PRICE MOVEMENTS, MAY, 1949 (PRELIMINARY)\*

COST OF LIVING: The Dominion Bureau of Statistics cost-of-living index advanced from 159.3 to 159.5 between April 1st and May 2, 1949. The slight increase was mainly attributable to a rise of 1.0 in the food index which moved from 198.5 to 199.5 as a result of seasonal increases in meats, coupled with advances in a number of other foods. The clothing index moved up 0.1 to 183.3, while the index of homefurnishings and services rose the same amount to 168.1. The sharpest change was registered by the fuel and light index which decreased from 131.0 to 129.1 due to price declines for coke and anthracite coal in Ontario and Quebec. The indexes of miscellaneous goods and services and rents were unchanged at 128.4 and 122.4 respectively.

From August, 1939 to May, 1949 the increase in the cost-of-living index was 58.2 per cent.
