| Regina | (359-5405) |
| Edmonton | (420-3027) |
| Vancouver | (666-3695) |

Toll-free access to the regional statistical information service is provided in Nova Scotia, New Brunswick, and Prince Edward Island by telephoning 1-800-565-7192. Throughout Saskatchewan, the Regina office can be reached by dialing 1(112)800-667-3524, and throughout Alberta, the Edmonton office can be reached by dialing 1-800-222-6400.

Nota

On peut se procurer cette publication, ainsi que toutes les publications du gouvernement du Canada, auprès des agents autorisés locaux, dans les librairies ordinaires ou par la poste.

Les commandes par la poste devront parvenir à Ventes et services de publications, Statistique Canada, Ottawa, K1A 0V7, ou à Imprimerie et édition, Approvisionnements et Services Canada, Ottawa, K1A 0S9.

Toutes demandes de renseignements sur la présente publication doivent être adressées à:

Division des industries manufacturières et primaires,
Section de l'énergie

Statistique Canada, Ottawa, K1A 0T6 (téléphone: 996-3139) ou à un bureau local des Services consultatifs situé aux endroits suivants:

| | |

Symbols

The following standard symbols are used in Statistics Canada publications:

- . . figures not available.
- . . figures not appropriate or not applicable.
- nil or zero.
- amount too small to be expressed.
- P preliminary figures.
- R revised figures.
- X confidential to meet secrecy requirements of the Statistics Act.

Signes conventionnels

Les signes conventionnels suivants sont employés uniformément dans les publications de Statistique Canada:

- . . nombres indisponibles.
- . . n'ayant pas lieu de figurer.
- néant ou zéro.
- nombres infimes.
- P nombres provisoires.
- R nombres rectifiés.
- X confidentiel en vertu des dispositions de la Loi sur la statistique relatives au secret.

Introduction

Farm Input Price Indexes (FIFI), 1971 = 100, are designed to measure price movements of inputs used in Canadian farming in 1971. The current indexes are calculated for the period starting 1971. Historically, these series succeed the previous FIFI, 1961 = 100 covering 1961 to 1977 and in broader terms, of Price Index Numbers of Commodities and Services Used by Farmers 1935-39 = 100 for the years 1913 to 1971.

All the index series have been published in Catalogue 62-004. The 1971 = 100 are also available on CANSIM.

The base-weighted indexes (Laspeyre's type) give an estimate of how much more or less it would cost to purchase a specified group of inputs at present as opposed to the base year. The weights are based on the 1971 estimates for farm expenditures and used in the general formula:

$$I_t = \frac{\sum \frac{P_t}{P_o} P_o Q_o}{\sum P_o Q_o} \times 100$$

where I_t is an index for the current period, P_t and P_o are item prices for the current and the base period respectively, and Q_o is a physical quantity of the item used in the base period.

Price sources are of several types. The first utilizes information gathered directly from farm suppliers (building materials, hardware, farm machinery, trucks, petroleum products, seed, pesticides, twine, electricity, artificial insemination); the second consists of other price indexes such as Industry Selling Price Indexes (fertilizer) and Consumer Price Index (autos, auto-parts, motor vehicle licences and insurance, telephone); the third type are business associations data (construction labour); the fourth type is represented by data collected by other divisions of Statistics Canada and other federal departments (farm labour, feed, taxes, federal livestock, interest). For certain indexes direct pricing is not possible in these instances (Custom Work, Farm Rent) imputation is used.

Introduction

Les indices des prix des entrées dans l'agriculture (IPEA), dont la base est 100 en 1971, servent à mesurer les mouvements des prix des entrées dans l'agriculture canadienne par rapport à ce qu'ils étaient en 1971. Les indices courants sont calculés pour la période depuis 1971. Ces indices sont la suite des IPEA 1961 = 100, qui ont couvert la période allant de 1961 à 1977, et, de façon plus générale, des indices des prix des produits et des services utilisés par les agriculteurs (1935-39 = 100), qui ont couvert les années 1913 à 1971.

Toutes ces séries d'indices ont paru dans la publication n° 62-004 au catalogue. Les indices 1971 = 100 sont également enregistrés sur CANSIM.

Ces indices pondérées (du type Layspeyer) donnent une estimation de ce qu'il en coûterait en plus ou en moins pour acheter au moment présent un groupe particulier d'entrées (ou facteurs de production) par rapport à l'année de base. Les coefficients de pondération sont fondés sur les estimations des dépenses agricoles pour 1971 et sont employés selon la formule générale suivante:

$$I_t = \frac{\sum \frac{P_t}{P_o} P_o Q_o}{\sum P_o Q_o} \times 100$$

où I_t est un indice pour la période courante, P_t et P_o sont les prix des articles pris en compte pour la période courante et la période de base respectivement, et Q_o est une quantité matérielle de l'article utilisé au cours de la période de base.

Les prix proviennent de plusieurs sources. En premier lieu, on se sert des renseignements recueillis directement auprès des fournisseurs des agriculteurs (matériaux de construction, quincaillerie, machines agricoles, camions, produits pétroliers, semences, pesticides, ficelle, électricité, insémination artificielle). La deuxième source comprend d'autres indices tels que l'indice des prix de vente dans l'industrie (engrais) et l'indice des prix à la consommation (autos, pièces d'autos, immatriculation et assurance des véhicules à moteur, téléphone). La troisième source comprend les données fournies par des associations commerciales ou autre (main-d'œuvre pour la construction). La quatrième source comprend les données recueillies par d'autres divisions de Statistique Canada et d'autres ministères fédéraux (main-d'œuvre agricole, aliments pour animaux, impôts, élevage du bétail, intérêt). Dans le cas de certains indices, le relevé direct des prix semble peu approprié; on a alors recours à l'imputation (travail à façon, loyer agricole).

The FPI are suitable for use wherever a measure of movement of farm input prices is needed; from price monitoring through analytical studies, econometric models, cost escalating for stabilization programs, for deflating or inflating current dollar farm expenditures. Precaution should, however, be exercised when using the indexes. Since the indexes assume a constant "basket" of goods, they should not be interpreted as a measure of production cost movement because of substitution effects and changes in productivity which might have taken place since 1971. Also, when comparing various input indexes or the regional indexes for the same input, it should be kept in mind that they do not indicate absolute level of prices, just relative change from 1971.

For further information on concepts and methods please contact Vaclav Krabicka, Agriculture Price Unit, Prices Divisions, Ottawa, K1A 0T6, Telephone (613)995-5764.

Les IPEA conviennent à toute mesure du mouvement des prix des entrées dans l'agriculture, qu'il s'agisse d'un simple contrôle faisant appel à des études analytiques ou à des modèles économétriques, de l'indexation des coûts dans le cadre de programmes de stabilisation, du gonflement ou du dégonflement des dépenses agricoles en dollars courants. Il faut toutefois utiliser ces indices avec précaution. Étant donné qu'ils supposent un "panier" constant de biens et de prix, il ne faut pas les interpréter comme étant une mesure du mouvement des coûts de production, car des substitutions peuvent avoir été faites et des changements peuvent avoir été apportés à la productivité depuis 1971. De même, lorsqu'on compare divers indices des prix des entrées ou des indices régionaux, il faut se rappeler qu'ils n'indiquent pas un niveau absolu des prix, seulement le changement relatif depuis 1971.

Pour plus de renseignements sur les concepts et les méthodes, prière de s'adresser à Vaclav Krabicka, Sous-section des prix agricoles, Division des prix, Statistique Canada, Ottawa, K1A 0T6, téléphone (613)995-5764.

FOOTNOTES

Table 1

- (1) The indexes are subject to a two-stage revision. Quarterly, the indexes are revised for the preceding quarter. Annual revisions taking place in the first quarter are applicable to the indexes for the past two years. In this publication, the 1979 indexes are final.
- (2) Farm share only.

Table 2

- (1) Farm share only.

Table 3

- (1) The indexes are subject to a two-stage revision. Quarterly, the indexes are revised for the preceding quarter. Annual revisions taking place in the first quarter are applicable to the indexes for the past two years. In this publication, the 1979 indexes are final.
- (2) Farm share only.
- (3) Selected items.

Table 5

- (1) The indexes are subject to a two-stage revision. Quarterly, the indexes are revised for the preceding quarter. Annual revisions taking place in the first quarter are applicable to the indexes for the past two years. In this publication, the 1979 indexes are final.

NOTES

Tableau 1

- (1) Les indices font l'objet d'une révision en deux temps. D'abord, l'indice d'un trimestre donné est révisé le trimestre suivant. Ensuite, une révision annuelle portant sur les deux années précédentes a lieu au premier trimestre. Les indices de 1979 donnés dans la présente publication sont définitifs.
- (2) Part agricole seulement.

Tableau 2

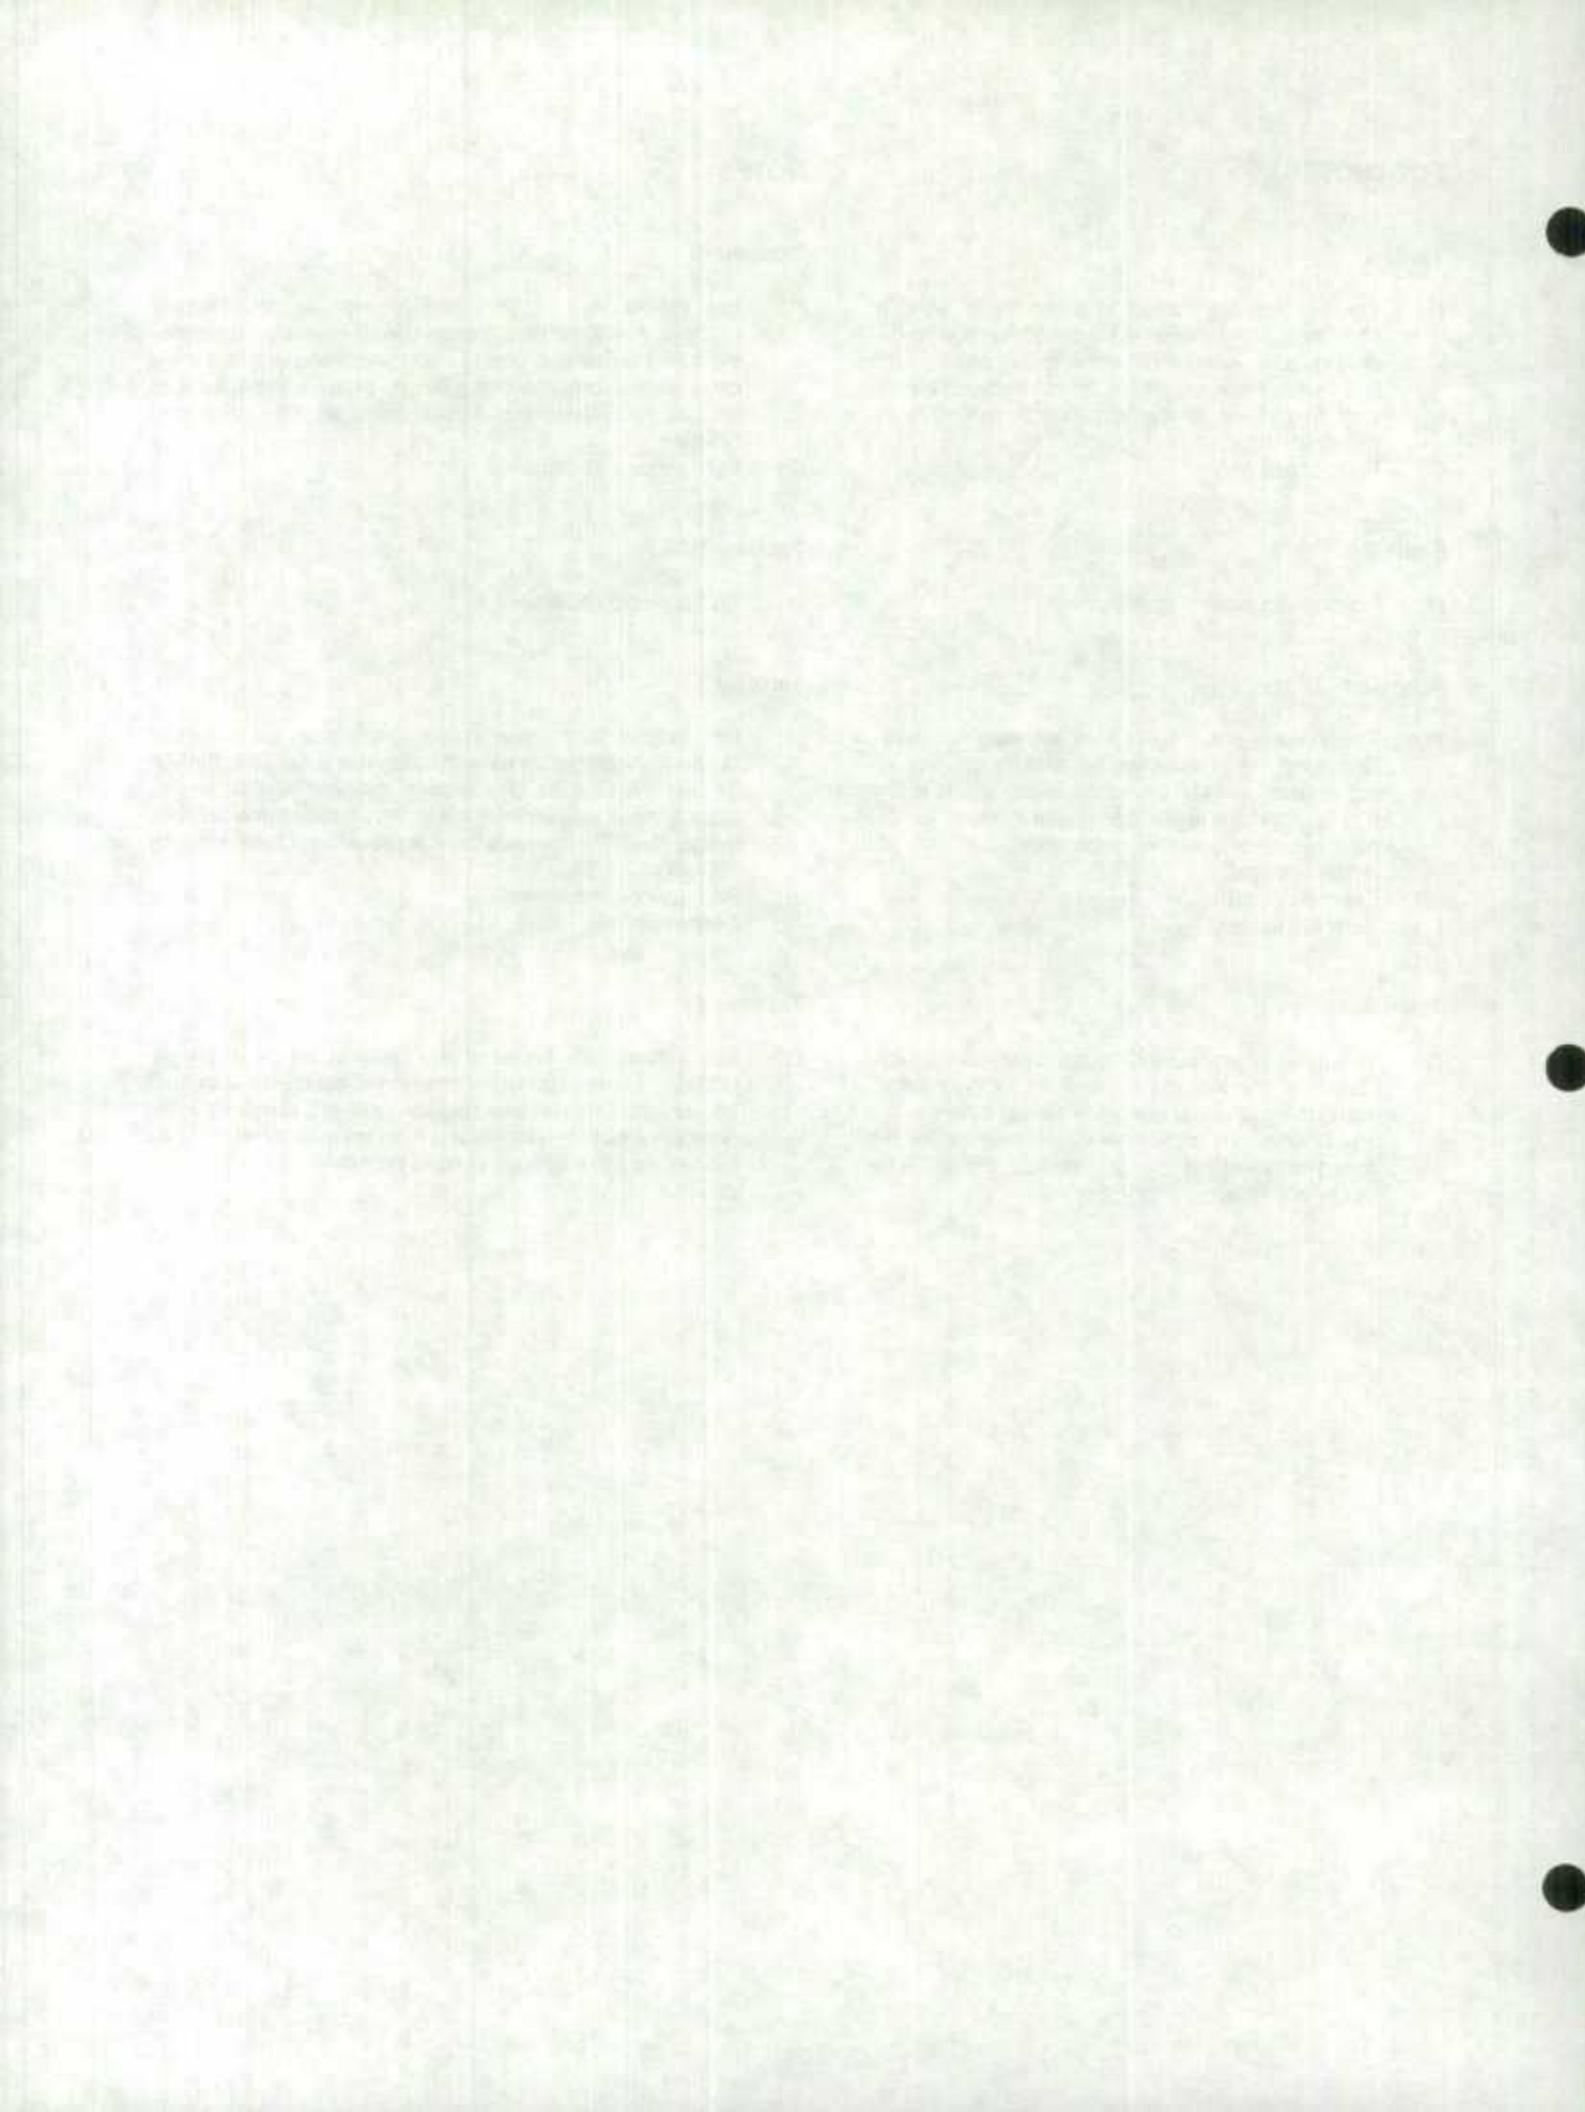

- (1) Part agricole seulement.

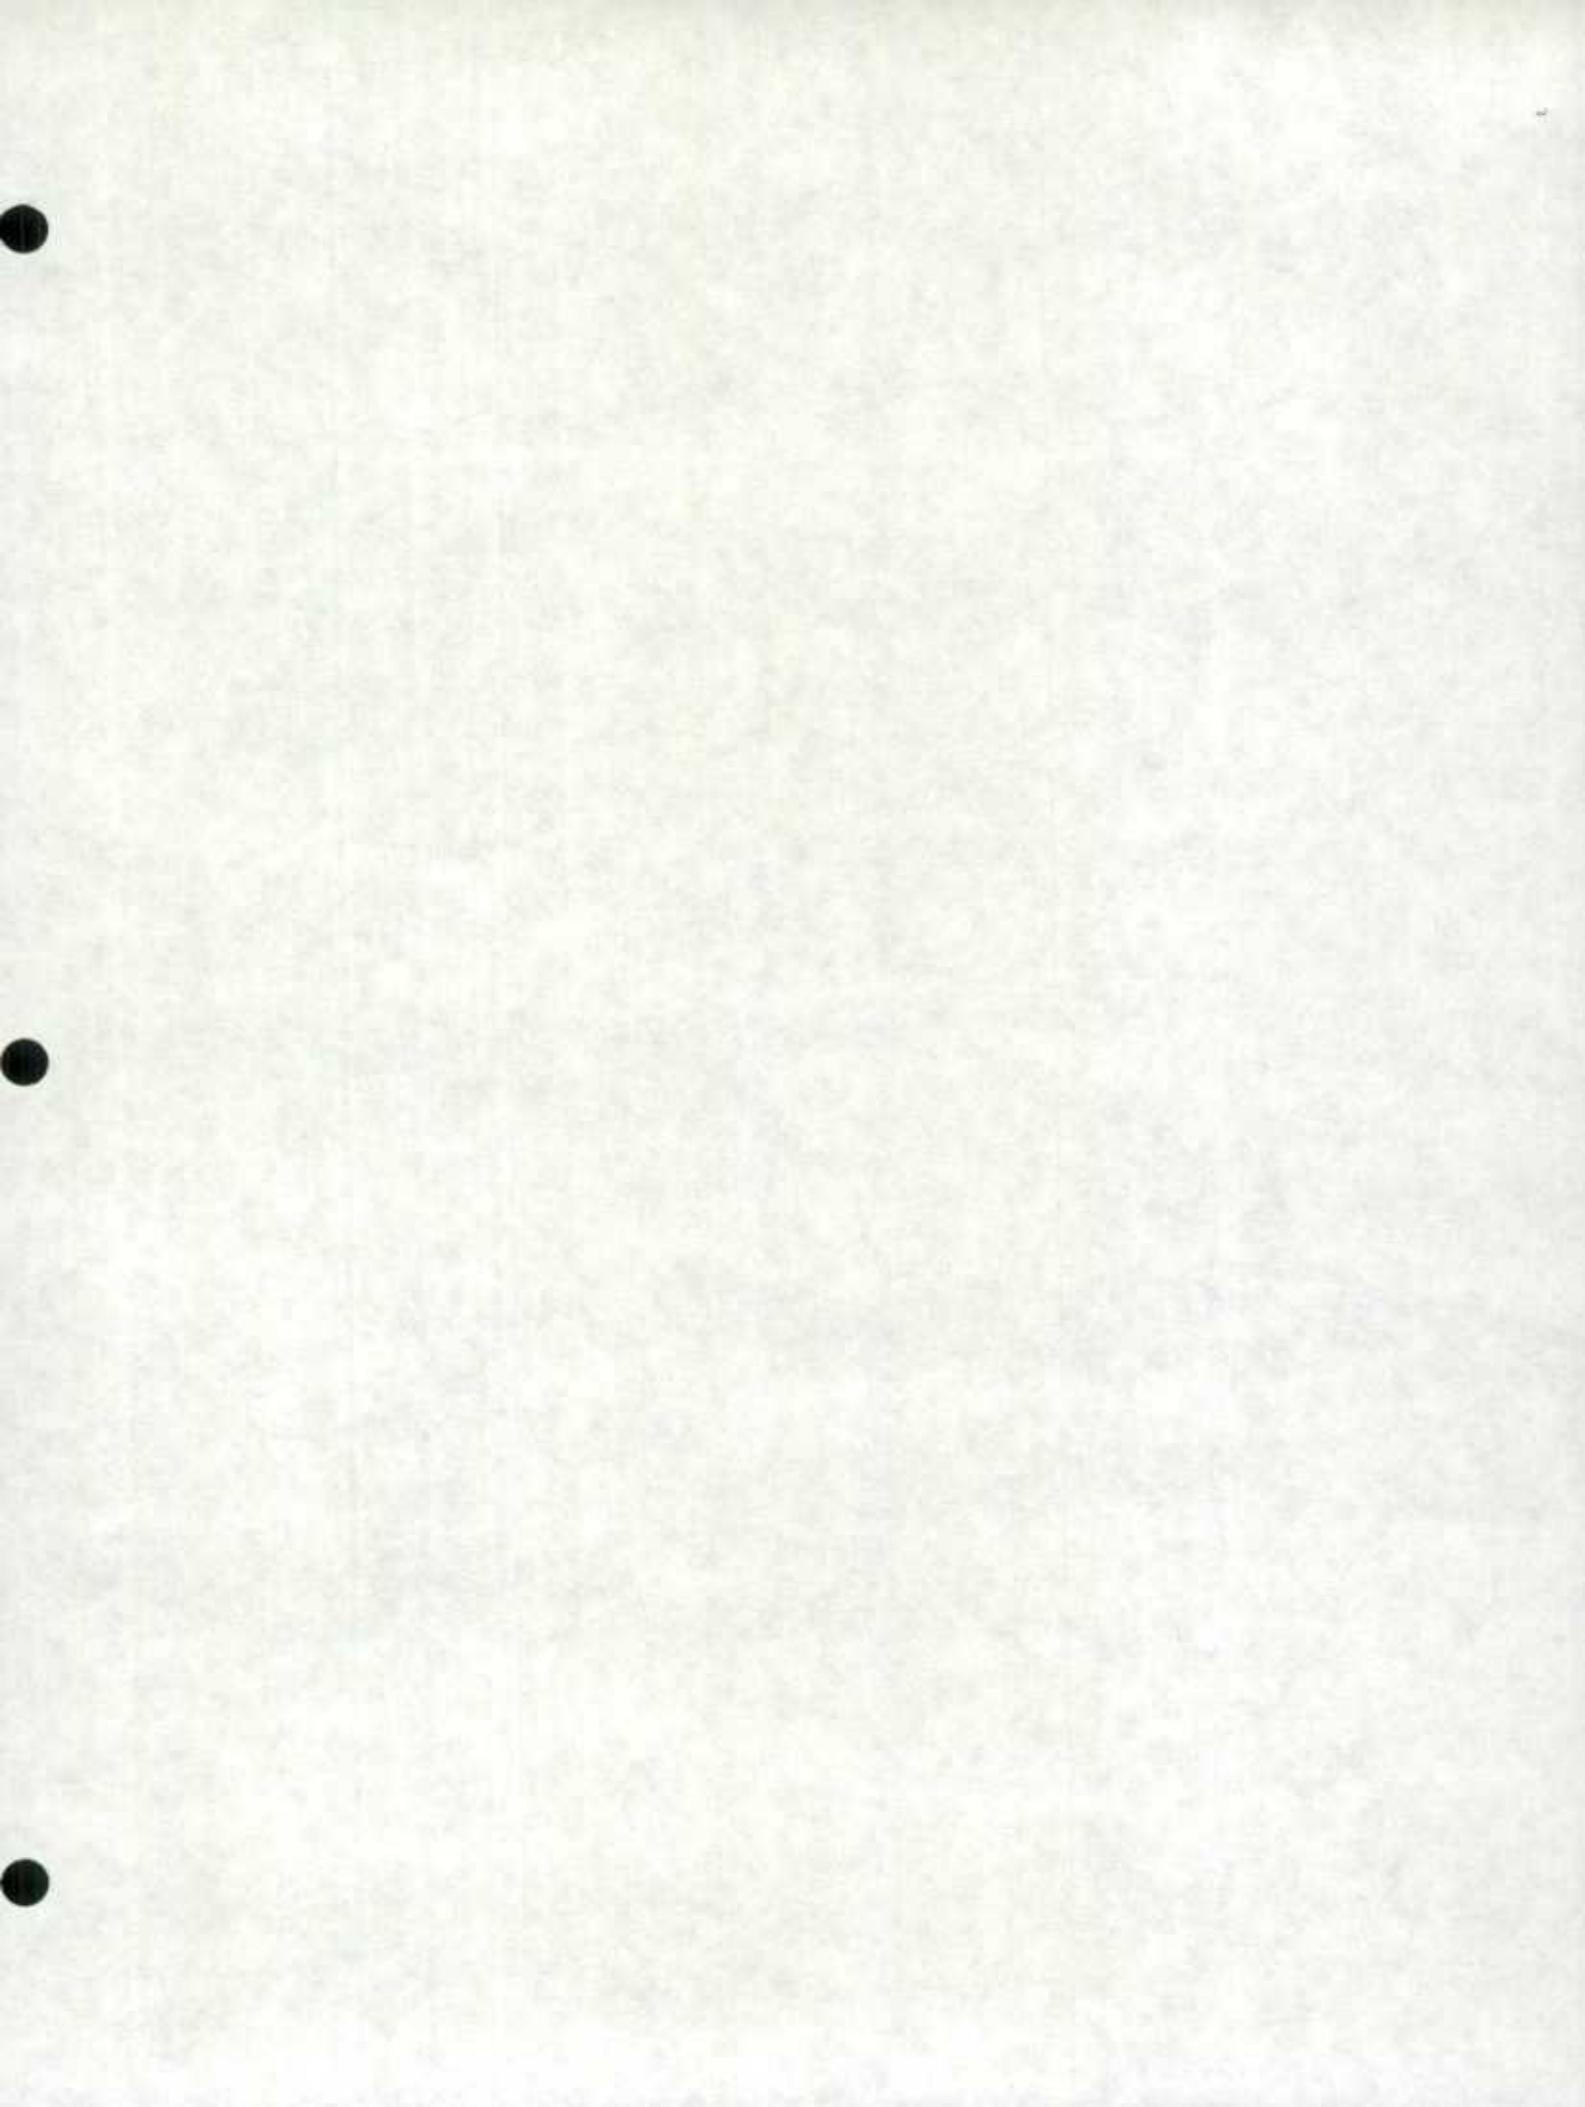

Tableau 3

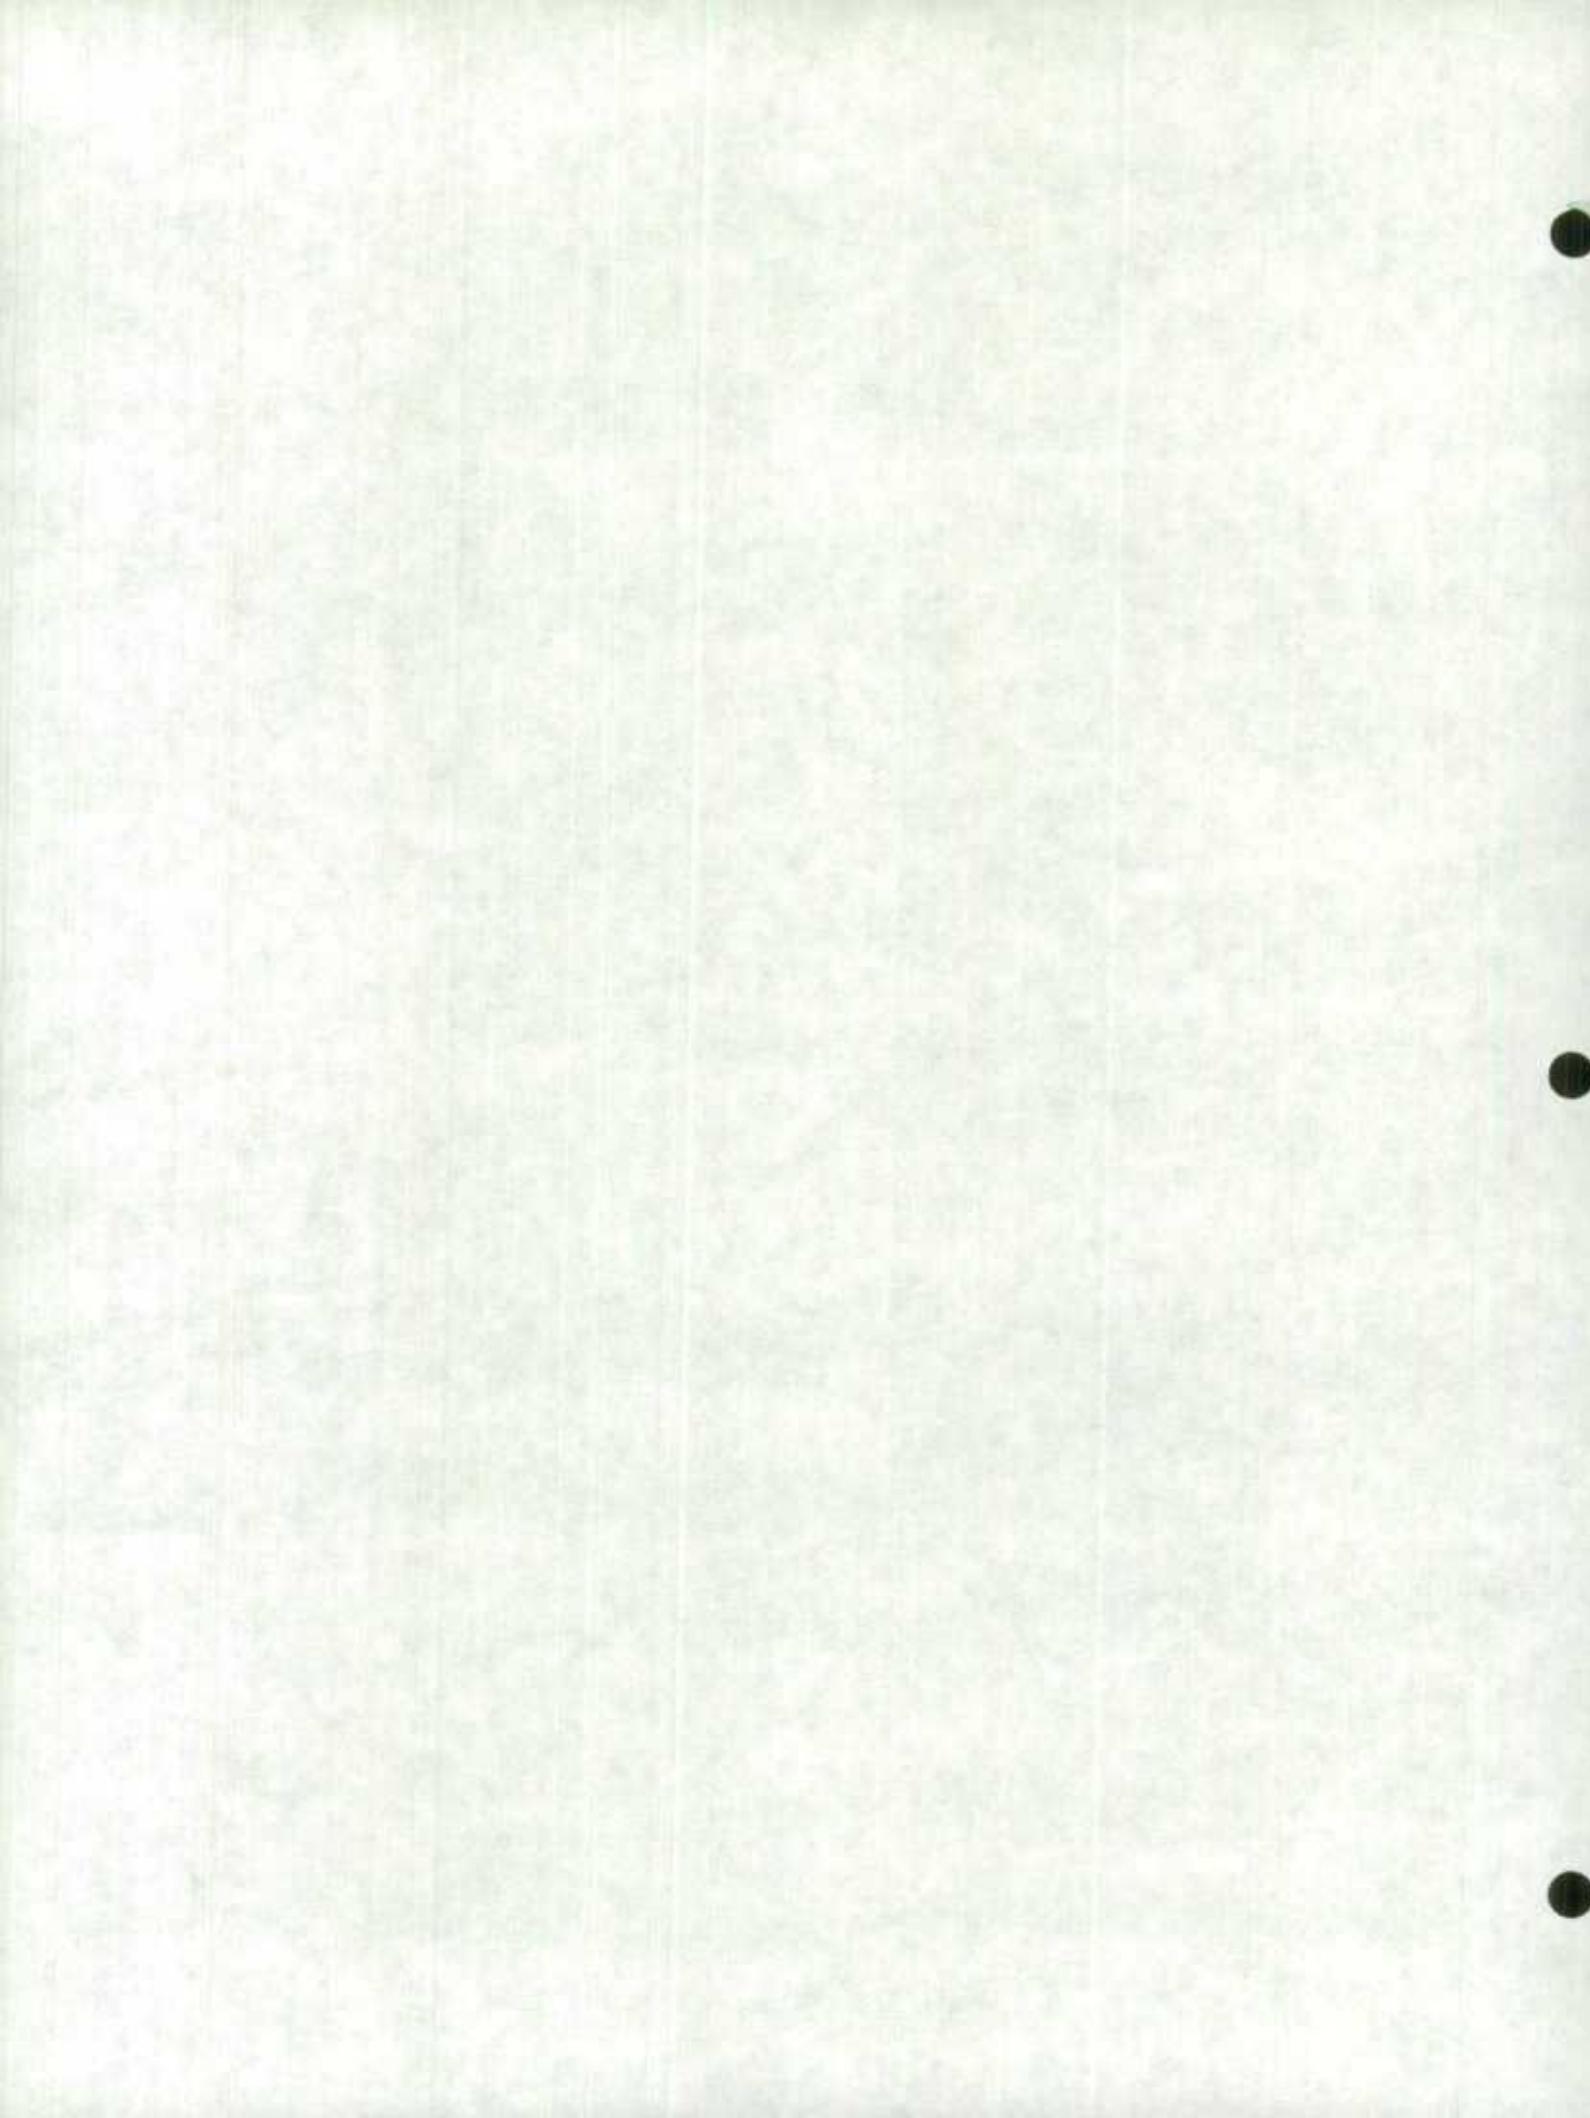

- (1) Les indices font l'objet d'une révision en deux temps. D'abord, l'indice d'un trimestre donné est révisé le trimestre suivant. Ensuite, une révision annuelle portant sur les deux années précédentes a lieu, au premier trimestre. Les indices de 1979 données dans la présente publication sont définitifs.
- (2) Part agricole seulement.
- (3) Certains items.

Tableau 5

- (1) Les indices font l'objet d'une révision en deux temps. D'abord, l'indice d'un trimestre donné est révisé le trimestre suivant. Ensuite, une révision annuelle portant sur les deux années précédentes a lieu au premier trimestre. Les indices de 1979 donnés dans la présente publication sont définitifs.
