Memorandum

1955 No. 3

Research Department

Price: \$1.00 per year

INDEX NUMBERS OF FARM PRICES OF AGRICULTURAL PRODUCTS, MARCH 1955 1/(1935-39 = 100)

The index of farm prices of agricultural products for March is estimated at 220.7, down from the revised estimate of 222.3 for February. Lower prices for grains, live stock and dairy products more than offset higher prices for potatoes, and poultry and eggs.

INDEX NUMBERS OF FARM PRICES OF AGRICULTURAL PRODUCTS (1935-39 = 100)

	Mon	thly Index		Annual Index			
Province	March 1955 <u>2</u> /	Feb. 1955 <u>2</u> /	March 1954 <u>3</u> /	1954 <u>4</u> /	1953 <u>5</u> /	1952

CANADA 1/	220.7	222.3	237.6	232.0	249.5	274.4	

1/ Excludes Newfoundland.

2/ Based on initial prices only for wheat, cats and barley in Manitoba, Saskatchewan and Alberta.

3/ Based on initial price plus ten-cent interim payment for wheat in Manitoba, Easkatchewan and Alberta.

4/ For Manitoba, Saskatchewan and Alberta, the index is based on initial prices plus a ten-cent interim payment for wheat for the period January to July inclusive, and on initial prices only for wheat, oats and barley for the period August to December inclusive.

5/ Based on initial price plus ten-cent interim payment for wheat in Manitoba.
Saskatchewan and Alberta for the period August to December inclusive.

5504-502-35

Prepared in Research Section, AGRICULTURE DIVISION.

In comparing current index numbers with those prior to August 1954, the following points should be considered. Western grain prices used in the construction of the index prior to August 1, 1954 are final prices for all grains except wheat. For the crop year 1953-54, the western wheat prices used are initial prices plus a ten-cent interim payment. Since August 1, 1954, only initial prices are available for wheat, oats and barley in the Prairie Provinces. Any subsequent participation payments made on the 1953 crop of wheat and on the 1954 crops of wheat, oats and barley will be added to the prices currently used and the index revised upward accordingly. An increase of 10 cents per bushel in the prices of western wheat, oats or barley would result in upward revisions in the indices for each of the Prairie Provinces and Canada approximately as follows, in points:

	Manitoba	Saskatchewan	Alberta	Canada
Wheat	6.2	9.3	8.1	4.0
Oats Barley	2.3	0.5	0.4	0.4

Since the first of August 1954, initial prices to producers, basis Fort William--Port Arthur, have amounted to \$1.40 per bushel for No. 1 Northern wheat, 65 cents per bushel for No. 2 C.W. oats and 96 cents per bushel for No. 3 C.W. 6-row barley. In addition to the payments made at the time of delivery producer certificates are issued to the grower covering quantities and grades delivered. These certificates entitle producers to share in any surpluses accumulated by the Board through the sale of these grains delivered to the Board during the crop year 1954-55. Any participation payments made on these grains at a later date will be added to the prices currently used in the price index and the index revised upward accordingly.

Most of the price information used in compiling the index is obtained from reports furnished monthly by volunteer farm correspondents throughout Canada. The prices used in computing the index are, as closely as can be determined, the prices which are actually received by farmers. Thus the storage, transportation, processing and handling charges which are not actually received by farmers are not included. On the other hand, subsidies, bonuses and premiums which can be attributed to specific products are all included to date.

The prices of wheat, cats, barley and flaxseed contain all Canadian Wheat Board payments including the recently announced final payments of 6.3 cents for cats, 9.7 cents for barley, and the interim payment of 10 cents per bushel for wheat. All payments of this kind are included in the year in which earned, not in the year in which paid.

In compiling the index the fixed base weighted aggregative method has been used. Each commodity has been weighted by the annual average amounts sold in the five-year base period 1935-39. No adjustments for seasonal variation of the prices have been made. The index is based upon prices for about 50 farm products which contributed approximately 90 per cent to the total cash income received by farmers from the sale of farm products, during the base period. The series is subject to revision as more complete data become available.
