NOTE

This publication has been delayed in the hope that a number of difficulties encountered in presenting accurate and comparable provincial debt statistics might be resolved in some substantial degree through the adoption of a more detailed and a more descriptive statistical format. This, however, has not been feasible and in order to avoid further delay, the basic format used in preceding publications of this series has been adhered to in this report. However, certain changes considered necessary toward clarifying some of the difficulties arising from comparatively recent developments in intra and inter government financing arrangements have been incorporated. The substantive changes from preceding issues are as follows:

- (a) Bonds and debentures (direct and guaranteed) issued in respect of Canada Pension Plan loans, and loans under the Municipal Development and Loan Act, have been isolated;
- (b) Direct and Indirect Debt held as an identifiable provincial investment have been isolated;
- (c) Reserves, unexpended balances, deferred revenue and surplus previously deducted in Table 2 are now omitted from this table.

Because some basic difficulties are still unresolved, it is suggested the statistics contained herein be interpreted with caution.

It is hoped that it will be feasible to adopt a more informative presentation commencing with the statistics for 1966-67.

SYMBOLS

The following standard symbols are used in Dominion Bureau of Statistics publications:

- .. figures not available.
- ... figures not appropriate or not applicable.
- nil and amounts under \$500 on the dollar tables and less than 0.05 per cent on the percentage tables.
- -- amount too small to be expressed.
- P preliminary figures.
- r revised figures.

Note: Figures appearing in footnotes to tables are in thousands of dollars.

PROVINCIAL GOVERNMENT FINANCE

Debt 1965

(Fiscal Year Ended March 31, 1966)

INTRODUCTION

This publication presents statistics dealing with debt of provincial governments and of the Yukon and Northwest Territories, as at March 31, 1966, based on their audited final reports. A report dealing with revenue and expenditure for the fiscal year ended March 31, 1966, has already been published.

These reports on government finance are designed to provide an annual series of intergovernmental comparative statistics. They are largely compiled from the information contained in the public accounts of the provinces. Major variations exist in the accounting methods and presentations used, so that figures drawn from the provinces' public accounts and other official reports must be recast or designated differently in many instances for reporting in terms of standard statistical categories. The differences between the statistics in this report

and the corresponding data appearing in the provincial public accounts are explained more fully under "Explanatory Comment", and particularly the comments on Table 4, (Page 8). It is generally recognized that such adjustments to and re-arrangements of data in published reports of governing bodies are necessary for statistical purposes.

Differences between provinces also exist with respect to the division of financial responsibility between the provincial government itself and the local levels of government as well as to the degree and method of participation in provincial government enterprise financing.

The co-operation of provincial government officials in supplying additional information to that contained in the public accounts is gratefully acknowledged.

ANALYSIS OF PROVINCIAL DEBT

During the fiscal year ended March 31, 1966, all provinces except Alberta and British Columbia floated new bond issues, and all provinces made retirements. Total new issues amounted to \$823 million which was \$286 million more than they borrowed in 1964-65.

Of the new issues approximately 87 per cent are payable in Canada. Five provinces, Newfoundland, Nova Scotia, New Brunswick, Ontario and Saskatchewan sold issues in the United States of America. Three provinces again issued provincial savings bonds—Quebec an issue of \$89 million, 10 year $5.5\frac{1}{4}$, $5\frac{1}{2}$ per cent bonds, Manitoba an issue of \$9.9 million, 10 year $4\frac{3}{4}$, 5, $5\frac{1}{2}$ per cent bonds and Saskatchewan an issue of \$12.3 million, 10 year 5, $5\frac{1}{2}$ per cent bonds.

During the period under review all provinces made retirements of bonded debt totalling \$282.3 million. This amount included \$5.4 million called or cancelled by three of the provinces prior to maturity, and \$56.6 million savings bonds of three provinces cashed at the owner's option. Of this latter amount \$44.0 million were issued by the Province of Quebec, \$8.2 million by the Province of Manitoba, and \$4.4 million by the Province of Saskatchewan.

The net result of the new issues and retirements was that the bonded debt increased in all provinces except Manitoba, Alberta and British Columbia which recorded decreases in debt. In British Columbia the outstanding direct funded debt is fully covered by sinking funds.

Included in Table 1, and other tables recording direct debt are the bonds of thirteen wholly-owned Crown Corporations in the Province of Newfound-

land. The Newfoundland Government has entered into long-term hire-purchase agreements with these corporations, for the rent and ultimate purchase of the buildings constructed by the corporations. When these payments have been made by the province over the life of the bond issues covering capital costs of the various buildings, ownership of these buildings will revert to the province. Bonded Debt of these corporations as at March 31, 1966 included in Table 1 is as follows:

| | \$.000 |
|--|---------------|
| Bell Island Hospital Building Corporation | |
| Limited | 1,096 |
| Board of Liquor Control Building Corporation | |
| Limited | 3,040 |
| Gander Hospital Corporation Limited | 4,816 |
| Grace Hospital Extension Corporation Limited | 8,700 |
| Grand Falls Hospital Corporation Limited | 3,277 |
| Memorial University of Newfoundland Build- | |
| ing Corporation Limited | 10,038 |
| Newfoundland Government Building Corpora- | |
| tion Limited | . 7,535 |
| Northern Hospital Building Corporation | |
| Limited | 7,035 |
| Nurses Training School Building Corporation | |
| Limited | 5,300 |
| Pepperrell Hospital Reconstruction Corpora- | |
| tion Limited | 5,350 |
| St. John's Infirmary Building Corporation | |
| Limited | 4,155 |
| Technical College Building Corporation | - 0 - 0 |
| Limited | 6,000 |
| Vocational Schools (Western) Building Cor- | co. 000 000 c |
| poration Limited | 3,774 |
| Total | 70,116 |

The corresponding amount outstanding as at March 31, 1965 was \$57,800 thousand.

Also included under bonded debt in Table 1, are the following serial debentures:

- Municipal works assistance deben-Ontario tures held by the Government of Canada \$36,389 thousand,

- Municipal works assistance deben-Manitoba tures \$2,127 thousand,

Saskatchewan - Municipal Development and Loan fund debentures \$6.215 thousand.

Included under guaranteed debt, Table 1, item 25, are guarantees under the Municipal Development and Loan Act for the province of Quebec in the amount of \$33,727,000. Not reflected in the funded or guaranteed debt of certain provinces are the advances reflected by the Federal Government under the Municipal Development and Loan Act as follows:

| | \$'000 |
|------------------------|---------|
| Newfoundland | 72.5 |
| Prince Edward Island | 45.0 |
| Nova Scotia | 1,603.3 |
| New Brunswick | 1,940.9 |
| Alberta | 7,306.3 |
| British Columbia1 | 4,582.2 |
| North West Territories | |

Total direct debt less sinking funds amounted to \$6,089 million, an increase of \$702 million or 12.0 per cent over the previous year.

Total indirect debt less sinking funds amounted to \$6,554 million, an increase of \$585 million or 9.8 per cent over the previous year. All provinces except Prince Edward Island and Ontario shared in this increase.

A major portion of the direct and indirect debt of provincial governments is directly attributable to financing needs of provincial government enterprises. Over \$1,248 million of provincial direct bonded debt and \$5,968 million of guaranteed debt as at March 31, 1966 can be clearly identified as having been incurred to finance loans to government enterprises on a self-sustaining basis. They may obtain the necessary funds by borrowing from the provincial governments or by selling their own bonds on the market. In the former case, the provincial government sometimes issues bonds to cover the amount required by the enterprise and then charges the enterprise the same rate of interest on its loan as the province has to pay on the relevant bonds. When an enterprise issues its own bonds, the provincial government usually guarantees them as to principal and interest, thus assuring the enterprise of a more favourable rate than would otherwise be secured.

The summary of debt statistics below shows that the average term and rate of interest on total gross bonded debt has risen.

Summary of Debt Statistics (All Provinces) Selected Years 1950 - 65 as at Fiscal Year Ends Nearest December 31

| | 1950 | 1952 | 1954 | 1956 | 1958 | 1960 | 1962 | 1963 | 1964 | 1965 |

EXPLANATORY COMMENT

Table 1 - Direct and Indirect Debt

Direct debt includes debts of those funds considered to be a part of "General Fund" as defined for purposes of these statistics; assets of these funds appear in Table 2. To the extent that separate accounts are maintained by the provinces, "General Fund" includes the assets and liabilities of the capital and loan fund, sinking fund, revenue (ordinary) fund, working capital funds, provincial institutions, and administrative or special funds (including public trust funds created by the province out of general or earmarked revenue). Assets and liabilities of government enterprises, trust funds and provincial universities are excluded from "General Fund" (except for amounts due from or to these funds).

Funded debt, for purposes of these statistics, consists of all bonded debt and treasury bills having a term of one or more years.

The summaries in Table 1 represent the total debt of provincial governments less sinking funds. Loans to government enterprises and other "active assets" are included in Table 2 under "receivable" and are summarized by source in Table 5.

Indirect debt as presented in this report, only includes the direct debt of another entity, guaran-

teed by a provincial government. Excluded, therefore, are such indirect liabilities as future commitments of a provincial government. Presented in Table 1 are the gross amount of bonds guaranteed less sinking funds in connection therewith, guaranteed bank loans, Municipal Improvement Assistant Act loans, and other miscellaneous guarantees.

Excluded from direct debt are the debts of two provincial toll authorities, viz. the Quebec Autoroutes Authority and the British Columbia Ferry Authority. The former was constituted by the Province of Quebec to construct and operate a toll expressway from Montreal to the Laurentians, and has now been extended to other highways leading into Montreal. The British Columbia Ferry Authority commenced operations during the fiscal year ended March 31, 1955 as the British Columbia Toll Highways and Bridges Authority. It was set up as a "Crown Corporation" for the purposes of constructing, purchasing, maintaining and operating toll highways, toll bridges and ferries in the province. During 1963-64 the province made full provision to pay off the total original cost of the seven bridges operated by the Authority. The latter now operates the ferry system only. The following statements of direct debt and assets off-setting direct debt have been prepared from the authorities' balance sheets, on the same basis as the General Fund Statistics.

Quebec Autoroutes Authority as at December 31, 1965

| Direct debt | Amount | Assets offsetting direct debt | Amount |

¹ Guaranteed by the Province and included in item 1 of Table 3.

Table 2 - Assets offsetting Direct Debt

The table has been described by its present title since the inception of this publication. From a statistical point of view, we are now of the opinion that unless a government in question has, by statute, specifically earmarked certain assets to be available for the retirement of debt, no valid relationship can be established between liabilities and assets; but rather a three way relationship exists between assets, liabilities and equities (surpluses and reserves). It is anticipated that in future editions of this publication the tables relating to assets and liabilities will be amended to be compatable with the financial accounts presentation being developed by D.B.S.

We are continuing to show this table in the usual form this year, but have made a slight change to show separately on both Tables 1 and 2 the identifiable portion of the direct and guaranteed debt of a province which is held as an asset and included in the general investments of the province, in order to more clearly reflect the debt position of each province.

Cash on hand and in banks (item 1) includes fixed deposits, time deposits and time certificates on which higher rates of interest are paid than on ordinary cash deposits and which some authorities classify as "investments".

Investments (item 2). In addition to the investments held in sinking funds (which are included in item 5 of Table 1) all provinces and the Yukon Territory had some other investments at March 31, 1966.

Most provinces hold investments in their "special funds", others invest temporarily idle funds, while others aid their local government authorities by purchasing debentures of municipalities and schools. As at March 31, 1966, provincial government investments consisted chiefly of debentures, notes and treasury bills issued or guaranteed by the Government of Canada (\$167.5 million for all provinces), issued or guaranteed by provincial governments (\$220.3 million) and issued by municipal and school corporations (\$210.4 million for all provinces).

Manitoba and British Columbia held shares of their own enterprises (\$5,000,000, and \$90,573,000 respectively).

Receivables (item 4). These assets are shown gross, i.e., any reserves for doubtful accounts or payables, offset against them in the Public Accounts, are added back to item 4, or to item 14, Table 1, in the case of payables. These assets are analyzed in Table 5.

Inventories (item 5) and Fixed Assets (item 8). These are shown at the valuation placed on them in the Public Accounts. There is little comparability between provinces for these items. For example some provinces show fixed assets at the

amount of bonded debt outstanding that was incurred to finance the acquisition of the assets, some show accumulated expenditures, some write off expenditures made more than thirty years prior to the balance sheet date, and others reduce capital assets to one dollar. There may also be little comparability for one particular province from one year to the next.

Table 3-Analysis of Indirect Debt by Issuing Authority

This table provides a breakdown of total indirect debt less sinking funds per Table 1, in terms of the various classes of authorities which incurred the debt. Approximately 91 per cent of the total represents debt of provincial government enterprises guaranteed by the provinces; of the total guaranteed bonds and debentures of provincial government enterprises amounting to \$5,660 million, bonds and debentures of provincial Hydro Electric Commissions accounted for \$4,845 million.

Table 4-Reconciliation of Total Direct Debt less Sinking Funds with Total of Provincial Balance Sheets per Public Accounts

The largest adjustment made to the Public Accounts' balance sheets is the deduction of surpluses, reserves, unexpended balances and deferred revenue (see item 2). These amounts are not considered as liabilities to the public, i.e., due outside of General Fund, hence they are deducted from balance sheet totals and offset against assets.

Item 3 consists of those amounts which are treated as trust funds by the province and which are not included in these General Fund statistics. Where only trust liabilities are identifiable on the provincial balance sheet, i.e., where assets are not segregated too, this elimination cannot be made. Items representing an appropriation of general or earmarked revenue, and treated as trust funds by the province, but which are not subject to a trust agreement, are considered as part of the General Fund and are not eliminated in item 3.

Item 4 shows the total of those sinking funds which are shown on the asset side of provincial balance sheets but which in these statistics are to be shown as a deduction from gross bonded debt on Table 1, item 5.

Where the provincial balance sheet includes the assets and liabilities of an activity considered to be a government enterprise, these are excluded from General Fund and the net excess of assets over liabilities or vice versa is considered to be an advance by or to the province. Adjustment item 5 represents the amount deducted from General Fund liabilities to achieve this result.

When combining the various funds to arrive at General Fund, cash on hand or in banks is offset against liabilities in the nature of temporary loans or bank overdrafts, or vice versa. See adjustment items 6 and 7.

Amounts owing by one fund to another within the General Fund structure are eliminated to avoid inflated totals. See adjustment item 8.

Items 10 and 11 represent liabilities of special funds and working capital funds (exclusive of interfund items, surpluses and reserves eliminated from direct debt) which are not included on the provincial balance sheets. These funds embrace general government activities, which for various reasons the provinces have decided to record separately but which for comparative purposes should be included in General Fund statistics.

Items 12 to 14 record the addition of certain items shown as offsets on the provincial balance

sheets but which for comparative purposes should be shown "gross" on Tables 1 and 2.

Item 15 shows amounts not appearing on the provincial balance sheets but in appendices thereto.

Tables 6 to 13 - Analyses of Bonded Debt

Bonds issued by the provinces (i.e., excluding bonds of other authorities assumed by the provinces) outstanding on March 31, 1966, are analyzed by place of payment, interest rate, term of issue and year of maturity. Changes in bonded debt during the fiscal year under review are similarly analyzed.

"Term of Issue" on Tables 8 and 12 means the number of years from the date the bonds were issued to the date of maturity. Tables 8 and 9 do not take into account optional retirements before the date of maturity. It is possible that certain callable issues will be redeemed earlier than the final date of maturity.

March 29, 1968.

¹ New issues and retirements of guaranteed liabilities were not available for the year under review; net changes only are shown in this table (most items.

2 Includes Special Areas or Districts.

3 Includes guaranteed bank loans implemented by the Province and now included in Table 2, Item 4, and bank loans of Building Corporations of 5,500 included in Table 1, item 12.

4 This table shows the changes in gross guaranteed debt and then the changes in sinking funds. An increase in sinking funds has the same effects as a reduction in guaranteed debt, while a decrease (shown as a minus figure) results in an increase in guaranteed debt.
