### BASIC REFERENCE DOCUMENT NOW AVAILABLE

The publication Labour Income 1926-58 (Catalogue number 72-502) is now available.

Contents include:

Part I - Definitions and Concepts. General notes explaining what the estimates of labour income measure.

Part II - Tables. A complete record of annual estimates of labour income from 1926, and of monthly (or quarterly) figures from 1947. Monthly and quarterly estimates are presented in both seasonally-adjusted and unadjusted form.

Part III - Sources and Methods. Detailed notes on the manner in which the estimates were prepared.

Copies of Labour Income 1926-58 (Catalogue number 72-502) may be obtained from the Information Services Division, Dominion Bureau of Statistics or from the Queen's Printer, Ottawa. Price 75 cents.

## Estimates of Labour Income

September, 1960

An estimated total of \$1,602.8 million was received by Canadian employees in the form of wages, salaries, and supplementary labour income for the month of September. This is an increase of \$28.3 million or 1.8 p.c. from the August estimate and \$3.2 million or 3.4 p.c. greater than the September, 1959 total.

The seasonally adjusted total of labour income for September was estimated at \$1,541.9 million, an increase of \$5.1 million or 0.3 p.c. from the August total. Forestry and non-government service advanced by 2.1 p.c. and 1.7 p.c. respectively. Government service was up by 0.7 p.c. Minor changes of less than 0.5 p.c. took place in all other industries between August and September.

The total of wages, salaries, and supplementary labour income, seasonally adjusted, was estimated at \$4,608.9 million for the third quarter, 1960. This is an increase of \$39.7 million or 0.9 p.c. from the second quarter total.

Forestry wages and salaries had a gain of 6.2 p.c. when compared with the second quarter estimate. Non-government service was up by 2.6 p.c. followed by public utilities with an increase of 2.2 p.c. Construction wages and salaries advanced by 1.7 p.c. between the second and third quarters while trade, finance, insurance and real estate, and government service had gains of just over 1 p.c. Mining was relatively stable during this same interval.

Slight decreases took place in two of the leading industrial components of labour income. Manufacturing wages and salaries was down by 0.3 p.c. and the transportation, storage and communication industries decreased by 0.4 p.c.

PRESENTATION OF LABOUR INCOME STATISTICS

The reference paper Labour Income 1926 - 58 contains a complete record of historical data on labour income to the end of 1958. All data available for later periods are published in the current issue of Estimates of Labour Income, (except for a few special tables which may be found in recent issues of National Accounts, Income and Expenditure).

The most recent monthly or quarterly figures are preliminary and subject to revision in the next issue. In addition, figures for the most recent years are subject to further minor revisions as new annual source materials become available. The next series of annual revisions will be completed in the spring of 1961.

The monthly and quarterly figures in this report are presented with one digit after the decimal point, i.e. to the nearest tenth of a million dollars. This is done in order to avoid sudden changes in estimates for small provinces or industries which would occur if the figures were rounded to the nearest million, and it should not be assumed that the estimates are accurate to the nearest tenth of a million.

CONCEPTS AND METHODS

Labour income is defined as the total of wages, salaries, and supplementary labour payments made to, or on behalf of, residents of Canada, excluding military pay and allowances. The wages and salaries component, which is specified to include living allowances, bonuses, commissions, and "tips", is measured prior to deductions of all kinds (income tax, employees' contributions to the Unemployment Insurance Fund and to welfare and pension funds, etc.). Both money payments and payments in kind are included in the total. The other component, supplementary labour income, comprises payments made by employers on behalf of their employees in order to provide them with future benefits, either definite or contingent. Specifically, these payments include employers' contributions to employee welfare and pension funds, to workmen's compensation and industrial vacation funds, and to the Unemployment Insurance Fund.

The annual estimates of labour income are based in most cases on survey data collected by D. B. S., published accounting records, or information otherwise obtained directly from business or government agencies. In a few cases information is not available for non-census years and projections from census "benchmarks" are made using the best available related indicators. Comprehensive notes on concepts and methods relating to the preparation of labour income estimates are contained in the reference paper Labour Income 1926-58. Information relating labour income estimates to the national accounts may be found in National Accounts, Income and Expenditure: 1926-1956.

The monthly and quarterly income estimates are obtained by applying indicators of short-run change to the estimated annual totals. About four-fifths of aggregate labour income is estimated on the basis of payroll indexes obtained from a monthly survey of establishments normally employing fifteen or more persons (see the D. B. S. monthly publication Employment and Payrolls). For industries not covered by this survey the estimates are based on indexes which are either derived from other sources of payroll information or specially constructed on the basis of related data. A constant number of working days is assumed for each month in order to avoid the effects of differences in numbers of holidays and week-ends.

FOOTNOTES

- (1) Monthly and quarterly figures may not add to annual totals because of rounding.
- (2) Quarterly figures are entered opposite the middle month of the quarter but represent quarterly totals.
- (3) Includes post office wages and salaries.
- (4) Includes Yukon, Northwest Territories, and Canadian residents abroad. The differences between monthly Canada totals and the totals for the ten provinces should not be taken as reliable measures for this group.
- (5) Includes Finance, Insurance, Real Estate and Non-Government Service.
