S. A. Cudmore, M.A., F.S.S.

INCOMES ASSESSED FOR INCOME WAR TAX IN CANADA

In countries where income tax is a normal feature of the revenue system, the statistics of incomes that come to the knowledge of the income tax officials have long been regarded as furnishing a guide both to the aggregate amount of the national income and more particularly to its distribution by income classes and by occupations of income taxpayers. Thus most estimates of the amount and the distribution of income in the United Kingdom and the United States take as their starting point the income tax statistics of incomes coming under review.

In Canada on account of the relatively high standard of living of our people the exemption limit has been comparatively high. Indeed, under the income tax legislation of 1926 to 1931, the exemption limit for individual income tax was \$3,000 for married and \$1,500 for single persons in respect of incomes of the years 1925 to 1930 both inclusive. In the session of 1932, however, the exemption limit was reduced to \$2,400 for married and \$1,200 for single persons in respect of incomes of 1931 while in the 1933 session a further reduction was made to \$2,000 for married and \$1,000 for single persons in respect of incomes of 1932. The effect of the former reduction is reflected in the large increase in the number of income taxpayers in the lower income classes in 1932-33, while the effect of the latter reduction will be seen when income tax statistics for 1933-34 become available.

The general rate of corporation income tax which, after an exemption of \$2,000, had been 10% on incomes under \$5,000 and 10½% on incomes of \$5,000 or over from 1919 to 1924 was reduced to 9% on incomes of 1925, 8.1% on incomes of 1926 and 8% on incomes of 1927, 1928 and 1929. It was raised again to 10% on incomes of 1930, to 11% on incomes of 1931 of \$5,000 or less and 11.55% on incomes in excess of \$5,000 and to 12½% on incomes of 1932 with an extra 1% where corporations and joint stock companies filed a return consolidating their profit or loss with that of their subsidiary or subsidiaries. Again in respect of the income of 1932 the \$2,000 exemption hitherto afforded corporations was removed. These 1933 changes in rates, however, do not affect the statistics for 1932-33 that are now presented.

In the consideration of the following tables, it should be remembered that the bulk of the income tax is collected in April, May and June, the first quarter of the fiscal year, on the income of the then preceding calendar year. Thus the figures of income assessed for the fiscal year ended March 31, 1933 apply in the main to the calendar year 1931, the income tax due on these incomes being collected mainly in April, May and June of 1932. Similarly, the figures of income assessed in the fiscal year 1932 apply for the most part to incomes earned in the calendar year 1930, and so on.

The figures of table 1 show the total amount of income assessed for the purposes of the income war tax, by individual and corporate incomes for the last thirteen fiscal years, together with the amount received from such taxation. Particularly notable is the rapid increase of the total incomes assessed from \$744,000,000 in the fiscal year ended 1927 to \$1,371,500,000 in the fiscal year ended 1931. Owing largely to the depression, the incomes assessed in 1932 and 1933 showed a great decline to \$992,600,000 and \$944,100,000 respectively, indicating a serious contraction in both individual and corporate incomes in 1930 and 1931 as compared with 1929. In the

latest year, however, individual incomes assessed increased from \$660,100,000 to \$685,500,000. One reason for this is that the reduction of the exemption limit brought many thousand more incomes under review.

From table 2 it will be seen that the great bulk of the income assessed is found in the provinces of Ontario and Quebec. So far as corporate incomes are concerned (see table 3) this is partly due to the location of the head offices of most Canadian corporations in Montreal and Toronto. British Columbia ranks third in this comparison.

Table 4 shows by individuals and corporations the number of taxpayers and the amount of taxes paid in the last four fiscal years by size of income classes, while table 5 gives the same information by occupations of the taxpayers, individual or corporate, also for four years. Table 6 gives by provinces the number of individual and corporate taxpayers and the amount of taxes collected in the last four years, together with percentages showing the percentage of individuals and corporations paying tax in each province and of the revenue collected from each province.

Tables 7 and 8 give detailed information relating to size of income classes and amount of taxes paid by individuals and corporations in each province, together with similar information classified by occupations of individuals and corporations.

I. AMOUNT OF INDIVIDUAL AND CORPORATE INCOME ASSESSED FOR THE PURPOSES OF THE INCOME WAR TAX, AND INCOME TAX REVENUE PAID IN TO THE RECEIVER-GENERAL, FISCAL YEARS ENDED MARCH 31, 1921-33.

Note. - Income war tax revenue received by the Receiver-General in the fiscal years ended 1919 and 1920 was \$9,349,720 and \$20,263,740 respectively.
