## ESTIMATES OF LABOUR INCOME

JANUARY - MARCH 1970

This publication contains for the first time annual estimates based on the 1960 Standard Industrial Classification from 1951 to 1969 and monthly estimates from January 1968 to date. Annual Estimates based on the 1948 Standard Industrial Classification from 1926 to 1953 are also included. For details see the explanatory notes on pages 5 and 12.

Published by Authority of

EMPLOYMENT AND PAYROLL REPORTS

Following are publications of the Labour Division based upon establishment data in the field of industrial employment, payrolls and hours:

71-301 - Advance Statement on Employment and Average Weekly Wages and Salaries - Monthly - Price \$1.00 per year

(Index numbers of employment and averages of weekly wage and salary statistics for Canada (major industry divisions) and the provinces (industrial composite figures)).

71-302 - Employment and Average Weekly Wages and Salaries - Monthly - Price \$4.00 per year

(Industry and area index numbers of employment and payrolls and averages of weekly wage and salary statistics; comparisons with earlier periods; charts and explanatory material).

71-303 - Man-Hours and Hourly Earnings - Monthly - Price - \$4.00 per year

(Industry and area averages of hours per week, hourly and weekly wages, with comparisons from a month and a year earlier, and certain historical comparisons; charts and explanatory material).

71-305 - Estimates of Labour Income - Monthly - Price \$2.00 per year

(Monthly estimates of wages, salaries and supplementary labour income, both unadjusted and seasonally-adjusted, for specific industries and regions; with annual totals for the last 12 years).

72-304 - Estimates of Employees by Province and Industry - Monthly - Price \$3.00 per year

(Estimates of total numbers of employees, with comparisons with a month and a year earlier).

71-301 - Review of Employment and Average Weekly Wages and Salaries - Annual - Price \$1.50

(Industry and area index numbers of employment and payrolls and average weekly wages and salaries, monthly and annually, over a lengthy period; charts and explanatory material).

72-302 - Review of Man-Hours and Hourly Earnings - Annual - Price \$1.50

(Industry and area averages of hours per week, hourly and weekly wages, monthly and annually, over a lengthy period; charts and explanatory material).

72-304 - Earnings and Hours of Work in Manufacturing - Annual - Final Report - Price 75 cents

(Separate figures of earnings and hours for men and women and for salaried employees and wage-earners in one week in October from 1946 with industrial and area detail; charts and explanatory material. Special data are obtained on a rotational basis in successive years).

71-306 - Seasonally-adjusted Employment Indexes - First Edition: January 1961 - March 1967 - Price \$2.00

(Monthly index numbers of employment, adjusted seasonally according to x-11 variant of the U.S. Bureau of the Census Method II, by industry division as well as most major industry group for Canada and by industry division for regions).

71-302 - Labour Income, 1926-58 - Price 75 cents - Out of print

(A record of annual estimates of labour income from 1926 to 1958, along with monthly figures from 1947; contains explanations of sources, methods and concepts).

72-304 - Employment Indexes, Average Weekly Wages and Salaries, Average Weekly Hours and Average Hourly Earnings, Monthly and Annual Statistics -- Historical Series, January 1961 - May 1965 -- Volume I - Price \$4.50

(This volume gives statistics revised to the 1960 Standard Industrial Classification and a 1961 time base for index numbers).

71-308 - Estimates of Employees by Province and Industry, 1961-68 - Price 50 cents

(Estimates of total numbers of employees, monthly and annually, for major industrial divisions, Canada and provinces; contains a review of concepts, sources and methods and indicators of sampling variability).

71-304 - Labour Costs in Manufacturing, 1967 - Price \$1.50

72-310 - Labour Costs in Manufacturing, 1968 - Price \$1.50

(An annual publication covering various industries on a cycle or occasional basis. Estimates of selected employer labour costs, by industry group and area - Report prepared jointly by Labour Division of DBS and Economics and Research Branch of the Canada Department of Labour).

Remittances should be in the form of cheque or money order, made payable to the Receiver General of Canada and forwarded to the Publications Distribution Unit, Financial Control Section, Dominion Bureau of Statistics, or to the Queen's Printer, Ottawa, Canada.

## WAGES AND SALARIES IN MANUFACTURING

BASIS: 1960 STANDARD INDUSTRIAL CLASSIFICATION

ESTIMATES OF LABOUR INCOME

JANUARY - MARCH 1970

Estimates of Labour Income based on the 1948 S.I.C. (Standard Industrial Classification Manual, DBS Catalogue No. 12-501) will no longer be produced. They are being replaced by estimates based on the 1960 S.I.C.

This report contains a record of annual labour income estimates from 1926 to 1969 and monthly estimates from January 1968 to date. Estimates based on the 1948 S.I.C. (previously published in Labour Income 1926-58, DBS Catalogue 72-502) are presented for 1926 to 1953. Revised estimates based on the 1960 S.I.C. and incorporating the most recent data available are presented from 1951 to date. The next issue of Estimates of Labour Income will contain monthly figures from January 1966 to date. For additional details see the explanatory notes on page 12.

Labour income was estimated at \$3,690.1 million in January, \$3,733.9 million in February and \$3,736.2 million in March. Seasonally-adjusted data show that total income increased from \$3,833.9 million in January to \$3,862.2 million in February for a gain of \$28.3 million or 0.7 per cent and declined in March to \$3,837.1 million for a drop of \$25.1 million or 0.6 per cent.

During the first quarter, total labour income seasonally-adjusted, increased by 3.0 per cent. The goods-producing and the service-producing industries contributed about equally to this increase which was 0.5 per cent more than the gain recorded during the fourth quarter of 1969.

Seasonally-adjusted, wages and salaries in the goods-producing industries increased by 3.1 per cent. This was slightly less than the increase recorded in the fourth quarter but about 0.5 per cent more than the average quarterly gain for 1969. Manufacturing increased by 1.8 per cent and construction by 5.4 per cent despite declines recorded in employment. The primary industries advanced by 6.7 per cent with increases of 7.4 per cent in forestry, 8.9 per cent in mining and no change in agriculture. Mining was seriously affected by labour disputes in the fourth quarter of 1969.

The increase of 3.0 per cent in the service-producing industries was 1.2 per cent higher than the advance recorded in the fourth quarter but the same as the average quarterly gain for 1969. Transportation, communication and other utilities increased by 2.6 per cent, finance, insurance and real estate by 2.4 per cent and trade by 1.9 per cent. The increases in the former two groups resulted from similar increases in employment and earnings. In trade, employment increased at a slightly higher rate than earnings. Service advanced by 4.6 per cent with employment increasing at a higher rate than earnings in the non-commercial sector and at a lower rate in the commercial sector. Public administration and defence, excluding military pay, increased by only 0.5 per cent from the fourth quarter which was inflated by retroactive payments.

(1) Excludes Military Pay and Allowances.

(2) Includes Fishing and Trapping.

(3) The difference between the sum of the provinces and these totals, which include Yukon, North-West Territories and Canadian residents abroad, contains a residual error resulting from seasonally adjusting by province and by industry.

Note: Estimates may not add to totals, owing to rounding.

TABLE 2. Wages and Salaries by Industry, and Supplementary Labour Income Canada Adjusted for Seasonal Variation

Year and month	Wages and salaries																				
	Agri-culture	Forest-ry	Mining	Manu-fac-turing	Con-struction	Trans-porta-tion com-muni-cation and utilities	Trade	Finance insur-ance and real estate	Service	Public Admin. and De-fence(1)	Total wages and salar-ies(2)	Supple-mentary labour income	Total labour income(2)								
											millions of dollars

### Concepts and Methods

Labour income is the compensation paid to employees for services rendered either as wages and salaries or as supplementary labour income. Wages and salaries include directors' fees, bonuses, commissions, taxable allowance and benefits, some imputed earnings (e.g. those for persons in religious orders) and living allowances considered to be an additional benefit to the employee. Supplementary labour income, which consists of payments made by employers for the future benefit of employees, is composed of employers' contributions to employee welfare and pension funds, to the Workmen's Compensation Fund and to the Unemployment Insurance Fund.

Money payments or payments in kind made to, or on behalf of, residents of Canada, excluding military pay and allowances, are included in the wages and salaries component. Contributions to armed forces pension funds are included in the supplementary labour income component in the estimates based on the 1948 Standard Industrial Classification. These contributions are totally excluded from the revised estimates for 1951 to date, based on the 1960 Standard Industrial Classification.

The annual estimates are based in most cases on data derived from sample and full coverage surveys conducted within the Dominion Bureau of Statistics, the decennial population censuses, and the public accounts of the federal and provincial governments.

The main indicators used to interpolate between censuses, project from benchmarks and allocate annual figures by month have been: a) the payroll index derived from the Employment, Payrolls and Man-Hours survey of large firms, b) total employees as published in Estimates of Employees by Province and Industry combined with average weekly earnings of large firms and c) monthly payroll derived from the surveys of employment and payroll in the federal, provincial and municipal governments.

The monthly figures are not affected by the number of pay days per month because a constant number of working days is assumed for each month. Retroactive wage payments reported for 1951-1968 were distributed over the year but since 1969 these payments have been included in the months in which they were made.

A complete explanation of the sources and methods used as well as definitions and other related information will be published at a later date.

### Statistical Presentation

The latest monthly figures are advance estimates based on early returns of employment reports. They have a lesser degree of reliability than the estimates for the immediately preceding month and the previous month which are based on more complete information. Estimates for other months and those for recent years are revised as new annual data become available.

The monthly figures in this report are presented with one digit after the decimal point, i.e. to the nearest tenth of a million dollars. This is done in order to avoid sudden changes in estimates for small provinces or industries which would occur if the figures were rounded to the nearest million. It should not be assumed that the estimates are necessarily accurate to the nearest tenth of a million.

Estimates of labour income based on the 1948 Standard Industrial Classification have been published for 1926 to 1969. Those based on the 1960 Standard Industrial Classification are now available from 1951 to date. A complete historical record of the statistics published is obtainable as follows:

Estimates Based on the 1948 Standard Industrial Classification

Publications	Years for which final data are available
Labour Income 1926-58 .....	1926-1956
<u>Estimates of Labour Income</u>	
From December 1960 to August 1961 .....	1957
From December 1961 to November 1962 .....	1958
From December 1962 to November 1963 .....	1959
From December 1963 to November 1964 .....	1960
From December 1964 to November 1965 .....	1961-1962
From December 1965 to November 1966 .....	1962-1964
From December 1966 to November 1967 .....	1963-1964
December 1967	1964-1966
From January - February 1968 to September 1968 .....	1964-1967
October - December 1968 .....	1965-1967
From January - March 1969 to October 1969 .....	1965-1968
November - December 1969 .....	1966-1969

Monthly data on wages and salaries by province for January 1951 to December 1962 are available on request.

Estimates Based on the 1960 Standard Industrial Classification

This report contains annual data from 1951 to 1969 and monthly data from January 1968 to date. The next issue (April 1970) of Estimates of Labour Income will contain monthly estimates from January 1968 to date. Other monthly data from January 1951 to December 1965 are available on request.
