PRELIMINARY ANALYSIS OF REVENUE AND EXPENDITURE OF PROVINCIAL GOVERNMENTS

1950

(Fiscal years ended nearest December 31)

This statement is a preliminary analysis of revenue and expenditure of provincial governments for fiscal years ended nearest to December 31, 1950. In the case of Nova Scotia, the figures cover a twelve month period ended November 30, 1950, as in prior years, although its fiscal year end was changed in that year by extending it to cover a sixteen month period ended March 31, 1951. Future reports will, however, relate to the new fiscal period ending March 31 each year.

Provincial Public Accounts for the fiscal years covered are, in most cases, not yet available. Hence these preliminary figures are based primarily on other sources of information such as Provincial Estimates and Budget Speeches. Source materials are listed on pages 5 and 8.

In making use of these statistics it should be clearly understood that they purport to be only an estimate of what final tabulations will show when all provincial Public Accounts are available. Nevertheless they are considered to be sufficiently comprehensive and complete to indicate the general trend of provincial finance.

The basis followed in making these preliminary compilations is the same as that used for the final statistics. Reference should be made to previous reports in this series for detailed descriptions and other commentary, including coverage of data in relation to Public Accounts.

These figures for the year 1950-51 reflect some new sources of revenue and provisions for added services as well as major increases in established sources of revenue and functions of expenditure. A general sales tax, "Social Security Assessment", was introduced in Newfoundland being put into effect during the latter part of the year, and New Brunswick introduced a similar levy, "Social Services and Education Tax Act". Ontario introduced a levy during the year on logging profits which it is estimated will produce about \$1,000,000 revenue in a full year. The revenue from this source in the year 1950-51, is expected to realize \$500,000. Quebec expenditures provide \$5,600,000 to assist in defraying the losses resulting from the disastrous fires at Cabano and Rimouski, half of which is to be recovered from the Federal government. Manitoba has provided \$15,230,000 as a result of the Red River Valley Flood,

\$12,500,000 of which is to be recovered from the Federal government.

Comparisons with preliminary figures published for the fiscal years ended nearest December 31, 1949 indicate that important increases in both revenue and expenditure have taken place during the year under review. Total net general revenue for 1950 is forecast herein as \$924,000,000 which is an increase of 11% over the preliminary figure of \$833,000,000 published for 1949. Total taxes increased from \$412,000,000 in 1949 to \$466,000,000 in 1950, or 13%, with most of this increase being accounted for by gasoline taxes and corporations income tax. Revenue from privileges, licences and permits rose from \$167,000,000 in 1949 to \$200,000,000 in 1950, or 20%, chiefly accounted for by increases in the revenue of the province of Alberta through the sale of Crown oil leases, rentals of Crown lands and royalties.

Total net combined general and capital expenditure (excluding debt retirement) increased during the same period from \$876,000,000 to \$962,000,000 or 10%. The cost of hospital care services rose from \$115,000,000 to \$133,000,000, or 16% and expenditure on social welfare went from \$81,000,000 to \$88,000,000, an increase of 10%. Provincial expenditure on education increased by \$21,000,000, or 13%, while the increase in natural resources and primary industries services is expected to be about \$19,000,000, or 32%.

An examination of total provincial government revenue and expenditure for the past five years reveals a steady climb in both. The following tables summarize this growth. Figures for 1949 and 1950 exclude Newfoundland to indicate the comparative trend for the other nine provinces.

NET GENERAL REVENUE		Milli	ons of De	ollars	
	1946(a)	1947(a)	1948(a)	1949(b)	1950(b)
Taxes	165	287	363	402	464

Education	88 .	124	142	153	174
Natural Resources and Primary					200 Ar
Industries	46	60	75	56	75
Total Net Combined General and Capital Expenditure (excluding Debt Retirement)	487	656	796	849	934

<sup>(</sup>a) Revised.

<sup>(</sup>b) Preliminary.

<sup>(</sup>c) Includes profit from the sale of liquor, taxes, licences, permits, fines and other sundry revenue.

Total liquor revenue for 1950, as defined in the preceding table, follows:

Prevince	\$000° B
Newfoundland Prince Edward Island	2,100
Nova Scotia	7,600
New Brunswick	5,500
Quebec	31,700
Ontario	39,700
Manitoba	7,100
Saskatchewan	9,200
Alberta	12,200
British Columbia	17,800
All provinces	133,800

#### EXPLANATORY NOTES

"Net General Revenue" is arrived at by first adjusting current or ordinary revenue to a gross basis and then deducting interest, institutional revenue and specified contributions from other governments which are offset against relative expenditures. Adjustments to the gross basis consist mainly of adding back revenue items which are deducted from expenditures and expenditure items which are deducted from revenues in the provincial accounts and by including, for comparative purposes, revenues of certain special funds and activities the operations of which in some provinces are not reflected in the main revenue accounts. The specified contributions from other governments referred to above are those which represent grants-in-aid and shared-cost contributions for specific services. These are deducted from expenditures to show the actual cost to the provinces of the service in question. General or unconditional fiscal subsidies such as those payable to the provinces by the Federal government under the B.N.A. Act and those payable under the Dominion-Provincial Tax Agreements, however, are not treated in similar fashion but remain as part of "Net General Revenue".

"Net Combined General and Capital Expenditure" includes, as the term implies, net general expenditure and net capital expenditure. The former is arrived at in the same fashion as explained for revenue. The latter represents expenditures through provincial capital accounts for the acquisition or construction of properties and equipment as well as public improvements such as highways, roads and bridges, less revenue items relating to such expenditures.

Transactions on account of loans and advances and other receivables and payables are, for purposes of these statistics, omitted from both the revenue and expenditure as the case may be, except for any such amounts which may have been treated as ordinary or current account transactions by the provinces. These latter are included as "non-revenue or surplus receipts" or "non-expense or surplus payments" in the detailed statistics

published. No attempt has been made to segregate the estimates for such transactions for this report as the volume is generally small and therefore relatively insignificant in relation to the overall totals.

Dominion Subsidies - These are payments by the Federal government to the provinces under the B.N.A. Act, and other special grants. All provinces receive subsidies based on (a) allowances for government (b) interest on debt allowances (except Newfoundland), and (c) allowances per head of population, and some receive special allowances such as the transitional grant to Newfoundland and the payments under the Maritime Provinces Additional Subsidies Act, 1942.

Dominion-Provincial Tax Agreement - Under the terms of the Dominion-Provincial
Tax Rental Agreements Act, 1947, all provinces except Quebec and Ontario have
agreed to refrain from levying personal income taxes, corporation income taxes,
other corporation taxes and succession duties except under certain conditions
outlined in the Act. In lieu of these taxes they receive a tax rental fee from
the Federal government, which is shown in this report as revenue under
"Dominion-Provincial Tax Agreement". This item excludes payments by the
Federal government under clause 3 of the Agreement, being a 5% tax on corporations
income levied by the provinces but collected by the Federal government. This
item is shown as corporations income tax revenue. Clause 7 of the Agreement
provides for payment of a portion of Federal revenue from corporation income
tax based on income derived from the distribution of electrical energy, gas or
steam in the province to which payment is made. Revenue from this source has
been segregated in the accompanying revenue table.

Liquor Control Revenues - These arise from four sources, namely: profits from the operation of provincial wholesale vendors and retail outlets, item 25; privileges, licences and permit fees, part of item 17; taxes on the sale of liquor, item 8; and miscellaneous revenue, such as fines, penalties and confiscations arising from infractions of the Liquor Control Acts and Regulations, part of item 26. Estimates of total liquor revenues are given on page 3.

Other Revenue - Item 26 combines revenue from the following sources: sales and services, fines and penalties, and miscellaneous items not otherwise specifically provided for in the classification, as well as non-revenue and surplus receipts previously referred to.

Gontributions to Municipalities - Expenditure item 19 consists of: Newfoundland - grants to the St. John's Municipal Council, annual grants to local schools and special assistance capital grants; Prince Edward Island - grant to City of Charlottetown in lieu of taxes and special grants to municipalities; Nova Scotia - payments to municipalities re Dominion-Provincial Agreement; New Brunswick - Subsidies to municipalities; Ontario - Railway tax distribution including amounts applied to cost of maintenance of patients in mental institutions, payments to counties and districts to assist in the cost of county and district assessors, and subsidies to certain municipalities; Manitoba - payments re Soldiers' Taxation Relief; Alberta - grants in lieu of taxes; British Columbia - share of sales tax collected by province under the Social Security and Municipal Aid Act. These payments are all in the form of general subsidies and shared-revenue contributions and have no relation to any particular municipal expenditure. All

other payments to municipal governments have been classified according to the nature of the expenditure to which the provincial payment was related.

Other Expenditure - Item 20 includes general government, protection of persons and property, recreational and cultural services, trade and industrial development, local government planning and development, and miscellaneous items of expenditure not otherwise specifically provided for in the classification, as well as non-expense and surplus payments previously referred to.
