JUL 13 1940

DEPARTMENT OF TRADE AND COMMERCE DOMINION BUREAU OF STATISTICS AGRICULTURE DIVISION OTTAWA - CANADA

Published by Authority of the Rt. Hon. C. D. Howe, Minister of Trade and Commerce

Price: 10 cents

OTTAWA, July 12, 1949: The Dominion Bureau of Statistics today issues the regular monthly report on index numbers of prices received by Canadian Farmers for agricultural products. The index numbers for the month of May 1949, are initially released and revisions of previously published data are included. Most of the price information used in compiling this index is obtained from reports furnished monthly by a corps of volunteer farm price correspondents throughout Canada.

INDEX NUMBERS OF FARM PRICES OF AGRICULTURAL PRODUCTS

The index of farm prices of agricultural products for May 1949 is estimated at 250.8 (1935-39 = 100) as compared with a revised estimate of 250.7 for April and 247.6 for the month of May 1948. Compared with a year ago, higher prices, for livestock, fruits, tobacco, poultry and eggs more than offset declines in the prices of coarse grains, dairy products, potatoes, vegetables and furs. Compared with the previous month, higher prices for grains and livestock offset lower prices for dairy products, potatoes and vegetables.

Index Numbers of Farm Prices of Agricultural Products for Canada 1/
(Fase 1935-39 = 100)

	Annual Averages		Monthly Averages					
			Month	1948	1949			
1935		88.0	January	240.4	257.4			
1936		96.9	February	240.1	252.9

1946		200.8	December	259.6				
1947		212.5						
1948		252.6						

^{1/} Includes revised data since last report. See table page 3.

The table on the following page presents the annual average of Index Numbers of Farm Prices of Agricultural Products by Provinces for the period 1935-47, and the monthly index numbers for the years 1948 and 1949. The prices used in computing the index are, as closely as can be determined, the prices which are actually received by farmers. Thus the storage, transportation, processing and handling charges which are not actually received by farmers are not included. On the other hand, subsidies, bonuses and premiums which can be attributed to specific products are all included to date.

The amounts paid per bushel on wheat participation certificates are included in the wheat prices up to July 1945. Subsequently, wheat prices include the ten cents per bushel retroactive increase announced on July 30, 1946 and paid on the 1945 crop. They also include the 20 cents retroactive payment made on all wheat delivered during the crop years 1945-46, 1946-47 and up to April 1, 1948, and the recently announced 20 cents per bushel payment to be made on all wheat delivered during the crop years 1945-46, 1946-47, 1947-48 and up to April 1, 1949.

Oats and barley prices include advance equalization payments until their discontinuance on March 18, 1947 and the adjustment payment made by the Canadian Wheat Board and western grain companies on deliveries of these grains from August 1 to October 21, 1947 when price ceilings were removed. In addition, oats and barley prices include final equalization payments up to July 1948. From August 1, 1946 to March 17, 1947, barley prices include the 10 cents adjustment payment made in respect of barley delivered during that period.

Flax prices include the adjustment payment of 50 cents per bushel made on all deliveries of commercial flaxseed during the 1947-48 crop year.

In compiling the index the fixed base weighted aggregative method has been used. Each commodity has been weighted by the annual average amounts sold in the five-year base period 1935-39. No adjustments for seasonal variation of the prices have been made. The index is based upon prices for about 50 farm products which contributed approximately 90 per cent to the total cash income received by farmers from the sale of farm products during the base period. The series is subject to revision as more complete data become available.
