## Memorandum

1956 No. 1

Price: \$1.00 per year

INDEX NUMBERS OF FARM PRICES OF AGRICULTURAL PRODUCTS, JANUARY 1956 1/-  
(1935-39 = 100)

The index of farm prices of agricultural products is estimated at 218.3 for January, 1.4 points below the revised figure of 219.7 for December. A fairly substantial decline in the price of eggs together with minor reductions for grains and livestock more than offset higher potato prices

INDEX NUMBERS OF FARM PRICES OF AGRICULTURAL PRODUCTS  
(1935-39 = 100)

	Monthly Index			Annual Index		
	Jan 2/ 1956	Dec 2/ 1955	Jan 3/ 1955	4/ 1955	5/ 1954	1953
Prince Edward Island	168.7	160.2	213.7	220.9	196.1	191.5
Nova Scotia	201.7	202.0	225.8	225.3	230.2	234.8
New Brunswick	198.5	184.2	218.9	226.1	211.8	213.2
Quebec	255.3	255.3	262.5	263.3	264.3	272.1
Ontario	239.9	241.8	246.3	249.6	252.8	263.8
Manitoba	208.1	209.9	213.5	213.8	224.5	245.3
Saskatchewan	189.2	190.8	184.1	187.6	204.0	228.7
Alberta	196.7	200.7	209.4	209.3	228.4	247.8
British Columbia	255.6	254.4	252.5	254.3	251.2	265.7
CANADA 1/	218.3	219.7	224.2	226.3	234.8	250.4

1/ Excludes Newfoundland.

2/ Based on initial prices only for wheat, oats and barley in Manitoba, Saskatchewan and Alberta.

3/ Based on initial price plus interim payment for wheat in Manitoba, Saskatchewan and Alberta.

4/ For Manitoba, Saskatchewan and Alberta, the index is based on the initial price plus interim payment for wheat for the period January to July inclusive, and on initial prices only for wheat, oats and barley for the period August to December inclusive.

5/ For Manitoba, Saskatchewan and Alberta, the index is based on the initial price plus interim payment for wheat for the period August to December inclusive.

5504-502-16

Prepared in Research Section, AGRICULTURE DIVISION.

In comparing current index numbers with those prior to August 1954 the following points should be considered. Prices for western grains used in the construction of the index prior to August 1, 1954 were final prices. For the period August 1, 1954 to July 31, 1955 western wheat prices were initial prices plus an interim payment. Since August 1, 1955 only initial prices have been available for wheat, oats and barley. Any subsequent participation payments made on the 1954 crop of wheat and the 1955 crops of wheat, oats and barley will be added to the prices currently used and the index revised upward accordingly. An increase of 10 cents per bushel in the prices of western wheat, oats or barley would result in upward revisions in the indices for each of the Prairie Provinces and Canada approximately as follows, in points:

	<u>Manitoba</u>	<u>Saskatchewan</u>	<u>Alberta</u>	<u>Canada</u>
Wheat .....	6.2	9.3	8.1	4.0
Oats .....	1.0	1.1	1.2	0.5
Barley .....	2.3	0.5	0.4	0.4

Since August 1, 1955, initial prices to producers at Fort William - Port Arthur, have been on the basis of \$1.40 per bushel for No. 1 Northern wheat, 65 cents per bushel for No. 2 C.W. oats, and 96 cents per bushel for No. 3 C.W. six-row barley. In addition to the payments made at the time of delivery producer certificates are issued to the grower covering quantities and grades delivered. These certificates entitle producers to share in any surpluses accumulated by the Board through the sale of these grains delivered to the Board. Any participation payments made on these grains at a later date will be added to the prices currently used in the price index and the index revised upward accordingly.

Most of the price information used in compiling the index is obtained from reports furnished monthly by volunteer farm correspondents throughout Canada. The prices used in computing the index are, as closely as can be determined, the prices which are actually received by farmers. Thus the storage, transportation, processing and handling charges which are not actually received by farmers are not included. On the other hand, subsidies, bonuses and premiums which can be attributed to specific products are all included to date.

The prices of wheat, oats, barley and flaxseed contain all Canadian Wheat Board payments announced to date including the recently announced interim payment on the 1954 wheat crop. All payment of this kind are included in the year in which earned not in the year in which paid.

In compiling the index the fixed base weighted aggregative method has been used. Each commodity has been weighted by the annual average amounts sold in the five-year base period 1935-39. No adjustments for seasonal variation of the prices have been made. The index is based upon prices for about 50 farm products which contributed approximately 90 per cent to the total cash income received by farmers from the sale of farm products, during the base period. The series is subject to revisions as more complete data become available.
