Data in many forms

Statistics Canada disseminates data in a variety of forms. In addition to publications, both standard and special tabulations are offered. Data are available on the Internet, compact disc, diskette, computer printouts, microfiche and microfilm, and magnetic tape. Maps and other geographic reference materials are available for some types of data. Direct online access to aggregated information is possible through CANSIM, Statistics Canada's machine-readable database and retrieval system.

How to obtain more information

Inquiries about this publication and related statistics or services should be directed to: Client Services Unit, Prices Division, Statistics Canada, Ottawa, Ontario, K1A 0T6 (telephone: (613) 951-9606), (fax (613) 951-2848), Internet: shadsan@stacan.ca or to the Statistics Canada Regional Reference Centre in:

Halifax	(902) 426-5331	Regina	(306) 780-5405
Montréal	(514) 283-5725	Edmonton	(403) 495-3027
Ottawa	(613) 951-8116	Calgary	(403) 292-6717
Toronto	(416) 973-6586	Vancouver	(604) 666-3691
Winnipeg	(204) 983-4020

Ordering/Subscription information

All prices exclude sales tax

Catalogue no. 62-004-XPB, is published quarterly in a **paper version** for \$25.00 per issue or \$83.00 for four issues in Canada. Outside Canada the cost is US\$25.00 per issue and US\$83.00 for four issues.

Please send orders to Statistics Canada, Operations and Integration Division, Circulation Management, 120 Parkdale Avenue, Ottawa, Ontario, K1A 0T6 or by dialling **(613) 951-7277** or **1 800 700-1033**, by fax **(613) 951-1584** or **1 800 889-9734** or by Internet: order@statcan.ca. For change of address, please provide both old and new addresses. Statistics Canada publications may also be purchased from authorized agents, bookstores and local Statistics Canada offices.

Standards of service to the public

To maintain quality service to the public, Statistics Canada follows established standards covering statistical products and services, delivery of statistical information, cost-recovered services and services to respondents. To obtain a copy of these service standards, please contact your nearest Statistics Canada Regional Reference Centre.

Des données sous plusieurs formes

Statistique Canada diffuse les données sous formes diverses. Outre les publications, des totalisations habituelles et spéciales sont offertes. Les données sont disponibles sur Internet, disque compact, disquette, imprimé d'ordinateur, microfiche et microfilm, et bande magnétique. Des cartes et d'autres documents de référence géographiques sont disponibles pour certaines sortes de données. L'accès direct à des données agrégées est possible par le truchement de CANSIM, la base de données ordiologique et le système d'extraction de Statistique Canada.

Comment obtenir d'autres renseignements

Toute demande de renseignements au sujet de la présente publication ou au sujet de statistiques ou de services connexes doit être adressée à : Sous-section du service à la clientèle, Division des prix, Statistique Canada, Ottawa, Ontario, K1A 0T6 (téléphone : (613) 951-9606), (télécopieur : (613) 951-2848), Internet : shadsan@stacan.ca ou à l'un des centres de consultation régionaux de Statistique Canada :

Note of appreciation

Canada owes the success of its statistical system to a long-standing co-operation involving Statistics Canada, the citizens of Canada, its businesses, governments and other institutions. Accurate and timely statistical information could not be produced without their continued co-operation and goodwill.

Note de reconnaissance

Le succès du système statistique du Canada repose sur un partenariat bien établi entre Statistique Canada et la population, les entreprises, les administrations canadiennes et les autres organismes. Sans cette collaboration et cette bonne volonté, il serait impossible de produire des statistiques précises et actuelles.

Symbols

The following standard symbols are used in Statistics Canada publications:

- .. figures not available.
- ... figures not appropriate or not applicable.
- nil or zero.
- amount too small to be expressed.
- ^P preliminary figures.
- ^r revised figures.
- x confidential to meet secrecy requirements of the Statistics Act.

Note on Cansim

CANSIM® (Canadian Socio-Economic Information Management System) is Statistics Canada's computerized data bank and its supporting software. Most of the data appearing in this publication, as well as many other data series are available from CANSIM via terminal, on computer printouts, or in machine readable form. Historical and more timely data, not included in this publication, are available from CANSIM.

For further information write to Marketing Division, Statistics Canada, Ottawa, K1A 0T6 or call (613) 951-8200.

® Registered Trade Mark of Statistics Canada.

Revisions

The indexes are subject of a two-stage revision. Quarterly, the indexes are revised for the preceding quarter. Annual revision takes place in the first quarter and is applicable to the indexes for the past two years.

This publication was prepared under the direction of:

- **Louis Marc Ducharme**, Director, Prices Division
- **François Bordé**, Chief, Goods & Services Producing Industries Section

The paper used in this publication meets the minimum requirements of American National Standard for Information Sciences – Permanence of Paper for Printed Library Materials, ANSI Z39.48 – 1984.

Signes conventionnels

Les signes conventionnels suivants sont employés uniformément dans les publications de Statistique Canada:

- .. nombres indisponibles.
- ... n'ayant pas lieu de figurer.
- néant ou zéro.
- nombres infimes.
- ^P nombres provisoires.
- ^r nombres rectifiés.
- x confidentiel en vertu des dispositions de la Loi sur la statistique relatives au secret.

Note concernant CANSIM

Le CANSIM® (Système canadien d'information socio-économique) est le système de Statistique Canada qui se compose d'une banque de données informatisées et de son logiciel de soutien. La plupart des données présentées dans cette publication et beaucoup d'autres données contenues dans le CANSIM peuvent être extraites par l'intermédiaire d'un terminal, sous forme d'imprimés d'ordinateur ou sous forme lisible par machine. Des données historiques et des données plus actuelles qui n'apparaissent pas dans cette publication sont disponibles de CANSIM.

Pour plus de renseignements, écrivez à la Division du marketing, Statistique Canada, Ottawa, K1A 0T6 ou téléphonez à (613) 951-8200.

Highlights

Farm Input Price Index

First Quarter 1997

Western Canadian farmers, particularly those who raise livestock, paid more to do business over the past 12 months than their counterparts in the East.

In the first quarter of 1997, farm input prices for Western Canada rose 2.9% from the same period a year earlier, compared with only a 1.8% increase for Eastern Canada.

For western farmers, the price of virtually all inputs into animal production increased 8.9% over the 12-month period, while in the East, it went up only 2.5%.

For Canada as a whole, farmers paid 2.4% more to do business on a year-over-year basis, despite a 13.2% decline in interest costs.

First quarter figures are the only ones to reflect changes in the farm rent and property tax indexes. At the national level, the index for farm rent declined 1.8%, while the property tax index increased 3.6%.

Higher cattle, poultry prices for Western producers

In the West, farmers faced price increases in seven of nine input categories; in particular, building and fencing materials and animal production.

The increase in the cost of animal production was due to higher prices for feeder cattle (+27.3%), weanling pigs (+12.3%) and poultry (+2.4%).

While higher prices for building materials contributed most to a 6.3% increase in the building and fencing index, western farmers also paid more for machinery and motor vehicles and supplies and services, including heating fuel and electricity.

Farm wages rose 3.4% annually. Higher prices for legume and grass seed and crop insurance resulted in a 1.8% increase in the crop production index.

However, farmers in the West benefited from lower prices for farm rent and lower interest costs, which declined 13.2% as a result of lower rates for non-mortgage loans.

In the East, farmers experienced price increases in eight of nine input categories. They too paid more on an annual basis for feeder cattle, weanling pigs and poultry. But due to lower feed prices, the overall increase in the animal production index was more moderate than in the West.

Faits saillants

Indice des prix des entrées dans l'agriculture

Premier trimestre de 1997

Au cours des 12 derniers mois, les agriculteurs de l'Ouest, en particulier les éleveurs de bétail, ont subi une hausse plus importante de leurs coûts d'exploitation comparativement aux agriculteurs de l'Est.

Au premier trimestre de 1997, les prix des entrées dans l'agriculture dans l'Ouest canadien ont progressé de 2,9% par rapport à la période correspondante de 1996, tandis qu'ils ont augmenté de seulement 1,8% dans l'Est.

Dans l'Ouest, le prix de presque toutes les entrées dans l'élevage d'animaux a augmenté de 8,9% sur une période de 12 mois, alors qu'il ne s'est accru que de 2,5% dans l'Est.

Dans l'ensemble du Canada, les agriculteurs ont connu une hausse de 2,4% de leurs coûts d'exploitation par rapport à l'année précédente, malgré une diminution de 13,2% des coûts d'intérêt.

Les chiffres du premier trimestre sont les seuls qui reflètent des variations des indices des loyers agricoles et des impôts fonciers. À l'échelle nationale, l'indice pour le loyer agricole a reculé de 1,8%, alors que l'indice de l'impôt foncier a avancé de 3,6%.

Hausse des prix des bovins et de la volaille pour les producteurs de l'Ouest

Dans l'Ouest, les agriculteurs se sont vu infliger des augmentations de prix dans sept des neuf catégories d'entrées, notamment pour les matériaux de construction et les clôtures et pour l'élevage d'animaux.

L'augmentation du coût de l'élevage d'animaux est attribuable à une hausse des coûts des bovins d'engraissement (+27,3%), des porcelets sevrés (+12,3%) et de la volaille (+2,4%).

La hausse des prix des matériaux de construction est la principale cause de la progression de 6,3% de l'indice des bâtiments et des clôtures, mais les agriculteurs de l'Ouest se sont aussi vu imposer des prix plus élevés pour les machines agricoles et les véhicules automobiles, les fournitures et les services, y compris le combustible de chauffage et l'électricité.

Les salaires agricoles ont augmenté de 3,4% annuellement. La progression des prix des légumineuses et des graminées et de l'assurance-récolte a entraîné une augmentation de 1,8% de l'indice des cultures agricoles.

Cependant, les agriculteurs de l'Ouest ont profité de la baisse des loyers agricoles et du fléchissement des coûts d'intérêt, qui ont chuté de 13,2% à la faveur d'un recul des coûts des prêts non hypothécaires.

Dans l'Est, les agriculteurs ont fait face à des augmentations de prix dans huit des neuf catégories d'entrées. Ils ont aussi payé davantage, d'une année à l'autre, pour les bovins d'engraissement, les porcelets sevrés et la volaille. Toutefois, à cause de la baisse du coût des aliments pour les animaux, l'augmentation globale de l'indice de l'élevage d'animaux a été moins rapide que dans l'Ouest.

Higher prices for building materials contributed to a 4.3% increase in building and fencing. Farmers in the East also paid more for property taxes, estimated at 4.2%, compared with the same period a year earlier. Eastern farmers also benefited from lower costs for non-mortgage loans, which helped push the annual cost of interest down 13.4%.

Higher prices for animal production inputs contribute most to annual increase

On a national basis, farmers paid more in seven of the nine input categories. Again, higher prices for inputs into animal production (+5.1%) contributed most to the year-over-year increase.

Farmers also faced higher prices for machinery and motor vehicles, due in large part to higher prices for gasoline and diesel fuel. Farmers saw higher prices for building materials, which contributed to a 5.1% increase in building and fencing.

Increased prices for crop insurance and legume and grass seed helped push the crop production index up. Also, farm wages rose 3.4%. Higher prices for heating fuel and custom work contributed to a 3.8% annual increase in supply and services.

On the other hand, farmers continued to pay less for interest (-13.2%), as a result of lower costs for non-mortgage loans.

Higher prices for cattle also pushed up quarterly increase

Nationally, farmers paid 0.9% more to do business in the first three months of 1997 compared with the last quarter of 1996. But western farmers again experienced the highest price increases. Input prices rose 1.3% in the West compared with 0.2% in the East.

Eastern farmers benefited from lower prices for farm wages, building and fencing and for inputs into crop production.

Western farmers, on the other hand, benefited from lower estimated prices for farm rent. However, this was offset by a quarter-over-quarter increase in machinery and motor vehicles, animal production and farm wage costs.

Le niveau plus élevé des prix des matériaux de construction a été un facteur de l'augmentation de 4,3% dans les bâtiments et les clôtures. Les agriculteurs de l'Est ont aussi payé davantage en impôts fonciers (+4,2%) par rapport à la même période de l'année précédente. Les agriculteurs de l'Est ont aussi profité du recul des coûts des prêts non hypothécaires, qui a contribué à faire diminuer de 13,4% le coût des intérêts annuels.

Les hausses de prix des entrées dans l'élevage d'animaux sont le principal facteur de l'augmentation annuelle

À l'échelle nationale, les agriculteurs ont subi une hausse dans sept des neuf catégories d'entrées. La progression des prix des entrées dans l'élevage d'animaux (+5,1%) a été le principal facteur de l'augmentation d'une année à l'autre.

Les agriculteurs se sont aussi vu infliger des prix plus élevés pour les machines agricoles et les véhicules automobiles, surtout à cause de l'avance des prix de l'essence et du carburant diesel. Les agriculteurs ont dû déboursier davantage pour les matériaux de construction, ce qui a entraîné une augmentation de 5,1% pour les bâtiments et les clôtures.

La progression des prix de l'assurance-récolte, des légumineuses et des graminées a entraîné une augmentation de l'indice des cultures agricoles. De plus, les salaires agricoles ont monté de 3,4%. La hausse des prix du combustible de chauffage et du travail sur commande a contribué à une augmentation annuelle de 3,8% des fournitures et des services.

Par ailleurs, les agriculteurs ont continué de profiter d'une baisse des coûts d'intérêt (-13,2%), résultat d'une diminution des coûts des prêts non hypothécaires.

L'avance des prix des bovins a aussi propulsé l'augmentation trimestrielle

À l'échelle nationale, il en a coûté 0,9% de plus aux agriculteurs pour être en activité au cours des trois premiers mois de 1997, par rapport aux trois mois précédents. Toutefois, les agriculteurs de l'Ouest ont encore été touchés par la plus forte augmentation des prix. Les prix des entrées ont augmenté de 1,3% dans l'Ouest, comparativement à 0,2% dans l'Est.

Les agriculteurs de l'Est ont tiré profit du recul des prix des salaires agricoles, des bâtiments et des clôtures et des entrées dans les cultures agricoles.

Par ailleurs, les agriculteurs de l'Ouest ont profité d'une baisse des niveaux estimatifs des loyers agricoles. Cependant, cette baisse a été effacée par les augmentations de prix d'un trimestre à l'autre des machines agricoles et des véhicules automobiles, de l'élevage d'animaux et des salaires agricoles.

(1) The indexes are subject to a two-stage revision. Quarterly, the indexes are revised for the preceding quarter. Annual revision takes place in the first quarter and is applicable to the indexes for the past two years.

(1) Les indices font l'objet d'une révision en deux temps. D'abord, l'indice d'un trimestre donné est révisé le trimestre suivant. Ensuite, une révision annuelle portant sur les deux années précédentes a lieu au premier trimestre.

(1) The indexes are subject to two-stage revision. Quarterly, the indexes are revised for the preceding quarter. Annual revision takes place in the first quarter and is applicable to the indexes for the past two years.

(2) Selected items.

(3) Groups and sub-groups of commodities are identified by the type of print and by the spacing. For further detail, see appendix I and II.

(1) Annual revision takes place in the first quarter and is applicable to the indexes for the past two years.

(1) Une révision annuelle portant sur les deux années précédentes a lieu au premier trimestre.

(2) The average rate for all outstanding loans of the corresponding type.

(2) Le taux moyen pour tous les prêts non remboursés du type correspondant.

TECHNICAL NOTES

FARM INPUT PRICE INDEX (1986=100)

1. Concepts, Data Description and Methods

The Farm Input Price Index (FIPI), 1986=100, measures the price changes of a basket of goods and services purchased by Canadian farmers for use in agricultural production. The basket is made up of the inputs bought by farmers in 1986. The index is calculated by comparing current prices for those inputs to the average of their prices in 1986.

The Farm Input Price Index is useful in transforming current dollar farm expenditures into constant dollars, which are an important component of analytical studies and econometric modelling. The FIPI and its details are also used to monitor price changes which are considered in the operations of marketing boards and in price stabilisation programmes.

The total FIPI represents the aggregate price change for all inputs into all kinds of farming operations. For a particular application, it may be more appropriate to select specific inputs and calculate a weighted average of them using the particular patterns of cost or expenditure that are more appropriate. Whatever basket is used, one should remember that the basket is fixed over time. For this reason, the index cannot measure changes in production costs due to changes in the mix of inputs used, or changes in productivity. Furthermore, comparisons of indexes between different regions for the same item or group of items only indicate differences in price movements over time, they cannot compare price levels in different parts of the country.

This FIPI series succeeds the previous series, 1981=100, covering the period 1981-1985, also the series 1971=100, covering the period 1971 to 1983, and the series 1961=100, covering the period 1961 to 1977. The earlier FIPI series have been converted to a 1986 time-base so that continuous indexes are available, wherever possible. In many cases this is from 1961. For looking at price movements before 1961, in some cases FIPI indexes follow some of the items found in the Price Index Numbers of Commodities and Services Used by Farmers 1935-1939=100 for the years 1913 to 1971.

Index formula

A general formula for an index made up of several items for the current period ($I_{t/0}$) is:

$$I_{t/0} = \frac{\sum p_t q_o}{\sum p_o q_o} \times 100$$

where p_t is the price of an item in the current period, and p_o , q_o and $p_o q_o$ are the price, quantity and value of expenditure of the item in the base (1986) period. This formula can be transformed to:

NOTES TECHNIQUES

INDICE DES PRIX DES ENTRÉES DANS L'AGRICULTURE (1986=100)

1. Concepts, description des données et méthodes

L'indice des prix des entrées dans l'agriculture (IPEA), établi sur la base de 1986=100, mesure la variation des prix des biens et des services qu'achètent les agriculteurs du Canada pour la production agricole. Le panier se compose des biens et des services achetés par les agriculteurs en 1986. Le calcul de l'indice est fondé sur la comparaison des prix courants de ces biens et services et de leurs prix moyens en 1986.

L'indice des prix des entrées dans l'agriculture permet de transformer les dépenses agricoles exprimées en dollars courants en dollars constants, qui sont un élément important des études analytiques et des modèles économétriques. L'IPEA et les détails qu'il renferme servent en outre à suivre l'évolution de ces prix qui sont utilisés par les offices de commercialisation et dans les programmes de stabilisation des prix.

Globalement, l'IPEA représente la variation d'ensemble des prix pour toutes les entrées dans tous les types de travaux agricoles. Cependant, dans certains cas particuliers, il pourrait être préférable de sélectionner des entrées spécifiques et de calculer une moyenne pondérée en se servant des schémas particuliers des coûts et des dépenses qui sont les plus pertinents. De plus, quel que soit le panier utilisé, il ne faut pas oublier que ce dernier est fixe dans le temps. L'indice ne saurait donc mesurer que les variations des coûts de production, attribuables à des changements de la composition des entrées, et non pas celles de la productivité. En outre, les comparaisons des indices de diverses régions pour un même article ou groupe d'articles ne révèlent que les divergences des mouvements de prix dans le temps et ne peuvent servir à rapprocher les niveaux de prix dans les diverses régions du pays.

Cette série fait suite à l'IPEA précédent établi sur la base de 1981=100 pour la période allant de 1981 à 1985, sur la base 1971=100, pour la période allant de 1971 à 1983, et à l'IPEA établi sur la base de 1961=100 pour la période allant de 1961 à 1977. Les séries antérieures ont été converties sur la base de 1986 afin d'assurer, dans la mesure du possible, l'uniformité des indices. Dans certains cas, la conversion est effectuée à partir de la base de 1961. En ce qui a trait aux mouvements de prix antérieurs à 1961, les indices de l'IPEA suivent quelquefois, certains des articles que l'on trouve dans les nombres-indices des prix des produits et services utilisés par les agriculteurs sur la base de 1935-1939=100, pour les années 1913 à 1971.

Formule de l'indice

La formule générale de l'indice de la période courante, composée de plusieurs articles, ($I_{t/0}$) est la suivante:

où p_t est le prix de l'article au cours de la période courante, p_o , q_o et $p_o q_o$ représentent respectivement le prix, la quantité et la valeur de l'article figurant dans l'indice de la période de base (1986). Cette formule est ensuite convertie comme suit:

$$I_{t/0} = \sum (p_t / p_0)^w$$

where

où

$$w = 100 \times \frac{p_0 q_0}{\sum p_0 q_0}$$

Expressed this way, the "w" is the percentage weight of an item – its percentage share in the total expenditure in the base period for all items in the index of which it is part.

Exprimé de cette façon, "w" est le poids en pourcentage d'un article – soit sa part en pourcentage des dépenses globales de la période de base pour tous les articles de l'indice dont il fait partie.

Composition of the basket

The definition of what should be included in the basket was last done in 1981. The main source of information for the weights of major groups and groups of items was Farm Operating Expenses and Depreciation Charges for 1986. More detailed weights, applying to the detailed composition of items in each group were estimated in 1981 from various additional sources, such as production statistics for both agriculture and manufacturing, and subsequently revalued to 1986 prices. With the publication of the expanded list of item indexes in 1992, many detailed weights in the expanded areas were re-estimated from the most recent available data on production and use. Tables of percentage weights are Appendixes 1 and 2 in this book.

Composition du panier

C'est en 1981 qu'on a procédé pour la dernière fois à la définition des articles qui composent le panier. Les dépenses d'exploitation agricole et d'amortissement de 1986 constituent la principale source d'information qui permet d'estimer les pondérations pour les groupes principaux et les groupes d'entrées. Les pondérations plus détaillées, qui servent à établir la composition exhaustive des articles de chaque groupe, ont été estimées en 1981 à partir de diverses sources additionnelles, notamment les statistiques sur la production agricole et manufacturière, et réévaluées par la suite en fonction des prix de 1986. La diffusion, en 1992, de la liste élargie d'articles a coïncidé avec la réévaluation de nombreuses pondérations détaillées dans les secteurs élargis à partir des données les plus récentes sur la production et l'utilisation. Les tableaux des pondérations en pourcentage figurent aux annexes 1 et 2 du présent ouvrage.

Sources of price information

Until 1992 the price information was derived from a variety of sources: direct farm suppliers (e.g. for farm machinery and seed); other price indexes such as the Industry Product Price Index (e.g. for fertilizer) and the Consumer Price Index (e.g. for car insurance); information collected by other divisions of Statistics Canada and other federal departments (e.g. for labour, feed, property taxes). In some cases, notably for custom work and farm rents, direct pricing is not available, so these indexes are imputed from other series.

Sources de renseignements sur les prix

Jusqu'en 1992, les renseignements sur les prix provenaient de diverses sources: les fournisseurs des agriculteurs (par exemple, les fournisseurs de machines agricoles et de semences), les autres indices de prix, notamment l'indice des prix des produits industriels (ex. engrais) et l'indice des prix à la consommation (ex. assurance des véhicules) et les renseignements recueillis par d'autres divisions de Statistique Canada et des ministères fédéraux (par exemple, les données relatives à la main d'oeuvre, aux aliments pour animaux, aux impôts fonciers). Dans certains cas, notamment celui du travail sur commande et des loyers agricoles, on impute ces indices à partir d'autres séries, le relevé direct des prix n'étant pas effectué.

Since the beginning of 1992, the sources of price information have been improved and extended, through a programme funded by Agriculture Canada. To provide more geographic detail, and to get more relevant prices, direct surveys of farm suppliers have been set up in the following areas: fertilizers, pesticides and fuels; building supplies, small tools and machinery and vehicle parts and repair. In almost all cases this pricing replaces poorer secondary sources. In addition the surveys of farm machinery and seed have been enlarged.

Depuis le début de 1992, on a amélioré et élargi les sources de données sur les prix dans le contexte d'un programme financé par Agriculture Canada. En vue d'accroître le nombre de détails géographiques et la pertinence des prix, on mène maintenant des enquêtes auprès des fournisseurs agricoles dans les domaines suivants: engrais, pesticides et carburants; fournitures de construction, petits outils et machinerie; pièces et réparations de véhicules. Dans presque tous les cas, ces relevés de prix remplacent des sources secondaires de moindre qualité. En outre, on a élargi les enquêtes sur la machinerie agricole et les semences.

Where possible, the prices used in the FIPI are transaction prices which correspond to those effectively paid by farmers, including the effect of all applicable taxes and subsidies. Because of the changes in sources, the FIPI from 1992 onward reflect more closely the movement of actual transaction prices.

Dans la mesure du possible, les prix utilisés dans l'IPEA sont les prix des transactions qui correspondent à ceux effectivement payés par les agriculteurs et tiennent compte notamment de toutes les taxes et subventions applicables. En raison des changements de sources, l'IPEA de 1992 et ceux des années subséquentes sont plus représentatifs du mouvement des prix réels des transactions.

Sample design

The samples of prices collected for the FIPI are designed to provide an index reliable at the level of detail shown in this publication. For this purpose, the samples are stratified to ensure that no important type of price change is omitted from the index. In this process, pricing categories are identified and split into sub-groups as needed to represent the commodity group. Samples are chosen to represent the price movement of each sub-group. As the number of price observations at this fine level of detail is more limited the reliability of the price movement is less than in the higher-level indexes shown here. Nevertheless, in most cases these detailed indexes are available to interested users.

The same design considerations apply geographically. Part of the expansion in 1992 was to put provincial indexes on as sound a base as the Eastern and Western Canada indexes were previously and to allow calculation of provincial FIPI totals. This has been done for each of the provinces from Quebec west. For the Atlantic Provinces as a whole the indexes are based on the same depth of coverage, but the individual provincial indexes in that region are based on thinner samples.

Timeliness and revisions

The indexes are published quarterly, about five weeks after the end of the reference quarter. Notice and summary figures are given in the Statistics Canada Daily Bulletin (Catalogue no. 11-001-XPB) and the data are available on CANSIM on that date. This publication is distributed about three weeks later.

In each quarter, indexes for the preceding quarter are subject to revision. Also, with the publication of the first quarter figure for each year, indexes for the preceding two years are subject to revision. These revisions mainly affect those indexes which are estimated in whole or part on annual data (property taxes, farm rent and interest).

Data availability

All publishable indexes are on CANSIM. Matrices 2050 to 2063 include more than 100 provincial or regional indexes covering more detail than is included in this publication. Matrices 550 to 582 include sub-provincial indexes for some items. A table showing which CANSIM matrices apply to which provinces is in Appendix 3.

Alternatively, users may get the additional detail from Prices Division.

In addition to index numbers the surveys of prices of fertilizers, pesticides and fuels, begun in 1992, provide estimates of average prices in different parts of the country, at different times of the year. These data may serve other needs than those satisfied by the time index series. Interested users should contact Prices Division. The average prices are also on Matrices 550 to 582.

Conception de l'échantillon

Les échantillons de prix relevés pour l'IPEA doivent permettre le calcul d'un indice fiable au niveau d'agrégation de la présente publication. À cette fin, les échantillons sont stratifiés pour faire en sorte qu'aucun type important de variation de prix ne soit omis de l'indice. À ce stade, on détermine les catégories de prix et on les répartit en sous-groupes au besoin pour représenter le groupe de produits. On sélectionne des échantillons pour illustrer les mouvements de prix dans chaque sous-groupe. Les observations de prix à ce niveau d'agrégation étant plus limitées, la fiabilité du mouvement des prix est donc inférieure à celle des indices de haut niveau. Néanmoins, dans la plupart des cas, les utilisateurs intéressés peuvent se procurer ces indices détaillés.

Les mêmes considérations relatives à la conception s'appliquent au niveau géographique. L'élargissement de 1992 consistait notamment à établir les indices provinciaux sur une base aussi solide que ne l'était antérieurement celle des indices de l'Est et de l'Ouest du Canada et à permettre le calcul des totaux provinciaux de l'IPEA. Ce qui a été fait pour chacune des provinces à l'ouest du Québec. Pour ce qui est des indices d'ensemble des provinces de l'Atlantique, la couverture est tout aussi étendue mais les indices provinciaux individuels de cette région sont fondés sur des échantillons moins grands.

Actualité des données et révisions

Les indices sont diffusés sur une base trimestrielle, environ cinq semaines après la fin du trimestre de référence. L'avis et le résumé paraissent dans Le Quotidien de Statistique Canada (n° 11-001-XPB au catalogue) et les données sont versées dans CANSIM le même jour. La présente publication est diffusée environ trois semaines plus tard.

À chaque trimestre, les indices du trimestre précédent font l'objet d'une révision. En outre, la révision des indices des deux années précédentes coïncide avec la diffusion des chiffres du premier trimestre de chaque année. Les révisions s'appliquent surtout aux indices estimés, intégralement ou partiellement, à partir des données annuelles (impôts fonciers, loyer agricole et intérêt).

Disponibilité des données

Tous les indexes qui peuvent être diffusés sont stockés dans CANSIM. Les matrices 2050 à 2063 contiennent plus de 100 indices provinciaux ou régionaux plus détaillés que la présente publication. Les matrices 550 à 582 comprennent les indices infra-provinciaux de certains articles. Vous trouverez à l'annexe 3 un tableau qui indique à quelle province correspondent les matrices de CANSIM.

Comme alternative, les utilisateurs peuvent obtenir des détails additionnels en s'adressant à la Division des prix.

Outre les chiffres des indices, les enquêtes sur les prix des engrais, des pesticides et des carburants, qui ont été mises en oeuvre en 1992, fournissent des estimations des prix moyens dans les différentes régions du pays, à diverses époques de l'année. Ces données peuvent répondre à des besoins autres que ceux qui sont comblés par la série des indices chronologiques. Les intéressés doivent communiquer avec la Division des prix. Les prix moyens sont également indiqués dans les matrices 550 à 582.

For further information

For data only, please contact the information unit at (613) 951-9606 or any regional office. For further information on concepts and methods, contact Vaclav Krabicka at (613) 951-3342. The addresses are on the inside front cover of this book.

Renseignements additionnels

Pour obtenir des données, veuillez communiquer avec la Sous-section de l'information et de l'analyse courante (613) 951-3350 ou avec n'importe quel bureau régional. Pour avoir plus de renseignements sur les concepts et les méthodes, vous êtes priés de vous adresser à Vaclav Krabicka au (613) 951-3342. Les adresses figurent dans la couverture avant intérieure de la présente publication.
