Vol. 25--No. 1

EMPLOYMENT AND PAYROLL REPORTS

Following are publications of the Labour Division based upon establishment data in the field of industrial employment, payrolls and hours:

72-001 - Advance Statement on Employment and Average Weekly Wages and Salaries - Monthly - Price \$1.00 per year

(Index numbers of employment and averages of weekly wage and salary statistics for Canada (major industry divisions) and the provinces (industrial composite figures)).

72-002 - Employment and Average Weekly Wages and Salaries - Monthly - Price \$4.00 per year

(Industry and area index numbers of employment and payrolls and averages of weekly wage and salary statistics; comparisons with earlier periods; charts and explanatory material).

72-003 - Man-Hours and Hourly Earnings - Monthly - Price \$4.00 per year

(Industry and area averages of hours per week, hourly and weekly wages, with comparisons from a month and a year earlier, and certain historical comparisons; charts and explanatory material).

72-005 - Estimates of Labour Income - Monthly - Price \$2.00 per year

(Monthly estimates of wages, salaries and supplementary labour income, both unadjusted and seasonally-adjusted, for specific industries and regions; with annual totals for the last 12 years).

72-008 - Estimates of Employees by Province and Industry - Monthly - Price \$3.00 per year

(Estimates of total numbers of Employees, with comparisons with a month and a year earlier).

72-201 - Review of Employment and Average Weekly Wages and Salaries - Annual - Price \$1.50

(Industry and area index numbers of employment and payrolls and average weekly wages and salaries, monthly and annually, over a lengthy period; charts and explanatory material).

72-202 - Review of Man-Hours and Hourly Earnings - Annual - Price \$1.50

(Industry and area averages of hours per week, hourly and weekly wages, monthly and annually, over a lengthy period; charts and explanatory material).

72-204 - Earnings and Hours of Work in Manufacturing - Annual - Final Report - Price 75 cents

(Separate figures of earnings and hours for men and women and for salaried employees and wage-earners in one week in October from 1946 with industrial and area detail; charts and explanatory material. Special data are obtained on a rotational basis in successive years).

72-206 - Seasonally-adjusted Employment Indexes - First Edition: January 1961 - March 1967 - Price \$2.00

(Monthly index numbers of employment, adjusted seasonally according to x-11 variant of the U.S. Bureau of the Census Method II, by industry division as well as most major industry group for Canada and by industry division for regions).

72-502 - Labour Income, 1926-58 - Price 75 cents - Out of print

(A record of annual estimates of labour income from 1926 to 1958, along with monthly figures from 1947; contains explanations of sources, methods and concepts).

72-504 - Employment Indexes, Average Weekly Wages and Salaries, Average Weekly Hours and Average Hourly Earnings, Monthly and Annual Statistics -- Historical Series, January 1961 - May 1965 -- Volume I - Price \$4.50

(This volume gives statistics revised to the 1960 Standard Industrial Classification and a 1961 time base for index numbers).

72-508 - Estimates of Employees by Province and Industry, 1961-68 - Price 50 cents

(Estimates of total numbers of employees, monthly and annually, for major industrial divisions, Canada and provinces; contains a review of concepts, sources and methods and indicators of sampling variability).

72-506 - Labour Costs in Manufacturing, 1967 - Price \$1.50

72-510 - Labour Costs in Manufacturing, 1968 - Price \$1.50

(An annual publication covering various industries on a cycle or occasional basis. Estimates of selected employer labour costs, by industry group and area - Report prepared jointly by Labour Division of DBS and Economics and Research Branch of the Canada Department of Labour).

Remittances should be in the form of cheque or money order, made payable to the Receiver General of Canada and forwarded to the Publications Distribution Unit, Financial Control Section, Dominion Bureau of Statistics, or to the Queen's Printer, Ottawa, Canada.

WAGES AND SALARIES IN MANUFACTURING

BASIS: 1960 STANDARD INDUSTRIAL CLASSIFICATION

ESTIMATES OF LABOUR INCOME

January 1971

The advance estimate of labour income for January, unadjusted for seasonal variations, was \$3,973.0 million, virtually unchanged from the preliminary estimate of \$3,970.6 million for December 1970. Seasonally-adjusted, total labour income increased from \$4,056.4 million in December to \$4,088.9 million in January, an increase of \$32.5 million or 0.8 per cent. In the goods-producing industries, wages and salaries advanced 1.1 per cent with manufacturing accounting for nearly all of this gain. The service-producing industries rose 0.5 per cent due mainly to increases in the service industry.

December 1970

The December estimate of labour income, seasonally-adjusted at \$4,056.4 million, advanced 0.9 per cent or \$34.7 million, over the revised estimate for November 1970. This was 0.5 percentage points higher than the increase recorded in November and above the average monthly gain recorded for the year. In the goods-producing industries, wages and salaries advanced 0.6 per cent. Manufacturing increased 1.0 per cent largely due to the settlement of the labour dispute in the transportation-equipment industries. If the effects of wages and salaries lost by employees on strike during November and December were removed, wages and salaries in manufacturing for December would have remained virtually unchanged. Mining increased 0.1 per cent while forestry recorded a 3.2 per cent decline and construction remained unchanged.

In the service-producing industries, wages and salaries increased by 1.0 per cent with all industry divisions except transportation, communication and other utilities, recording increases. Trade advanced 1.5 per cent as the 3.2 per cent increase in retail trade was partially offset by a 0.9 per cent decline in wholesale trade. Finance, insurance and real estate rose 1.6 per cent with increases in both earnings and employment. Transportation, communication and other utilities declined by 1.0 per cent. However, if the effects of retroactive payments paid to post office employees were removed from the November and December estimates, wages and salaries for this industry division in December would have shown an increase over November. Commercial service increased 1.4 per cent; non-commercial service advanced 0.9 per cent, due mainly to an increase in education. Public administration and defence rose 2.5 per cent with most of the increase being attributed to retroactive payments in the federal component.

(1) Excludes Military Pay and Allowances.

(2) Includes Fishing and Trapping.

(3) Includes Yukon, North West Territories and Canadian residents abroad.

(4) The difference between the sum of the provinces and these totals, which include Yukon, North West Territories and Canadian residents abroad, contains a residual error resulting from seasonally adjusting by province and by industry.

Note: Estimates may not add to totals, owing to rounding.

Concepts and Methods

Labour income is the compensation paid to employees for services rendered either as wages and salaries or as supplementary labour income. Wages and salaries include directors' fees, bonuses, commissions, taxable allowance and benefits, some imputed earnings (e.g. those for persons in religious orders) and living allowances considered to be an additional benefit to the employee. Supplementary labour income, which consists of payments made by employers for the future benefit of employees, is composed of employers' contributions to employee welfare and pension funds, to the Workmen's Compensation Fund and to the Unemployment Insurance Fund.

Money payments or payments in kind made to, or on behalf of, residents of Canada, excluding military pay and allowances, are included in the wages and salaries component. Contributions to armed forces pension funds are included in the supplementary labour income component in the estimates based on the 1948 Standard Industrial Classification. These contributions are totally excluded from the revised estimates for 1951 to date, based on the 1960 Standard Industrial Classification.

The annual estimates are based in most cases on data derived from sample and full coverage surveys conducted within the Dominion Bureau of Statistics, the decennial population censuses, and the public accounts of the federal and provincial governments.

The main indicators used to interpolate between censuses, project from benchmarks and allocate annual figures by month have been: a) the payroll index derived from the Employment, Payrolls and Man-Hours survey of large firms, b) total employees as published in Estimates of Employees by Province and Industry combined with average weekly earnings of large firms and c) monthly payroll derived from the surveys of employment and payroll in the federal, provincial and municipal governments.

The monthly figures are not affected by the number of pay days per month because a constant number of working days is assumed for each month. Retroactive wage payments reported for 1951-1968 were distributed over the year but since 1969 these payments have been included in the months in which they were made.

A complete explanation of the sources and methods used as well as definitions and other related information will be published at a later date.

Statistical Presentation

The latest monthly figures are advance estimates based on early returns of employment reports. They have a lesser degree of reliability than the estimates for the immediately preceding month and the previous month which are based on more complete information. Estimates for other months and those for recent years are revised as new annual data become available.

The monthly figures in this report are presented with one digit after the decimal point, i.e. to the nearest tenth of a million dollars. This is done in order to avoid sudden changes in estimates for small provinces or industries which would occur if the figures were rounded to the nearest million. It should not be assumed that the estimates are necessarily accurate to the nearest tenth of a million.

Estimates of labour income based on the 1948 Standard Industrial Classification have been published for 1926 to 1969. Those based on the 1960 Standard Industrial Classification are now available from 1951 to date. A complete historical record of the statistics published is obtainable as follows:

Estimates Based on the 1948 Standard Industrial Classification
