to the travelled portions of streets and highways. Non-traffic accidents are those occurring on private property or elsewhere not on a public way and are excluded from this report. The information contained in this series is based on police records. When only property damage is sustained in a traffic accident, any accident with a minimum of \$100 damage is reported by every province and territory.

The number of deaths from motor vehicle traffic accidents as reported in this publication will not necessarily agree with the number of deaths reported in the publication of the Vital Statistics Section of the Dominion Bureau of Statistics. The material in this report is based on compilations made by provincial authorities from police department accident reports, while the Vital Statistics report bases its figures on medical certificates of cause of death, obtained from official provincial death records. Differences may also occur in the geographic distribution of deaths because, in this publication, deaths are recorded according to the province in which the accidents actually occurred regardless of the nationalities or places of residence of the persons killed, while in the Vital Statistics report deaths of Canadian residents only are counted by province of residence, regardless of whether the accident or death took place in Canada or the United States. Other different concepts account for small differences in the number of deaths shown by the two statistical series, such as, the elapsed time between the accident and the death of the victim and minor variations in definitions.

During the first three months of 1969, motor vehicle traffic accidents in Canada numbered 130,192 of which 712 were fatal accidents, 23,112 were non-fatal injury accidents and 106,368 resulted in property damage only. The number of accidents reported for the first quarter of 1969 was less in Prince Edward Island, Nova Scotia and New Brunswick and greater in the remaining provinces than the number reported for the same period in 1968. The value of property damage from all accidents (Quebec estimated) amounted to \$69.5 million.

The number of persons killed during the period totalled 843. Prince Edward Island, New Brunswick, Quebec, Ontario and the Yukon and Northwest Territories reported an increase in fatalities compared to the first quarter of 1968.

Persons injured in all provinces totalled 33,770 with all provinces reporting increases over the January - March 1968 period except Newfoundland, New Brunswick, Saskatchewan, Alberta and British Columbia.
