68-204 0 D.B.S. MEMORANDUM Dominion Bureau of Statistics, Ottawa, Canada PROPERTY OF Price 25 cents December 1950 11-1110 BRALL FINANCIAL STATISTICS OF PROVINCIAL GOVERNMENTS SUMMARY OF REVENUE AND EXPENDITURE (PRELIMINARY) 1949 (Fiscal Years Ended Nearest December 31) This statement is a preliminary estimate of provincial revenues and expenditures for fiscal years ended nearest to December 31st, 1949. For eight provinces it relates to the fiscal year ended March 31st, 1950, for New Brunswick, October 31st, 1949 and for Nova Scotia, November 30th, 1949. Provincial Public Accounts for the fiscal years covered are not yet available for all provinces. Hence the estimates had to be based in some cases

Provincial Public Accounts for the fiscal years covered are not yet available for all provinces. Hence the estimates had to be based in some cases on other sources of information. These included official provincial estimates, budget speeches containing a review of operations for the year in question, including in some instances, nine or ten months' actual figures and estimates for the remaining months. These source materials are listed on page 6.

In making use of these statistics it should be clearly understood that they purport to be only an estimate of what final tabulations will show when all the provincial public accounts are available. Nevertheless they are considered to be sufficiently comprehensive and complete to indicate the general trend of provincial finance in the latest fiscal year.

A test was made by applying the same methods used in the compilation of these current estimates to earlier years. It was found that the difference between preliminary estimates and the figures based on the final statements of the public accounts were in no instance greater than 12% for revenues and 5% for expenditures for any single province. For the ten provinces combined the error was approximately 6% for revenues and 2% for expenditures.

It should, however, be further pointed out that the margin of error for individual items within such totals may be more or less than the foregoing, depending on the degree of detail for which specific information is available and the necessity to make estimates and exercise personal judgment in classifying departmental revenues and expenditures of the provinces according to the source and functional categories in the tables.

The basis followed in making these preliminary compilations is the same as that used for the final published statistics of provincial

Prepared in the Public Finance and Transportation Division

finance. Thus, this statement represents the continuation of the new series of provincial finance statistics as revised and heretofore published for the years 1946, 1947 and 1948. Final statistics for the year 1949 will be published in the same form and detail as for these preceding years, when the necessary information is available at a later date.

Reference should be made to the reports for previous years as referred to for a detailed description and commentary on this series of statistics as well as general coverage of the data and basis of the compilations in relation to the official public accounts of the provinces.

With a view to minimizing the time involved in preparing the statistics in preliminary form, the data are not produced in the same degree of detail as for the final published figures. It will be noted that revenues are shown for only the major or more important sources and expenditures are condensed somewhat in terms of what are considered to be the more significant functional services or categories of provincial operations from a social and economic point of view.

EXPLANATORY NOTES

The term "net general revenue" is used to represent the current or ordinary provincial revenues first adjusted to a gross basis, i.e. by adding back revenue items which in the provincial accounts may have been deducted from expenditures, and conversely, expenditures which may have been deducted from revenues and including, for comparative purposes, revenues of certain special funds or activities the operations of which in some provinces are not reflected in the main revenue statements. Interest, institutional revenues and contributions from other governments, other than general or unconditional fiscal subsidies, namely, those representing grants-in-aid and shared-cost contributions for services are eliminated from the gross totals thus arrived at and off-set against relative expenditures.

The term "net combined and general capital expenditures" comprehends the same procedure and adjustments in arriving at gross totals to which is added net capital expenditures, the latter being represented by expenditure through provincial capital accounts on properties and equipment, public improvements such as highways, roads and bridges, etc., less revenue items relating to expenditures of this nature.

Transactions relating to loans and advances, other receivables and payables, as well as those with respect to borrowings are, for the purpose of these statistics, omitted from both revenues and expenditures, as the case may be, with the exception of any such amounts which may have been included in ordinary revenue or expenditure in the provincial accounts. These latter are referred to as "non-revenue or surplus receipts" and "non-expense and surplus payments" in the detailed statistics published. No attempt has been made to provide separate estimates of such transactions for this report, in as much as the volume is generally small and relatively insignificant in relation to total revenues and expenditures.

<u>Liquor Control Revenues</u>. Revenues in this regard arise from four sources, namely, profits on the operation of provincial wholesale vendors and retail outlets, privilege licences and permit fees, taxes on the sale of liquor,

and miscellaneous revenues, such as fines, penalties and confiscations arising from infractions of the Liquor Control Acts and Regulations. An estimate of the liquor revenues from these sources by provinces for the year 1949 is as follows:

Provinces	Sales Tax \$000	Permits \$000	Profits \$000	Fines, Penalties, Confiscations \$000	Total \$000
Newfoundland	-	••	1,834	• •	1,834
Prince Edward Island	195	33	643	15	886
Nova Scotia	-	74	8,209	50	8,333
New Brunswick	-	14	6,470	19	6,503
Quebec	10,687	355	17,887	20	28,949
Ontario		12,422	25,662	71	38,155

Saskatchewan	-	48	8,505	52	8,605
Alberta	-	815	11,167	115	12,097
British Columbia	-	227	16,023	• •	16,250
Total	10,882	15,205	102,759	384	129,230

.. Information not available.

Other Revenue. Item No. 27 combines revenues from the following sources: sales and services, fines and penalties, and miscellaneous items not otherwise specifically provided for in the main classifications, as well as non-revenue and surplus receipts previously referred to.

Other Expenditure. Item No. 48 of the expenditures includes general government, protection of persons and property, recreational and cultural services, trade and industrial development, local government planning and development, and miscellaneous items of expenditure not otherwise specifically provided for in the main classifications, as well as non-expense and surplus payments previously referred to.

As indicated previously, no attempt has been made to provide preliminary figures for these items of detail in this report.
