ESTIMATES OF EMPLOYEES BY PROVINCE AND INDUSTRY

FEBRUARY 1968

The aggregate number of employees in non-agricultural industries covered in the last week of February 1968 was 5,480,300(1). This represented a decrease of 38,300 or 0.7 p.c. over January 1968. Seasonal declines in employment occurred in all industries except public administration and defence, community, business and personal services and finance, insurance and real estate which show increases of 2,600 or 1.0 p.c., 8,900 or 0.6 p.c. and 1,100 or 0.4 p.c., respectively. Levels of employment decreased 4,600 or 7.7 p.c. for forestry; 6,100 or 2.0 p.c. for construction; 25,-100 or 1.6 p.c. for manufacturing (mainly attributable to labour disputes); 1,300 or 1.1 p.c. for mines, quarries and oil wells; 9,600 or 1.0 p.c. for trade; and 4,200 or 0.7 p.c. for transportation, communication and other utilities. Compared to February 1967, estimates of aggregate employment were higher by 73,700 or 1.4 p.c. Community, business and personal services added 93,900 or 7.3 p.c.; finance, insurance and real estate, 14,700 or 5.8 p.c.; public administration, 13,400 or 5.3 p.c., trade, 27,900 or 3.1 p.c.; mines, quarries and oil wells, 1,800 or 1.6 p.c.; and transportation, communication and other utilities, 800 or 0.1 p.c. On the other hand, forestry decreased 9,900 or 15.2 p.c.; construction, 18,000 or 5.8 p.c.; and manufacturing, 50,900 or 3.2 p.c.

ESTIMATIONS DU NOMBRE D'EMPLOYES PAR PROVINCE ET PAR INDUSTRIE

FÉVRIER 1968

Le nombre total d'employés dans les industries non agricoles au cours de la dernière semaine de février était de 5,480,300(1). Ce nombre représente une diminution de 38,300 (0.7 p. 100) par rapport à la même semaine de janvier. Il y a eu des contractions saisonnières dans toutes les industries, sauf dans l'administration publique et la défense, les services sociaux, commerciaux, industriels et personnels, et les finances, les assurances et l'immeuble, où on a relevé des accroissements de 2,600 (1 p. 100), 8,900 (0.6 p. 100) et 1,100 (0.4 p. 100) respectivement. Les effectifs se sont resserrés de 4,600 (7.7 p. 100) dans l'exploitation forestière, de 6,100 (2 p. 100) dans la construction, de 25,100 (1.6 p. 100) dans la fabrication (surtout à cause de différends ouvriers), de 1,300 (1.1 p. 100) dans les mines, les carrières et les puits de pétrole, de 9,600 (1 p. 100) dans le commerce et de 4,200 (0.7 p. 100) dans les transports, les communications et les autres services d'utilité publique. Comparativement à février 1967, le nombre global estimatif des personnes occupées est en hausse de 73,700 (1.4 p. 100). Les effectifs se sont accrues de 93,900 (7.3 p. 100) dans les services sociaux, commerciaux, industriels et personnels, de 14,700 (5.8 p. 100) dans les finances, les assurances et l'immeuble, de 13,400 (5.3 p. 100) dans l'administration publique, de 27,900 (3.1 p. 100) dans le commerce, de 1,800 (1.6 p. 100) dans les mines, les carrières et les puits de pétrole et de 800 (0.1 p. 100) dans les transports, les communications et les autres d'utilité publique. Par contre, ils ont diminué de 9,900 (15.2 p. 100) dans l'exploitation forestière, de 18,000 (5.8 p. 100) dans la construction et de 50,900 (3.2 p. 100) dans la fabrication.

The publication presents for the first time selected estimates of employees in public administration and the non-commercial component of community, business and personal service. The former covers federal and provincial government employees except for provincial government employees in B.C. and the latter covers employment in hospitals and education and related services. A historical series covering the 1961 to 1967 period is included to provide comparable data for the newly incorporated industries and revised data for the commercial industries. The revisions occur mainly in the years 1961 and 1962 where a downward bias of about 1 p.c. in the statistics resulted from technical difficulties connected with the introduction of the 1960 Standard Industrial Classification and associated changes.

(1) Preliminary.

Pour la première fois, la publication présente certaines estimations d'employés de l'administration publique et du secteur non commercial des services sociaux, commerciaux, industriels et personnels. L'administration publique comprend les employés des gouvernements fédéral et provinciaux, sauf ceux du gouvernement de la Colombie-Britannique, tandis que le secteur non commercial comprend les employés des hôpitaux et de l'enseignement et des services connexes. Une série chronologique couvrant la période de 1961 à 1967 fournit des données comparables sur les industries nouvellement constituées en société et des données rectifiées sur les industries commerciales. Les rectifications ont lieu surtout dans les années 1961 et 1962, où un biais par défaut d'environ 1 p. 100 de la statistique provient de difficultés techniques liées à l'adoption de la classification type des industries de 1960 et aux changements connexes.

(1) Chiffre provisoire.

This publication is expanded to include selected estimates of employees in public administration and non-commercial services and provides revised data for commercial and non-commercial industries incorporated. Data published in previous issues are, therefore, superseded.

La présente publication a été augmentée et comprend maintenant certaines estimations d'employés de l'administration publique et des services non commerciaux; elle contient aussi des données rectifiées sur les industries commerciales et non commerciales constituées en société. Ces données annulent donc celles des publications précédentes.

Notes: 1. Estimates may not add to totals due to rounding.

2. Data for N.W.T. and Yukon are too small to be published separately but are included in the Canada total.

(1) Refers to employment in hospitals and education and related services. Welfare and religious organizations are excluded at present.

(2) Includes health services (except hospitals); motion picture and recreational services; services to business management; personal services (except domestic service) and miscellaneous services.

(3) Excludes municipal government employees and provincial employees in British Columbia.

| | Dec. | 16.1 | 9.2 | 112.5 | 45.1 | 67.3 | 30.8 | 74.1 |

Notes: 1. Estimates may not add to totals due to rounding.

2. Data for N.W.T. and Yukon are too small to be published separately but are included in the Canada total.

(1) Refers to employment in hospitals and education and related services. Welfare and religious organizations are excluded at present.

(2) Includes health services (except hospitals); motion picture and recreational services; services to business management; personal services (except domestic service) and miscellaneous services.

(3) Excludes municipal government employees and provincial employees in British Columbia. Provincial employees in Quebec are excluded from 1961 to 1963 inclusive.

P Preliminary figures.

R Revised figures.

Nota: 1. Les estimations ne concordent pas toujours avec les totaux à cause de l'arrondissement des nombres.

2. Les chiffres, trop faibles, des T.N.-O et du Yukon ne peuvent pas être publiés séparément; ils sont compris dans ceux du Canada entier.

(1) Comprend l'emploi dans les hôpitaux et l'enseignement et les services connexes. Les institutions de bien-être social et institutions religieuses sont exclus actuellement.

(2) Comprend les services de santé (sauf les hôpitaux); la cinématographie et les services récréatifs; les services extérieurs des entreprises; les services personnels (sauf les services ménagers) et les services divers.

(3) Ne comprend pas les employés provinciaux de la Colombie-Britannique ni ceux des gouvernements municipaux. Les employés de la province de Québec sont exclus de 1961 to 1963.

ESTIMATES OF EMPLOYEES

The monthly releases of estimates of employees cover the industry divisions of forestry; mines, quarries and oil wells; manufacturing; construction; transportation, communication and other utilities; trade; finance, insurance and real estate; community, business and personal services; and public administration. Employment in defence is excluded at present. The statistics are derived by combining employment data from the survey of larger establishments with estimates obtained from a monthly sample survey of smaller establishments. Establishments employing 15 or more persons are carried on a self-representing basis. Establishments employing fewer than 15 employees are sampled with the exception of smaller establishments of multi-establishment firms which are all considered as self-representing.

The statistics published in this release are based on the 1960 Standard Industrial Classification. Because of adjustments made at the beginning of 1966 when the larger establishment survey was converted to the 1960 Standard Industrial Classification, the data in this report are not strictly comparable with those published in the reference paper "Estimates of Employees by Province and Industry, 1961-64" (Cat. No. 72-503) and in the monthly releases for the period December 1964 to December 1965. These data were revised in 1966 according to the 1960 Standard Industrial Classification.

The data refer to employees of establishments who are paid for rendering current service or are on paid absence during the reference period. The employee concept excludes employers; own account workers; unpaid family workers; employees usually working less than the equivalent of one full day a week; employees temporarily absent without pay; and persons providing services to the establishment on the basis of a fee for services rendered. Conceptually, the data relate to the last pay period in each month specified.

The estimates of employees are considered, for most purposes, to be more reliable indicators of changes in employment than the larger establishment employment indexes(1). However, the nature of the sample survey does not permit the publication of industry detail below the industry division level or of geographic detail below the provincial level, and the larger-establishment employment indexes are the only source of current information of that type. In addition to the industries covered by the employment indexes the estimates include those in the non-commercial sector of service and public administration. It is expected that the estimates will ultimately be extended to incorporate data for the fishing and trapping industry and, as a result, provide full coverage of the non-agricultural sector.

For additional information regarding concepts, sources and methods, as well as an appraisal of the reliability of the data, see the reference paper "Estimates of Employees by Province and Industry, 1961-64" (Cat. No. 72-503).

ESTIMATIONS DU NOMBRE D'EMPLOIÉS

Les bulletins mensuels donnant des estimations du nombre d'employés portent sur les divisions industrielles suivantes: forestage; mines, carrières et puits de pétrole; fabrication; construction; transports, communications et autres services d'utilité publique; commerce; finances, assurances et immeuble; services communautaires, commerciaux et personnels; et administration publique. Les employés de la défense nationale sont exclus actuellement. La statistique s'obtient en combinant les données de l'emploi tirées du relevé des grands établissements aux estimations provenant du sondage mensuel des petits établissements. Les établissements qui comptent 15 employés ou plus sont traités indépendamment. D'autre part, les établissements employant moins de 15 personnes font l'objet d'un échantillonnage, sauf les petits établissements des sociétés à succursales multiples, tous considérés comme autonomes.

La statistique publiée dans le présent bulletin se fonde sur la Classification type des industries de 1960. En raison des rajustements effectués au début de 1966, - époque où l'on a adopté le relevé des grands établissements à la Classification type des industries de 1960, - les données du présent rapport ne sont pas exactement comparables à celles qui figurent dans le document de référence: Estimations du nombre d'employés par province et par industrie, 1961-1964 (no. de catalogue 72-503F) et dans les bulletins mensuels parus entre décembre 1964 et décembre 1965. Ces données ont été révisées en 1966 conformément à la Classification type des industries de 1960.

Les données se rapportent aux employés que les établissements rémunèrent pour services courants ou qui sont en congés payés durant la période observée. Le concept d'employé exclut: les employeurs; les travailleurs à leur propre compte; les travailleurs familiaux non rémunérés; les employés qui travaillent habituellement moins que l'équivalent d'une pleine journée de travail par semaine; les employés temporairement absents sans paie, et les personnes rendant à l'établissement des services contre honoraires. Selon le concept, les données ont trait à la dernière période de paie de chacun des mois spécifiés.

Les estimations d'employés sont considérées à toutes fins pratiques, comme des indicateurs des fluctuations de l'emploi plus sûrs que les indices de l'emploi dans les grands établissements(1). Toutefois, la nature du relevé-échantillon ne permet pas de publier la statistique détaillée sur l'industrie au niveau inférieur à celui de la division industrielle, non plus que le détail géographique au-dessous du niveau provincial, et les indices d'emploi des grands établissements sont la seule source actuelle de renseignement de cette nature. En plus des industries comprises dans les indices, les estimations incluent les données pour le secteur non-commercial de service et celles pour l'administration publique. On prévoit que les estimations s'étendront éventuellement aux données intégrées de l'industrie de la pêche et du piégeage et couvriront par conséquent, tout le secteur non agricole.

Pour de plus amples renseignements sur les concepts, sources et méthodes, le lecteur est prié de consulter le document de référence intitulé: Estimations du nombre d'employés par province et par industrie, 1961-1964 (no. de catalogue 72-503F), où il trouvera également une appréciation du degré de fiabilité des chiffres en cause.
