Financial Statistics of Provincial Governments in Canada,
1927, 1928 and 1929.

P R E F A C E

From 1916 to 1926, the Bureau of Statistics annually prepared and published a more or less detailed and comparable report dealing with ordinary provincial revenues and expenditures, assets and liabilities.

This study afforded useful information up to a certain point, but the omission of extraordinary, capital and trust fund items gave only a partial picture of the financial activities of the provinces as a whole, and the printing of the report was therefore discontinued. In order, however, to preserve a continuity of statistics, a bulletin has been issued annually from 1927 to 1931 showing brief summaries of ordinary revenues and expenditures as well as bonded debt and treasury bill statements.

With the view of improving these statistics, the Bureau has during the past few months prepared a new classification of accounts covering the years 1927, 1928 and 1929 for the several classes of revenues and expenditures for each province with the exception of Manitoba where only ordinary revenues and expenditures are shown. For this province, the Bureau was unable to procure detailed information of extraordinary, capital and trust fund items in time for inclusion in this report. The tables were compiled with as uniform a terminology of accounts as was possible from the widely divergent forms in which individual provinces detail their Public Accounts reports. The task proved to be a difficult one, requiring considerable consultation with Treasury and other Departmental officials to whom grateful acknowledgment is extended for their valuable assistance.

Though the new classification afforded considerable improvement over previous compilations, the Bureau felt that complete uniformity could only be brought about by a general Conference of Provincial Treasury officials, which has recently been arranged. The Bureau, therefore, presents the following report only as a tentative basis for discussion until final rearrangements are agreed upon.

While the statistics are shown in the various tables as for the years 1927, 1928 and 1929, they cover the provincial fiscal years ending as follows:

Prince Edward Island, Dec. 31; Nova Scotia, Sept. 30;
New Brunswick, Oct. 31; Quebec, June 30; Ontario, Oct. 31;
Manitoba, Apr. 30; Saskatchewan, Apr. 30; Alberta, Mar. 31;
and British Columbia, Mar. 31.

The report has been compiled under the direction of Colonel J. R. Munro,
Chief of Finance Statistics Branch.

R. H. COATS,
Dominion Statistician.

Dominion Bureau of Statistics,
Ottawa, September 1, 1933.

Notes on Revenues and Expenditures of Provincial Governments for their
Respective Fiscal Years ended in 1927, 1928 and 1929.

TABLE 1 - SUMMARY OF CLASSIFIED REVENUES AND EXPENDITURES

TABLE 2 - ORDINARY REVENUE

Ordinary Revenue as analysed in this table has been divided into four principal groups, viz.:

1. Taxation, Licensing, Special Assessments and Fines.
2. Subsidies, Subventions, Grants, etc.
3. Proceeds from Public Financial Activities.
4. Revenues from Operations by the various Governmental Departments.

As some items may include more than one source of revenue the following explanatory notes will be found useful in a comparative study of the subdivisions of this table.

1 - Taxation and Licenses

Under the provisions of the British North America Act of 1867 and amendments thereto, each Province is given the right to impose direct taxation within its own jurisdiction. In consequence of such wide power there is a lack of uniformity in the administration of land or property tax according to provincial organization and requirements.

Under the municipal organization as erected by each provincial government the general practice is to delegate taxation of land and property to the municipalities. There are, however, certain provinces who impose special taxation for revenue purposes apart from any collections made by municipal governments. In Prince Edward Island there is no municipal organization other than some seven incorporated towns and one city; outside of these places land and other taxation is administered by the provincial government.

"General Property Tax" is the first sub-heading under taxation revenue. In Prince Edward Island this includes real estate, personal property, income and road taxes. Provincial land tax provides the revenue for Nova Scotia. In New Brunswick it consists entirely of wild land tax. No revenue under this heading is shown for Quebec and Ontario as such matters are delegated to municipal governments. The revenue as shown for Manitoba consists of municipal levy and unoccupied land tax. In Saskatchewan "General Property Tax" includes taxes for public revenue, wild lands, supplementary revenue and forfeited lands. Under this heading for Alberta are included taxes for supplementary revenue, general and leased land taxes for education, wild land, Improvement District, Tax Recovery and Timber Area, Tax Acts. British Columbia includes land taxes for real property, wild lands, coal and timber lands, also school taxes as affecting rural districts.

Corporation Taxes. Irrespective of any tax placed upon financial and commercial corporations by the Dominion Government, each province under the B.N.A. Act is empowered to exact duty for such institutions operating within the individual provincial areas. Included under this heading, therefore, are banks, railway companies, insurance companies, (fire, life and accident) telephone, loan and trust, gas, electric and power, telegraph and steamship companies as well as various other commercial corporations.

Income Tax. The Provincial Governments of Prince Edward Island, Manitoba and British Columbia are the only ones which impose a governmental tax on income. In the provinces of Ontario, Nova Scotia, New Brunswick and Saskatchewan incomes are taxed in certain municipalities but such revenues do not affect the provincial treasuries. Income tax, other than Dominion, is not levied in the other provinces.

All Other Special Taxes. Include principally Broker's Tax in Prince Edward Island; transfer tax of shares and bonds in Quebec; fire Marshal's tax, luxury tax and tax on transfer of securities in Ontario; and beverage tax and fire prevention tax in Alberta.

All Other Business Licenses and Permits. Under this heading are included, pedlars' licenses in Prince Edward Island, licenses for hotels, lodging houses and restaurants, as well as licenses under the Public Fire Protection Act in Quebec; licenses for undertakers, private detectives and auctioneers as well as those in connection with the Lightning Rod Act for Ontario; pedlars' and auctioneers' licenses principally in Saskatchewan; billiard rooms, restaurants, threshing machines, auctioneers' and pedlars' in Alberta, while the figures for British Columbia cover real estate agents' and trade licenses.

All Other Non-business Licenses. Included are dog trainers' licenses in Saskatchewan and dog licenses in British Columbia. These revenues are in addition to those collected by the municipalities of each province.

2 - Subsidies, Subventions, etc.

Under the terms of the British North America Act, the provinces entering the federation of Canada in 1867 and at later dates, were granted stipulated subsidies and allowances. There have been amendments to the Act from time to time in which additional subsidies and allowances were made. These subsidies consist mainly of allowances for debt, for support of government and legislature, allowances based on population, and, allowances in lieu of public lands. Other special grants and allowances have also been made from time to time.

"Other Donations and Assessments" are self-explanatory.

3 - Public Finance

The ordinary revenue is principally derived from interest, earnings and repayments of advances to public service enterprises, as well as interest from deposits, investments, loans, etc.

4 - All General Departments

The revenue from this source is derived from the operation, regulation and general activities of the various departments which go to make up the government of the individual provinces of the country, as for example, fees, in connection with the attorney general's department, the education department, charities and hospitals, agriculture, lands, water power rentals, forests and mines departments, printing and sales of publications, refunds of departmental advances, etc., while the profits from liquor traffic control form a large portion of this revenue.

TABLE 3 - EXTRAORDINARY REVENUE

To a large extent this revenue represents the proceeds of loans and borrowings by the provincial governments such as bonds and debentures, treasury bills, temporary loans and bank overdrafts, which naturally increase the public liabilities. As the accounting is kept separate from ordinary and capital charge, the heading extraordinary has been used owing to lack of a better definition. This class of revenue has not been analyzed for Manitoba in this report.

Explanation of items is similar to the discussion of Ordinary Revenue tables.

TABLE 4 - CAPITAL REVENUE

The bulk of this revenue represents receipts from the issue of bonds and treasury bills to be applied on public undertakings such as government buildings, highways, railways, power plants and drainage. In some instances the revenue represents repayments of loans to other organizations. The analysis of this class of revenue for Manitoba is not included in this report.

TABLE 5 - REVENUE FROM TRUST FUNDS, ETC.

This revenue consists of funds set aside for special uses. Almost all of this revenue, held in trust, is confined to the province of Quebec, and the sources from which it is obtained are itemized in the table.

TABLE 6 - ORDINARY EXPENDITURE

The analysis of this expenditure has been grouped into ten divisions as follows:

1. General Government.
2. Protection to Person and Property.
3. Development and Conservation of Natural Resources.
4. Conservation of Health and Sanitation.
5. Hospitals, Charities and Corrections.
6. Education.
7. Highways, Roads and Public Buildings.
8. Public Works, Utilities and Services.
9. Public Debt, Interest, and Other Public Finance.
10. Other Miscellaneous Expenditure.

As will be seen from a study of the tables, each of these divisions has been further analyzed in detail, but even with such subdivision there are many items which include more than one charge upon the public treasury, consequently the following explanatory notes are offered to assist in obtaining a more detailed perspective of the channels through which provincial finances flow.

1 - General Government

Under this heading are included the employment of persons and services connected with the legislative assembly, printing, elections and library; salaries of Ministers, administration of offices of Treasury department, Provincial Secretary, King's Printer, Municipal Affairs, and Executive Council. Expenditure on legal and

judicial services are also included embodying such as Attorney General's administration, Magistrates, sheriffs, coroners, prosecutions, court officials, land title offices and enforcement of liquor traffic acts.

2 - Protection of Person and Property

This includes, police salaries, wages and expenses; fish and game warden expenses; fire prevention and investigation costs; expenses of labour administration, workmen's compensation, inspection of factories, boilers, buildings, etc.

3 - Development and Conservation of Natural Resources

The first important subdivision of this group consists of expenditure on Agriculture. It being one of the basic industries of the country, provincial governments encourage development, by means of grants to agricultural societies and other associations peculiar to the industry, by assisting in regulation and control of dairying, live stock and poultry raising, by extension services such as experimental farms and demonstration stations as well as extension of marketing produce, and, by expending money on the advancement of horticultural and vegetable industries.

The second subdivision of this group relates to expenditure in connection with Lands and Forests. Forests, timber and woods control, forms one of the leading sources of provincial revenues, and in order to promote such interests there is necessarily a considerable amount of expenditure in administration of forest service ranging, fire ranging and protection, as well as other regulation. Water rights expenditure is also shown, as well as the expenditures on lands administration.

The third subdivision of this group details expenditures in connection with fish and game control.

Mines and Mining constitutes the fourth subdivision of the group, in which are outlined expenditures for administration, regulation, exploration, surveying and inspection.

4 - Health and Sanitation

The expenditures detailed in this group show what each provincial government is doing, to promote child welfare, to prevent the ravages of communicable disease, to regulate sanitary conditions for the people by the maintenance of divisional boards of health, to assist health associations and to support clinics and research work.

5 - Hospitals, Charities and Corrections

While the Dominion Government expends annually large sums of money on the hospitalization of casualties resultant from the Great War, on the maintenances of penitentiary affairs and on the emergent relief of unemployed, such matters as form the subdivision of this group, are ordinarily the allotment of provincial government control, and the services rendered for public welfare are detailed in the tables of expenditure. Looking back over the years it at once becomes apparent how serious a problem has the public cost for care of mentally afflicted people in each province become. The extension of social welfare is also exhibited in provincial assistance for general hospital direction throughout the country, the care of children, housing of aged indigents and other charitable undertakings. Government expenditures on reformatories, industrial farms and other correctional affairs are also shown.

6 - Education

The ordinary expenditure of all provinces for education is only exceeded by that on Interest charges on the public debt. There has been a very pronounced rise in governmental cost of education in recent years occasioned partly by a more favourable consideration of teachers salaries, partly by the purchasing power of the dollar, but more particularly by the extension of educational facilities in public school, collegiate or high school as well as in college and university training throughout Canada. The classification of expenditures under this group has been detailed so as to give a survey of what each province does to promote educational interests within its own jurisdiction. It should be borne in mind, however, that provincial government expenditures on education form only a part of the whole, as, to a large extent, municipalities throughout Canada collect school taxes, and through their School Boards construct, equip and maintain, from such funds, the necessary public institutions of learning, subject to regulation and requisite assistance by the several Provincial Governments.

7 - Highways, Public Roads and Bridges

The phenomenal increase in the use of motor vehicles throughout Canada within the last fifteen or twenty years has been responsible for a heavy expenditure for permanent highways, construction and maintenance of improved roads and the erection of bridges. The investment of provincial governments in highways and roads will readily be seen from a study of the assets and liabilities tables of this report. The tables of expenditure are detailed to show the annual outlay in maintaining the programme of highway construction by the several provinces.

8 - Public Works, Public Buildings, Utilities and Services

Under this heading will be found a classification of annual expenditure on, public buildings necessary for the administration work of the many government departments and the operation of ferries, steamers, power plants, telephones and various other services.

9 - Public Debt, Interest and Other Public Finance

The expenditures under this group represent the chief annual outlay by provincial treasuries. The debt situation has been dealt with in a special report by the Bureau of Statistics and the annual carrying charges of this debt are detailed in this table.

10 - Miscellaneous

Under this heading are grouped expenditures on a variety of matters which individually are not extensive enough to make up separate tables. The expenditures on Civil Service and Old Age pensions together with Mothers' and Deserted Wives' allowances form the larger part of this group.

TABLE 7 - EXTRAORDINARY EXPENDITURE

The bulk of this expenditure represents the payment of public debt charges in the shape of treasury bills, debentures, bonds, and advances towards public services such as power plants, highway assistance, hospitals and charities. The lack of uniformity in accounting as between provinces is apparent in this table, as

- 6 -

expenditures under this heading are greater than ordinary for Nova Scotia, Ontario and Alberta, very much less for Prince Edward Island, Quebec and Saskatchewan, while no such classification is shown for New Brunswick or British Columbia. Manitoba extraordinary expenditure was not analyzed.

TABLE 8 - CAPITAL EXPENDITURE

The interpretation of capital charges to the laymind conveys the erection of public buildings, organization and erection of hospitals, educational institutions, railways, power plants and such other services which require funds not readily available out of current revenue and in as much as these buildings and services will be for the benefit of future taxpayers as well as serving the immediate needs of the present day public, it is logical that such costs should be spread over a period of years and the charges kept apart from current ordinary expense account. The analysis of Capital Expenditure for Manitoba is not shown in this report.

As is the case in extraordinary expenditure, there is a lack of uniformity in classification of this expenditure as between provinces, and the Bureau cannot under present conditions of accounting offer any more scientific statistical arrangement than the detail as shown in this table.

As may be seen from the table, highways, public works and utility services and public debt charges of various kinds constitute the large part of this expenditure.

TABLE 9 - TRUST FUNDS EXPENDITURE

The provinces of Prince Edward Island, Ontario, Alberta and British Columbia show no expenditure under this classification, while only small amounts are given for Nova Scotia, New Brunswick and Saskatchewan. The province of Quebec practically controls the bulk of the expenditure of Trust Funds shown in this table.

In the case of Quebec over one half represents expenditure out of corporations tax.

The analysis of trust fund expenditure for Manitoba is not included in this report.

Table 1.- Summary of All Revenues by Provinces for the years 1927, 1928 and 1929 showing Ordinary, Extraordinary, Capital and Trust Fund Items.

Province	Year	All Revenues	Ordinary	Extraordinary	Capital	Trust Funds, etc.

NOTES ON ASSETS AND LIABILITIES OF PROVINCIAL GOVERNMENTS FOR THEIR
RESPECTIVE FISCAL YEARS ENDED IN 1929.

PRINCE EDWARD ISLAND

The Balance Sheet for this province is unlike that of the other provinces and the Bureau compiled its table of assets from Sinking Funds and Housing Accounts together with the Debit and Land Purchase Accounts in connection with the Dominion government.

Public Buildings and Sites, Roads and Bridges are not taken into account as public assets in this province.

NOVA SCOTIA

The Assets were compiled from the Balance Sheet in which is included the "Net Debt" comprised of "Other Expenditure" on Buildings and Land, Creameries, Equipment, Exhibition Commission, Farm Properties, Fenwick Mine, Horticultural Experimental Farm, Payzant Hospital, Rural Telephones, Bridges, Ferries, Culverts, Roads, Machinery, etc., (\$31,124,370.52) together with "Deficit Account" (\$2,244,043.70). The Bureau's compilation shows these assets under "Miscellaneous Assets" rather than grouping them with principal or negotiable items.

In earlier years this province capitalized Dominion Government subsidy at 5% in their assets but discontinued such practice in the reorganization of public accounting in 1925.

NEW BRUNSWICK

This Province does not include the value of Government Buildings and Sites in their Assets.

In the "Consolidated Balance Sheet" the value of Roads and Bridges, Railway Investments and other Capital Expenditures, are shown as "Assets representing Net Debt of the Province" but the Bureau in its classification has treated them as "Miscellaneous Assets" rather than as principal or negotiable.

Dominion Subsidies are not capitalized in this Province.

QUEBEC

This province includes buildings and sites in its table of assets. The Bureau has classified these under "Miscellaneous Assets" rather than principal or negotiable. With regard to roads and bridges, this Province also shows expenditures on Ile Perrot, Batiscan and Quebec bridges in its table of assets. All of these items the Bureau has also placed under "Miscellaneous Assets".

Beginning with 1931, Quebec has adopted the policy of including all roads and bridges in its assets.

With regard to Dominion Subsidies, this province up to 1929 did not capitalize this account but in 1931 it is noted that their assets include Dominion Subsidies capitalized on a yield basis of 5% amounting to \$42,579,184.

ONTARIO

The Bureau's classification is made up from the Provincial Asset and Liability statement. This Province capitalizes on a yield basis of 5% the annual subsidies of the Dominion Government. The Dominion Public Accounts do not show such liabilities.

The valuation of provincial buildings and lands, improvements to highways and other road expenditure are included in the provincial assets. The Bureau classifies such items under its "Miscellaneous" division as distinct from "Principal" or negotiable assets.

MANITOBA

The Bureau's classification is made up from the Provincial Balance Sheet.

With regard to Dominion Subsidies the Provincial Accounts show a capitalization of the increased subsidy under "The Manitoba Boundaries Extension Act 1912". The Dominion Public Accounts does not include this increased subsidy as a liability but merely shows an annual allowance of 5% interest on this sum of money.

Government Buildings and Sites, Roads and Public Undertakings are included in Provincial Assets, but the Bureau has classified these as "Miscellaneous" rather than "Principal" or negotiable.

SASKATCHEWAN

The Provincial Public Accounts capitalize at 5% the sum of \$8,107,500 upon which the Dominion Government agreed under the "Saskatchewan Act" to pay interest annually. The Dominion does not show this capitalized sum as a liability. There are other allowances by the Dominion Government which the Province does not capitalize.

Government Buildings and Sites as well as Roads and Bridges are included in the assets. These items the Bureau has classified as "Miscellaneous".

ALBERTA

The Dominion Government subsidies are all capitalized at 5% though the Dominion Public Accounts do not include such sums in their statement of liabilities.

Public Buildings, Roads and Bridges are included in the Provincial Assets all of which items the Bureau has placed under "Miscellaneous Assets" as distinct from "Principal" or negotiable.

BRITISH COLUMBIA

Up to 1928 this Province capitalized Dominion subsidies at 5% in their table of Assets but from 1929 forward have discontinued such practice.

Government Buildings, Roads and Bridges are included in the provincial assets. Following the Bureau's usual practice such items have been classified as "Miscellaneous".

RESOURCES

The Provinces of Prince Edward Island, Nova Scotia, New Brunswick, Quebec and British Columbia do not include potential resources such as forests, timber, lands, mines, etc. in their assets nor do they even compile any statement of their estimated worth.

The Province of Ontario shows a table of the estimated value of resources in conjunction with their assets but such valuations are not added in with the assets.

The Province of Manitoba shows under "Deferred Assets" a valuation of Unsold Lands but Deferred Assets are not added with the Capital and Current Assets.

Saskatchewan also shows a statement of estimated value of unsold lands but it is not taken into account in its total of assets.

Alberta gives a valuation of unsold school lands which it adds in with Capital Assets. The Bureau has reclassified this item under the heading of resources, similar to that of Ontario.

LIABILITIES

The Bureau in its compilation has divided liabilities into two groups viz: Direct and Indirect Liabilities. The latter consists principally of provincial guarantees of bonds and loans to railways, municipalities and other organizations.

In making the classification submitted in these tables considerable difficulty has been encountered due to the wide divergence in terminology of accounts employed by the various provinces. The groupings as shown may readily be reduced in number but only after combined consultation with representatives of each province.

Approximately over seventy-five per cent of the direct liabilities of the provinces represent bonded or debenture debt and the Bureau has made a special report in this connection covering the years 1916 to 1932.

Table 10. - Classified Summary of Assets and Liabilities by Provinces
for the years 1927, 1928 and 1929.
