ESTIMATES OF EMPLOYEES BY PROVINCE AND INDUSTRYESTIMATIONS DU NOMBRE D'EMPLOYES PAR PROVINCE ET PAR INDUSTRIEAugust 1970

The advance unadjusted estimate of employees in non-agricultural(1) industries shows a rise from July to August 1970. All industry divisions increased except mines, quarries and oil wells, community, business and personal services, and public administration and defence which recorded declines. Employment was higher in New Brunswick, Quebec, Ontario, and Manitoba. All other provinces showed decreases.

Seasonally-adjusted, the August advance estimate of non-agricultural employment showed a rise from July. Among the industry divisions for which data are available, the largest relative change was an increase in construction. Higher employment was recorded in all provinces except Newfoundland, Prince Edward Island, and Nova Scotia where decreases occurred.

July 1970

The preliminary unadjusted estimate of 6,677.6 thousand employees in non-agricultural industries(1) for the last week of July was 1.9 p.c. lower than the June total of 6,807.1 thousand employees. Decreases were recorded in manufacturing, trade, and community, business and personal services. The decline in manufacturing resulted from layoffs associated with the model changeover in motor vehicles. In community, business and personal services, the decrease occurred in education where teachers not being paid during the summer months are not counted as employed. All other industry divisions recorded gains. Employment was lower in all provinces except Nova Scotia, Manitoba, Saskatchewan, and Alberta where small increases occurred.

Compared to July 1969 data, employment was 0.6 p.c. (38,500 employees) higher. Among the industry divisions, the largest relative changes were increases of 15.7 p.c. in mines, quarries and oil wells (18,400 employees), 8.6 p.c. in public administration and defence (37,700 employees), 4.3 p.c. in trade (44,900 employees), and a decrease of 5.5 p.c. in construction (23,200 employees). All provinces recorded higher employment except Quebec, Saskatchewan, and British Columbia which showed declines.

Seasonally-adjusted, the July estimate of non-agricultural employment dropped 1.7 p.c. (110,200 employees) from June 1970. Decreases occurred in community, business and personal services, 4.1 p.c. (78,800 employees), in manufacturing, 0.8 p.c. (13,900 employees); in trade, 0.6 p.c. (6,800 employees); and in public administration and defence, 1.4 p.c. (6,500 employees). The decline in community, business and personal services was larger than the usual seasonal movement because teachers not being paid during the summer months who were previously included in the estimates, are now excluded. Employment decreased in all provinces except Nova Scotia, Saskatchewan, and Alberta which recorded slight gains.

Août 1970

Selon la première estimation non corrigée des variations saisonnières, l'effectif du secteur non agricole(1) s'est accru de juillet à août 1970. Le nombre d'employés a augmenté dans toutes les branches d'activité, sauf l'exploitation minière, les carrières et les puits de pétrole, les services sociaux, commerciaux, industriels et personnels, et l'administration publique et la défense, où il a diminué. Les effectifs étaient plus élevés au Nouveau-Brunswick, au Québec, en Ontario et au Manitoba. Toutes les autres provinces signalaient des diminutions.

Après correction des variations saisonnières, la première estimation de l'effectif d'août du secteur non agricole révèle que celui-ci s'est accru par rapport à juillet. Parmi les branches d'activité dont les chiffres sont connus, le changement relatif le plus élevé est l'augmentation qui s'est produite dans la construction. Le nombre d'employés s'est accru dans toutes les provinces, sauf à Terre-Neuve, dans l'Île-du-Prince-Édouard et en Nouvelle-Écosse, où il a diminué.

Juillet 1970

L'estimation préliminaire, non corrigée des variations saisonnières, de l'effectif des industries du secteur non agricole(1) révèle que, la dernière semaine de juillet, celui-ci se composait de 6,677,600 personnes, soit 1.9 p. 100 de moins qu'en juin (6,807,100). On a enregistré des diminutions dans l'industrie manufacturière, le commerce, et les services sociaux, commerciaux, industriels et personnels. La baisse dans l'industrie manufacturière découlait des mises à pied associées au changement de modèles de véhicules automobiles. Dans les services sociaux, commerciaux, industriels et personnels, la diminution s'est produite dans l'enseignement où les professeurs qui ne sont pas payés durant les mois d'été ne sont pas comptés. Toutes les autres branches d'activité ont connu des augmentations. Le nombre d'employés était moins élevé dans toutes les provinces, sauf en Nouvelle-Écosse, au Manitoba, en Saskatchewan et en Alberta, où il a légèrement augmenté.

Comparativement à juillet 1969, les effectifs étaient de 0.6 p. 100 plus élevés (38,500 employés). Parmi les branches d'activité, les changements relatifs les plus considérables sont les augmentations de 15.7 p. 100 dans l'exploitation minière, les carrières et les puits de pétrole (18,400 employés), de 8.6 p. 100 dans l'administration publique et la défense (37,700 employés), de 4.3 p. 100 dans le commerce (44,900 employés), et une diminution de 5.5 p. 100 dans la construction (23,200 employés). Le nombre d'employés a augmenté dans toutes les provinces, sauf au Québec, en Saskatchewan et en Colombie-Britannique, où il a diminué.

Correction faite des variations saisonnières, l'estimation de juillet de l'effectif non agricole était de 1.7 p. 100 (110,200 employés) inférieure à celle de juin 1970. Il y a eu diminution de 4.1 p. 100 (78,800 employés) dans les services sociaux, commerciaux, industriels et personnels, de 0.8 p. 100 (13,900 employés) dans l'industrie manufacturière; de 0.6 p. 100 (6,800 employés) dans le commerce; et de 1.4 p. 100 (6,500 employés) dans l'administration publique et la défense. La baisse dans les services sociaux, commerciaux, industriels et personnels a été plus prononcée que le mouvement saisonnier habituel parce que les professeurs qui, sans être payés durant les mois d'été, figuraient auparavant dans les estimations, en sont maintenant exclus. Le nombre d'employés a diminué dans toutes les provinces, sauf en Nouvelle-Écosse, en Saskatchewan et en Alberta, où il a légèrement augmenté.

| Grand - Total - Global | 322.7 | 319.1 | 318.2 | 296.8 |

Notes: 1. Estimates may not add to totals owing to rounding. -- Les estimations ne concordent pas toujours avec les totaux à cause de l'arrondissement des nombres.

2. Data for the Northwest Territories and Yukon are too small to be published separately and are included in the Canada total. -- Les chiffres, trop faibles, des territoires du Nord-Ouest et du Yukon ne peuvent pas être publiés séparément; ils sont compris dans ceux du Canada entier.

3. Employees in fishing and trapping are included at the Canada level. -- Les employés des entreprises de la pêche et le piégeage sont inclus au niveau du Canada.

4. See coverage, definitions and explanations on the estimates on page 32. -- Voir le champ de l'enquête, les définitions et les explications relative aux estimations à la page 32.

(1) Employment in hospitals, education and related services, welfare organizations, religious organizations and private households. Private households are excluded for the metropolitan areas covered. -- L'emploi dans les hôpitaux, l'enseignement et les services connexes, les organismes de bien-être, les collectivités religieuses et les ménages. Les ménages des particuliers ne sont pas compris dans les estimations pour les régions métropolitaines observées.

(2) Employment in health services excluding hospitals, motion picture and recreational services, services to business management, personal services except domestic service, and miscellaneous services. -- L'emploi dans les services de santé (sauf les hôpitaux), la cinématographie et les services récréatifs, les services extérieurs des entreprises, les services personnels (sauf les services ménagers) et les services divers.

(3) Excludes non-civilian employees. -- Ne comprend pas les militaires.

* The decline in July occurred mainly in community, business and personal services where the drop in non-commercial services was larger than the usual seasonal movement because teachers not being paid during the summer months who were previously included in the estimates, are now excluded.

COVERAGE, DEFINITIONS AND EXPLANATIONS(1)

In January 1969, the estimates were expanded to include all non-agricultural employees. Additions were made for welfare and religious organizations, municipal governments, remaining provincial government employees, fishing and trapping and private household employees.

The estimates are produced by combining data from a variety of sources. The largest single source is the monthly employment and earnings survey of all establishments employing 20 or more persons in any one month of the year. Data from this survey are compiled in extensive industry and area detail and include average hours and earnings figures as well as employment indexes. These data are published separately.(2) Establishments employing fewer than 15 employees are asked to report employment data only and are sampled on a rotational basis. The design of the sample was changed in May 1968, with a resultant increase in the amount of industry and area detail available. The additional detail was included for the first time in the January 1969 estimates, but sampling still limits the estimates to considerably less detail than is available for large firms only. The third main source of data is a complete survey of establishments employing 15-19 persons. These firms are also asked to provide employment data only.

Exclusions from the three sources mentioned above have necessitated supplemental coverage in certain industries. In non-commercial service, separate surveys of employment in hospitals, education and related services and religious and welfare organizations have been established. Data for public administration and defence are collected by other divisions within DBS. Estimates for fishing and trapping and private household service are based on the monthly Labour Force household survey.

The estimates of employees are compiled according to the 1960 Standard Industrial Classification.(3) Estimates for fishing and trapping are too small to be published separately but are included in the Canada total. Durable goods manufacturing covers wood products, furniture and fixtures, primary metal industries, metal fabricating industries, machinery (except electrical), transportation equipment, electrical products and non-metallic mineral products. Non-durable goods manufacturing covers the remaining manufacturing industries. Geographic detail is given for Canada, the provinces, Montreal, Toronto, Winnipeg and Vancouver. Estimates for the Yukon and Northwest Territories are not published separately but are included in the Canada total.

As has been indicated, the estimates are based almost entirely on surveys of establishments. The establishment is defined as the smallest industrial unit which is a separate operating entity capable of reporting all elements of basic industrial statistics. The data in the main refer to the last week in the specified month and include employees who are paid for rendering current services or are on paid absence during that period. Excluded are proprietors, directors and firm members including those who are actively engaged in the operation of the firm, pensioners, own-account workers, unpaid family workers, employees working less than the equivalent of one full day in a week, employees absent without pay and persons providing services to the establishment on a contract basis.

See footnote(s) on page 33.

CHAMP DE L'ENQUÊTE, DÉFINITIONS ET EXPLICATIONS(1)

En janvier 1969, on a étendu la portée des estimations afin d'y inclure tous les employés des établissements non agricoles. Des additions ont été faites de manière à englober les organismes de bien-être et les collectivités religieuses, les administrations municipales, le reste des fonctionnaires provinciaux, les employés des entreprises de la pêche et du piégeage et ceux des ménages.

Pour calculer les estimations on a groupé des données de sources diverses. Les résultats de l'enquête mensuelle sur l'emploi et les gains dans les établissements employant 20 personnes ou plus dans un mois quelconque de l'année constituent la source la plus importante. Ces résultats sont compilés par branche d'activité et par région et comprennent les chiffres de la moyenne des heures et des gains et les indices de l'emploi. Ces données sont publiées séparément(2). Les établissements employant moins de 15 personnes sont priés de ne déclarer que les données relatives à l'emploi et sont soumis à un sondage tournant. La composition de l'échantillon a été modifiée en mai 1968 et il en est résulté une augmentation de la quantité de renseignements disponibles par industrie et par région. Des renseignements complémentaires ont été inclus pour la première fois dans les estimations de janvier 1969, mais l'échantillonnage limite encore plus considérablement la finesse des estimations que pour les grandes entreprises prises séparément. L'enquête détaillée sur les établissements employant 15 à 19 personnes constitue la troisième source, en ordre d'importance des données. Ces établissements sont également priés de ne fournir que les données relatives à l'emploi.

Les trois sources mentionnées plus haut ont nécessité une enquête complémentaire auprès de certaines industries. Des enquêtes distinctes sur l'emploi ont été effectuées auprès des services non-commerciaux, à savoir: les hôpitaux, les services de l'enseignement et services connexes, les collectivités religieuses et les organismes de bien-être. Les données sur l'administration publique et la défense nationale sont recueillies par d'autres divisions du B.F.S. Les estimations sur la pêche et le piégeage et les ménages se fondent sur les résultats de l'enquête mensuelle sur les membres des ménages faisant partie de la main-d'œuvre.

Les estimations des employés sont établies suivant la classification type des industries de 1960(3). Le nombre estimé d'employés de la pêche et du piégeage est trop faible pour être publié séparément, mais il est compris dans le total pour le Canada. La fabrication des biens durables comprend les produits du bois, les meubles et articles d'ameublement, l'industrie métallique primaire, l'industrie des produits métalliques, les machines (sauf le matériel électrique), le matériel de transport, les appareils électriques et les produits minéraux non-métalliques. Les biens non-durables comprennent les industries manufacturières restantes. Des renseignements sur la répartition géographique sont donnés pour le Canada, les provinces, Montréal, Toronto, Winnipeg et Vancouver. Les estimations pour le Yukon et les Territoires du Nord-Ouest ne sont pas publiées séparément mais sont incluses avec les estimations totales pour le Canada.

Comme on vient de le mentionner, les estimations sont établies presque entièrement à partir des enquêtes sur les établissements. L'établissement est la plus petite unité industrielle exploitée comme une entité distincte capable de déclarer tous les éléments de la statistique industrielle de base. Les données ont trait dans l'ensemble à la dernière semaine du mois spécifié et visent les employés rémunérés pour services courants rendus ou en congé payé pendant cette période. Sont exclus les propriétaires, administrateurs et associés d'entreprise (y compris ceux qui s'occupent activement de l'exploitation de l'entreprise), les pensionnés, les travailleurs à leur compte, les aides familiaux non-rémunérés, les employés qui travaillent moins que l'équivalent d'un jour entier par semaine, les employés absents sans payé et les personnes fournissant des services à forfait à l'établissement.

Voir renvoi(s) à la page 33.

The estimates of employees are designed to measure trends in total non-agricultural employment by province and industry.(4) In as much as the small firm sample design does not permit the compilation of extensive geographic and industrial detail, the large firm employment indexes are the only source of current information of this type. The reliability of these as indicators of changes in total employment is directly related to the proportion of large firms in a particular industry and area.

Data for the two most recent months are preliminary and subject to revision for corrections and data received after initial tabulations.

- (2) The DBS reports are Employment and Average Weekly Wages and Salaries, Cat. No. 72-002, and Man-Hours and Hourly Earnings, Cat. No. 72-003.
- (3) Dominion Bureau of Statistics, Standard Industrial Classification Manual, Cat. No. 12-501, Ottawa, Queen's Printer, 1960.
- (4) The coefficients of sampling variability for the estimates are available on request and have been published in the occasional paper referred to in footnote (1).

Les estimations du nombre d'employés visent à mesurer les tendances de l'emploi non agricole total par province et par industrie(4). Vu que le sondage des petits établissements ne permet pas la compilation de données géographiques et industrielles complètes et détaillées, les indices de l'emploi relatifs aux grandes entreprises constituent l'unique source de renseignements courants de cette catégorie. La fiabilité de ces renseignements comme indicateurs de changements dans l'emploi total est directement en fonction de la proportion des grandes entreprises dans une industrie et une région particulières.

Les données pour les deux mois les plus récents sont provisoires et sujettes à révision selon les rectifications et les données qui nous parviendront après la publication des tableaux.
