Price: \$1.00 per year

INDEX NUMBERS OF FARM PRICES OF AGRICULTURAL PRODUCTS, SEPTEMBER 1956 1/-
(1935-39 = 100)

A preliminary estimate places the index of farm prices of agricultural products at 229.7 for September. This is 2.9 points below the revised estimate of 232.6 for August, but 4.5 points above the comparable estimate of 225.2 for September 1955. Compared with the preceding month, September prices were lower for grains, potatoes, and poultry & eggs, but higher for dairy products and livestock. In contrast with September a year ago, higher prices for livestock, dairy products and potatoes more than offset lower prices for poultry and eggs.

INDEX NUMBERS OF FARM PRICES OF AGRICULTURAL PRODUCTS
(1935-39 = 100)

	Monthly Index			Annual Index		
	Sept. 2/ 1956	Aug. 2/ 1956	Sept. 2/ 1955	1955 3/ 1954	1954	1953
Prince Edward Island	191.3	279.5	169.4	220.6	196.1	191.5
Nova Scotia	208.8	210.0	189.1	220.0	230.2	234.8
New Brunswick	208.3	259.9	180.8	226.0	211.8	213.2
Quebec	260.8	263.0	259.7	261.9	264.3	272.1
Ontario	258.1	259.2	250.4	249.2	252.8	263.8
Manitoba	216.5	217.6	214.1	218.3	227.5	245.3
Saskatchewan	191.8	194.2	193.4	194.2	208.7	228.7
Alberta	213.6	213.8	211.9	215.0	232.4	247.8
British Columbia	259.5	252.5	243.9	248.2	249.6	265.7
CANADA 1/	229.7	232.6	225.2	228.5	236.8	250.4

1/ Excludes Newfoundland.

2/ Based on initial prices only for wheat, oats and barley in Manitoba, Saskatchewan and Alberta.

3/ For Manitoba, Saskatchewan and Alberta, the index is based on initial prices only for wheat, oats and barley for the period August to December inclusive.

5504-502-96

Prepared in Research Section, AGRICULTURE DIVISION.

In comparing current index numbers with those prior to August 1955, the following points should be considered. Western grain prices used in the construction of the index prior to August 1, 1955 are final prices. Prices for western grains used in the construction of the index since August 1, 1955 are initial prices only for wheat, oats and barley. Any subsequent participation payments made on the 1955 and 1956 crops of western wheat, oats and barley will be added to the western grain prices currently used for the period August 1, 1955 to date and the index revised upward accordingly. An increase of 10 cents per bushel in the prices of western wheat, oats or barley would result in upward revisions in the indices for each of the Prairie Provinces and Canada approximately as follows, in points:

	<u>Manitoba</u>	<u>Saskatchewan</u>	<u>Alberta</u>	<u>Canada</u>
Wheat	6.2	9.3	8.1	4.0
Oats	1.0	1.1	1.2	0.5
Barley	2.3	0.5	0.4	0.4

Since August 1, 1955, initial prices to producers at Fort William - Port Arthur, have been on the basis of \$1.40 per bushel for No. 1 Northern wheat, 65 cents per bushel for No. 2 C.W. oats, and 96 cents per bushel for No. 3 C.W. six-row barley. In addition to the payments made at the time of delivery producer certificates are issued to the grower covering quantities and grades delivered. These certificates entitle producers to share in any surpluses accumulated by the Board through the sale of these grains delivered to the Board. Any participation payments made on these grains at a later date will be added to the prices currently used in the price index and the index revised upward accordingly.

Most of the price information used in compiling the index is obtained from reports furnished monthly by volunteer farm correspondents throughout Canada. The prices used in computing the index are, as closely as can be determined, the prices which are actually received by farmers. Thus the storage, transportation, processing and handling charges which are not actually received by farmers are not included. On the other hand, subsidies, bonuses and premiums which can be attributed to specific products are all included to date.

The prices of wheat, oats, barley and flaxseed contain all Canadian Wheat Board payments announced to date. All payments of this kind are included in the year in which earned not in the year in which paid.

In compiling the index the fixed base weighted aggregative method has been used. Each commodity has been weighted by the annual average amounts sold in the five-year base period 1935-39. No adjustments for seasonal variation of the prices have been made. The index is based upon prices for about 50 farm products which contributed approximately 90 per cent of the total cash income received by farmers from the sale of farm products, during the base period. The series is subject to revisions as more complete data become available.
