# ESTIMATES OF LABOUR INCOME

## OCTOBER - DECEMBER 1971

*Published by Authority of*  
The Minister of Industry, Trade and Commerce

DOMINION BUREAU OF STATISTICS  
Labour Division  
Employment Section

April 1972  
8003-511

Price: 20 cents  
\$2.00 a year

Vol. 25—Nos. 10-12

EMPLOYMENT AND PAYROLL REPORTS

Following are publications of the Labour Division based upon establishment data in the field of industrial employment, payrolls and hours:

72-001 - Advance Statement on Employment and Average Weekly Wages and Salaries - Monthly - Price \$1.00 per year

(Index numbers of employment and averages of weekly wage and salary statistics for Canada (major industry divisions) and the provinces (industrial composite figures)).

72-002 - Employment and Average Weekly Wages and Salaries - Monthly - Price \$4.00 per year

(Industry and area index numbers of employment and payrolls and averages of weekly wage and salary statistics; comparisons with earlier periods; charts and explanatory material).

72-003 - Man-Hours and Hourly Earnings - Monthly - Price - \$4.00 per year

(Industry and area averages of hours per week, hourly and weekly wages, with comparisons from a month and a year earlier, and certain historical comparisons; charts and explanatory material).

72-005 - Estimates of Labour Income - Monthly - Price \$2.00 per year

(Monthly estimates of wages, salaries and supplementary labour income, both unadjusted and seasonally-adjusted, for specific industries and regions; with annual totals for the last 12 years).

72-008 - Estimates of Employees by Province and Industry - Monthly - Price \$3.00 per year

(Estimates of total numbers of Employees, with comparisons with a month and a year earlier).

72-201 - Review of Employment and Average Weekly Wages and Salaries - Annual - Price \$1.50

(Industry and area index numbers of employment and payrolls and average weekly wages and salaries, monthly and annually, over a lengthy period; charts and explanatory material).

72-202 - Review of Man-Hours and Hourly Earnings - Annual - Price \$1.50

(Industry and area averages of hours per week, hourly and weekly wages, monthly and annually, over a lengthy period; charts and explanatory material).

72-204 - Earnings and Hours of Work in Manufacturing - Annual - Final Report - Price 75 cents

(Separate figures of earnings and hours for men and women and for salaried employees and wage-earners in one week in October from 1946 with industrial and area detail; charts and explanatory material. Special data are obtained on a rotational basis in successive years).

72-206 - Seasonally-adjusted Employment Indexes - First Edition: January 1961 - March 1967 - Price \$2.00

(Monthly index numbers of employment, adjusted seasonally according to x-11 variant of the U.S. Bureau of the Census Method II, by industry division as well as most major industry group for Canada and by industry division for regions).

72-502 - Labour Income, 1926-58 - Price 75 cents - Out of print

(A record of annual estimates of labour income from 1926 to 1958, along with monthly figures from 1947; contains explanations of sources, methods and concepts).

72-504 - Employment Indexes, Average Weekly Wages and Salaries, Average Weekly Hours and Average Hourly Earnings, Monthly and Annual Statistics -- Historical Series, January 1961 - May 1965 -- Volume I - Price \$4.50

(This volume gives statistics revised to the 1960 Standard Industrial Classification and a 1961 time base for index numbers).

72-508 - Estimates of Employees by Province and Industry, 1961-68 - Price 50 cents

(Estimates of total numbers of employees, monthly and annually, for major industrial divisions, Canada and provinces; contains a review of concepts, sources and methods and indicators of sampling variability).

72-506 - Labour Costs in Manufacturing, 1967 - Price \$1.50

72-510 - Labour Costs in Manufacturing, 1968 - Price \$1.50

(An annual publication covering various industries on a cycle or occasional basis. Estimates of selected employer labour costs, by industry group and area - Report prepared jointly by Labour Division of DBS and Economics and Research Branch of the Canada Department of Labour).

Remittances should be in the form of cheque or money order, made payable to the Receiver General of Canada and forwarded to the Publications Distribution Unit, Financial Control Section, Dominion Bureau of Statistics, or to the Queen's Printer, Ottawa, Canada.

## WAGES AND SALARIES IN MANUFACTURING

BASIS: 1960 STANDARD INDUSTRIAL CLASSIFICATION

## ESTIMATES OF LABOUR INCOME

(Adjusted for Seasonal Variations)

Early in 1971, difficulties in implementing a new computerized system for compiling employment, earnings and hours data resulted in the interruption of the publication of these data. As a result, monthly estimates of labour income, which largely depend on the above-noted data for projection purposes, were published at infrequent intervals, i.e. February to June data were released in September, July to September were published in December and the estimates for October to December are contained in this publication. It is now expected that the January to March, 1972 estimates of labour income will be published sometime in May 1972 following which monthly publication will be resumed.

### Fourth Quarter 1971

During the fourth quarter, total labour income, adjusted for seasonal variations, increased by 2.0 %. This gain was about the same as that recorded in the third quarter but represented a marked deceleration from the advances of 2.4 and 4.0 % experienced in the first and second quarters of 1971, respectively. The gain in the fourth quarter was almost entirely due to increases in average earnings, with employment recording little change.

In the goods-producing industries, wages and salaries rose by 1.2 %. Since the first quarter of 1971, the relative contribution of the goods-producing industries to the growth in total labour income has been declining. The growth in the fourth quarter was only slightly less than the increase recorded in the third quarter, but represented a considerable deceleration from the gains of 3.1 and 3.6 % recorded in the first and second quarters, respectively. This deceleration was mainly the result of a slower growth and a decline in employment during the third and fourth quarters, respectively, following significant gains in the first half of the year. The increase in employment at the beginning of 1971 was partly attributable to the cessation of labour disputes in manufacturing and construction in the latter half of 1970. Manufacturing accounted for most of this deceleration by recording an increase of only 0.8 % as compared with gains of 3.4, 2.8, and 2.1 % in the first, second, and third quarters, respectively. Construction increased by 3.0 % over the strike-affected third quarter which recorded virtually no change. Wages and salaries in the primary industries remained virtually unchanged with a decrease in mining being offset by increases in the other components.

In the service-producing industries, wages and salaries increased by 2.6 % with most of the gain being attributable to increases in average earnings. This gain was about 0.5 percentage points more than the advance in the third quarter and was about the same as the average quarterly growth recorded in 1971. The most noticeable advance was a 5.0 % increase in total trade. This gain was about twice as large as the average quarterly growth for 1971. Both retail and wholesale trade contributed to this increase. Transportation, communication, and other utilities increased by 2.1 %, a marked deceleration from the gains of about 3.5 % in the second and third quarters but only slightly less than the average quarterly gain for 1971. The deceleration in the fourth quarter was due to a slowdown in average earnings as employment increased. Finance, insurance, and real estate advanced by 1.7 %, slightly less than the average quarterly gain in 1971 but 0.7 percentage points more than the increase recorded in the third quarter. In service, wages and salaries increased by 1.3 %. This compares with an increase of 2.5 % in the third quarter and an average quarterly gain for 1971 of 2.8 %. Both the commercial and non-commercial sectors of service contributed to this deceleration. Public administration and defence advanced by 4.7 %, about one percentage point more than the average quarterly gain for 1971. Retro-active payments to federal government employees accounted for a large proportion of this fourth quarter gain.

### Annual 1971

During 1971, total labour income increased by 9.9 % as compared with increases of 8.9 % in 1970 and 12.2 % in 1969. The larger rate of growth in 1971 resulted from acceleration in both employment and average earnings but, as in 1970, the increase in average earnings contributed most to the total advance of 9.9 %. While both the goods-producing and service-producing industries advanced at a faster rate than in 1970 the acceleration was greater in the goods-producing industries.

Wages and salaries in the goods-producing industries increased by 8.5 %, entirely as a result of increases in average earnings, as employment declined. This increase was 1.7 percentage points more than the advance recorded in 1970 and except for 1969, constituted the largest gain since 1966. In manufacturing and construction, which were affected by strikes to a larger degree in 1970 than in 1971, wages and salaries increased by 7.5 % and 13.4 %, respectively. These gains compare with 1970 advances of 5.6 % in manufacturing and 9.6 % in construction. Mining increased by 6.8 % following increases of 17.5 % in 1970 and 4.4 % in 1969. While only a relatively small amount of wages and salaries were lost by employees on strikes in 1970, labour disputes affected this industry significantly in 1969 and moderately in 1971. Forestry advanced by 6.0 % (no change in 1970) and agriculture, fishing and trapping increased by 4.3 %, about the same gain as for the previous year.

Wages and salaries in the service-producing industries increased by 10.9 % as compared with gains of 10.2 and 14.2 % recorded in 1970 and 1969, respectively. Employment advanced at about the same rate as in 1970 while average earnings accelerated slightly. Wages and salaries in service increased by 11.8 % (12.7 % in 1970) with larger gains recorded in the commercial sector than in the non-commercial sector. Transportation, communication and other utilities advanced by 9.8 % (7.7 % in 1970), trade by 8.6 % (9.3 % in 1970), finance, insurance and real estate by 8.8 % (9.6 per cent in 1970), and public administration by 15.0 % (8.6 % in 1970). The gain in public administration was somewhat influenced by larger retroactive payments made to federal government employees in 1971 than in 1970.

(1) Excludes Military Pay and Allowances.

(2) Includes Fishing and Trapping.

(3) Includes Yukon, North West Territories and Canadian residents abroad.

(4) The difference between the sum of the provinces and these totals, which include Yukon, North West Territories and Canadian residents abroad, contains a residual error resulting from seasonally adjusting by province and by industry.

Note: Estimates may not add to totals, owing to rounding.

TABLE 2. Wages and Salaries by Industry, and Supplementary Labour Income, Canada, Adjusted for Seasonal Variation

Year and month	Wages and Salaries												Total labour income(2)	
	Agri-culture	Forestry	Mining	Manufacturing	Construction	Transportation, communication and other utilities	Trade	Finance, insurance and real estate	Service	Public Admin. and Defence(1)	Total wages and salaries(2)			
											millions of dollars

### Concepts and Methods

Labour income is the compensation paid to employees for services rendered either as wages and salaries or as supplementary labour income. Wages and salaries include directors' fees, bonuses, commissions, taxable allowance and benefits, some imputed earnings (e.g. those for persons in religious orders) and living allowances considered to be an additional benefit to the employee. Supplementary labour income, which consists of payments made by employers for the future benefit of employees, is composed of employers' contributions to employee welfare and pension funds, to the Workmen's Compensation Fund and to the Unemployment Insurance Fund.

Money payments or payments in kind made to, or on behalf of, residents of Canada, excluding military pay and allowances, are included in the wages and salaries component. Contributions to armed forces pension funds are included in the supplementary labour income component in the estimates based on the 1948 Standard Industrial Classification. These contributions are totally excluded from the revised estimates for 1951 to date, based on the 1960 Standard Industrial Classification.

The annual estimates are based in most cases on data derived from sample and full coverage surveys conducted within the Dominion Bureau of Statistics, the decennial population censuses, and the public accounts of the federal and provincial governments.

The main indicators used to interpolate between censuses, project from benchmarks and allocate annual figures by month have been: a) the payroll index derived from the Employment, Payrolls and Man-Hours survey of large firms, b) total employees as published in Estimates of Employees by Province and Industry combined with average weekly earnings of large firms and c) monthly payroll derived from the surveys of employment and payroll in the federal, provincial and municipal governments.

The monthly figures are not affected by the number of pay days per month because a constant number of working days is assumed for each month. Retroactive wage payments reported for 1951-1968 were distributed over the year but since 1969 these payments have been included in the months in which they were made.

A complete explanation of the sources and methods used as well as definitions and other related information will be published at a later date.

### Statistical Presentation

The latest monthly figures are advance estimates based on early returns of employment reports. They have a lesser degree of reliability than the estimates for the immediately preceding month and the previous month which are based on more complete information. Estimates for other months and those for recent years are revised as new annual data become available.

The monthly figures in this report are presented with one digit after the decimal point, i.e. to the nearest tenth of a million dollars. This is done in order to avoid sudden changes in estimates for small provinces or industries which would occur if the figures were rounded to the nearest million. It should not be assumed that the estimates are necessarily accurate to the nearest tenth of a million.

Estimates of labour income based on the 1948 Standard Industrial Classification have been published for 1926 to 1969. Those based on the 1960 Standard Industrial Classification are now available from 1951 to date. A complete historical record of the statistics published is obtainable as follows:

Estimates Based on the 1948 Standard Industrial Classification
