Data in many forms

Statistics Canada disseminates data in a variety of forms. In addition to publications, both standard and special tabulations are offered. Data are available on the Internet, compact disc, diskette, computer printouts, microfiche and microfilm, and magnetic tape. Maps and other geographic reference materials are available for some types of data. Direct online access to aggregated information is possible through CANSIM, Statistics Canada's machine-readable database and retrieval system.

How to obtain more information

Inquiries about this publication and related statistics or services should be directed to: Client Services Unit, Prices Division, Statistics Canada, Ottawa, Ontario, K1A 0T6 (telephone: (613) 951-9606), (fax (613) 951-2848), Internet: infounit@stacan.ca or to the Statistics Canada Regional Reference Centre in:

Halifax	(902) 426-5331	Regina	(306) 780-5405
Montréal	(514) 283-5725	Edmonton	(403) 495-3027
Ottawa	(613) 951-8116	Calgary	(403) 292-6717
Toronto	(416) 973-6586	Vancouver	(604) 666-3691

Ordering/Subscription information

All prices exclude sales tax

Catalogue no. 62-004-XPB, is published quarterly in a paper version for \$25.00 per issue or \$83.00 for four issues in Canada. Outside Canada the cost is US\$25.00 per issue and US\$83.00 for four issues.

Please send orders to Statistics Canada, Operations and Integration Division, Circulation Management, 120 Parkdale Avenue, Ottawa, Ontario, K1A 0T6 or by dialling (613) 951-7277 or 1 800 700-1033, by fax (613) 951-1584 or 1 800 889-9734 or by Internet: order@statcan.ca. For change of address, please provide both old and new addresses. Statistics Canada publications may also be purchased from authorized agents, bookstores and local Statistics Canada offices.

Standards of service to the public

Statistics Canada is committed to serving its clients in a prompt, reliable and courteous manner and in the official language of their choice. To this end, the agency has developed standards of service which its employees observe in serving its clients. To obtain a copy of these service standards, please contact your nearest Statistics Canada Regional Reference Centre.

Des données sous plusieurs formes

Statistique Canada diffuse les données sous formes diverses. Outre les publications, des totalisations habituelles et spéciales sont offertes. Les données sont disponibles sur Internet, disque compact, disquette, imprimé d'ordinateur, microfiche et microfilm, et bande magnétique. Des cartes et d'autres documents de référence géographiques sont disponibles pour certaines sortes de données. L'accès direct à des données agrégées est possible par le truchement de CANSIM, la base de données ordinolingué et le système d'extraction de Statistique Canada.

Comment obtenir d'autres renseignements

Toute demande de renseignements au sujet de la présente publication ou au sujet de statistiques ou de services connexes doit être adressée à : Sous-section du service à la clientèle, Division des prix, Statistique Canada, Ottawa, Ontario, K1A 0T6 (téléphone : (613) 951-9606), (télécopieur : (613) 951-2848), Internet : infounit@stacan.ca ou à l'un des centres de consultation régionaux de Statistique Canada :

Note of appreciation

Canada owes the success of its statistical system to a long-standing co-operation involving Statistics Canada, the citizens of Canada, its businesses, governments and other institutions. Accurate and timely statistical information could not be produced without their continued co-operation and goodwill.

Note de reconnaissance

Le succès du système statistique du Canada repose sur un partenariat bien établi entre Statistique Canada et la population, les entreprises, les administrations canadiennes et les autres organismes. Sans cette collaboration et cette bonne volonté, il serait impossible de produire des statistiques précises et actuelles.

Symbols

The following standard symbols are used in Statistics Canada publications:

- .. figures not available.
- ... figures not appropriate or not applicable.
- nil or zero.
- amount too small to be expressed.
- ^P preliminary figures.
- ^R revised figures.
- ~~x~~ confidential to meet secrecy requirements of the Statistics Act.

Note on Cansim

CANSIM® (Canadian Socio-Economic Information Management System) is Statistics Canada's computerized data bank and its supporting software. Most of the data appearing in this publication, as well as many other data series are available from CANSIM via terminal, on computer printouts, or in machine readable form. Historical and more timely data, not included in this publication, are available from CANSIM.

For further information write to Marketing Division, Statistics Canada, Ottawa, K1A 0T6 or call (613) 951-8200.

® Registered Trade Mark of Statistics Canada.

Revisions

The indexes are subject of a two-stage revision. Quarterly, the indexes are revised for the preceding quarter. Annual revision takes place in the first quarter and is applicable to the indexes for the past two years.

This publication was prepared under the direction of:

- **Louis Marc Ducharme**, Director, Prices Division
- **François Bordé**, Chief, Goods & Services Producing Industries Section

The paper used in this publication meets the minimum requirements of American National Standard for Information Sciences – Permanence of Paper for Printed Library Materials, ANSI Z39.48 – 1984.

Signes conventionnels

Les signes conventionnels suivants sont employés uniformément dans les publications de Statistique Canada:

- .. nombres indisponibles.
- ... n'ayant pas lieu de figurer.
- néant ou zéro.
- nombres infimes.
- ^P nombres provisoires.
- ^R nombres rectifiés.
- ~~x~~ confidentiel en vertu des dispositions de la Loi sur la statistique relatives au secret.

Note concernant CANSIM

Le CANSIM® (Système canadien d'information socio-économique) est le système de Statistique Canada qui se compose d'une banque de données informatisées et de son logiciel de soutien. La plupart des données présentées dans cette publication et beaucoup d'autres données contenues dans le CANSIM peuvent être extraites par l'intermédiaire d'un terminal, sous forme d'imprimés d'ordinateur ou sous forme lisible par machine. Des données historiques et des données plus actuelles qui n'apparaissent pas dans cette publication sont disponibles de CANSIM.

Pour plus de renseignements, écrivez à la Division du marketing, Statistique Canada, Ottawa, K1A 0T6 ou téléphonez à (613) 951-8200.

® Marque déposée de Statistique Canada

Révisions

Les indices font l'objet d'une révision en deux temps. D'abord, l'indice d'un trimestre donné est révisé le trimestre suivant. Ensuite, une révision annuelle portant sur les deux années précédentes a lieu au premier trimestre.

Cette publication a été rédigée sous la direction de:

- **Louis Marc Ducharme**, Directeur, Division des prix
- **François Bordé**, Chef, Section des Industries de biens et de services

Le papier utilisé dans la présente publication répond aux exigences minimales de l'"American National Standard for Information Sciences" – "Permanence of Paper for Printed Library Materials", ANSI Z39.48 1984.

Highlights

Farm Input Price Index

Fourth quarter 1997

Higher prices for feeder cattle pushed the total index up 2.2% in the fourth quarter of 1997 compared with the same period a year earlier. This advance was up significantly from the 0.1% annual increase recorded in the third quarter of 1997.

Over the past 12 months, farmers in the West faced larger price increases for feeder cattle (+29.7%) than their eastern counterparts (+24.5%). However, farmers in the West benefited from lower prices for fertilizers (-10.7%). As a result, overall price increases were virtually the same in both regions.

The overall increase in the index occurred despite a 5.8% decline in interest costs, which were the result of lower rates for non-mortgage loans.

Feeder cattle prices kept dogging farmers

On a national basis, the jump in prices for feeder cattle (+27.4%) contributed most to the annual increase. Producers also paid more for turkey pouls but profited from lower prices for weanling pigs and prepared feed since the fourth quarter of 1996.

Higher prices for machinery replacement, such as combines and plows, contributed most to a 2.5% annual increase in machinery and motor vehicles. Farmers also faced higher prices for farm labour and paid more for telephone and custom work.

On the other hand, farmers saw the index for non-mortgage interest drop 7.2% compared with the same period a year earlier. Lower prices for nitrogen fertilizers helped push the annual crop production index down 0.7% and farmers also benefited from lower prices for building and fencing as a result of lower prices for building materials.

First quarterly drop since 1996

The drop in input prices between the third and fourth quarters of 1997 was the first decline since the fourth quarter of 1996, when it fell 2.9%.

Faits saillants

Indice des prix des entrées dans l'agriculture

Quatrième trimestre de 1997

La hausse du prix des bovins d'engraissement s'est traduite par une augmentation de l'indice total de 2,2 % au quatrième trimestre de 1997 par rapport à la période correspondante de 1996. Cette progression est nettement supérieure à l'augmentation annuelle de 0,1 % observée au troisième trimestre de 1997.

Les agriculteurs de l'Ouest ont eu à faire face à de plus fortes augmentations du prix des bovins d'engraissement (+29,7 %) que leurs homologues de l'Est (+24,5 %) au cours des 12 derniers mois. Cependant, les agriculteurs de l'Ouest ont pu profiter d'une baisse de prix des engrais (-10,7 %). Par conséquent, les hausses de prix ont été dans l'ensemble à peu près identiques dans les deux régions.

La hausse globale de l'indice est survenue malgré le recul de 5,8 % des coûts d'intérêt, conséquence du repli des taux de prêts non hypothécaires.

Le prix des bovins d'engraissement demeure la bête noire des agriculteurs

À l'échelle nationale, la hausse du prix des bovins d'engraissement (+27,4 %) a constitué le principal facteur de l'augmentation annuelle. Les producteurs ont également payé plus cher les dindonneaux, mais ont profité d'une baisse de prix des porcelets sevrés et des aliments préparés depuis le quatrième trimestre de 1996.

La hausse des prix pour le remplacement des machines (comme les moissonneuses-batteuses et les charrues) a principalement causé l'augmentation annuelle de 2,5 % des machines agricoles et des véhicules automobiles. Les agriculteurs ont également dû composer avec l'augmentation du prix de la main-d'œuvre agricole et ont payé plus cher le téléphone et le travail sur commande.

Les agriculteurs ont toutefois vu l'indice de l'intérêt non hypothécaire flétrir de 7,2 % par rapport à un an plus tôt. La baisse des prix des engrais d'azote a contribué à réduire de 0,7 % l'indice annuel des cultures agricoles. Les agriculteurs ont également profité du recul du prix pour les bâtiments et les clôtures, grâce à la diminution des prix des matériaux de construction.

Première baisse trimestrielle depuis 1996

La chute des prix des entrées entre le troisième et le quatrième trimestre de 1997 (-2,9 %) a constitué le premier repli depuis le quatrième trimestre de 1996.

Lower prices for weanling pigs (-12.7%) and feeder cattle (-4.5%) contributed most to the decrease in animal production compared with the third quarter of 1997. Lower prices for nitrogen fertilizers (-13.6%) and potatoes (-9.2%) helped push the crop production index down.

However, the preliminary interest figures indicate the cost of non-mortgage interest rose on a quarterly basis, which resulted in an increase in the overall cost of interest (+4.4%). Farmers also paid more for machinery and motor vehicles due in large part to higher prices for trucks and non-powered machinery such as cultivators and balers.

Livestock prices up significantly for western producers

Farmers in the West paid significantly more for feeder cattle compared with the same period a year earlier. In fact, they paid more for all inputs into animal production with the exception of weanling pigs and prepared feed. Feeder livestock also carries more weight in Western Canada than in Eastern Canada.

Farm wages rose 3.6% over the past 12 months and higher prices for machinery and trucks contributed to an increase in machinery and motor vehicles on a year-over-year basis.

Farmers in the West faced higher prices for pesticides (+1.7%) but these were offset by lower prices for seed potatoes and fertilizers (-10.7%). Lower costs for non-mortgage loans helped push the annual cost of interest down 5.7%.

Once again, producers in the East paid more for feeder cattle but did not face the increases in other feeder livestock inputs to the same extent as their western counterparts.

While farm wages and machinery and motor vehicles both went up 2.5%, farmers in the East faced higher prices for pesticides (+2.0%) and saw only marginal decreases in fertilizers (-0.4%).

The East also benefited from lower interest costs (-6.2%) as a result of lower rates for non-mortgage loans.

Les baisses de prix des porcelets sevrés (-12,7 %) et des bovins d'engraissement (-4,5 %) ont contribué le plus à la diminution de l'élevage d'animaux par rapport au troisième trimestre de 1997. Les baisses de prix des engrais d'azote (-13,6 %) et des pommes de terre (-9,2 %) ont contribué à infléchir l'indice des cultures agricoles.

Les chiffres provisoires pour l'intérêt révèlent cependant que le coût de l'intérêt non hypothécaire a augmenté au cours du trimestre, entraînant une hausse du coût global de l'intérêt (+4,4 %). Les agriculteurs ont également payé plus cher les machines agricoles et les véhicules automobiles, dans une large mesure à cause de la majoration du prix des camions et des machines non motorisées comme les cultivateurs et les presses à fourrages.

Nette progression des prix du bétail pour les producteurs de l'Ouest

Les agriculteurs de l'Ouest ont payé leurs bovins d'engraissement nettement plus cher qu'à la même période il y a un an plus tôt. Ils ont payé plus cher toutes les entrées dans l'élevage d'animaux, sauf les porcelets sevrés et les aliments préparés. Les bovins d'engraissement pèsent également plus lourd dans l'Ouest canadien que dans l'Est.

Les salaires agricoles ont augmenté de 3,6 % au cours des 12 derniers mois et les hausses de prix des machines agricoles et des camions ont contribué à une augmentation d'une année à l'autre pour les machines agricoles et les véhicules automobiles.

Les agriculteurs de l'Ouest ont payé plus cher les pesticides (+1,7 %), mais ces hausses ont été épousées par des diminutions de prix pour les pommes de terre de semence et les engrais (-10,7 %). La baisse des coûts des prêts non hypothécaires a contribué à ramener le coût annuel d'intérêt à 5,7 %.

Encore une fois, les producteurs de l'Est ont payé plus cher les bovins d'engraissement mais n'ont pas été touchés aussi fort que leurs homologues de l'Ouest par les hausses ayant touché les autres entrées destinées au bétail d'engraissement.

Alors que les salaires agricoles, les machines agricoles et les véhicules automobiles ont enregistré dans chaque cas une progression de 2,5 %, les agriculteurs de l'Est ont dû payer plus cher les pesticides (+2,0 %) et n'ont eu droit qu'à de légères diminutions du prix des engrais (-0,4 %).

L'Est a également profité de la baisse des coûts d'intérêt, qui ont chuté de 6,2 % à la suite de la diminution des taux des prêts non hypothécaires.

(1) The indexes are subject to a two-stage revision. Quarterly, the indexes are revised for the preceding quarter. Annual revision takes place in the first quarter and is applicable to the indexes for the past two years.

(1) Les indices font l'objet d'une révision en deux temps. D'abord, l'indice d'un trimestre donné est révisé le trimestre suivant. Ensuite, une révision annuelle portant sur les deux années précédentes a lieu au premier trimestre.

(1) The indexes are subject to two-stage revision. Quarterly, the indexes are revised for the preceding quarter. Annual revision takes place in the first quarter and is applicable to the indexes for the past two years.											
(2) Selected items.											
(3) Groups and sub-groups of commodities are identified by the type of print and by the spacing. For further detail, see appendix I and II.

(1) Annual revision takes place in the first quarter and is applicable to the indexes for the past two years.

(1) Une révision annuelle porte sur les deux années précédentes à lieu au premier trimestre.

(2) The average rate for all outstanding loans of the corresponding type.

(2) Le taux moyen pour tous les prêts non remboursés du type correspondant.

TECHNICAL NOTES

FARM INPUT PRICE INDEX (1986=100)

1. Concepts, Data Description and Methods

The Farm Input Price Index (FIFI), 1986=100, measures the price changes of a basket of goods and services purchased by Canadian farmers for use in agricultural production. The basket is made up of the inputs bought by farmers in 1986. The index is calculated by comparing current prices for those inputs to the average of their prices in 1986.

The Farm Input Price Index is useful in transforming current dollar farm expenditures into constant dollars, which are an important component of analytical studies and econometric modelling. The FIFI and its details are also used to monitor price changes which are considered in the operations of marketing boards and in price stabilisation programmes.

The total FIFI represents the aggregate price change for all inputs into all kinds of farming operations. For a particular application, it may be more appropriate to select specific inputs and calculate a weighted average of them using the particular patterns of cost or expenditure that are more appropriate. Whatever basket is used, one should remember that the basket is fixed over time. For this reason, the index cannot measure changes in production costs due to changes in the mix of inputs used, or changes in productivity. Furthermore, comparisons of indexes between different regions for the same item or group of items only indicate differences in price movements over time, they cannot compare price levels in different parts of the country.

This FIFI series succeeds the previous series, 1981=100, covering the period 1981-1985, also the series 1971=100, covering the period 1971 to 1983, and the series 1961=100, covering the period 1961 to 1977. The earlier FIFI series have been converted to a 1986 time-base so that continuous indexes are available, wherever possible. In many cases this is from 1961. For looking at price movements before 1961, in some cases FIFI indexes provide some of the items found in the Price Index Numbers of Commodities and Services Used by Farmers 1935-1939=100 for the years 1913 to 1971.

Index formula

A general formula for an index made up of several items for the current period ($I_{t/0}$) is:

$$I_{t/0} = \frac{\sum p_t q_o}{\sum p_o q_o} \times 100$$

where p_t is the price of an item in the current period, and p_o , q_o and $p_o q_o$ are the price, quantity and value of expenditure of the item in the base (1986) period. This formula can be transformed to:

NOTES TECHNIQUES

INDICE DES PRIX DES ENTRÉS DANS L'AGRICULTURE (1986=100)

1. Concepts, description des données et méthodes

L'indice des prix des entrées dans l'agriculture (IPEA), établi sur la base de 1986=100, mesure la variation des prix des biens et des services qu'achètent les agriculteurs du Canada pour la production agricole. Le panier se compose des biens et des services achetés par les agriculteurs en 1986. Le calcul de l'indice est fondé sur la comparaison des prix courants de ces biens et services et de leurs prix moyens en 1986.

L'indice des prix des entrées dans l'agriculture permet de transformer les dépenses agricoles exprimées en dollars courants en dollars constants, qui sont un élément important des études analytiques et des modèles économétriques. L'IPEA et les détails qu'il renferme servent en outre à suivre l'évolution de ces prix qui sont utilisés par les offices de commercialisation et dans les programmes de stabilisation des prix.

Globalement, l'IPEA représente la variation d'ensemble des prix pour toutes les entrées dans tous les types de travaux agricoles. Cependant, dans certains cas particuliers, il pourrait être préférable de sélectionner des entrées spécifiques et de calculer une moyenne pondérée en se servant des schémas particuliers des coûts et des dépenses qui sont les plus pertinents. De plus, quel que soit le panier utilisé, il ne faut pas oublier que ce dernier est fixe dans le temps. L'indice ne saurait donc mesurer que les variations des coûts de production, attribuables à des changements de la composition des entrées, et non pas celles de la productivité. En outre, les comparaisons des indices de diverses régions pour un même article ou groupe d'articles ne révèlent que les divergences des mouvements de prix dans le temps et ne peuvent servir à rapprocher les niveaux de prix dans les diverses régions du pays.

Cette série fait suite à l'IPEA précédent établi sur la base de 1981=100 pour la période allant de 1981 à 1985, sur la base 1971=100, pour la période allant de 1971 à 1983, et à l'IPEA établi sur la base de 1961=100 pour la période allant de 1961 à 1977. Les séries antérieures ont été converties sur la base de 1986 afin d'assurer, dans la mesure du possible, l'uniformité des indices. Dans certains cas, la conversion est effectuée à partir de la base de 1961. En ce qui a trait aux mouvements de prix antérieurs à 1961, les indices de l'IPEA suivent quelquefois, certains des articles que l'on trouve dans les nombres-indices des prix des produits et services utilisés par les agriculteurs sur la base de 1935-1939=100, pour les années 1913 à 1971.

Formule de l'indice

La formule générale de l'indice de la période courante, composée de plusieurs articles, ($I_{t/0}$) est la suivante:

où p_t est le prix de l'article au cours de la période courante, p_o , q_o et $p_o q_o$ représentent respectivement le prix, la quantité et la valeur de l'article figurant dans l'indice de la période de base (1986). Cette formule est ensuite convertie comme suit:

$$I_{t/0} = \sum (p_t/p_o)w$$

where

$$w = 100 \times \frac{p_o q_o}{\sum p_o q_o}$$

où

Expressed this way, the "w" is the percentage weight of an item – its percentage share in the total expenditure in the base period for all items in the index of which it is part.

Composition of the basket

The definition of what should be included in the basket was last done in 1981. The main source of information for the weights of major groups and groups of items was Farm Operating Expenses and Depreciation Charges for 1986. More detailed weights, applying to the detailed composition of items in each group were estimated in 1981 from various additional sources, such as production statistics for both agriculture and manufacturing, and subsequently revalued to 1986 prices. With the publication of the expanded list of item indexes in 1992, many detailed weights in the expanded areas were re-estimated from the most recent available data on production and use. Tables of percentage weights are Appendixes 1 and 2 in this book.

Sources of price information

Until 1992 the price information was derived from a variety of sources: direct farm suppliers (e.g. for farm machinery and seed); other price indexes such as the Industry Product Price Index (e.g. for fertilizer) and the Consumer Price Index (e.g. for car insurance); information collected by other divisions of Statistics Canada and other federal departments (e.g. for labour, feed, property taxes). In some cases, notably for custom work and farm rents, direct pricing is not available, so these indexes are imputed from other series.

Since the beginning of 1992, the sources of price information have been improved and extended, through a programme funded by Agriculture Canada. To provide more geographic detail, and to get more relevant prices, direct surveys of farm suppliers have been set up in the following areas: fertilizers, pesticides and fuels; building supplies, small tools and machinery and vehicle parts and repair. In almost all cases this pricing replaces poorer secondary sources. In addition the surveys of farm machinery and seed have been enlarged.

Where possible, the prices used in the FIPI are transaction prices which correspond to those effectively paid by farmers, including the effect of all applicable taxes and subsidies. Because of the changes in sources, the FIPI from 1992 onward reflect more closely the movement of actual transaction prices.

Exprimé de cette façon, "w" est le poids en pourcentage d'un article – soit sa part en pourcentage des dépenses globales de la période de base pour tous les articles de l'indice dont il fait partie.

Composition du panier

C'est en 1981 qu'on a procédé pour la dernière fois à la définition des articles qui composent le panier. Les dépenses d'exploitation agricole et d'amortissement de 1986 constituent la principale source d'information qui permet d'estimer les pondérations pour les groupes principaux et les groupes d'entrées. Les pondérations plus détaillées, qui servent à établir la composition exhaustive des articles de chaque groupe, ont été estimées en 1981 à partir de diverses sources additionnelles, notamment les statistiques sur la production agricole et manufacturière, et réévaluées par la suite en fonction des prix de 1986. La diffusion, en 1992, de la liste élargie d'articles a coïncidé avec la réévaluation de nombreuses pondérations détaillées dans les secteurs élargis à partir des données les plus récentes sur la production et l'utilisation. Les tableaux des pondérations en pourcentage figurent aux annexes 1 et 2 du présent ouvrage.

Sources de renseignements sur les prix

Jusqu'en 1992, les renseignements sur les prix provenaient de diverses sources: les fournisseurs des agriculteurs (par exemple, les fournisseurs de machines agricoles et de semences), les autres indices de prix, notamment l'indice des prix des produits industriels (ex. engrais) et l'indice des prix à la consommation (ex. assurance des véhicules) et les renseignements recueillis par d'autres divisions de Statistique Canada et des ministères fédéraux (par exemple, les données relatives à la main d'œuvre, aux aliments pour animaux, aux impôts fonciers). Dans certains cas, notamment celui du travail sur commande et des loyers agricoles, on impute ces indices à partir d'autres séries, le relevé direct des prix n'étant pas effectué.

Depuis le début de 1992, on a amélioré et élargi les sources de données sur les prix dans le contexte d'un programme financé par Agriculture Canada. En vue d'accroître le nombre de détails géographiques et la pertinence des prix, on mène maintenant des enquêtes auprès des fournisseurs agricoles dans les domaines suivants: engrais, pesticides et carburants; fournitures de construction, petits outils et machinerie; pièces et réparations de véhicules. Dans presque tous les cas, ces relevés de prix remplacent des sources secondaires de moindre qualité. En outre, on a élargi les enquêtes sur la machinerie agricole et les semences.

Dans la mesure du possible, les prix utilisés dans l'IPEA sont les prix des transactions qui correspondent à ceux effectivement payés par les agriculteurs et tiennent compte notamment de toutes les taxes et subventions applicables. En raison des changements de sources, l'IPEA de 1992 et ceux des années subséquentes sont plus représentatifs du mouvement des prix réels des transactions.

Sample design

The samples of prices collected for the FIPI are designed to provide an index reliable at the level of detail shown in this publication. For this purpose, the samples are stratified to ensure that no important type of price change is omitted from the index. In this process, pricing categories are identified and split into sub-groups as needed to represent the commodity group. Samples are chosen to represent the price movement of each sub-group. As the number of price observations at this fine level of detail is more limited the reliability of the price movement is less than in the higher-level indexes shown here. Nevertheless, in most cases these detailed indexes are available to interested users.

The same design considerations apply geographically. Part of the expansion in 1992 was to put provincial indexes on as sound a base as the Eastern and Western Canada indexes were previously and to allow calculation of provincial FIPI totals. This has been done for each of the provinces from Quebec west. For the Atlantic Provinces as a whole the indexes are based on the same depth of coverage, but the individual provincial indexes in that region are based on thinner samples.

Timeliness and revisions

The indexes are published quarterly, about five weeks after the end of the reference quarter. Notice and summary figures are given in the Statistics Canada Daily Bulletin (Catalogue no. 11-001-XPB) and the data are available on CANSIM on that date. This publication is distributed about three weeks later.

In each quarter, indexes for the preceding quarter are subject to revision. Also, with the publication of the first quarter figure for each year, indexes for the preceding two years are subject to revision. These revisions mainly affect those indexes which are estimated in whole or part on annual data (property taxes, farm rent and interest).

Data availability

All publishable indexes are on CANSIM. Matrices 2050 to 2063 include more than 100 provincial or regional indexes covering more detail than is included in this publication. Matrices 550 to 582 include sub-provincial indexes for some items. A table showing which CANSIM matrices apply to which provinces is in Appendix 3.

Alternatively, users may get the additional detail from Prices Division.

In addition to index numbers the surveys of prices of fertilizers, pesticides and fuels, begun in 1992, provide estimates of average prices in different parts of the country, at different times of the year. These data may serve other needs than those satisfied by the time index series. Interested users should contact Prices Division. The average prices are also on Matrices 550 to 582.

Conception de l'échantillon

Les échantillons de prix relevés pour l'IPEA doivent permettre le calcul d'un indice fiable au niveau d'agrégation de la présente publication. À cette fin, les échantillons sont stratifiés pour faire en sorte qu'aucun type important de variation de prix ne soit omis de l'indice. À ce stade, on détermine les catégories de prix et on les répartit en sous-groupes au besoin pour représenter le groupe de produits. On sélectionne des échantillons pour illustrer les mouvements de prix dans chaque sous-groupe. Les observations de prix à ce niveau d'agrégation étant plus limitées, la fiabilité du mouvement des prix est donc inférieure à celle des indices de haut niveau. Néanmoins, dans la plupart des cas, les utilisateurs intéressés peuvent se procurer ces indices détaillés.

Les mêmes considérations relatives à la conception s'appliquent au niveau géographique. L'élargissement de 1992 consistait notamment à établir les indices provinciaux sur une base aussi solide que ne l'était antérieurement celle des indices de l'Est et de l'Ouest du Canada et à permettre le calcul des totaux provinciaux de l'IPEA. Ce qui a été fait pour chacune des provinces à l'ouest du Québec. Pour ce qui est des indices d'ensemble des provinces de l'Atlantique, la couverture est tout aussi étendue mais les indices provinciaux individuels de cette région sont fondés sur des échantillons moins grands.

Actualité des données et révisions

Les indices sont diffusés sur une base trimestrielle, environ cinq semaines après la fin du trimestre de référence. L'avis et le résumé paraissent dans Le Quotidien de Statistique Canada (n° 11-001-XPB au catalogue) et les données sont versées dans CANSIM le même jour. La présente publication est diffusée environ trois semaines plus tard.

À chaque trimestre, les indices du trimestre précédent font l'objet d'une révision. En outre, la révision des indices des deux années précédentes coïncide avec la diffusion des chiffres du premier trimestre de chaque année. Les révisions s'appliquent surtout aux indices estimés, intégralement ou partiellement, à partir des données annuelles (impôts fonciers, loyer agricole et intérêt).

Disponibilité des données

Tous les index qui peuvent être diffusés sont stockés dans CANSIM. Les matrices 2050 à 2063 contiennent plus de 100 indices provinciaux ou régionaux plus détaillés que la présente publication. Les matrices 550 à 582 comprennent les indices infra-provinciaux de certains articles. Vous trouverez à l'annexe 3 un tableau qui indique à quelle province correspondent les matrices de CANSIM.

Comme alternative, les utilisateurs peuvent obtenir des détails additionnels en s'adressant à la Division des prix.

Outre les chiffres des indices, les enquêtes sur les prix des engrains, des pesticides et des carburants, qui ont été mises en oeuvre en 1992, fournissent des estimations des prix moyens dans les différentes régions du pays, à diverses époques de l'année. Ces données peuvent répondre à des besoins autres que ceux qui sont comblés par la série des indices chronologiques. Les intéressés doivent communiquer avec la Division des prix. Les prix moyens sont également indiqués dans les matrices 550 à 582.

For further information

For data only, please contact the information unit at (613) 951-9606 or any regional office. For further information on concepts and methods, contact Vaclav Krabicka at (613) 951-3342. The addresses are on the inside front cover of this book.

Renseignements additionnels

Pour obtenir des données, veuillez communiquer avec la Sous-section de l'information et de l'analyse courante (613) 951-3350 ou avec n'importe quel bureau régional. Pour avoir plus de renseignements sur les concepts et les méthodes, vous êtes priés de vous adresser à Vaclav Krabicka au (613) 951-3342. Les adresses figurent dans la couverture avant intérieure de la présente publication.

APPENDIX - 3**Farm Input Price Index –****CANSIM Matrix and Series Numbers**

Average prices and indexes of Selected Farm Inputs are now available on CANSIM by geographic regions as follows:

Matrix number	Geographic Regions	Series Number
nº de matrice	Région géographique	nº de série
550	Newfoundland – Terre-Neuve	607000
551	Prince Edward Island – Île-du-Prince-Édouard	607100
552	Nova Scotia – Nouvelle-Écosse	607200
553	New Brunswick – Nouveau-Brunswick	607300
554	Quebec-East – Québec-Est	607400
555	Quebec-South – Québec-Sud	607500
556	Quebec-West-Central – Québec-Ouest-Centre	607600
557	Quebec-East-Central – Québec-Est-Centre	607700
558	Quebec-West – Québec-Ouest	607800
559	Ontario-South – Ontario-Sud	607900
560	Ontario-North – Ontario-Nord	608000
561	Ontario-Central – Ontario-Centre	608100
562	Ontario-East – Ontario-Est	608200
563	Ontario-West – Ontario-Ouest	608300
564	Manitoba-South-West – Manitoba-Sud-Ouest	608400
565	Manitoba-North-West – Manitoba-Nord-Ouest	608500
566	Manitoba-Central – Manitoba-Centre	608600
567	Manitoba-East – Manitoba-Est	608700
568	Saskatchewan-South-East – Saskatchewan-Sud-Est	608800
569	Saskatchewan-South-West – Saskatchewan-Sud-Ouest	608900
570	Saskatchewan-West-Central – Saskatchewan-Ouest-Centre	609000
571	Saskatchewan-East-Central – Saskatchewan-Est-Centre	609100
572	Saskatchewan-North – Saskatchewan-Nord	609200
573	Alberta-South-East – Alberta-Sud-Est	609300
574	Alberta-South-Central – Alberta-Sud-Centre	609400
575	Alberta-South-West – Alberta-Sud-Ouest	609500
576	Alberta-East-Central – Alberta-Est-Centre	609600
577	Alberta-West-Central – Alberta-Ouest-Centre	609700
578	Alberta-North-East – Alberta-Nord-Est	609800
579	Alberta-North-West – Alberta-Nord-Ouest	609900
580	British Columbia-West – Colombie-Britannique-Ouest	610000
581	British Columbia-East – Colombie-Britannique-Est	610100
582	British Columbia-North – Colombie-Britannique-Nord	610200

Agricultural Statistics on CD-ROM

Whether you are interested in detailed statistics on dairy farming in Ontario, off-farm income in Saskatchewan, or poultry production in Quebec, the data are all there in one easy-to-use package on the ESAS CD-ROM. ESAS, the Extraction System of Agricultural Statistics, combines software with data on a compact disc to give clients desktop access to a wide array of farm financial and physical statistics.

Whether you need the information by region, farm type or revenue class, ESAS has:

- ▶ a complete itemization of operating revenues and expenses;
- ▶ sources and levels of off-farm income for operators and farm families;
- ▶ assets, liabilities, and capital investment for farms; and
- ▶ land use and livestock inventories.

The job of administering and evaluating agricultural programs is a challenging one. ESAS simplifies the research burden of program analysis and government administrators with important data on the financial and physical status of Canadian farms. Trade in your stacks of computer printouts for one easy-to-use CD-ROM.

The ESAS CD-ROM (catalogue no. 21F0001XCB) is \$625 (plus GST/HST and applicable PST) in Canada and US \$625 outside Canada. Annual Updates are available after the initial purchase for only \$295 (plus GST/HST and applicable PST) in Canada and US \$295 outside Canada. A discount is available to all educational institutions.

To learn more about ESAS, call the Agriculture Division of Statistics Canada toll-free at 1-800-465-1991

To order, write to Statistics Canada, Operations and Integration Division, Circulation Management, 120 Parkdale Ave., Ottawa, Ontario, K1A 0T6, or contact the nearest Statistics Canada Reference Centre listed in this publication.

If more convenient, fax your order to 1-800-889-9734 or call toll-free 1-800-267-6677 and use your Visa or MasterCard.

Via Internet: order@statcan.ca

ESAS is the product of a joint venture between Statistics Canada and Agriculture and Agri-Food Canada.

Statistiques agricoles sur CD-ROM

Que votre domaine d'intérêt soit l'élevage laitier en Ontario, les revenus hors ferme en Saskatchewan ou la production de volaille au Québec, toutes les données sont disponibles dans la trousse du CD-ROM SESA. Le SESA, le système d'extraction des statistiques agricoles, combine logiciel avec données sur un disque compact pour donner aux clients l'accès à un large éventail de statistiques agricoles financières et physiques.

Que vous ayez besoin d'information par région, par type d'exploitation agricole ou par catégorie de revenus, le SESA comprend :

- ▶ le bilan complet des revenus et des dépenses d'exploitation;
- ▶ les sources et le niveau des revenus hors ferme des exploitants agricoles et des familles agricoles;
- ▶ l'actif, le passif et les immobilisations;
- ▶ les estimations portant sur l'utilisation des terres et les stocks de bétail.

La gestion et l'évaluation des programmes agricoles présentent un défi. Le SESA simplifiera le travail de recherche des analystes des programmes et des gestionnaires des gouvernements en leur fournissant d'importantes données sur la situation financière et matérielle des exploitations agricoles canadiennes. Échangez vos piles d'imprimés d'ordinateur contre un CD-ROM facile à utiliser.

Le CD-ROM du SESA (n° 21F0001XCB au catalogue) coûte 625 \$ (TPS/T VH en sus et TVP s'il y a lieu) au Canada et 625 \$ US à l'extérieur du Canada. Les mises à jour annuelles coûtent seulement 295 \$ (TPS/T VH en sus et TVP s'il y a lieu) au Canada et 295 \$ US à l'extérieur du Canada une fois que vous avez acheté la trousse initiale. Tous les établissements d'enseignement peuvent profiter d'un rabais.

Pour en savoir plus sur le SESA, téléphonez sans frais à la Division de l'agriculture de Statistique Canada au 1-800-465-1991

Pour commander, écrivez à Statistique Canada, Division des opérations et de l'intégration, Gestion de la circulation, 120, avenue Parkdale, Ottawa (Ontario) K1A 0T6, ou communiquez avec le Centre de consultation de Statistique Canada le plus près indiqué dans la présente publication.

Vous pouvez aussi envoyer votre commande par télécopieur au 1-800-889-9734 ou téléphoner sans frais au 1-800-267-6677 et donner votre numéro de carte VISA ou MasterCard.

Par l'entremise d'Internet : order@statcan.ca

Le SESA est le fruit d'une collaboration entre Statistique Canada et Agriculture et Agroalimentaire Canada.

Agriculture Statistics at work for you

Did you know that Statistics Canada's Agriculture Division provides many of its clients with **special services** tailor-made to meet their unique data requirements? Agriculture Division has a variety of information sources at its fingertips that can be used to provide you with **the data you need to make important decisions as an agri-business specialist.**

SPECIAL TABULATIONS

Looking for specific agriculture data to help in your day-to-day work? Agriculture Division can provide you with customized tables and reports that give you the data you require. You can pick and choose the variables from one or more of our databases and receive them in a format that **best suits your needs.**

ANALYTICAL STUDIES

Require in-depth analysis of the data that affect your industry or market? Agriculture Division's specialized team of professionals has the hands-on experience in data analysis **you want working for you.**

CUSTOM SURVEYS

Do you need information that no one has but you don't know how to get it? Agriculture Division can conduct a special survey or expand on an existing one **just for you.**

Find out for yourself what many agriculture professionals have known for years — Statistics Canada has the know-how and expertise to get the job done!

Call us toll-free at 1-800-465-1991 or contact the Statistics Canada Regional Reference Centre nearest you and find out today what we can do for you!
