TAXATION STATISIICS IN CANADA

INCONE TAX, EXCESS PHOEITS RAX AND SUCCESSION DUTIES

New Basis of Compliation - In the published statement of 1943 , notice was given that arrangements were under way for the publication of statistics on an Tncome Taxation Year basis. This year's atatemont takes tho initial stop in thet direction and later statements will complete the transition.

The decision to make the change is occasioned by the growing interest in income tax statistics from an economic and social standpoint. Formerly the atatiatics were in the sature of an administrative report covering the annual work accomplished by the Taxation Division of the Department of National Revenue duriag a Government Fiscal Year. Now, it is belioved that the statistice are of sufficient importance to be presented in the nature of a national report covering the income earmed by, and the taxes lepied on, all taxpayers in respect of a specific Caleader or Taxation Year. All income tax statistice must relate to a poriod of tire. Fommerly the statistics related to the piacal foar in wich the income was assessed by the Department; thus, income eamed in 1941 may be assessed in the $2942-43$ F1scal Year and becomes a part of the 1943 statistics. On the new basis the statistics will be related to the year in which the income is arned by the taxpayer and all incomes earned in 1941 will be combined to form the 1941 Taxation Year statistics regardless of when the assessments are made by the Dopartment. This dese cribes the change of basis in its broadest espect. A more detalled account is provided in the body of the report where brief toxtual commenta accompany each statistical tablo. The reador is cautioned to givo due atteation to these coments before consideriss the quantitativo tables.

The report is divided into three sections:

Colloction Statistics - No besic change in presontation from previous reporta. Assessment Statistics on a Taxation Year Basis - New basis of preseatation. Aspossmont Statibtics on a Fibcal Year Basis - OLd basis of probertation, continued for purposes of record only.

Collection Statistics - Vollection statistics are gathered by the accounting section at the timo the payments are mado and therefore have the value of being very up to date. Their timeliness has been onhanced within the pest two years by the adoption of the "pey-se-you-go" eystem which reaults in collecting tax ubstantially during the year in malch the income is earned and, on the average, sbout ton months prior to the actual flling of an incone tax return by the taxpayer. The payments on behalf of most taxpayors, however, ere made by their employers and a cheque from one employer may cover the tax payments of hundreds of employees. At this stage therefore it is not possibie to ilnk the moniea received to the individuals wo are, in the final analysis, contributing the tax. Collection statistics, as such, are for this reason not capable of being closely related to the persons who are being taxed and any statistical tables wich attempt to describe the taxpayer, such as by occupation or income class, must be besed on tho income tax roturn wich is filed by the taxpayer many months aftor the payment of his tax.

Asseasment Statibtics on Taxation Year Basis - A Taxetion Year is a period of time during which incone Is recelved and becomes subject to tax at ratea laid down in the "Income Nar Tax Act". In the case of individuals this period is almost slways Caleadar Yoar and in the case of corporations it is the Calendar Year in which the corporation "e fiscal period ends. The texpayer's declaration of income for each Taxation Tear is made on the official income tax return prescribed by the Ministor. "Assessment Statistics" sre gethered from these income tar returns after the returns heve been checked and verified or corrected by the ascesaing section.

Assesment Statistics on a Tration Year basis a complation of all statistice draw from the asassed tax returns for a pecific Taxation Yoer and the resulting table portrays the fax conditions in Canade for that specific year. Hitherto the Department of Natlonal Revenue bas not isgued etatiatice on a Taxation Year basis but the first stop in this direction is being mede in the present report.

Aseesmant Statistic on a Fiscal Year Basis - A Government Piscal Year is a twolvemonth period onding on Narch 3lat in each yesr, the 1944 Figcal Year consisting of the last mine months of 1943 and the firvt
three months of 1944. In the past the Department of Notional Revenue has issued all assessment statistics on a Fiscal Year basis and the figures were drew from all return a actually assessed during the twelvemonth period regardless of which Taxation Year the assessments applied to; thus, the Fiscal Year statistics would consist of the partial statiatics for several Taxation Years.

In practice, prion to the outbreak of war, the returns assessed io given Fiscal Year, say 1939, would predominantly consist of returns covering the 1957 Taxation Year. This is understood by recalling that most retums for the 19.37 Taxation Year would be filled early in 1938 and would be assessed during; the last nine months oi 1938 and the first three months of 1939, thus becoming embodied in the inarch $31,13.33$, Fiscal Year statistics. On this basis, the statistics were called l93j statistics because the assessments were completed by the administration during the 1939 Fiscal Year even though the inconea were earned in 1337. However, the 1959 fiscal Year statistics would not be precisely related to the 193 ? Taxation Year. $-a c h$ year some taxpayers die and the executors file a return for the period of the year up to the time of deati. The adrinistrition will assess these returns rapidly in order to permit the early settlement of the estate. Mrs procedure results in a number of 193 ? Taxation Year returns being assessed in the 1938 is cal lear. Un the other hand, some 19.37 Taxation Year returns might involve point e of contention requiring protracted consultations with the taxpayer and in such a case the return might not be finally assessed until the 1940 jiscel Year.

It will be readily understood from the above paragraph that the Income Tax administration at any point of time is simultaneously assessing the tax returns for several different facetion Years and that any report which groups the statistics on the basis of when the assessment was completed by the Department will contain a mixture of figures from different Taxation Years.

The value of income tax statistics rom a national standpoint is greatly inpaired if the fleures cannot be related to a specific Taxation or calendar Year and for this reason it has been decided to withhold the future publication of assessment statistics until they accurately reflect a given Taxation or Calendar lear. In the present report, however, the statistics for the 1943 and 1942 Fiscal Years are again reported on the old basis for purposes of record.

Deputy Minister of National revenue for iaxetion, Department of National Revenue.

Chief Statistician, 'fixation Division. Department of National Revenue.

SECTION I - COLIECTION STATISTIUS

TABIE A

TOTAL ANUUL COLIECTIONS

The Taxation Division of the Department of Nationsl kevenue administers three acts of the Dominion जoverunent, mamely:
the "Incone Nar Tax Act" enacted 1917,
"The Excess Frofits Tax Act, 1940".
"The Jominion Succession Duty fot" enscted 1941.

During the Var of $1914-18$ there was also enacted the "Business Profits rar Tax Act" the adminiatratlon of which was eventually merged 1 th the Income Var Tax fot adainistration. The Busineas Profita Var Tax act was substantially aimilar in intert to the present Excess Profits Tax fict and in the table below the collections under the two acts are placed in the same column but are so separated in time as to be clearly distinguishable ingofar as revenues are concermed.

Annul collections under these acts are given below on a Government Fiscal Year beals
41
figures are given "net" aiter deductine renade of any taxes in the same year.

# SUBDIVISION OF COLLECTIONS 

I

INCONE WAR TAX ACT - SUBDIVIDRD

The Income Har Tex Act levios several different taxes on incomes, brief detcription of
which follows below:

Genoral Income Tax on Individuals - This constitutes the main source of personal income tax and is levied under Section $9(1)$ of the Act. The rate structure is set forth in paragraphe $A$ and $A$ of the First Sohedule to the Act.

Generel Income Tar on Corporations - This 1 - levied under Section $9(2)$ of the Act at mates at forth in paragraphs C, D and $\mathcal{E}$ of the First Schedule. The rate of tax has boen unchanged since the 1940 taxation Year at $18 \%$, the rate for companies filing consolidated returns is 20\%. Certain Non-Resident Owned Investment Corporations" as defined in the Act are subject to a 22 b rato of tax.

## Thx on Dividonds and Interest -

(A) If Paid to Residents in a Currency at Premiun in Excess of 5t - Under Section gs of the Aot thore is levied on residents of Canade tax of 5 on interest and dividends paid by Canadian debtors if

(B) If Pald to Non-Residents - Under Section $98(2)$ of the Act there $1 s$ levied a tax of $15 \%$ on nonrosidents of Cenada in respect of all dividends, intereat, copyright and certain other payments received from Canadian debtors. Interest on bonds 1 ssued or guaranteed by the Dominion of Canada 18 exempt from this tax and thore are certain other qualifications not mentioned bere.

15\% Tex on Rents and Rojelties Pald to Non-Residents - This tax 1 a levied under Section 27 of the Act and 10 imposed on the income of non-residents of Canada from rents and royalties received from Canadian sources. The tar is therefore very siadlar to the 15 f tax levied under Section $9 B(2)$ which also applies to nonresidents.

Gift Tax - Under Section 88 of the dct a tax is levied on gifta at rates varying frow 100 l to 28 .

Mational Defence Tax - Under Section 91 of the Act E Nationel Defence Tax" was imposed during the Taretion or Calendar Yonrs 1940 and 194l. The tax was deductible at the source from payments of salary, wages, dividends or interest beginging on July 1,1940 ad terminatiog on August 31, 1942. It was cancelled when a syaten of tar deduction at source for general income tax was introduced on September 1 , 1942 . All deductlons mide during the eight monthe from January 1 to August 31, 1942, were credited to the genervilicome tax of the individual concermed.

Althougt it was levied under a soparate section of the Act this tax, while it existed, was an integral and important part of the general atructure for taxing individuals and for thia reason is shom bolow as part of the general tax collected under Soction $9(1)$. This is considered a satisfactory mothod of rovealing the growth of individual tax collections duriag the war poriod.

The actual collection of National Defonce Tax during the $11 f 0$ of the tax was follows by monthe:

| MONTH | AMOUNT COLIECTED $\$$ | RATE OF DEDUCTIO |
| :---: | :---: | :---: |
| AJGUST 1940 | 2,590 | From July 1, 1940 to July 1, 1941 - |

TOTAL COLLECTED
214,894,931

1942 Deferred Tex - During 1942 the collection of individual income tax was converted to mper-as-you-go" basis. In order to facilitate this conversion the rates of taxation for the jear 1942 wore cut in half except in the case of individuals having investment income in excess of $\$ 3,000$. In the ease of such persons a Defermed Tax" was levied under Section $9 A(1)(b)$ of the Act. This tax 10 payable upon the death of the taxpayer and therefore is designated as the " 1942 Doferred Tax". The tax 18 imposed on invostaont incone in excess of $\$ 3,000$ earned in the year 1942 . The tax itself is non-recurring but revenuen will be recelved from it for many years to cone upon the desth of those who were subject to the tax in 1942.

Until April 30, 1944, those liable for the Deferred Tax had the privilege of settling the liability inmediately at a discount by paying the present value of the tax arrived at by the use of otandard mortality tables and a $2 \%$ rate of intereat. Collections of the Deferred Tax in the 1944 Fiscal Year therefore include payments from taxpayers who exercised this option during the year.

(x) Includes National Defence Tax imposed under Section 91 of the Act as explained in the text above.

THE EXCESS FROFITS TAX ACT, 1940 - SUBDIVIDIT

The Ixcess Profits Tax Act was imposed abortly after the outbreak of war in ig39 for the pur. pose of heavily taxing the excese businese profits occurring in an expanded wartime economy. The Act applien to sll form of businoss onterprise whether conductod within a corporate, partmership or aole proprdotorahip trueture.

Frees profits aro defined as profits in excess of mStandard Proftem. Standard Profita art deflnod as the verage profit enmed in the thres best years of the four-Fear atandard period extending froa 1936 to 1939 inclusve. Bustnesees mich wero depressed during the bandard period may apply to the Boerd of Refores for the award of a Standard Profit based on mome yardetick other than the ectual profite of the businens during the jear. 1936 to 1939.

The Excest Profits Tax Act is not confined only to the texing of micesa Profits" as defined bove. The lot miso imposes a tax on "Total Profits" ac indicatod below. The tax 1s levied under Section 3
of the Act at mates lald dom in the Second Schedule to the Act; those rates frow 1940 to 1944 have been as followe:

## EXCESS PROFITS TAX a CORPORATIONS

1940 - $12 \%$ of total profits or 75 of excess profits wheherer is greater.
1941 - $22 \%$ of total profite or $75 \%$ of excese profte whichever is greater.
1942 - Mrst Six Months - Sane tax rates as in 1941.
1942 - Second Six Months - $12 \%$ of total profits plus oither $10 \%$ of total profits or $100 \%$ of excess profits wichover is greater.

1943 - $12 \%$ of total profite plus oither $20 \%$ of total profits or $100 \%$ of excess profits wichover is greater.

1944 - Uncbanged from 1943.
Note: Corporations paying the loot rete of tax on excess profits w111 have 20$\}$ of the ter refunded to them after the Nar. No part of the 126 or 10 tax on total profits 18 refundable and no pert of the 756 rate of tax on excess profite in effect prior to July $1,1942, ~ i s ~ r e f u n d a b l e . ~$

Corporations having taxable profit of less than 3 j, 000 befor deduction of any salary or wages paid to s shareholder were not subject to the Excess Profits Tax prior to July 1 , 1942. After July 1 . 1942, such corporations aro subject only to the 12, tax on total profits.

## EXGESS PROFITS TAX ON PARTNERSHIPS <br> OR INDIVIDUALS IN BUSINESS

Note: Taxpayers subject to the $100 \%$ rate of tax on excess profite W111 Fare $20 \%$ of the tax refunded to then after the inar.

Partnerahips or sole proprietorehips earing leas than $\$ 5,000$ per gear before deduction for propristor's alaries are not subject to Excese Profits Tax and in computing taxable income under the Act - maximum allomance of $\$ 5,000$ es a alary for each woring proprietor is deductible.

In the table below the tax collections from partners or sole proprietors are listed under the hoading "Individuals".

TABLE D

TABIS F
COLLECTIONS ON A "TAXATION YEAR" BASIS
(1.0. Relating the Tax back to the Yoar in which the Income was Received)

The previous collection tables reflected the total texes collected during a covernment Flsol
Year without regerd to which particular Taxation Years the revemues apply. In the followng table the collection of the more important taxes are re-arranged in order to reveal the revenues recelved for the account of each succeeding Taxation Year.

A Taxation Year is a period of time during which income is received and becomes subject to tax at Fated laid down in the Act. In the case of Individunls the Taxation Year is almost always alendar Year. In the case of a corporation the Taxation Year is the Calendar Year in wich the company'a fiscal period ends. Under the present system of collection, a substantial portion of the taxes is collected durine the year in wich the income is earned, that is to say, during the Taxation Year, and the belance is almost ontirely collacted in the two following years.

The general Head Office account for a Rexation Year is held open for statistical purposes for a period of three years. Thereafter, any taxes collected for a "closed" year are credited to a Combined Years Account". As of Harch 31, 1944, general Head Office accounts were open for the Taxation Years 1944, 1943 and 1942 and the "Combined Account" was known as 1917-41. All collections in the Combined fecount are, in the table below, credited to the last year in the combined focount which in the case above is 1941. In the succeeding year the Corbined Account" will be known as 1917-43 and all the colleotions in this account for a twelve-month period will be credited to 1942. The collections received in the Combined Account are relatively amall and as each Taxation Year oventually received the "combinedn revenues for a twelvemonth period it is not belioved that this procedure in any. way affects tho comparative table and it has the advantage of permanonty closing off a Taxation Year for genersi stetistical purposes. It is not to be understood Srom the foregoing description that the ccount of an individual taxpayer is closed off for any Taxation Yeer until 凡ll peyment is received.

The following tablo distributes the collections frow individual and corporation income and excess profits tax on a Taxation Year basis. It will be noted that the collections for the last three yeare are still open.

## SECTION II

## ASSESSIMNT STATISTICS ON \& TAXATION YEAR BASIS

In the introduction to this report it was stated that a change is contemplated in the future presentation of income tax statistics. It is proposed to present assessment statistics on a Taxation Year basis so that all taxpayers for a spacific Taxation or lalendar Year together win theis income and the tax resulting from that income can be shown in a sirigle table. The development of such a tablo cannot be cornpleted until all the tax retums for a specific year are assebsed ar otherwise ac aunted for. It is expected that the first report on such a basis will cover the 1941 Taxatian fear and will be avallable by the summer of 1945,1 , e. three gears after all 1941 returns have been received.

It is realized, however, that for the purposes of study in the ileld of taxation and social reconstruction, information of a much more current nature is imediately required. The Separtment has therefore prepared an estimate of the current statistical position with regard to individual income tax showing the estimated number of individuals subject to income tax topether with estimetes of their total income, total tax payable and the amount refundable for the 1944 Taxation Year or Calendar Year. Jurreat estimates of this nature $w 11$ be continued from year to year.

Persons using or extracting information from this table are cautioned to bear in mind that the IIgures are estimates. In view of the rapidly changing tax conditions of the past few years it has not bean posaible to use statistics of prevlous years as a gulde to any great extent. The estimate has been prepared with cara but seversl assumptions have been nocessary in compiliag it and it is to be expected that the eventurl fisures for 1944 will difior in some degree from the estimate.

It will be recalled that the savings element or "refundable portion" of individual income tax was eliminated by Parliament as of July l. 1944. This change bas been taken into account in arrivine at the estimate below. The smount of refundable tax is estimated at $\$ 74,000,000$ for the first six monthe of 1944.

## SECTION III

## ASSESSMENT STATISTICS ON A GOVERNMENT FISCAL YEAR BASIS

In the past the Department has issued assessment statistics on Government Fiscal Year beais. It mas explained in the introduction to this report that these atatistios in general related to incomes earmed two years previous to the date of the particular Flacsi Year and that in this way the statistice could be atisfactomily linked to a specific Tazation Year although the connection was never a precise one.

Stace the outbreak of far the number of returns to be asseased bas increased so rapidly that It has not been possible to clear all returns in a twolve-month span of time. Certain taxpayers joined the armed bervices and were not readily avellable to clarify points mequiring attention by the assessor. There has also been a considerable movement in the working population whicb has retarded the normal spoed of assosigg. Most inportant of all, the actual flling date for tar returns which was April 30 in the case of 1940 Taration Year returns was altered to Meroh 31 for the 1941 return, to June 30 for the 1942 return and then back to April 30 in the case of the 1943 roturn. All these factore have combined to upset the relationship between the returns assessed in a certain piscal Year and the returns inled for a cortain Teration Year.

As stated in Section II of this report it has been decided in the future to withold the publication of asasament statistics until all the returns for a secific Taxation fear have been ssessed and assembled into a single report. For purposes of record, howevor, the statist 108 for the 1942 and 1943 Fiscal Years are included in this report and in each case there is a preliminary statement sbowing the composition of the statistics with respect to specif1c Taxation Years.

## 1942-43 FISCAL XEAR ASSESSMENT STATISTICS

During the Goverment Piscal Year 1942-43, anding on March 31, 1943, there were assessed 642,126 individual tox returns and 9,956 corporation tar returne. These returns were distributed as follows by Taxation Years.

| Individual Assesements relating to the 1940 Taxation Year or earlier | 316,468 | 788,769,066 | 67,959,268 |
| :---: | :---: | :---: | :---: |
| Individunl Asseasmots relating to the 1941 Taration Year | 325,126 | $636,812,924$ | 47,935,098 |
| Individual Assesments relating to the 1942 Taratim Tear | 532 | 1,144,309 | 194.421 |
| Total Individual Assemsmonts made in tho 1942-43 Fiscal Year | 642,126 | 1,426,726,299 | 116,088,787 |
| Corporation Assesaments relating to the 1940 Taxation Fear or earlier | 6.573 | 378, 706,862 | 59,629,407 |
| Corporetion Assessants rolating to the 1941 Taxation Year | 3,273 | 63,352,394 | 11, 187,810 |
| Corporetion Assesmants relating to the 1942 Taxation Yaar | 109 | 960,068 | 181,277 |
| Corporntion Aseosmments relating to the 1943 Taxation Year | 1 | - | 100 |
| Total Corporation Assessinents medo in the 1942-43 Fiscal Year | 9,956 | 443,019,384 | $70,996,594$ |
