# THE HIGHWAY AND THE MOTOR VEHICLE IN CANADA, 1935 Part 1. Highways

Statistics on rural highways are collected from provincial highway officials and include mileages of highways under provincial jurisdiction and of highways under local municipal jurisdiction as far as they are available to the provincial officials. In the three Maritime Provinces all rural highways are provincial highways. In Quebec all improved roads are under provincial jurisdiction - this includes roads gravelled or with a superior top. In Ontario the province has been increasing steadily the highway mileage under its jurisdiction and has been granting subsidies to counties and townships for road expenditures by these local bodies. Consequently the data on local road mileages and expenditures are fairly comprehensive. In the four western provinces practically all improved roads are under provincial control and little information is available on roads outside provincial control. Mileages, however, have been estimated by the provinces and where data on expenditures were available they have been included. During the past few years a large part of the road work in counties and townships in both the western and eastern provinces has been done by persons receiving relief from the local municipality and accurate expenditures are difficult to compute. Also the various fiscal years of the provinces complicate any compilation for the country as a unit.

The conference of statisticians of the British Commonwealth, held at Ottawa in 1935, decided upon a uniform schedule for collecting and compiling highway statistics with the object of making available comparable highway statistics for all countries of the Commonwealth. The new schedule was used in collecting 1935 statistics and, as might be expected, the divisions were not possible for all provinces. In most of the provinces

administrative and general expenses were charged to construction and maintenance; also segregations were not made of new construction and major improvements. These defects, however, are not serious, the principal object being to segregate maintenance and construction or capital expenditures. The conference decided that highway expenditures, maleages, etc., should include all urban streets and sidewalks besides rural roads and footpaths. It has not been the practice in Canada nor in the United States to include urban streets with highways although many township roads classed as rural are urban in nature and, with the subdivision into building lots of land bordering main provincial highways and the development of such subdivisions, the distinction between rural highways and urban streets will become more difficult to make as far as use is concerned. The Bureau made the first attempt to collect data on mileage and expenditures on urban streets and the details are included as an appendix to this report.

Table 1. Highway Mileage Open for Traffic: The mileage of surfaced rural roads in Canada at the close of 1935 was 96,403 miles, the greater part of it being surfaced with gravel. Cement concrete surface amounted to 1,997 miles and asphalt on concrete and macadam bases was 492 miles. Roads with bituminous surfaces amounted to 4,379 miles, water bound macadam amounted to 1,539 miles, and gravel and crushed stone amounted to 87,780 miles, of which 3,124 miles was oil-treated. Included in "Other Surface" of 216 miles was 81 miles of retread. The highways which were not surfaced, amounting to 314,405 miles, were mostly local roads although a large part of the mileage in the Maritime and western provincial roads was earth roads not surfaced with gravel, stone,

Tables 2.3 - Expenditures: During 1935 the provinces reported a total expenditure of \$55,430,151 on highways, bridges and ferries. The Dominion Government expended \$3,423,231 and Dominion subsidies included in the provincial expenditures amounted to \$6,669,079. The greater part of this subsidy was for the Trans-Canada highway. The total amount collectable by the provinces from the Dominion and Municipal Governments was \$7,265,763, leaving a net provincial expenditure of \$48,164,388 to which must be

added \$2,902,556 collectable by the counties and townships in Ontario from the Provincial Government as subsidies on local roads. This brings the provincial net expenditure to \$51,066,944 and the municipal net expenditure to \$5,599,987.

These statistics have included for the first time expenditures on National Park roads divided according to provinces, Niagara Park Commission roads, and roads under the Department of Colonization of the Province of Quebec. The fiscal year of the Province of Ontario was changed from the year ended October 31 to March 31. Expenditures for the five months, November 1 - March 31, 1935, by the Niagara Park Commission were \$4,613 and the Ontario Highway Department reported for the calendar year ended December 31, 1935, making estimates for municipal expenditures and reporting amounts collectable from municipalities for provincial highways for January 1 to March 31, 1935. After that date the province assumed the entire construction and maintenance cost of provincial highways. Statistics for British Columbia are for the fiscal year ended March 31, 1936. In previous reports data for this province have been approximately one year behind those of the other provinces. Total expenditures for the fiscal year ended March 31, 1935, which are not included in previous reports nor in Table 2 of this report, were \$2,579,027, made up of \$1,839,029 on roads and \$739,998 on bridges which is exclusive of \$806,123 expended on the railway bridge at New Westminster about half of which is chargeable to the highway deck and approaches.

Table 4.— Provincial Highway Debt: The provincial highway debt outstanding at the close of the year amounted to \$492,003,144 and the interest charges were \$22,801,669.

The payments on principal amounted to only \$2,785,792 which was less than 10 per cent of the construction expenditures for the year and less than one per cent of the total highway debt outstanding.

#### Part 11 .- Motor Vehicles

Table 5.— Summary of Motor Vehicle Registrations, 1935: Increases were recorded in all provinces in registrations of motor vehicles compared with those of 1934 and the average number of persons (using the revised estimated total population) per passenger automobile was reduced from 11.4 to 11.0 and for all motor vehicles from 9.6 to 9.3 persons. The United States, United Kingdom and France were the only countries showing a larger total registration and of these countries only the United States had a larger registration in relation to population. The relative densities were approximately 4, 2 and 1 for the United States, Canada and the other two countries.

Table 6 Motor Vehicle Registrations, 1935: New registrations include all motor vehicles registered for the first time in the respective provinces and consequently are not exclusively new vehicles. The three Prairie Provinces do not make this segregation. The registration of trucks and trailers without regard to differences in carrying capacity restricts the value of such statistics to a large extent because these range from small trailers of 500 pounds or so capacity to trailers and trucks up to 10 or 12 tons. Ontario makes a segregation according to gross weight and Quebec according to tare weight, but a division is not available for the other provinces. A classification according to net weight or carrying capacity and according to gross weight or combined weight of vehicle and maximum load permissible would be of considerable value for transportation and highway construction and maintenance problems

Table 7. Public Service Vehicles: All provinces require operators of passenger and freight motor vehicles carrying passengers and freight for gain on rural highways to secure permits before operating. Regulations, however, have not become effective in Prince Edward Island and only passenger motor buses are so licensed in Nova Scotia. In Quebec all taxi cabs must also secure a provincial permit and in the western provinces certain taxi cabs require permits. These permits are in addition to the registration of the vehicle as a motor vehicle. Fees are charged for these permits except in Nova Scotia and all provinces collect a special tax based on the ton mile or on gross revenues resulting from the operation of these vehicles in highway transportation. These special taxes are shown separately in Table 9. Quite a complete revision in the British Columbia regulations was made effective July 1, 1935.

Table 8: This table contains registrations by municipalities in each province as far as the data are available from provincial tabulations.

Table 9. Motor Vehicle Revenues, 1935: The gross tax on motor vehicle owners and operators, including the provincial sales tax on gasolene, amounted to \$54,623,623. Expenses for collection of this tax have not been deducted and the entire tax on gasolene is not on gasolene consumed by motor vehicles as is explained under the heading, "Gasolene Consumption" Data for Ontario are for the fiscal year ended March 31, 1936. Revenues collected during the five months, November, 1934, to March, 1935, amounted to \$11,066,271, made up of \$4,789,712 tax on gasolene and \$6,276,559 registration fees on motor vehicles, etc. In addition to the above provincial taxes, the Dominion Government collected during the calendar year 1935 duties of \$485,074 on gasolene imported and \$7,510,612 on motor vehicles and parts imported; also an excise tax of \$236,860 on motor vehicles manufactured in Canada and \$83,962 on motor vehicles imported, or a total of \$8,316,508

(5) Includes fines.
(6) Revision of fees, July 1, 1935.

Gasolene Consumption. All provinces require retail sales of gasolene to be reported and a tax is imposed on all gasolene consumed by motor vehicles using the highways and streets and also gasolene used for some other purposes. Some of the provinces tax all gasolene and refund part or all of the tax when it is used in farm tractors, fishing boats and in stationary engines, etc., upon application and other provinces exempt such gasolene from the tax at time of sale. The exemptions and refunds have had a tendency to be reduced with each change in regulations so that the gasolene on which the tax is collected and retained is becoming farther from the consumption by motor vehicles and is including more and more gasolene used for other purposes. The taxable gasolene is, however, largely consumed by motor vehicles and still indicates in a general way the increase or decrease in the use of motor vehicles.

In Manitoba, Alberta and British Columbia the tax is 7 cents per gallon but the refund is only 5 cents in Manitoba and 6 cents in Alberta and British Columbia. In the other provinces the full tax is refunded when the gasolene is purchased for certain uses.

All provinces reported larger sales than in 1934 and monthly returns indicate the increases continued throughout 1936. Total sales during 1935 amounted to 573,652,245 gallons and between 85 and 90 per cent of this was consumed by motor vehicles. This was an increase of 38,870,227 gallons, or 7.3 per cent, over the 1934 gross sales. Exports amounted to 3,357,092 gallons and are excluded in gross sales and refunds.

Table 13 shows the rate of taxation and effective dates, also the uses on which refunds and exemptions are made.

#### GASOLENE TAX

			Tax		Refund Exemptions
Province	Date Effective		per Gallon Cents	Amount per Gallon Conva	Uses
Manitoba	April 27, March 5,	1925	3	2	Tractors, etc. in threshing, ploughing, grinding grain, lumbering commercial fishing boats and any mining or manufacturing purpose other than in operation of motor vehicles.  All gaselene not used in operation of
	April 14,	1930	5	5	motor vehicles.  All gasolene not used in operation of motor vehicles. Claim for refund must be made within 6 months.
	May 7, April 28,		7	5	Same as above. Fishing vessels to limit of 15 gallons per day operated; threshing machines and combines; manicipal fire apparatus.
Saskatchewan	April 1,	1930 1932 1935 1935	3 5 6 6 7	3 5 5	Other than in paration of motor vehicles on highways provided claim is made for amount over \$3,00 Same as above.  Same as above.  No refund for these three months.  Farm services - Claim for refund only \$3,00 and over.
Alberta	June 1	1927 1929 1933 1935	3 5 6 7	2 3 4 5 6	Other than in operation of motor vehicles on highways. Manicipal motor vehicles operated solely within the municipality.  Same as above.  Same as above.  Same as above.  Gasolene extended to include gasolene, benzol, benzine kerosene gas oil, distillates diesel oil and other liquid petroleum products excepting lubricants and kerosene used for illuminating, fuel oil for creosoting, dust laying, domestic heating and for rail way locomotives, shops etc.
British Columbia	Dec. 21, March 25, April 13, Oct. 1,	1930 1932 1934	3 5 7	3 5 5 6	(Other than in operation of motor vehicles on (public highways, Persons who have suffered (loss of a limb as a result of service in the (Great War are entitled to refund of gasolene (tax paid by them.  Gasolene extended to include all petroleum liquid products used to generate power accombustion in motor vehicle engines.

Motor Vehicle Accidents. Motorists are required to report accidents in all provinces but comprehensive statistics are not available in all cases. The Vital Statistics Branch of the Bureau compiles statistics on all deaths from motor vehicle accidents and these are shown in Tables 14-17. A direct comparison of such statistics for the provinces is of little value due to the difference in size, population, motor vehicle density, etc., but, to put them on somewhat the same bases, the average number of deaths per 10,000 registered motor vehicles has been computed and tabulated in Table 16. Although this treatment puts the data on a better footing than the raw figures, it still gives no weight to differences in use of motor vehicles, differences in climate, roads, tourist cars, etc., all of which are factors in accidents.

Saskatchewan has quite consistently shown a lower ratio of deaths to registrations than the other provinces, while New Brunswick and Quebec have shown higher ratios. It is quite possible that the alignments, contours and surfaces of the roads have some effect on these accidents although a large proportion of fatal accidents are on straight stretches of open road with clear vision and good surface. Many of the deaths from motor vehicle accidents reported from cities are due to accidents outside the cities, the victims having been brought into the city hospitals and reported from there.

Data in Tables 14, 15, 16 and 17 are based on reports made to the Vital Statistics Branch of the Bureau. Table 18 is compiled from returns made by provincial motor vehicle officials and police and Table 19 contains data reported by urban police. This last table includes only persons killed and injured as the result of accidents within the urban limits.

Tourist Automobiles. The number of United States automobiles entered for touring purposes and also the number of Canadian cars crossing into the United States, as recorded by the Department of National Revenue showed increases over the previous year and the expenditures by United States tourists in Canada increased by 52 per cent, or from \$86,259,000 in 1934 to \$131,806,000 in 1935. These expenditures were approximately two thirds of the total foreign tourist expenditures in Canada.

Table 20 shows the number of cars entering via the various ports in each province. Entries through the Maritime Provinces are shown in one group because practically all United States tourists visiting Nova Scotia and Prince Edward Island enter via the New Brunswick border.

# Part 111 MOTOR VEHICLE REGULATIONS

Prince
Edward
Island,
Nova
Scotia,
New
Brunswick
and
Ouebec

Each province has jurisdiction over the licensing of motor vehicles, chauffeurs, drivers, etc. and the basis adopted is different in each province. In Prince Edward Island, Nova Scotia, New Brunswick and Quebec the basis of assessing registration fees for passenger automobiles is on the weight of the wehicle, except that Prince Edward Island and Nova Scotia also make a separate charge for the first registration on all motor vehicles and New Brunswick makes an annual fee for all registrations plus the weight basis fee. In these provinces commercial cars are licensed on the tare weight (weight of vehicle) basis,, except in Prince Edward Island where the carrying capacity is the basis up to 2 tons. Prince Edward Island also makes a separate charge for markers for passenger cars. New Brunswick charges to the nearest quarter of a hundred weight and to the nearest twenty five cents and Nova Scotia and Quebec assess any fraction of a hundred weight as a hundred weight. Quebec also assesses a considerably higher rate for vehicles with solid tires than for vehicles with pneumatic tires. Also in Quebec steam and electric motor vehicles are assessed at a higher rate than motor vehicles with gasolene engines, whereas in the other three provinces no distinction is made.

Ontario

In Ontario passenger cars are assessed according to the horse power and the number of cylinders. Commercial vehicles are assessed on the gross weight basis; i.e., the weight of the vehicle plus the varrying capacity, the rate for vehicles with solid tires being higher than for vehicles with pneumatic tires.

Manitoba, Saskatchewan and Alberta In all three Prairie Provinces passenger cars are taxed on the wheel base basis. Trucks are taxed on a gross weight basis in Manitoba and Saskatchewan. In Alberta trucks are assessed an annual registration fee based on the wheel base and those operating for gain over rural roads, other than farmers, market gardeners or ranchers for the transportation of their own property, are assessed an additional fee based on the gross weight.

British Columbia A registration fee of \$10.00 for the first registration is made and an annual fee based on the tare weight of the vehicle is assessed. The annual fee is reduced one twelfth each month of the egistration year (ended February 28) the vehicle is not registered. Also refunds are made to persons residing east of the Gascade mountains of licenses and plates are surrendered before December 1 of one quarte of fee and, before November 1, of one third of fee.

Yukon Territory In the Yakon Territory a flat rate of \$10.00 per wehicle is assessed.

## SCHEDULE OF FEES

(1935 and 1936)

	11,000 803 1,000)										
	Registration fee on first registration \$2.50 for passenger cars and trucks.										
	Passenger cars: Annual fee 50 cents per 100 pounds plus \$1.00 for markers.										
Prince Vivard	Trucks: Carrying capacity up to 1 ton										
Iskand	Unloaded weight over 5,000 lbs										
	Drivers permits Owner Owner 5.50										
	Dealers 3 markers 30.00 Additional markers 10.00										
Nova Scotia	Initial registration fee  Annual fees:  Passenger cars Fees are based on the weight of the vehicle,  72 cents per 100 pounds or fraction with a  minimum fee of \$12.00.										
	Commercial cars (trucks, buses and trailers). Fees are based on the weight of the vehicle plus the maximum load the owner desires to carry on it with a minimum load 2 times the weight of the vehicle and a minimum fee of \$16.00.										
	Commercial Cars (tracks, buses and trailers) 1936:										
	6 000 lbs. and under 40 cents per 100 lbs. or fraction 7 000 " " " 45 " " " " " " " " 8 ,000 " " " 55 " " " " " " " " 9 ,000 " " " 60 " " " " " " " " " 10 ,000 " " " " 65 " " " " " " " " " 11 ,000 " " " " 75 " " " " " " " " 0ver 12,000 lbs. special rates and by special permit. #### PUBLIC SERVICE VEHICLES

Operators of motor vehicles used for the transportation of passengers and/or merchandise for gain are now required to secure a special permit in each province and the fees for such permits are in addition to the registration fees.

Prince Edward Island Prince Edward Island was the last province to pass a Public Vehicle Act and it became effective on April 6, 1933, but regulations have not yet been put into operation.

Nova Scotia In Nova Scotia common carriers are required to secure a Certificate of Public Convenience and Necessity. A fee of \$10.00 per year is charged for each bus for which a certificate is issued plus a monthly fee of 2 per cent of the gross revenues.

New Brunswick In New Brunswick common carrier passenger buses are assessed 2 per cent of the gross revenue and if they also carry freight a further fee of \$25.00 is charged for buses weighing up to 3,000 pounds. Buses and trucks carrying freight are assessed \$50.00 per annum if weighing 3,000 to 4,000 pounds (weight of vehicle) and \$100.00 per annum if weighing 4,000 pounds or over. A further fee of \$25.00 is charged when a trailer is used with a truck. Certain exemptions are allowed for trucks carrying milk and cream to dairies.

Quebec

In Quebec public buses and trucks are assessed on the ton (gross ton) mile basis. Motor buses of 12 seats or less are charged 1/12 cent per ton mile and buses of over 12 seats at 1/10 cent per ton mile. Taxi cabs, trucks and trailers are also charged 1/10 cent per ton mile. The seating capacity of buses is based on an allowance of 20 inches per seat and 150 pounds per passenger.

Ontario

In Ontario public vehicles are divided into two classes (1) those operating on provincial highways (King's Highway) and (2) those operating on other rural roads. For buses of the first class the charge is 1/20 cent per passenger mile and of the second class, 1/30 cent per passenger mile. The seating capacity is based on 18 inches per seat. For trucks and trailers the fee is based on the gross weight, ranging from \$10.00 per year for a truck having a gross weight of 2 tons to \$112.50 for a truck with a gross weight of 15 tons for trucks operating on the provincial roads and from \$10.00 for trucks with gross weights up to 4 tons to \$56.00 for trucks with gross weights of 15 tons operating on other rural roads.

<sup>/</sup> Provided for by law but not yet applied.

6 The increase in trailer license to equal truck license was made in 1936.

A & B = Common carriers.

C & D = Contract carriers or private carriers

Trucks operated for the transportation of farm and dairy products exclusively are not included in the above classes and are assessed a fee of \$1.00 per year.

Mari toba

In Manitoba public buses are charged a minimum fee of \$50,00 plus \$2.00 for each seat in excess of 12 when operating on regular runs. Chartered buses are charged 1/10 cent per passenger mile for each trip if not certificated Trucks with carrying capacities up to 1½ tons transporting milk and cream are charged \$25.00 per year. Other trucks are charged \$50.00 per year. All trucks with capacities over 2 tons are charged \$25.00 per ton or fraction in excess of 2 tons. Public service vehicles transporting fish or other seasonal commodities for a period of less than six months are required to pay a license of \$10.00 only.

Saskat

See page 42.

Alberta

In Alberta public buses are required to pay a fee of \$1.00 plus 1/15 cent per passenger mile for routes over gravel roads and 2/45 cent per passenger mile over earth roads. Public trucks other than those belonging to farmers, market gardeners and ranchers used for the transportation of owners produce and those operating exclusively within the limits of cities, towns or villages, or within a 5 mile radius of these municipalities are assessed on a gross weight basis:

# APPENDIX

#### URBAN STREETS

As stated in the report, the scheme of highway statistics agreed upon by the statisticians of the several countries of the British Commonwealth at the conference held in Ottawa in 1935 included urban streets and sidewalks, as well as rural roads and footpaths. Thus it covered all thoroughfares for pedestrian and vehicular traffic maintained by the public through its various governments.

The necessity for the inclusion of urban streets is more apparent in thickly populated regions than elsewhere. The limits of urban municipalities certainly do not mark the dividing lines between streets and highways in Canada. What are commonly known as streets extend for miles beyond every large city and there are many fairly large communities, urban in every respect, which are not incorporated and whose streets are at present classed as rural highways. The distinction gets more difficult as the density of population increases

The Bureau forwarded schedules to all cities and towns with populations of 2 000 and up in Nova Scotia and New Brunswick, 4,000 and up in Quebec and Ontario, 1,000 and up in the four western provinces, and to all urban municipalities in Prince Edward Island requesting the same data as collected for rural highways. There was some difficulty in securing accurate data on the mileages of different classes of pavement, some greater difficulty in securing accurate data on expenditures during the year, particularly the segregation of expenditures on sewers, water services, etc., from the pavement costs, and still greater difficulty in securing a segregation of debt chargeable to streets and sidewalks. Because of omissions in sincet debt for several cities and of the difficulty of estimating even approximate data, scatistics on municipal debt and debt charges chargeable to streets have been omitted from this table. It is possible, however, that better records may be established and that these data, even if partly estimated, may be available for future reports.

These data compiled from this first survey should be considered as preliminary and subject to correction in subsequent reports.
