Highlights

Employment was little changed in February (+15,000 or +0.1%). An increase in the number of people working full-time offset a decline in the number of people working part-time. With fewer people searching for work, the unemployment rate declined by 0.2 percentage points to 6.6%, matching the rate observed in January 2015, and the lowest since October 2008.

Chart 1 Employment and unemployment rate, Canada, seasonally adjusted

Employment

Unemployment rate

Analysis — February 2017

Employment was little changed in February (+15,000 or +0.1%). An increase in the number of people working full-time offset a decline in the number of people working part-time. With fewer people searching for work, the unemployment rate declined by 0.2 percentage points to 6.6%, matching the rate observed in January 2015, and the lowest since October 2008.

In the 12 months to February, employment rose by 288,000 (+1.6%), with most of the gains occurring since July 2016. This coincided with stronger economic growth observed in the second half of 2016.

In February, there were an estimated 105,000 more people working full-time, the second notable increase in three months. In the 12 months to February, full-time employment rose by 235,000 (+1.6%), driven by increases since July. The number of people working part-time fell by an estimated 90,000 in February, following a period of growth that began in autumn of 2015.

In the 12 months to February, the total number of hours worked was little changed.

From January to February, employment increased among core-aged women (25 to 54 years old) and men aged 55 and older. There was little employment change among the other demographic groups.

Provincially, employment rose in British Columbia, Saskatchewan and Manitoba. In contrast, there were fewer people working in Nova Scotia and in Newfoundland and Labrador. Employment was essentially unchanged in the remaining provinces.

In February, more people were employed in wholesale and retail trade, public administration, and in transportation and warehousing.

Employment increases for core-aged women

Employment among women aged 25 to 54 increased for the third consecutive month, up 18,000 in February. Their unemployment rate remained at 5.3% as more women in this age group participated in the labour market. More core-aged women worked full-time in the month (+84,000) and this was partly offset by fewer of them working part-time (-65,000). The recent employment gains for core-aged women boosted their year-over-year employment growth to 98,000 (+1.7%).

Following a notable increase in January, employment for 25- to 54-year-old men held steady in February. Compared with February 2016, employment for this group increased by 63,000 (+1.0%), driven by gains since the fall of 2016. In the 12 months to February, the unemployment rate for core-aged men fell by a full percentage point to 5.8%.

Employment among men aged 55 and older increased by 14,000 in February, and their unemployment rate was 6.3%. In the 12 months to February, employment among older men rose by 63,000 (+3.1%), and their population increased by 154,000 (+3.1%).

Employment among women aged 55 and older held steady in February, and their unemployment rate was 5.2%. Compared with 12 months earlier, 56,000 (+3.4%) more women aged 55 and older were working, and the number of women in this age group rose by 156,000 (+2.9%).

In February, employment among youths aged 15 to 24 was little changed both in the month and on a year-over-year basis, while their population continued to decline. Their unemployment rate declined by 0.9 percentage points to 12.4% in February, as fewer youths searched for work.

Provincial summary

In February, employment increased by 19,000 in British Columbia, continuing an upward trend that began in the spring of 2015. The increase in February was fueled by gains in full-time work and was spread across several industries. In the 12 months to February 2017, employment increased by 85,000 or 3.6%, the fastest growth rate of all provinces. Over the same period, the unemployment rate fell by 1.4 percentage points to 5.1%, the lowest since October 2008. In February British Columbia posted the lowest unemployment rate among the provinces.

Employment in Saskatchewan rose by 8,000 in February, the largest increase since April 2012. Nearly all of the gains were in full-time work and stemmed from the services sector. Prior to the increase in February, total employment had been relatively flat since the spring of 2016. In February, the provincial unemployment rate fell by 0.4 percentage points to 6.0%.

In Manitoba, employment increased by 3,400 in February, driven by gains in full-time work and in construction. At the same time, the unemployment rate fell by 0.3 percentage points to 5.8%, the second lowest among the provinces following British Columbia. The employment increase in February boosted year-over-year gains for the province to 6,600 (+1.0%).

In February, the number of people working full-time increased by 53,000 in Ontario, offsetting a similar-sized decrease in the number of people working part-time, resulting in little change in overall employment for the month. Building on gains observed since July, employment in Ontario was up by 108,000 (+1.5%) on a year-over-year basis, with virtually all of the increase in full-time work. In February the unemployment rate declined by 0.2 percentage points to 6.2% as the number of people searching for work edged down.

There was little employment change in Quebec for the second consecutive month. In the 12 months to February, employment was up by 83,000 (+2.0%), powered by gains in the second half of 2016. The unemployment rate in February was 6.4%, down 1.1 percentage points from 12 months earlier.

In Alberta, employment held steady in February, with full-time gains (+19,000) offsetting losses in part-time employment (-18,000). Following significant declines from autumn 2015 to the summer of 2016, total employment in the province has been stable in recent months. In February, the unemployment rate fell by 0.5 percentage points to 8.3%, as fewer people searched for work.

Following an increase in January, there were 6,800 fewer people working in Nova Scotia in February and the unemployment rate was 8.1%. The employment decline in February was largely the result of a drop in part-time employment. Although total employment in the province decreased in February, it was little changed compared with 12 months earlier.

Employment in Newfoundland and Labrador fell by 3,800 in February and the unemployment rate was 14.2%. The employment decline observed in February offset an increase in January and continued a downward trend that began in May 2016. In the 12 months to February, employment in the province fell by 6,400 (-2.8%).

Industry perspective

Following little change in the previous three months, employment in wholesale and retail trade increased by 19,000 in February and edged up 35,000 (+1.3%) on a year-over-year basis. The additional employment in February followed higher sales reported in the latter part of 2016 at both the wholesale and retail level.

Employment in transportation and warehousing increased for the second consecutive month, up 8,800 in February. Compared with 12 months earlier, employment in this industry increased by 34,000 (+3.8%).

Employment in public administration also increased for the second consecutive month, up 12,000 in February, bringing total gains to 65,000 (+7.2%) on a year-over-year basis. In the 12 months to February, there were more people employed at the federal level and also at the local, municipal and regional level.

The number of private and public sector employees was little changed in February. On a year-over-year basis, increases in the number of private sector employees totalled 253,000 (+2.2%), spread across several service industries, while public sector employment rose by 78,000 (+2.2%), driven by gains in public administration.

The number of self-employed workers was little changed in February and edged down from 12 months earlier.

Canada 150

In celebration of the country's 150th birthday, Statistics Canada is presenting snapshots from our rich statistical history.

Women's employment rates and gender wage differences

In 1950, 21.1% of women aged 25 to 54 were employed. This had more than tripled to 77.8% by 2016. In contrast, the employment rate for men fell from 94.0% in 1950 to 85.0% in 2016. The increase in women's employment coincided with socio-demographic and economic changes, such as the pursuit of higher levels of education, delayed marriage and childbearing, and increased separation and divorce.

Despite the convergence in their employment rates, women continue to earn less than men. In 2016, women aged 25 to 54 working full-time earned an average of \$26.69 per hour, while their male counterparts earned an average of \$30.35. This means that on an hourly basis, women earned \$0.88 for every dollar earned by men in 2016, up from about \$0.75 in the mid-1980s.

For more information on women's employment rates and gender wage differences, see the "Women and Paid Work" chapter of Women in Canada.

Note to readers

The LFS estimates for February are for the week of February 12 to 18.

The LFS estimates are based on a sample and are therefore subject to sampling variability. As a result, monthly estimates will show more variability than trends observed over longer time periods. For more information, see "Interpreting Monthly Changes in Employment from the Labour Force Survey." Estimates for smaller geographic areas or industries also have more variability. For an explanation of the sampling variability of estimates and how to use standard errors to assess this variability, consult the "Data quality" section of the publication Labour Force Information (71-001-X).

This analysis focuses on differences between estimates that are statistically significant at the 68% confidence level.

The LFS estimates are the first in a series of labour market indicators released by Statistics Canada, which includes indicators from programs such as the Survey of Employment, Payrolls and Hours (SEPH), Employment Insurance Statistics, and the Job Vacancy and Wage Survey. For more information on the conceptual differences between employment measures from the LFS and SEPH, refer to section 8 of the Guide to the Labour Force Survey (71-543-G).

The employment rate is the number of employed people as a percentage of the population aged 15 and older. The rate for a particular group (for example, youths aged 15 to 24) is the number employed in that group as a percentage of the population for that group.

The unemployment rate is the number of unemployed as a percentage of the labour force (employed and unemployed).

The participation rate is the number of employed and unemployed as a percentage of the population.

Full-time employment consists of persons who usually work 30 hours or more per week at their main or only job.

Part-time employment consists of persons who usually work less than 30 hours per week at their main or only job.

Seasonal adjustment

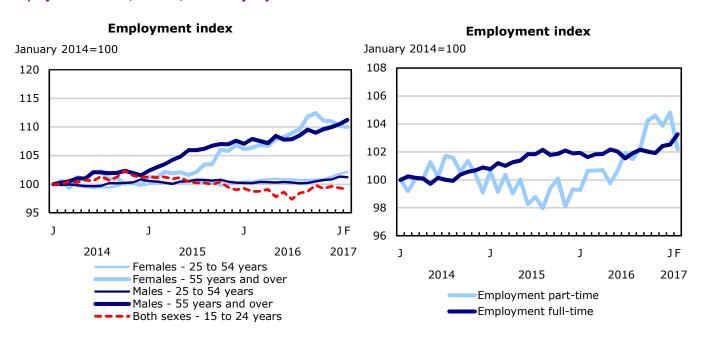

Unless otherwise stated, this release presents seasonally adjusted estimates, which facilitate comparisons by removing the effects of seasonal variations. For more information on seasonal adjustment, see Seasonally adjusted data - Frequently asked questions.

Chart 1 shows trend-cycle data on employment. These data represent a smoothed version of the seasonally adjusted time series, which provides information on longer-term movements, including changes in direction underlying the series. These data are available in CANSIM table 282-0087 for the national level employment series. For more information, see the StatCan Blog and Trend-cycle estimates – Frequently asked questions.

Next release

The next release of the LFS will be on April 7.

282-0128	Labour force survey estimates (LFS), by census metropolitan area based on 2011 Census boundaries, sex and age group, 3-month moving average, unadjusted for seasonality, monthly
282-0129	Labour force survey estimates (LFS), by census metropolitan area based on 2011 Census boundaries, sex and age group, annual
282-0130	Labour force survey estimates (LFS), employment by census metropolitan area based on 2011 Census boundaries and North American Industry Classification System (NAICS), 3-month moving average, unadjusted for seasonality, monthly
282-0131	Labour force survey estimates (LFS), employment by census metropolitan area based on 2011 Census boundaries and North American Industry Classification System (NAICS), annual
282-0134	Labour force survey estimates (LFS), by selected census agglomerations based on 2011 Census boundaries, annual
282-0135	Labour force survey estimates (LFS), by census metropolitan area based on 2011 Census boundaries, 3-month moving average, seasonally adjusted and unadjusted, monthly
282-0136	Labour force survey estimates (LFS), by Montréal, Toronto and Vancouver census metropolitan areas based on 2011 Census boundaries, seasonally adjusted and unadjusted, monthly

282-0137	Labour force survey estimates (LFS), by population centres and rural areas based on 2011 Census boundaries, sex and age group, unadjusted for seasonality, monthly
282-0138	Labour force survey estimates (LFS), by population centres and rural areas based on 2011 Census boundaries, sex and age group, annual
282-0139	Labour force survey estimates (LFS), employment by population centres and rural areas based on 2011 Census boundaries, class of worker and North American Industry Classification System (NAICS), unadjusted for seasonality, monthly
282-0140	Labour force survey estimates (LFS), employment by population centres and rural areas based on 2011 Census boundaries, class of worker and North American Industry Classification System (NAICS), annual
282-0141	Labour force survey estimates (LFS), by National Occupational Classification (NOC) and sex, unadjusted for seasonality, monthly
282-0142	Labour force survey estimates (LFS), by National Occupational Classification (NOC) and sex, annual
282-0143	Labour force survey estimates (LFS), by usual hours worked, National Occupational Classification (NOC) and sex, unadjusted for seasonality, monthly
282-0144	Labour force survey estimates (LFS), by usual hours worked, National Occupational Classification (NOC) and sex, annual
282-0145	Labour force survey estimates (LFS), by actual hours worked, National Occupational Classification (NOC) and sex, unadjusted for seasonality, monthly
282-0146	Labour force survey estimates (LFS), by actual hours worked, National Occupational Classification (NOC) and sex, annual
282-0147	Labour force survey estimates (LFS), multiple jobholders by National Occupational Classification (NOC), sex and age group, unadjusted for seasonality, monthly
282-0148	Labour force survey estimates (LFS), multiple jobholders by National Occupational Classification (NOC), sex and age group, annual
282-0149	Labour force survey estimates (LFS), job tenure by National Occupational Classification (NOC) and sex, unadjusted for seasonality, monthly
282-0150	Labour force survey estimates (LFS), job tenure by National Occupational Classification (NOC) and sex, annual
282-0151	Labour force survey estimates (LFS), wages of employees by type of work, National Occupational Classification (NOC), sex, and age group, unadjusted for seasonality, monthly
282-0152	Labour force survey estimates (LFS), wages of employees by type of work, National Occupational Classification (NOC), sex, and age group, annual
282-0153	Labour force survey estimates (LFS), employees working overtime (weekly) by National Occupational Classification (NOC), sex and age group, unadjusted for seasonality, monthly
282-0154	Labour force survey estimates (LFS), employees working overtime (weekly) by National Occupational Classification (NOC), sex and age group, annual

282-0155	Labour force survey estimates (LFS), employment by National Occupational Classification (NOC), seasonally adjusted, monthly
282-0156	Labour force survey estimates (LFS), employment by economic region based on 2011 Census boundaries and National Occupational Classification (NOC), three-month moving average, unadjusted for seasonality, monthly
282-0157	Labour force survey estimates (LFS), employment by economic region based on 2011 Census boundaries and National Occupational Classification (NOC), annual
282-0158	Labour force survey estimates (LFS), employment by census metropolitan area based on 2011 Census boundaries and National Occupational Classification (NOC), three-month moving average, unadjusted for seasonality, monthly
282-0159	Labour force survey estimates (LFS), employment by census metropolitan area based on 2011 Census boundaries and National Occupational Classification (NOC), annual
282-0160	Labour force survey estimates (LFS), weekly wage distributions of employees by type of work, National Occupational Classification (NOC) and sex, unadjusted for seasonality, monthly
282-0161	Labour force survey estimates (LFS), weekly wage distributions of employees by type of work, National Occupational Classification (NOC) and sex, annual
282-0162	Labour force survey estimates (LFS), hourly wage distribution of employees by type of work, National Occupational Classification (NOC) and sex, unadjusted for seasonality, monthly
282-0163	Labour force survey estimates (LFS), hourly wage distribution of employees by type of work, National Occupational Classification (NOC) and sex, annual
282-0164	Labour force survey estimates (LFS), employees by union status and National Occupational Classification (NOC), Canada, annual
282-0165	Labour force survey estimates (LFS), employment by Aboriginal group, National Occupational Classification (NOC), sex and age group, annual
282-0166	Labour force survey estimates (LFS), employment by Aboriginal group, National Occupational Classification (NOC) and age group, Canada, selected provinces and regions, annual
282-0167	Labour force survey estimates (LFS), average usual hours and wages of employees by age group, sex, union coverage, job permanency, and National Occupational Classification (NOC), unadjusted for seasonality, monthly
282-0168	Labour force survey estimates (LFS), regional unemployment rates used by the Employment Insurance Program, three-month moving average, seasonally adjusted, monthly
282-0200	Labour force survey estimates (LFS), weekly wage distributions of employees by type of work, North American Industry Classification System (NAICS), and sex, unadjusted for seasonality, monthly
282-0201	Labour force survey estimates (LFS), weekly wage distributions of employees by type of work, North American Industry Classification System (NAICS), and sex, annual
282-0204	Labour force survey estimates (LFS), hourly wage distributions of employees by type of work, North American Industry Classification System (NAICS), and sex, unadjusted for seasonality, monthly

282-0205	Labour force survey estimates (LFS), hourly wage distributions of employees by type of work, North American Industry Classification System (NAICS), and sex, annual
282-0208	Labour force survey estimates (LFS), by educational degree, sex and age group, unadjusted for seasonality, monthly
282-0209	Labour force survey estimates (LFS), by educational degree, sex and age group, annual
282-0210	Labour force survey estimates (LFS), by family type and family age composition, unadjusted for seasonality, monthly
282-0211	Labour force survey estimates (LFS), by family type and family age composition, annual
282-0212	Labour force survey estimates (LFS), hours lost by employees by reason of absence, full and part week and sex, unadjusted for seasonality, monthly
282-0213	Labour force survey estimates (LFS), hours lost by employees by reason of absence, full and part week and sex, annual
282-0214	Labour force survey estimates (LFS), activity prior to unemployment by sex and age group, unadjusted for seasonality, monthly
282-0215	Labour force survey estimates (LFS), activity prior to unemployment, by sex and age group, annual
282-0216	Labour force survey estimates (LFS), reason for leaving job during previous year by sex and age group, unadjusted for seasonality, monthly
282-0217	Labour force survey estimates (LFS), reason for leaving job during previous year by sex and age group, annual
282-0218	Labour force survey estimates (LFS), reason for not looking for work, by sex and age group, unadjusted for seasonality, monthly
282-0219	Labour force survey estimates (LFS), reason for not looking for work, by sex and age group, annual
282-0220	Labour Force Survey estimates (LFS), employees by union status, sex and age group, Canada and provinces, annual
282-0221	Labour Force Survey estimates (LFS), employees by union status, sex, age group and education level, Canada, annual
282-0223	Labour Force Survey estimates (LFS), employees by union status, North American Industry Classification System (NAICS) and sex, Canada, annual
282-0224	Labour Force Survey estimates (LFS), employees by union status, establishment size, job tenure, type of work and job permanency, Canada, annual
282-0225	Labour Force Survey estimates (LFS), average weekly earnings, average hourly wage rate and average usual weekly hours by union status and type of work, Canada and provinces, annual
282-0226	Labour force survey estimates (LFS), by Aboriginal group, sex and age group, Canada, selected provinces and regions, annual

282-0227	Labour force survey estimates (LFS), by detailed Aboriginal group, sex and age group, Canada and selected regions, annual
282-0228	Labour force survey estimates (LFS), by Aboriginal group, educational attainment and age group, Canada and selected regions, annual
282-0229	Labour force survey estimates (LFS), employment by Aboriginal group, North American Industry Classification System (NAICS), sex and age group, annual
282-0230	Labour force survey estimates (LFS), employment by Aboriginal group, North American Industry Classification System (NAICS) and age group, Canada and selected regions, annual
282-0233	Labour force survey estimates (LFS), average hourly and weekly wages and average usual weekly hours by Aboriginal group and age group, Canada, selected provinces and regions, annual

Selected surveys from Statistics Canada

3701	Labour Force Survey		
------	---------------------	--	--

Selected summary tables from Statistics Canada

- Average hourly wages of employees by selected characteristics and occupation, unadjusted data, by province (monthly)
- · Days lost per worker by industry and sex
- · People employed, by educational attainment
- Reasons for part-time work by sex and age group
- Self-employment, historical summary
- Employment by age, sex, type of work, class of worker and province (monthly)
- Actual hours worked per week by industry, seasonally adjusted (monthly)
- Labour force characteristics, unadjusted, by territory (3 month moving average)
- Employment by industry and sex
- Full-time and part-time employment by sex and age group
- · Labour force characteristics by age and sex
- Labour force characteristics by immigrant status of population aged 25 to 54, and by educational attainment
- · Labour force characteristics by immigrant status, by detailed age group

- Labour force characteristics by immigrant status of population aged 25 to 54, by country of birth
- Days lost per worker due to illness or disability, by sex, by province
- Employment by industry
- Labour force characteristics, seasonally adjusted, by province (monthly)
- Labour force characteristics, unadjusted, by province (monthly)
- · Labour force, employment and unemployment, levels and rates, by province
- Economic indicators, by province and territory (monthly and quarterly)
- Days lost per worker by reason, by provinces
- Labour force characteristics, seasonally adjusted, by census metropolitan area (3 month moving average)
- Labour force characteristics, unadjusted, by economic region (3 month moving average)
- Distribution of employed people, by industry, by province
- Employment by major industry group, seasonally adjusted, by province (monthly)
- Labour force characteristics
- Labour force characteristics, unadjusted, by census metropolitan area (3 month moving average)
- Labour force characteristics, population 15 years and older, by census metropolitan area
- Labour force characteristics, population 15 years and older, by economic region, by province
- Canada: Economic and financial data
- Labour force characteristics by sex and age group
- Labour force characteristics by immigrant status of population aged 25 to 54, by province
- Latest statistics (monthly)

^{1.} For geographic descriptions of economic regions, refer to the Guide to the Labour Force Survey (catalogue number 71-543-GIE).

Note(s): Estimates in this table are based on 2011 Census boundaries. Related CANSIM table 282-0122. As a result of the wildfire affecting northern Alberta, LFS data for the census agglomeration of Wood Buffalo were not collected from May to July 2016. Data collection resumed in August 2016. Estimates for the economic region of Wood Buffalo-Cold Lake are not available for June, July, August, and September 2016.

- Average standard error of change in two consecutive months (see "Sampling Errors" in Data Quality for further explanations).
- Since 1992, the Labour force survey (LFS) has been conducted in the Yukon, using an alternative methodology that accommodates some of the operational difficulties inherent to remote locales. These estimates are not included in the national totals. In 1995, the LFS in the Yukon underwent a sample redesign. One result of the redesign was that the covered population increased from 85% to 92%, which is reflected by the sharp increase in the three month moving averages estimates of January, February and March of 1995 for all the level estimates. Users are therefore warned to be cautious when comparing estimates before January 1995 to estimates for January 1995 and forward.
- Since 2001, the Labour force survey (LFS) has been administered in the Northwest Territories, using an alternative methodology that accommodates some of the operational difficulties inherent to remote locales. These estimates are not included in national totals.
- Since 2004, the Labour force survey (LFS) has been administered in Nunavut, using an alternative methodology that accommodates some of the operational difficulties inherent to remote locales. These estimates are 3-month moving averages and are not included in national totals. From January 2004 to December 2007, estimates represent about 70% of all Nunavut residents aged 15 and over. Starting in January 2008, coverage was extended to 92%, so that by March 2008, the 3-month moving average is completely based on the extended coverage. Because of the large difference in coverage, users are recommended not to compare estimates prior to January 2008 with data afterwards. The January and February 2008 3-month moving average estimates are based on a mix of both coverages, since the extended coverage was introduced in January 2008. Estimates from January 2004 to December 2007 are based on the 10 largest communities in Nunavut: Iqaluit, Rankin Inlet, Cambridge Bay, Kugluktuk, Baker Lake, Arviat, Pond Inlet, Cape Dorset, Pangnirtung, Igloolik. Estimates from March 2008 to present cover the above communities as well as: Taloyoak, Gjoa Haven, Kugaaruk, Coral Harbour, Repulse Bay, Qikiqtarjuaq, Arctic Bay, Hall Beach, Clyde River.

The boundaries of these regions are determined by Employment and Social Development Canada (ESDC). For geographic descriptions and maps of $employment\ insurance\ regions,\ see\ the\ ESDC\ website:\ http://srv129.services.gc.ca/eiregions/en/geocont.aspx.$

Note(s): Related CANSIM table 282-0168. All regions are based on the 1996 Census boundaries, with the exception of those in Prince Edward Island and in the territories, which respect the 2011 Census boundaries.

This region excludes St. John's.

^{3.} Prince Edward Island as well as the territories are each comprised of two regions effective October 12, 2014.

This region excludes Charlottetown.

The monthly regional unemployment rates for EI purposes in the territories are subject to the greater of a seasonally adjusted 3-month-moving average or 12-month-moving average.

This region excludes Whitehorse.

This region excludes Yellowknife.

This region excludes Iqaluit.

Data quality

Definitions and explanations

The **labour force** is composed of those members of the civilian non-institutional population 15 years of age and over who, during the reference week, were employed or unemployed.

Employed persons are those who, during the reference week:

- (a) did any work at all at a job or business;
- (b) had a job but were not at work.

A person is considered to be **full-time** if his/her usual hours at the main job are 30 or more hours per week. When the number of hours worked at the main job is usually less than 30 hours per week then he/she is considered to be **part-time**.

Unemployed persons are those who, during the reference week:

- (a) were without work, had actively looked for work in the past four weeks (ending with reference week) and were available for work:
- (b) had not actively looked for work in the past four weeks but were on temporary layoff and were available for work;
- (c) had not actively looked for work but had a new job to start within four weeks from the reference week and were available for work.

Persons in the civilian non-institutional population 15 years of age and over who, during the reference week, were neither employed nor unemployed are classified as **not in the labour force**.

The **unemployment rate** represents the number of unemployed persons expressed as a percentage of the labour force (employed and unemployed). The unemployment rate for a particular group (for example, age, sex, or marital status) is the number unemployed in that group expressed as a percentage of the labour force for that group.

The **participation rate** represents the total labour force expressed as a percentage of the population aged 15 years and over. The participation rate for a particular group (for example, women aged 25 years and over) is the labour force in that group expressed as a percentage of the population for that group.

The employment rate represents the number of employed persons expressed as a percentage of the population aged 15 years and over. The employment rate for a particular group (for example, age, sex, marital status, or province) is the number employed in that group expressed as a percentage of the population for that group.

The **part-time** rate represents the number of persons employed part-time expressed as a percentage of the employed. The part-time rate for a particular group (for example, age or sex) is the number of persons employed part-time in that group expressed as a percentage of the employed for that group.

All geographic regions are based on the 2011 Census boundaries.

Seasonal adjustment

Fluctuations in economic time series are caused by seasonal, cyclical and irregular movements. A seasonally adjusted series is one from which seasonal movements have been eliminated. Seasonal movements are defined as those which are caused by regular annual events such as climate, holidays, vacation periods and cycles related to crops, production and retail sales associated with Christmas and Easter. The seasonally adjusted series contains irregular as well as longer-term cyclical fluctuations.

The seasonally adjusted series are revised each year to take into account current data and to generate new forecast factors for the next twelve months. The data are therefore subject to slight revisions in future issues of this publication.

For more information on seasonal adjustment, see Seasonally adjusted data – Frequently asked questions.

Sampling variability of estimates

Estimates in this publication are based on the Labour Force Survey, a monthly survey of approximately 56,000 households across Canada. Because the entire population is not surveyed, the estimates are subject to sampling error. While the published estimate is the best available indicator of the real value, changes in the level of any estimates between two months can be the result of a true change, or sampling variability. The sampling error can be estimated by calculating the standard error for the published estimate or statistic. These standard errors have been included in the publication tables in order to assist users in interpreting the data. They are based on 12-month averages and are updated twice a year, in February and August.

Interpretation based on standard error

Approximately two-thirds (68%) of the time, a change greater than the sampling error indicates a real change. The larger the change compared to the standard error, the better the chance that we are observing a real change, as opposed to a change due to sampling variability. At the 95% confidence level, the change in the estimate must be greater than twice the standard error in order to ensure that change is real.

Movements in estimates that are smaller than the standard error are less likely to reflect a real change and more likely to be due to sampling variability. While the above is true for monthly movements, one can have more confidence in a series of consecutive movements in the same direction, even though some of the monthly movements may be smaller than the standard error.

Interpretation based on confidence intervals

Confidence intervals provide another way of looking at the variability inherent in estimates of sample surveys. To illustrate how to calculate the confidence interval, let us say that one month the published estimate for total employment rose by 16,000 to reach 18,000,000. The associated standard error for the movement estimate is 29,500. The standard error used to interpret the movement estimate indicates that:

- There are approximately two chances in three (68%) that the real value of the movement between the two months falls within the range -13,500 to +45,500 (16,000 + or - one standard error).
- There are approximately nine chances in ten (90%) that the real value of the movement between the two months falls within the range -31,200 to +63,200 (16,000 + or - 1.6 times the standard error).
- There are approximately nineteen chances in twenty (95%) that the real value of the movement between the two months falls within the range -43,000 to +75,000 (16,000 + or – two standard errors).

For more detailed explanations on the sampling variability of estimates, and in particular for information on how to assess the variability of level estimates, consult the **Data quality** section of the *Guide to the Labour Force Survey* (71-543-G).

Documentation

For more detailed information about the Labour Force Survey, see the following documents:
