Data in Many Forms...

Statistics Canada disseminates data in a variety of forms. In addition to publications, both standard and special tabulations are offered on computer printouts, microfiche and microfilm, and magnetic tapes. Maps and other geographic reference materials are available for some types of data. Direct access to aggregated information is possible through CANSIM, Statistics Canada's machine-readable data base and retrieval system.

How to Obtain More Information

Inquiries about this publication and related statistics or services should be directed to:

Capital Expenditures Section,
Construction Division,

Statistics Canada, Ottawa, K1A 0T6 (Telephone: 995-9013) or to the Statistics Canada reference centre in:

| | |
|-----------------------|---------------------------|
| St. John's (772-4073) | Sturgeon Falls (753-4888) |
| Halifax (426-5331) | Winnipeg (949-4020) |
| Montréal (283-5725) | Regina (359-5405) |
| Ottawa (992-4734) | Edmonton (420-3027) |
| Toronto (966-6586) | Vancouver (666-3691) |

Toll-free access is provided in all provinces and territories, for users who reside outside the local dialing area of any of the regional reference centres.

How to Order Publications

This and other Statistics Canada publications may be purchased from local authorized agents and other community bookstores, through the local Statistics Canada offices, or by mail order to Publication Sales and Services, Statistics Canada, Ottawa, K1A 0T6.

Des données sous plusieurs formes...

Statistique Canada diffuse les données sous formes diverses. Outre les publications, des totalisations habituelles et spéciales sont offertes sur imprimés d'ordinateur, sur microfiches et microfilms et sur bandes magnétiques. Des cartes et d'autres documents de référence géographiques sont disponibles pour certaines sortes de données. L'accès direct à des données agrégées est possible par le truchement de CANSIM, la base de données ordinolingué et le système d'extraction de Statistique Canada.

Comment obtenir d'autres renseignements

Toutes demandes de renseignements au sujet de cette publication ou de statistiques et services connexes doivent être adressées à:

Section des dépenses d'investissements,
Division de la construction,

Statistique Canada, Ottawa, K1A 0T6 (téléphone: 995-9013) ou au centre de consultation de Statistique Canada à:

| | |
|-----------------------|---------------------------|
| St. John's (772-4073) | Sturgeon Falls (753-4888) |
| Halifax (426-5331) | Winnipeg (949-4020) |
| Montréal (283-5725) | Regina (359-5405) |
| Ottawa (992-4734) | Edmonton (420-3027) |
| Toronto (966-6586) | Vancouver (666-3691) |

Un service d'appel interurbain sans frais est offert, dans toutes les provinces et dans les territoires, aux utilisateurs qui habitent à l'extérieur des zones de communication locale des centres régionaux de consultation.

SYMBOLS

The following standard symbols are used in Statistics Canada publications:

.. figures not available.

... figures not appropriate or not applicable.

- nil or zero.

-- amount too small to be expressed.

P preliminary figures.

R revised figures.

x confidential to meet secrecy requirements of the Statistics Act.

SIGNES CONVENTIONNELS

Les signes conventionnels suivants sont employés uniformément dans les publications de Statistique Canada:

.. nombres indisponibles.

... n'ayant pas lieu de figurer.

- néant ou zéro.

-- nombres infimes.

P nombres provisoires.

R nombres rectifiés.

x confidentiel en vertu des dispositions de la Loi sur la statistique relatives au secret.

NOTE ON CANSIM

Data for most of the tables in this publication are available on CANSIM (Canadian Socio-Economic Information Management System). For those tables that are available, the matrix numbers for retrieval are shown on the top left box for every table.

For further information write to CANSIM, Current Economic Analysis Division, Statistics Canada, Ottawa, K1A 0T6 or telephone (613) 995-7406.

NOTE CONCERNANT CANSIM

Pour la plupart des tableaux de cette publication, les chiffres sont disponibles sur CANSIM (Système canadien d'information socio-économique). Pour les tableaux qui sont disponibles, les numéros de matrice apparaissent à gauche au haut de la page de chaque tableau.

Pour plus de renseignements, écrivez à CANSIM, Division des analyses de conjoncture, Statistique Canada, Ottawa, K1A 0T6 ou téléphonez à (613) 995-7406.

INTRODUCTION

This report sets out the 1984 capital spending intentions for all sectors of the economy. Comparative figures of preliminary actual expenditures in 1983 and actual expenditures in 1982 are also given. The results are based on a questionnaire survey of individual companies and other spending agencies completed towards the end of 1983 and in January and February 1984. The figures reflect spending plans as formulated at that time.

The estimates cover total outlays for construction and for the acquisition of producers' machinery and equipment by Canadian business, institutions and governments, together with expenditures for housing. All in all, about 24,000 establishments were surveyed for their investment intentions. In order to approximate full coverage, adjustments were made for non-surveyed and for non-reporting firms. In a few areas, where the survey approach is not considered practical, expenditure estimates were arrived at independently on the basis of current trends and expert opinion in these fields (e.g., agriculture and housing).

Information on capital spending intentions provides a useful indication of market conditions both in the economy at large and in particular industries. Since such expenditures account for a large and relatively variable proportion of gross national expenditures, the size and content of the investment program provides significant information about demands to be placed upon the productive capacities of the economy during the period covered by the survey. In addition, information on the relative size of the capital expenditures program planned, both in total and for individual industries, gives an indication of the views management hold on prospective market demands in relation to present productive capacity.

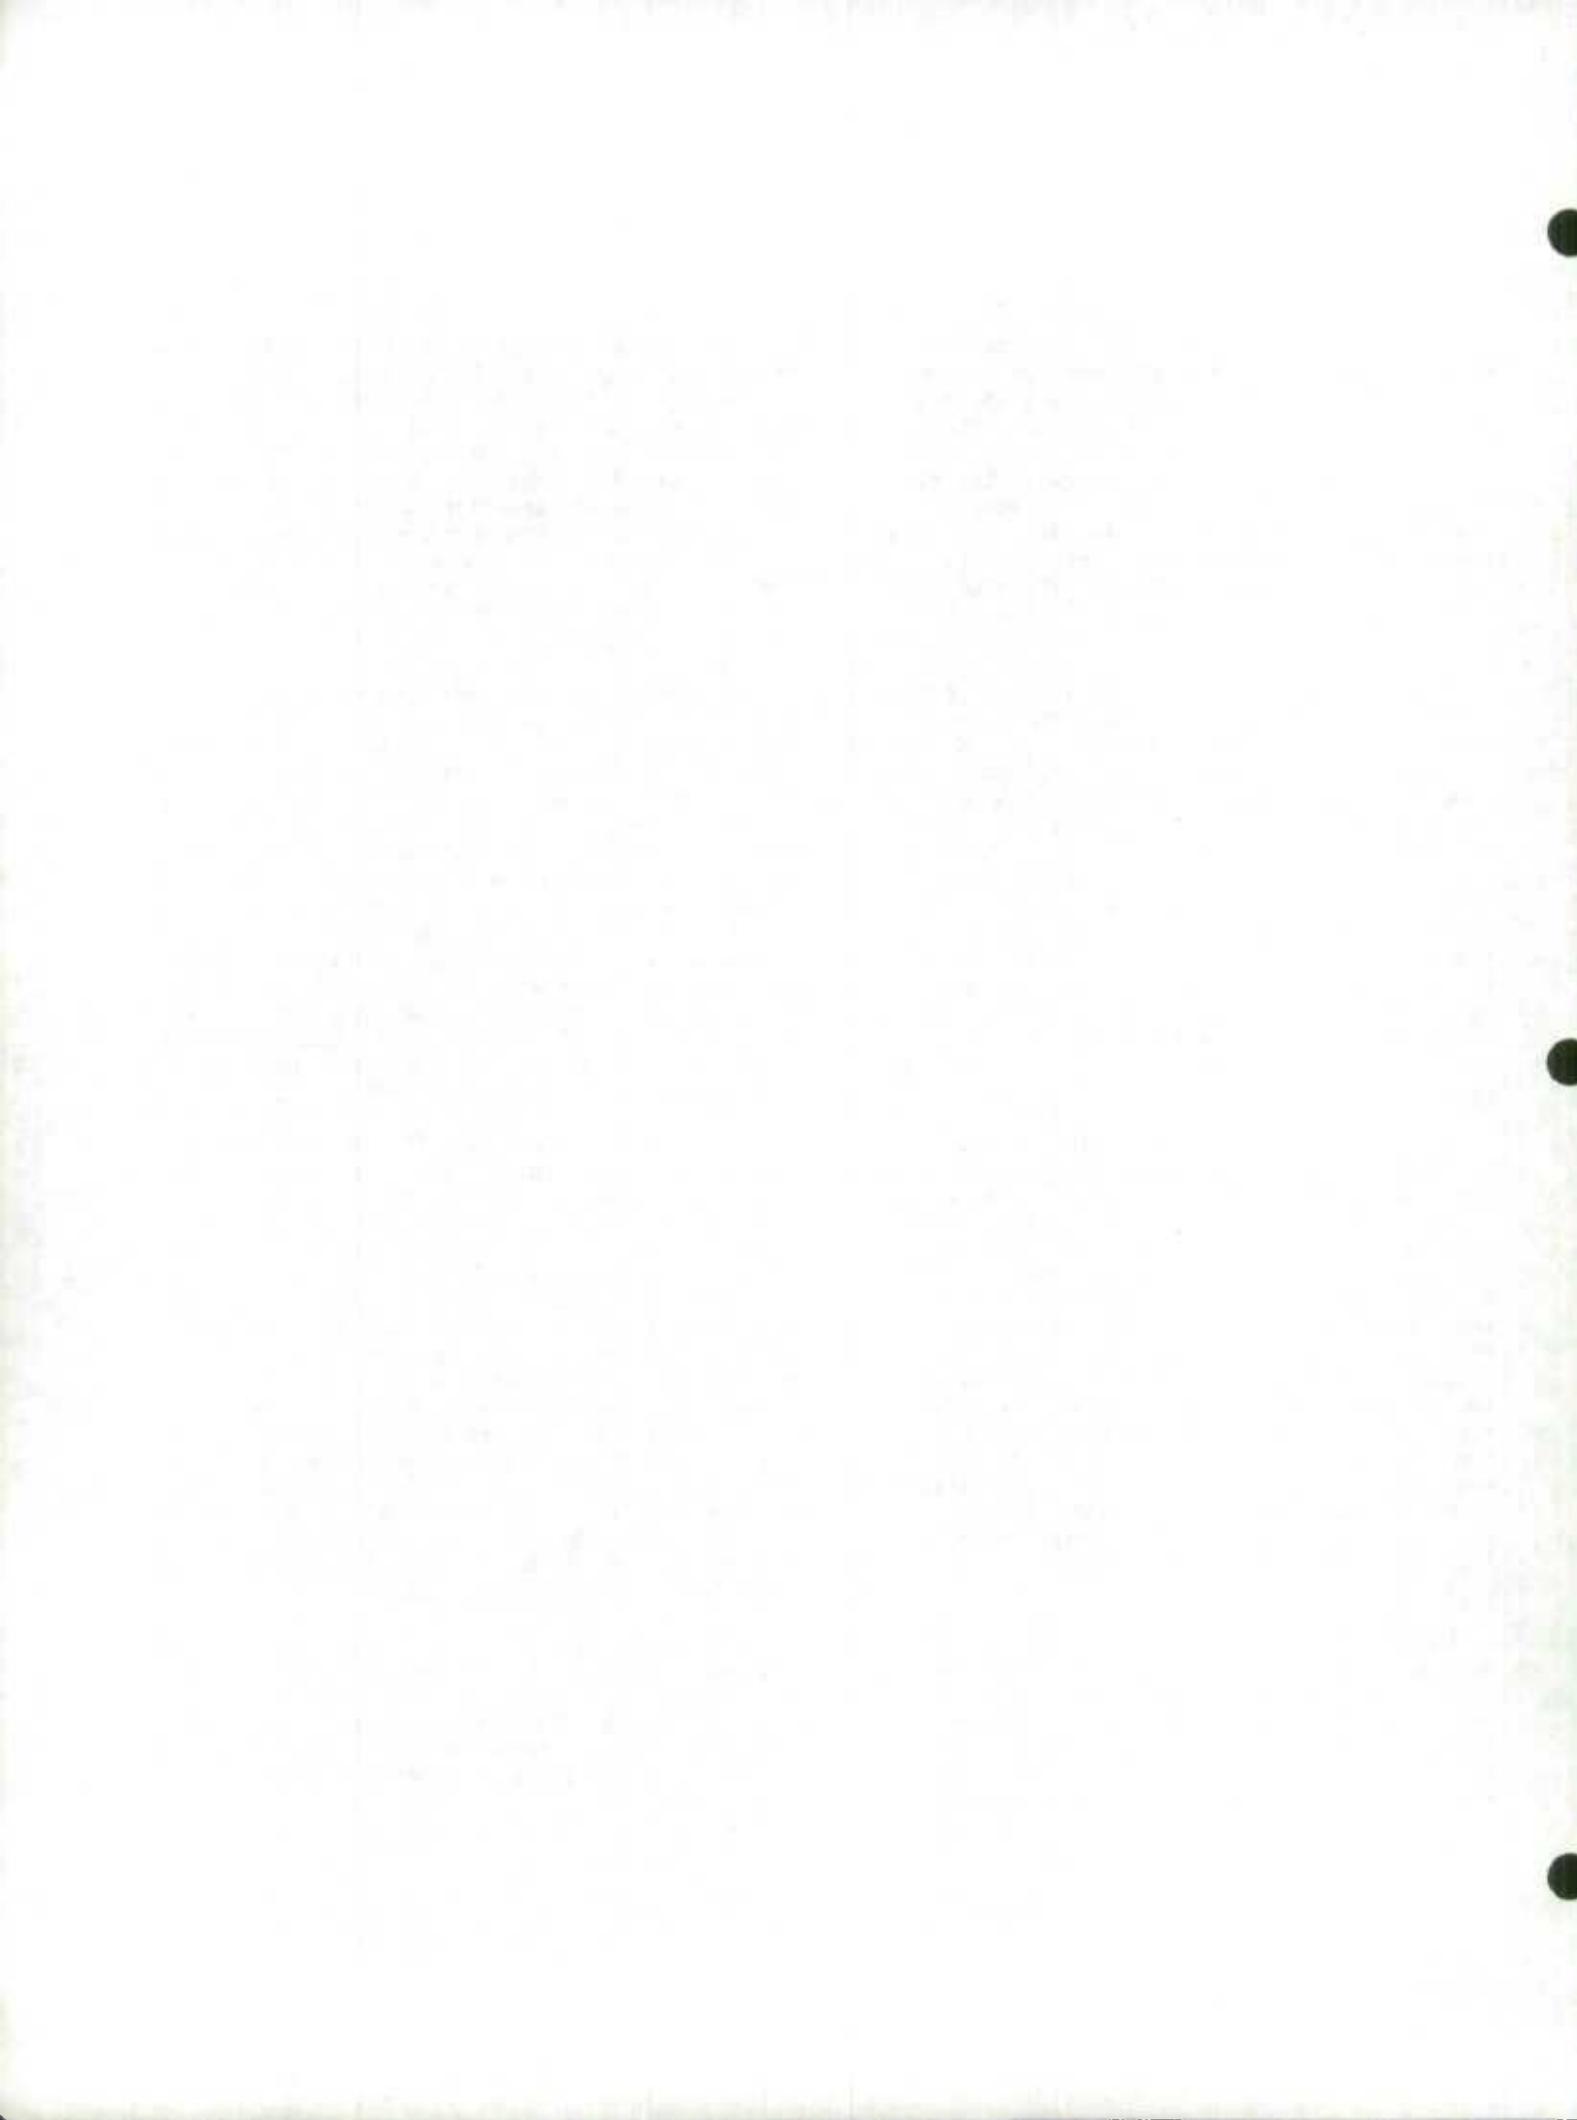

Non-capitalized repair expenditures on structures and machinery and equipment are also given in the report, but these are shown separately. By including these outlays, a more complete picture is provided of all demands likely to be made on labour and materials in accomplishing the program.

Nous présentons ici un état des immobilisations projetées dans les divers secteurs de l'économie en 1984 (de même que les dépenses réelles provisoires de 1983 et les dépenses réelles de 1982). La plupart des chiffres sont fondés sur les réponses à un questionnaire adressé aux sociétés particulières et aux autres organismes qui font des immobilisations. Comme les réponses ont été préparées vers la fin de 1983 et en janvier et en février 1984, les chiffres représentent les immobilisations projetées à ce moment-là.

Les immobilisations prévues comprennent l'ensemble des sommes que les sociétés commerciales, les institutions et les gouvernements du Canada entendent consacrer à des constructions et à l'acquisition de machines et d'outillage, ainsi que les dépenses visant la construction d'habitations. L'étude a porté sur environ 24,000 entreprises commerciales, mais les totaux ont été ajustés de façon à inclure les immobilisations des sociétés qui n'ont pas répondu, ainsi que des sociétés qui n'ont pas fait partie du relevé. Dans certains secteurs, où la méthode d'enquête n'a pas semblé pratique, les montants ont été calculés séparément d'après la tendance courante et l'opinion de spécialistes en la matière (e.g., agriculture, pêche et habitation).

Ces renseignements sur les projets d'immobilisations fournissent des indications utiles quant à l'état du marché dans l'économie en général et dans certaines industries particulières. Comme ces dépenses représentent une partie importante mais toujours variable des dépenses nationales brutes, l'envergure du programme des investissements et sa répartition entre les différents secteurs donnent une idée de la demande particulièrement aléatoire que les producteurs canadiens auront à satisfaire au cours de la période en cause. De plus, ces renseignements sur l'importance relative des immobilisations projetées dans l'ensemble du pays et dans les industries déterminées permettent de connaître les prévisions des chefs d'entreprises pour ce qui est de la demande en fonction de la capacité actuelle de production.

Le rapport comprend aussi, quoique sous une rubrique distincte, les sommes destinées à la réparation non-capitalisée d'immeubles, de machines et d'outillage. L'inclusion de ces sommes donne une idée plus juste des besoins de main-d'œuvre et de matériaux que représentera l'exécution du programme.

SECTION I

APPRAISAL OF THE 1984 CAPITAL EXPENDITURE PROGRAM

Total capital expenditures in Canada during 1984 are estimated to be \$75,061 million or 0.8% above the \$74,425 million in 1983. This increase follows a decrease of 3.0% in 1983 from the \$76,761 million in 1982.

The total for capital outlays on construction is \$46,318 million in 1984, \$46,104 million in 1983 and \$46,518 million in 1982, representing an increase of 0.5% in 1984 and a decrease of 0.9% in 1983. Residential construction projected at \$13,164 million for 1984 is up 2.3% over the \$12,872 million in 1983. This percentage falls short of the 26.8% gain last year over the \$10,149 million in 1982. The number of housing starts used in these estimates were 166,000 for 1984, 162,645 for 1983 and 125,860 for 1982. The rest of the construction program for non-residential buildings and for engineering structures is estimated at \$33,154 million (-0.2%) in 1984, \$33,232 million (-8.6%) in 1983 and \$36,369 million in 1982. Totals for machinery and equipment are \$28,743 million (+1.5%) in 1984, \$28,321 million in 1983 (-6.4%) and \$30,244 million in 1982.

The current outlook for 1984 shows the business sector down by 0.4% to \$49,569 million from the \$49,757 million in 1983. Last year the decrease was 10.1% from the \$55,354 million in 1982. The social capital of institutions and governments on the other hand is up by 4.5% in 1984 for a total of \$12,328 million. The 1983 total of \$11,796 was 4.8% higher than the \$11,258 in 1982.

The strengths in the business sector during 1984 are expected to be mostly from the drilling of petroleum and gas wells where a total program of \$7,798 million represents an increase of \$706 million or 10% over the 1983 level. This gain is supplemented by some added strength in metal mining but reduced by a sizeable reduction for coal mining in non-metal mines. A similar pattern is shown in manufacturing where an increase for primary metals to a total program of \$1,143 million (+\$450 million, +64.9%) is offset by decreases for the chemical products group to a new total of

ÉVALUATION DU PROGRAMME DES DÉPENSES D'INVESTISSEMENT DE 1984

Selon les estimations, le total des dépenses d'investissement au Canada en 1984 sera de \$75,061 millions, en hausse de 0.8% par rapport au chiffre de \$74,425 millions de 1983. Cette augmentation fait suite à une baisse de 3.0% en 1983 par rapport au chiffre de \$76,761 millions de 1982.

Le total des dépenses d'investissement dans le secteur de la construction est de \$46,318 millions en 1984, de \$46,104 millions en 1983 et de \$46,518 millions en 1982, ce qui représente une augmentation de 0.5% en 1984 et une diminution de 0.9% en 1983. Les projections pour la construction résidentielle, à \$13,164 millions pour 1984, enregistrent une progression de 2.3% par rapport au total de \$12,872 millions de 1983. Cette augmentation n'est pas aussi élevée que celle de 26.8% de l'année précédente par rapport au total de \$10,149 millions de 1982. Le nombre de mises en chantier de logements utilisé dans l'établissement de ces estimations est de 166,000 pour 1984, de 162,645 pour 1983 et de 125,860 pour 1982. Le reste du programme de construction d'immeubles non résidentiels et de travaux de génie est estimé à \$33,154 millions (-0.2%) en 1984, à \$33,232 millions (-8.6%) en 1983 et à \$36,369 millions en 1982. Les totaux pour les machines et le matériel sont de \$28,743 millions (+1.5%) en 1984, de \$28,321 millions en 1983 (-6.4%) et de \$30,244 millions en 1982.

Selon les perspectives actuelles pour 1984, le secteur des entreprises va baisser de 0.4%, passant de \$49,757 millions en 1983 à \$49,569 millions. L'année précédente, la baisse avait été de 10.1% par rapport au chiffre de \$55,354 millions de 1982. Le capital social des institutions et des administrations publiques progresse, par contre, de 4.5% en 1984 pour s'établir à \$12,328 millions. Le total pour 1983 de \$11,796 millions dépasse de 4.8% celui de \$11,258 millions de 1982.

On s'attend à ce que la fermeté dans le secteur des entreprises en 1984 provienne principalement du forage de puits de pétrole et de gaz naturel, pour lequel un programme de \$7,798 millions représente une augmentation de \$706 millions (+10%) par rapport au niveau de 1983. Cette progression se trouve renforcée par la fermeté supplémentaires des mines métalliques, mais atténuée par une baisse appréciable dans le cas des mines de charbon pour les mines non métalliques. La fabrication accuse une évolution semblable, la progression dans le cas de la première transformation des métaux pour un programme total de \$1,143 millions (+\$450 millions, +64.9%) étant

\$1,044 million (-\$652 million, -38.4%), for the petroleum and coal products total of \$520 million (-\$214 million, -29.2%) and for transportation equipment which is shown at \$640 million (-\$154 million, -19.4%). The wood products group is showing some strength again to reach \$312 million (+91 million, +41.0%).

The total for transportation, communication, miscellaneous utilities group, at \$15,259 million, is down by \$775 million or 4.8% from 1983. The total of \$7,317 for electric power represents a decrease of \$990 million or 11.9% from 1983, while the water transport and services total of \$269 million is down by \$335 million or 55.4%. An increase of \$230 million (+19.0%) to a new total of \$1,444 million for rail transport only partly offsets those decreases.

In the social capital group, the total for government, at \$9,242 million, represents an increase of \$555 million or 6.4% over 1983. Most of the increase is for federal government where the new total reaches \$2,166 million. Programmes are expected to be up to \$3,200 million for provincial governments and \$3,877 million for municipal governments.

Regionally, increases for 1984 are shown for Manitoba (+11.8%), New Brunswick (+11.2%), Prince Edward Island (+9.8%), Quebec (+6.7%), Ontario (4.4%), Saskatchewan (+3.5%), Yukon and Northwest Territories (+2.4%). Decreases are expected in Alberta (-8.7%), British Columbia (-5.8%), Nova Scotia (-3.1%) and Newfoundland (-0.5%).

compensée par des baisses pour le groupe des produits chimiques de \$652 millions, ou 38.4%, à de \$214 millions, ou 29.2 %, pour les dérivés du pétrole et du charbon, à \$520 millions, et de \$154 millions, ou 19.4 %, pour le matériel de transport, qui passe à \$640 millions. Le groupe des produits du bois retrouve une certaine fermeté et atteint \$312 millions (+91 millions, +41.0 %).

Le total pour le groupe des transports, communications et services d'utilité publique divers de \$15,259 millions est en baisse de \$775 millions, ou 4.8 %, par rapport au chiffre de 1983. Le total de \$7,317 millions dans le cas de l'énergie électrique accuse une baisse de \$990 millions, ou 11.9 % par rapport à 1983, tandis que le total de \$269 millions pour le transport par lau et les services est en baisse de \$335 millions, ou 55.4 %. Ces baisses sont compensées en partie seulement par une augmentation de \$230 millions (+19.0 %) du transport ferroviaire, à \$1,444 millions.

Pour le groupe du capital social, le total de \$9,242 millions des administrations publiques est en hausse de \$555 millions, ou 6.4 %, par rapport à 1983. La plus grande partie de cette augmentation va à l'administration fédérale, dont le nouveau total atteint \$2,166 millions. On s'attend à ce que les programmes augmentent pour atteindre \$3,200 millions pour les administrations provinciales et \$3,877 millions pour les administrations municipales.

Par région, il y aura une augmentation en 1984 au Manitoba (+11.8 %), au Nouveau-Brunswick (+11.2 %), à l'Île-du-Prince-Édouard (+9.8 %), au Québec (+6.7 %), en Ontario (+4.4 %), en Saskatchewan (+3.5 %) et au Yukon et dans les Territoires du Nord-Ouest (+2.4 %). On prévoit des baisses en Alberta (-8.7 %), en Colombie-Britannique (-5.8 %), en Nouvelle-Écosse (-3.1 %) et à Terre-Neuve (-0.5 %).

SECTION III

PROVINCES AND TERRITORIES

Capital and Repair Expenditures by Provinces and Territories (See Tables 7-20)

The expenditures shown for each province or territory represent the value of construction work put in place and the value of machinery and equipment acquired for use within the province or territory. Such expenditures represent gross additions to the capital stock of the province or territory, and are a reflection of economic activity in that area. However, the actual production of these assets may generate its major employment and income giving effects in other regions. For example, the spending of millions of dollars on plants and equipment in Western Canada may generate considerable activity in machinery industries in Ontario and Quebec as well as construction activity in the Western provinces.

It should be appreciated that there are statistical difficulties in making a precise geographic allocation of past or anticipated investment since many business firms operating in several provinces do not either record or plan their capital expenditures geographically. As a result, it has been necessary to use approximate breakdowns in many cases. Such is the case for investment in railway rolling stock, ships, aircraft and certain other items.

The degree of detail provided is dependent to some extent on the validity of methods used to obtain provincial estimates and also on limitations imposed by the Statistics Act. These restrictions have particular relevance in the case of the less populated provinces and territories.

Private and Public Breakdowns (See Tables 7C and 7D)

Capital and repair expenditures for the provinces and for the territories are divided into the Private (non-government) and Public (government) categories in Tables 7C and 7D. Additional data is also

PROVINCES ET TERRITOIRES

Immobilisations et réparations par province et territoire (voir les tableaux 7-20)

Les montants indiqués pour chacune des provinces ou territoires représentent la valeur des travaux de construction qui y seront entrepris et celle des machines et du matériel achetés pour y être utilisés. Ces sommes constituent des additions brutes aux capitaux de la province ou territoire et donnent des indications de l'activité économique de la région. Cependant, la production effective des biens en cause peut exercer son influence du point de vue de la création d'emplois et de revenu dans d'autres régions. Ainsi, la dépense de millions de dollars en installations et équipement industriels dans l'Ouest canadien peut déterminer une grande activité dans les industries des machines en Ontario et au Québec et dans la construction dans les provinces de l'Ouest.

On éprouve, dans certains cas, des difficultés d'ordre statistique à déterminer à quel endroit s'applique tel ou tel investissement. En effet, un grand nombre d'entreprises commerciales qui font affaires dans plusieurs provinces n'établissent pas leurs plans ou leurs comptes d'immobilisations sur une base géographique. Il a donc fallu dans ces circonstances se contenter d'une répartition approximative. Ce fut le cas notamment pour les achats de matériel roulant de chemins de fer, de navires, d'avions et d'autres biens analogues.

Les détails fournis dépendent, dans une certaine mesure, de la validité des méthodes employées pour obtenir des estimations d'ordre provincial et des restrictions imposées par la Loi sur la statistique. Ces restrictions ont été particulièrement importantes dans le cas des provinces ou territoires les moins peuplés.

Répartitions privées et publiques (voir les tableaux 7C et 7D)

La répartition entre la catégorie privée et la catégorie publique des dépenses d'immobilisations et de réparations pour les provinces et les territoires se retrouve aux tableaux 7C et 7D. Des données supplémentaires sont disponibles sur la

available on the CANSIM data bank for the three levels of government and for the categories of information for national totals in Table 23. These statistics can be retrieved from the appropriate provincial and territorial matrix back to 1963.

banque de données CANSIM pour les trois niveaux de gouvernements et pour les catégories de données nationales qui se trouvent dans le tableau 23. On peut extraire ces statistiques des matrices provinciales et territoriales appropriées, à partir de 1963.

SECTION IV

SUPPLEMENTARY

Current and Constant Dollars (See Table 21)

Constant dollars are derived by applying deflators for the major groups of structures for construction and selected weighted deflators for the machinery and equipment component of capital expenditures.

Business and Social Capital (See Table 22)

This table is a regrouping of the various SIC industries included in Tables 1-6 into the categories of Business capital and Social capital. A supplementary sheet identifying the individual industries included in each item is available on request from the Construction Division, Statistics Canada, Ottawa, K1A 0T6 (613-995-9043).

Private and Public (See Tables 23 and 24)

These tables divide the total capital and repair expenditures for Canada into Private (non-government) and Public (government) categories.

The Public category includes government enterprises for municipal, provincial and federal governments, municipal hospitals and schools, provincial hospitals, schools and universities, and federal government housing, and government department expenditures for the three levels.

Public enterprises cover, in general, government owned establishments whose principal source of revenue is derived from the provision of goods and services to the public.

The total for federal government departments includes data for departmental Crown corporations and excludes data for proprietary Crown corporations which are all classed as enterprises. Agency Crown corporations, on the other hand, are provisionally classified in part to enterprises and the remainder to government departments.

SUPPLÉMENTAIRES

Dollars courants et constants (voir le tableau 21)

Les estimations en dollars constants s'obtiennent par dégonflement pour les principaux groupes de structures pour ce qui est de la construction, et par une pondération sélective de déflation pour les composantes machinerie et outillage de ces investissements.

Investissements commerciaux et services sociaux (voir le tableau 22)

Ce tableau rassemble les industries de la CAE, comprises dans les tableaux 1-6 en deux catégories: investissements commerciaux et services sociaux. On peut se procurer un feuillet supplémentaire identifiant pour chaque item les industries composantes en s'adressant à la Division de la construction, Statistique Canada, Ottawa, K1A 0T6 (613-995-9043).

Investissements privés et publics (voir les tableaux 23 et 24)

Ces tableaux divisent les dépenses totales d'immobilisations et de réparations pour le Canada en deux catégories: privée (non-gouvernementale) et publique (gouvernementale).

La catégorie publique comprend les entreprises des gouvernements municipaux, provinciaux et fédéral; les écoles, les universités et les hôpitaux provinciaux, les écoles et les hôpitaux municipaux; les habitations du gouvernement fédéral; et les dépenses aux trois niveaux de gouvernement.

Entreprises publiques comprend, en général, les entreprises gouvernementales qui tirent la majeure partie de leur revenu de la fourniture de biens et de services au public.

Les totaux pour les ministères du gouvernement fédéral comprennent les chiffres pour les corporations de département mais excluent les chiffres pour les corporations de propriétaire, ces dernières étant considérées comme entreprises publiques. D'autre part, les corporations de mandataire sont pour le moment classées en partie avec les entreprises publiques et en partie avec les ministères gouvernementaux.

Comparison of Intended with Actual Expenditures in 1982 (See Table 25)

In considering the accuracy of investment intentions, two separate factors should be kept in mind. First, it is necessary to consider the extent to which investment plans are formulated in advance. Second, consideration ought to be given to the comparison of anticipated investment expenditures with the actual investment statistics once they are available for the period in question.

For the first point, it should be noted that it is not always easy to obtain reliable data on the future plans of business firms. Some firms do not decide upon their complete investment program at the beginning of the year and are unable to state their intentions precisely. Generally however, new investment expenditures, particularly those on structures and large installations, need previous planning and preparation and most firms are able to give a good estimate of expected outlays. In addition the seasonal character of construction in Canada frequently means that early decisions must be made regarding capital spending plans for the year ahead.

When comparing intentions with actuals, it should be kept in mind that the figures given represent the capital expenditures intentions of businessmen and others at the time the surveys are made. These intentions may change for a variety of reasons as the year progresses. Changes in the general business outlook may make it desirable to either modify or expand investment spending, changing price trends may result in revision of cost estimates, and shortages of materials or labour, unfavourable weather or labour disputes may retard progress on projects. In addition, individual businesses have different planning periods and in some cases plans are kept flexible as a matter of policy.

Table 25 provides a comparison of the 1982 expenditure intentions in January 1982, the revised expenditure intentions in June 1982; the preliminary estimate of realizations in January 1983 and the final expenditures for 1982 collected in 1983.

Coverage of the 1983-84 Survey (See Table 26)

Estimates for most of the sectors covered in this report are based on questionnaire surveys. The per cent coverage in each sector or industry is calculated by expressing expenditures of reporting firms as a percentage of published expenditures. Those groups for which independent estimates were made are listed in the table with a dash in the per cent column.

Etat comparatif des dépenses prévues et des dépenses réelles en 1982 (voir le tableau 25)

Pour déterminer à quel point les projets d'investissement correspondent à la réalité, il faut tenir compte de la mesure dans laquelle les investissements sont projetés d'avance et la mesure dans laquelle, lorsque la statistique de la période en cause est connue, les résultats se comparent aux intentions du début.

Pour ce qui est du premier point, il faut noter qu'il n'est pas toujours facile d'obtenir les données réellement valables au sujet des projets des entreprises commerciales. Certaines n'établissent pas au début de l'année un programme entier d'immobilisations et sont donc incapables d'indiquer leurs intentions avec précision. Toutefois, les nouvelles immobilisations, notamment celles qui visent des constructions et de grandes installations, nécessitent en général des plans et une assez longue préparation, de sorte que la plupart des entreprises peuvent donner une idée assez exacte de leurs dépenses prévues. En outre, à cause du caractère saisonnier de la construction au Canada, il est souvent nécessaire d'arrêter assez tôt le programme d'immobilisations pour l'année à venir.

Quant au rapport entre les prévisions et les dépenses réelles, il faut bien se rappeler que les chiffres donnés représentent les projets d'investissement des hommes d'affaires et autres au moment du relevé. Ces projets peuvent changer au cours de l'année pour diverses raisons. L'évolution des perspectives générales de commerce peut nécessiter certaines modifications ou même des additions à ces projets; des hausses ou des baisses de prix peuvent exiger un nouveau calcul du coût de l'entreprise, ou une rareté de matériaux et de main-d'œuvre ou encore les mauvais temps peuvent retarder les travaux. En outre, les entreprises particulières établissent leurs plans à des périodes différentes et certaines tiennent par principe à se réservé une certaine latitude.

Le tableau 25 présente un état comparatif des dépenses de 1982 projetées en janvier 1982, des projets des dépenses révisés en juin 1982, des réalisations estimatives en janvier 1983 et des dépenses réelles pour 1982 recueillies en 1983.

Envergure du relevé de 1983-84 (voir le tableau 26)

Pour la plupart des secteurs visés par le présent rapport, les chiffres sont fondés sur les réponses à un questionnaire circulaire. L'envergure du relevé est calculée d'après le pourcentage des projets déclarés par les entreprises en cause, par rapport au total des investissements publiés. Les groupes qui ont été l'objet de calculs de la part des tierces personnes sont mentionnés au tableau, mais aucun pourcentage n'est donné dans leur cas.

The estimates of total outlays in the groups covered by survey are thought to be of better quality than the independent estimates which are based on much less complete information.

Comparison of Private and Public Investment with "Gross Fixed Capital Formation" as Recorded in the National Income and Expenditure Accounts (See Table 27)

New investment as shown in this report includes all capital outlays of private organizations and governmental agencies acquiring durable physical assets. The totals do not, however, correspond exactly with the details published for gross fixed capital formation in the National Income and Expenditure Accounts because of further adjustments made for the purposes of the national accounting system. The effect and nature of these further additions is reflected in the classification groupings shown in Table 27 and the explanatory footnotes. The comparison is made for 1981 actual data only. Subsequent years are not included because of a difference in timing of revisions in the National Income and Expenditure Accounts and Private and Public Investment.

Capital and Repair Expenditures by Metropolitan Areas - Manufacturing (See Tables 28-31)

The expenditures are shown for 15 of the largest metropolitan areas of Canada for manufacturing only. Capital and repair expenditures are not available for all other sectors (e.g., utilities, trade, etc.) which are surveyed only at the provincial or territorial level. Statistics for some individual manufacturing industries are also provided for Montréal, Toronto and Vancouver.

The degree of detail released for manufacturing by metropolitan areas is limited because of the confidentiality clauses of the Statistics Act.

Dans le cas des groupes atteints par le relevé, les estimations semblent plus sûres que pour les groupes ayant été estimés par des tiers d'après des renseignements beaucoup moins complets.

Rapprochement des investissements privés et publics et de la "formation brute de capital fixe" figurant dans les comptes nationaux du revenu et des dépenses (voir le tableau 27)

Les nouveaux investissements qui figurent dans le présent rapport comprennent tous les capitaux consacrés par le secteur privé et les pouvoirs publics à l'acquisition de biens tangibles et durables. Par contre, le total ne correspond pas exactement aux chiffres détaillés que publient les comptes nationaux du revenu et des dépenses au titre de la formation brute de capital fixe; en effet pour les besoins de la comptabilité nationale, il a fallu procéder à des ajustements supplémentaires. L'effet, ainsi que la nature de ces additions, font l'objet d'une ventilation conforme au classement adopté pour le tableau 27 et aux notes explicatives. Le rapprochement est fait seulement pour les chiffres réels de 1981. On n'a pu inclure les années ultérieures à cause d'une discordance dans les dates pour les révisions des comptes nationaux du revenu et des dépenses et des investissements privés et publics.

Immobilisations et réparations par région métropolitaine - Industries manufacturières (voir les tableaux 28-31)

Pour 15 des plus grandes régions métropolitaines du Canada, nous ne publions que les dépenses du secteur manufacturier. Les dépenses d'immobilisations et de réparations ne sont pas disponibles pour tous les autres secteurs (e.g., services d'utilité publique, commerce, etc.) qui ne sont relevés qu'au niveau de la province ou du territoire. Les statistiques de certaines industries manufacturières en particulier sont fournies pour Montréal, Toronto et Vancouver.

Les détails fournis sur le secteur de la fabrication par région métropolitaine sont limités par les clauses de la Loi sur la statistique relative au caractère confidentiel des chiffres recueillis.

Footnotes

- (1) The capital expenditures on construction for the mining sector include outlays for on-property exploration and development but exclude outside or general exploration for mines, and exclude geological and geophysical expenditures for petroleum and gas. Starting with the 1982 data, on-property exploration and development expenditures include: (i) field expenditures on all physical work and surveys, (ii) "other related costs" such as applied administrative costs, general overhead and lease rental costs. In the earlier data the definition excluded the second group of "other related costs". For further details on actual expenditures see Catalogue 61-216 Investment Statistics - Exploration, Development and Capital and Repair Expenditures by Mining and Exploration Companies, 1982.
- (2) Also includes capital and repair expenditures by both metal and non-metal exploration companies.
- (3) Includes coal mines, gypsum, salt, potash and miscellaneous non-metal mines, and quarrying.
- (4) Also includes expenditures on facilities related to petroleum and gas wells and extraction of petroleum from shales or sands, natural gas processing plants and contract drilling for petroleum and gas.
- (5) Also includes expenditures for heavy water plants.
- (6) The SIC for broadcasting also includes community antenna television.
- (7) Includes toll highways and bridges, warehousing, water systems of private and provincial enterprises and other utilities.
- (8) See footnote (9).
- (9) The largest part of this item in accordance with the SIC is accounted for by expenditures of real estate companies engaged in developing, owning and leasing properties. The total represents all types of non-residential construction including factories and multi-purpose developments where facilities are provided for theatres, stores, hotel accommodation, etc.
- (10) Includes acquisition of machinery and equipment for lease and all other services not already shown in this table.

Notes

- (1) Les dépenses d'immobilisations en construction pour le secteur minier incluent les dépenses des travaux d'exploration et de mise en valeur à la mine ou au chantier; toutefois elles excluent les dépenses pour les travaux d'exploration de nature générale ou hors-chantier pour les mines et celles des études géologiques et géophysiques pour ce qui est des puits de pétrole et de gaz. À partir de données de 1982, les dépenses d'exploration (prospection) et de mise en valeur au terrain comprend: (i) les dépenses pour les travaux physiques et les levés sur le terrain, (ii) "autres frais" tels que les frais, généraux et les frais de location. Dans les données antérieures, le deuxième groupe "autres frais" étaient exclus. Pour des renseignements détaillés sur les dépenses réelles d'immobilisations voir n° 61-216 au catalogue Statistique des investissements - Dépenses d'exploration, de mise en valeur, d'immobilisations et de réparations par les compagnies minières et d'exploration, 1982.
- (2) Comprend également les dépenses en immobilisation et en réparation des compagnies d'exploration de minerais métalliques et non métalliques.
- (3) Comprend les mines de charbon, de gypse, de sel gemme, de potasse et de produits non métalliques divers, et de produits de carrières.
- (4) Comprend aussi les dépenses d'installations se rattachant aux puits de pétrole et de gaz et à l'extraction de pétrole des schistes ou des sables, aux usines de traitement du gaz naturel et aux entreprises de forage de puits de pétrole et de gaz à forfait.
- (5) De même, comprend les dépenses encourues par les usines d'eau lourde.
- (6) La CAÉ inclut avec radiodiffusion et télévision les services de télévision à antenne collective.
- (7) Y comprend les routes et les ponts à péage, l'entreposage, les services de distribution et de traitement d'eau d'entreprises privées et provinciales, ainsi que les autres services d'utilité publique.
- (8) Voir note (9).
- (9) Selon la CAÉ, la majeure partie de cette catégorie de dépenses est effectuée par les sociétés dont l'activité consiste à construire, posséder et louer des biens immobiliers. Ce chef représente tous genres de construction non-résidentielle, comme des usines et des projets devant servir à plusieurs fins, tel que les bâtiments qui comprennent: théâtres, magasins, hôtels, etc.
- (10) Comprend l'acquisition de machines et d'équipement à des fins de location et tous les autres services qui n'apparaissent pas séparément dans ce tableau.

- (11) The total for federal government departments includes data for departmental Crown corporations and excludes data for proprietary Crown corporations which are all classified as enterprises. Agency Crown corporations, on the other hand, are provisionally classified in part to enterprises and the remainder to government departments.
- (12) Estimates for government departments are meant to reflect the capital outlays likely to be achieved and therefore could differ from other series representing stated intentions of capital spending.
- (13) Capital expenditures on machinery and equipment include an estimate for "capital items charged to operating expenses", in the manufacturing, utilities and trade totals.
- (14) For further information regarding the private and public breakdowns, see the texts beginning Section III, Provinces and Territories and Section IV, Supplementary.
- (15) The percentage is calculated by dividing "Gross Fixed Capital Formation", as defined by the National Income and Expenditure Accounts, by the total "Gross National Expenditure".
- (16) These categories cover, in general, government owned establishments whose principal source of revenue is derived from the provision of goods and services to the public.
- (17) These categories include provincial hospitals, schools and universities, municipal hospitals and schools and federal government housing.
- (18) This category includes provincial hospitals, schools and universities.
- (19) This category includes municipal hospitals and schools.
- (20) Firms reporting in the mid-year survey were not asked to re-examine repair expenditures. Mid-year estimates are therefore a repeat of figures reported at the beginning of the year.
- (21) Not revised at mid-year.
- (22) Coverage is calculated by expressing expenditures of reporting firms as a percentage of published expenditures.
- (23) The capital expenditures allocated to capital items charged to operating expense are not included in the calculation of the coverage.
- (24) This group comprises several categories of commercial services not covered by direct surveys.
- (25) Coverage for residential housing is calculated by expressing public and privately initiated housing covered by survey as a percentage of estimated completions.
- (11) Les totaux pour les ministères du gouvernement fédéral comprennent les chiffres pour les corporations de département mais excluent les chiffres pour les corporations de propriétaire, ces dernières étant considérés comme entreprises publiques. D'autre part, les corporations de mandataire sont pour le moment classées en partie avec les entreprises publiques et en partie avec les ministères gouvernementaux.
- (12) Les évaluations des dépenses pour les ministères gouvernementaux sont basées sur les réalisations prévues. Par le fait même, la présente série pourrait différer d'autres statistiques se rapportant qu'aux prévisions.
- (13) Les dépenses en immobilisation pour les machines et l'outillage comprennent une estimation pour les "Biens-capitaux imputés sur les dépenses d'exploitation" dans les totaux pour le secteur de fabrication, le secteur des services d'utilité et le secteur du commerce.
- (14) Pour plus d'information sur la répartition privée et publique des investissements, voir les textes au début de la section III, provinces et territoires et section IV, supplémentaires.
- (15) Le pourcentage est calculé en divisant la "Formation brute de capital fixe" par les "Dépenses nationales brutes" tels qu'exprimés par les comptes nationaux du revenu et des dépenses.
- (16) Ces catégories comprennent, en général, les entreprises publiques qui tirent la majeure partie de leur revenu de la fourniture de biens et de services au public.
- (17) Ces catégories comprennent les écoles, les universités et les hôpitaux provinciaux; les écoles et les hôpitaux municipaux, les habitations du gouvernement fédéral.
- (18) Cette catégorie comprend les écoles, les universités et les hôpitaux provinciaux.
- (19) Cette catégorie comprend les écoles et les hôpitaux municipaux.
- (20) À l'occasion du relevé de la mi-année, les entreprises n'ont pas été invitées à revoir leurs projets de réparations. Les chiffres de la mi-année sont donc les mêmes que ceux du début de l'année.
- (21) N'a pas été révisée à la mi-année.
- (22) L'envergure du relevé est calculée d'après le pourcentage que les projets déclarés par les entreprises en cause représente par rapport au total des investissements publiés.
- (23) Les dépenses d'immobilisations allouées à l'item "Biens-capitaux imputés sur les dépenses d'exploitation" ne sont pas comprises dans le calcul de la couverture.
- (24) Ce groupe comprend plusieurs catégories de services commerciaux qui n'ont pas fait l'objet d'enquêtes directes.
- (25) Dans le secteur de l'habitation, l'envergure du relevé a été établie d'après le pourcentage que les projets publics et privés déclarés représentent par rapport au total prévu des maisons achevées.

- (26) Independent estimates were made of expenditures in these groups.
- (27) These adjustments comprise deductions for defense construction, net sales of used motor vehicles, scrap and salvage and an addition for transfer costs of land and existing buildings.
- (28) Also includes government business enterprises but not the portion of their capital expenditures considered to be part of government (direct) gross fixed capital formation.
- (29) Includes government built non-rental housing, expenditures for public hospitals, provincial and municipal schools, outlays made directly by government departments and the portion of capital expenditures of Crown corporations classified to this category.
- (30) Beginning in 1976, expenditures for the construction industry are projected from benchmark data derived from annual censuses of the construction industry.
- (31) Combination food stores and other chain stores were previously combined as chain stores.
- (32) Housing expenditures are derived from the data available at the time of publication. Revised and adjusted data are available in CANSIM Matrix No. 0442.
- (33) Confidential data points have been added to the "Other Manufacturing" category.
- (26) Dans ces groupes, certains projets ont été estimés par des tiers.
- (27) Ces ajustements comprennent une déduction au titre de la construction de la défense nationale, au titre des ventes nettes de véhicules automobiles usagés, et au titre de rebus et récupérations ainsi qu'une addition au titre des frais de transfert de terrain et de bâtiments existants.
- (28) Comprend également les entreprises publiques, à l'exclusion toutefois de la portion de leurs dépenses d'investissement considérée comme faisant partie de la formation brute (directe) de capital fixe pour les pouvoirs publics.
- (29) Comprend la construction gouvernementale pour l'habitation non destinée à la location, les dépenses pour les hôpitaux publics, les écoles provinciales et municipales, les déboursés effectués directement par les ministères gouvernementaux, ainsi que la partie des dépenses d'investissement des sociétés de la Couronne qui relève de la présente catégorie.
- (30) À compter de 1976, les dépenses de l'industrie de la construction sont projetées à partir de données de référence provenant de recensements annuels de l'industrie de la construction.
- (31) Auparavant, on retrouvait les magasins d'alimentation combinés et les autres magasins en série sous le même titre magasins en série.
- (32) Les dépenses pour l'habitation représente les données disponibles au moment de la publication. Les données révisées sont publiées dans la matrice de CANSIM numéro 0442.
- (33) Les données confidentielles ont été additionnées au groupe "Autres industries de fabrication".

SECTION V

STATISTICAL NOTES

Definitions

The main emphasis of the report is on new capital rather than on non-capitalized repair expenditures. New capital expenditures include the cost of procuring, constructing and installing new durable plant and machinery, whether for replacement of worn or obsolete assets, or as net additions to existing assets. Included are all capitalized costs such as architectural, legal and engineering fees, as well as the value of work on capital assets undertaken by firms with their own labour force. Gross outlays are reported without any deduction for scrap or trade-in value of old assets. Excluded are expenditures made for the acquisition of previously existing structures, for used machinery and equipment unless imported and for land since outlays of this type involve only the transfer of property and not the creation of a capital asset.

Construction includes building construction and all types of engineering construction such as roads, dams, transmission lines and pipelines, as well as oil drilling and mine development. The machinery and equipment category takes into account the purchase of all such items which are used either in producing goods or providing services but does not cover durable goods purchased for personal use. Included, as well as industrial machinery, are transportation equipment, agricultural implements, professional and scientific equipment, office and store furnishings and other similar capital goods. Excluded, for the purpose of this report, are outlays for machinery and equipment by the Department of National Defence.

The intention is to include the costs of all new plant and equipment which normally has a life of more than one year. For this reason companies were asked to report, as capital expenditures, all purchases to be charged to fixed asset accounts. This method of reporting omits certain types of equipment which are bought regularly out of ordinary revenue and charged to current account. Adjustments have been made where necessary to take account of such omitted capital items and separate figures are shown in the relevant tables under "Capital items charged to operating expenses".

RENSEIGNEMENTS STATISTIQUES

Définitions

Le rapport vise moins les réparations non-capitalisées que les immobilisations neuves. Celles-ci comprennent le coût d'acquisition, de construction et d'installation de nouvelles usines et machines durables, qu'il s'agisse de remplacer des biens usés ou désuets ou d'ajouter aux installations existantes, ainsi que tous les frais portés au compte de capital, comme les honoraires d'architectes, d'avocats et d'ingénieurs, et la valeur des travaux effectués par le propriétaire par l'entremise de ses propres ouvriers. Le rapport indique les dépenses brutes, sans déduction pour la valeur des biens mis au rancart ou cédés en échange de biens nouveaux, mais il ne comprend pas les achats de constructions existantes, de machines ou d'équipement usagés, à moins qu'ils n'aient été importés, ni de terrains, puisque dans ces cas il s'agit d'une simple cession des droits de propriété et non de la création d'un bien nouveau.

La construction comprend les bâtiments et tous les travaux de génie, comme les routes, les barrages, les lignes de transmission et les pipelines, ainsi que le forage de puits de pétrole et la mise en exploitation des mines. Dans le secteur des machines et de l'outillage, les achats comprennent tous les articles employés à la production de biens et de services mais non les biens durables achetés pour usage personnel. Sous cette rubrique sont inclus, en plus des machines industrielles, le matériel de transport, les instruments agricoles, le matériel professionnel et scientifique, les ameublements de bureaux et de magasins et autres biens capitaux du même genre. Toutefois, le présent rapport ne tient pas compte des montants consacrés à l'acquisition de machines et d'outillage par le Ministère de la Défense nationale.

On a visé à inclure le prix de toutes les nouvelles usines et de nouvelles machines et outillage d'une durée normale de plus d'un an. C'est pourquoi on a demandé aux sociétés d'inscrire comme immobilisations tous les achats devant être portés au compte de capital fixe. Ainsi, il n'est pas tenu compte de certains éléments d'actif achetés régulièrement au moyen de recettes ordinaires et postés au compte courant. Des rajustements ont été faits lorsqu'il a semblé nécessaire de tenir compte de ces éléments et les sommes en cause figurent aux tableaux pertinents sous le titre "Biens-capitaux imputés sur les dépenses d'exploitation".

Housing is not generally considered a capital expenditure in the sense mentioned above but it has been included in this report because it forms a large proportion of construction expenditures and has cyclical fluctuations similar to those which characterize business, institutional and government capital expenditures.

The repair expenditures shown in the tables represent the non-capitalized outlays made to maintain the operating efficiency of the existing stock of durable physical assets. Where the repair costs are large enough to materially lengthen the expected serviceable life of the assets, increase its capacity or otherwise raise its productivity, they are treated as capital expenditures on new construction or on new machinery and equipment.

Methods

The figures in the various tables of this report are estimates of total expenditures. In order to approximate full coverage for Canada, adjustments were made to allow for the smaller establishments which are not surveyed and for establishments which did not report. In manufacturing, the method used to inflate the reported expenditures was to multiply the known expenditures by a factor obtained by dividing the total value of shipments for the most recent year available of all the establishments in each industry by the corresponding total for the establishments reporting in the current surveys. The use of shipments as a related indicator provides a framework of analysis in the estimation procedures to take account of relevant industry characteristics such as the size of establishments. In the utilities, trade, finance and institutional and commercial services sectors the same principle has been followed using appropriate basic data for the sector concerned. Expenditures reported by establishments for which no production or other basic data are available are included as "net additions". It is believed that the estimating procedures for non-reporting establishments and the sectors not covered by direct survey, do not introduce any great margin of error into the total. Estimates for individual industries or regions are, of course, subject to greater error than the total figures for Canada.

In a few areas, where the survey approach is not considered to be practical, expenditure estimates were arrived at independently on the basis of current trends and expert

La construction d'habitations n'est pas habituellement considérée comme une immobilisation au sens indiqué ci-dessus mais on l'a incluse dans ce rapport parce qu'elle représente une forte proportion des dépenses en construction et que le cycle de ses fluctuations est analogue à celui qui caractérise les immobilisations des entreprises commerciales, des institutions et des gouvernements.

Les dépenses en réparation, figurant dans les tableaux, représentent les déboursés non-capitalisés effectués en vue de maintenir les biens matériels durables en bon état de fonctionnement. Lorsque ces dépenses atteignent des sommes suffisantes et elles ont pour effet d'accroître la durée prévue ou la productivité d'éléments d'actif, elles sont considérées comme des immobilisations en constructions neuves ou en machines et outillage neufs.

Méthodes

Les chiffres qui apparaissent dans les divers tableaux sont des estimations des dépenses globales. Afin de se rapprocher le plus possible du total pour tout le Canada, on a effectué des rajustements de façon à faire la part des plus petits établissements qui n'ont pas fait partie de l'enquête ou n'y ont pas répondu. Pour le secteur de la fabrication, la méthode employée pour gonfler le montant des dépenses en immobilisation déclarées consiste à multiplier ce dernier par le facteur du rapport de la valeur totale des expéditions, pour l'année la plus récente, de tous les établissements ayant répondu à l'enquête courante, suivant la disponibilité des données. L'utilisation des expéditions comme indicateur connexe insère une analyse d'ensemble dans les procédures d'estimations afin de tenir compte des caractéristiques pertinentes tel que la grosseur d'un établissement. Pour les services d'utilité publique, le commerce, la finance, les institutions et les services commerciaux, on a appliqué le même principe en cherchant des données de base appropriées au secteur en cause. Les projets mentionnés par les établissements à l'égard desquelles aucun renseignement en matière de production ou autre ne pouvait être obtenu, sont inscrits comme "additions nettes". Il y a lieu de croire que la formule d'estimation employée à l'égard des établissements qui n'ont pas répondu au questionnaire et des secteurs que le relevé n'a pas atteint directement, n'a pas pu fausser sensiblement le montant global.

Dans certains secteurs, où la méthode d'enquête n'a pas semblé pratique, les montants ont été calculés séparément d'après la tendance courante et l'opinion de spécialistes en la matière.

opinion in these fields. Some of the areas so estimated are agriculture and fishing investment. The estimates of total outlays in the groups covered by survey are thought to be of better quality than the independent estimates which are based on much less complete information.

Housing estimates were made on a different basis from those derived from information submitted directly by businesses and governments. Last year's estimates of the volume of residential construction were prepared on the basis of results from surveys conducted by the Canada Mortgage and Housing Corporation, and the value estimates were prepared by Statistics Canada. These value estimates were calculated by means of a sensitive methodology making use of the duration of construction and monthly measures of work put in place for various types of construction.

Appraisal of the probable volume of new housing construction in the current year was made by representatives of the Corporation who assessed market conditions, mortgage facilities, current and proposed housing policies. Finally an allowance was made for other housing expenditures such as home conversions, mobile homes, alterations, home improvements and acquisition costs which currently account for approximately 20% of total expenditures. Allowing for probable change in construction costs, estimates were then prepared for the value of construction work carried over from last year and the value of work expected to be undertaken this year.

Construction Expenditures - By Type of Structure

For details of construction activity by type of structure see the publication **Construction in Canada** (Catalogue 64-201).

The statistics for these types of structure come from the same capital and repair expenditures surveys that produce **Private and Public Investment in Canada, Intentions**.

matière. Cette méthode d'évaluation a été employée surtout à l'égard des investissements agricoles et de ceux de l'industrie de la pêche. Dans le cas des groupes atteints par le relevé, les estimations semblent plus sûres que pour les groupes ayant été estimés par des tiers d'après des renseignements beaucoup moins complets.

Pour l'habitation, les estimations n'ont pas été établies sur la même base que celles qui découlent des renseignements fournis directement par les entreprises ou les pouvoirs publics. Pour l'année dernière, Statistique Canada a estimé les dépenses d'habitation en se basant sur les résultats des enquêtes menées par la Société canadienne d'hypothèques et de logement et au moyen d'une méthodologie sensible fondée sur la durée des travaux et sur les réalisations mensuelles des différents types de construction.

Pour l'année courante, des estimations du volume probable des travaux de construction domiciliaire ont été faites par des représentants de la société, lesquels se fondent sur les conditions du marché, les disponibilités de financement et les politiques d'habitation proposées. Enfin, on a tenu compte des autres dépenses d'habitation telles que les transformations, les maisons mobiles, les modifications, les améliorations et les frais d'acquisition qui représentent environ 20% des dépenses totales. En tenant compte de l'évolution probable des coûts de la construction, on a pu alors estimer la valeur des travaux reportés pour l'année dernière et celle des travaux attendus cette année.

Dépenses de construction - Par genre de construction

On trouvera dans la publication **La construction au Canada** (n° 64-201 au catalogue) le détail des travaux de construction selon le genre.

Les enquêtes sur les dépenses d'immobilisations et de réparations, dont les résultats apparaissent dans la publication **Investissements privés et publics au Canada - Perspective**, nous fournissent également les statistiques pour ces genres de construction.

SELECTED PUBLICATIONS DEALING WITH INVESTMENT ACTIVITY
