DOMINION BUREAU OF STATISTICS  
AGRICULTURAL DIVISION  
OTTAWA, CANADA

Published by Authority of the Hon. James A. MacKinnon, M.P.,  
Minister of Trade and Commerce

Dominion Statistician:	Herbert Marshall
Director, Agricultural Division:	C. V. Parker
Statistician, Farm Finance Section:	W. G. Morris

Ottawa, January 12, 1948: The Dominion Bureau of Statistics today issues the regular monthly report on index numbers of prices received by Canadian farmers for agricultural products. The index numbers for the month of November 1947, are initially released and revisions of previously published data are included. Most of the price information used in compiling this index is obtained from reports furnished monthly by a corps of volunteer farm price correspondents throughout Canada.

INDEX NUMBERS OF FARM PRICES OF AGRICULTURAL PRODUCTS

Prices received by Canadian farmers for agricultural products at November 15 averaged higher than at the corresponding date in 1946. The index number of prices received for all products at 203.9 (1935-39 = 100) was 19.3 points above the index number of 184.6 a year ago.

The index numbers for all provinces have registered substantial increases when compared with November of last year with higher prices for grains, live stock, dairy products and potatoes being chiefly responsible. Increases are shown also in the indices of prices for poultry and eggs in all provinces except Prince Edward Island, Manitoba and Saskatchewan.

1/ Includes revised data since last report. See table over-leaf.

The table over-leaf presents the annual averages of Index Numbers of Farm Prices of Agricultural Products by provinces for the period 1935-45, and the monthly index numbers for the year 1946 and the first eleven months of 1947. The prices used in computing the index are, as closely as can be determined, the prices which are actually received by farmers. Thus the storage, transportation, processing and handling charges which are not actually received by farmers are not included. On the other hand subsidies, bonuses and premiums which can be attributed to specific products are all included to date.

Advance and final equalization payments on oats and barley are included up to July 1945. From that date the advance payments only are included until their discontinuance on March 18, 1947. The amounts paid per bushel on wheat participation certificates are included in the wheat prices up to July 1945. In the 1945-46 crop year the ten cents per bushel retroactive increase announced on July 30, 1946 is included.

In compiling the index the fixed base weighted aggregative method has been used. Each commodity has been weighted by the annual average amounts sold in the five-year base period 1935-39. No adjustments for seasonal variation of the prices have been made. The index is based upon prices for about 50 farm products which contributed approximately 90 per cent to the total cash income received by farmers from the sale of farm products during the base period. The series is subject to revision as more complete data become available.

Price: 10 cents per copy.
