PREFACE

This report presents financial statistics on education for 1974-75. Data in the historical tables go back to 1950-51.

The total education enterprise, with its six million students, more than 300,000 teachers and other non-teaching staff and a 1974 expenditure of \$11 billion is one of the most important sectors of the Canadian socio-economic life. Expenditures amounted to 7.5% of the Gross National Product (GNP) in 1974-75, indicating a considerable investment in education.

This edition contains financial statistics for all educational levels: elementary and secondary, post-secondary and vocational.

This publication was prepared by Dr. A. Horvath with the assistance of Mrs. D. Proc and Mrs. E. Sattlegger, all of the Projections Section.

Comments concerning the content of this publication or suggestions for changes in content or manner of presentation should be addressed to the Director of the Education, Science and Culture Division, or the Chief of the Projections Section.

PETER G. KIRKHAM,
Chief Statistician of Canada.

PRÉFACE

Ce bulletin présente les statistiques financières de l'enseignement de 1974-75. Les données des tableaux chronologiques remontent à 1950-51.

Le secteur de l'enseignement, qui comprend six millions d'étudiants, un personnel de plus de 300,000 enseignants et non enseignants, et dont les dépenses annuelles pour 1974 se chiffrent à \$11 milliards, constitue l'un des plus importants secteurs de l'activité socio-économique canadienne. Ces dépenses représentaient 7.5 % du Produit national brut (P.N.B.) en 1974-75, ce qui indique l'importance des investissements dans ce domaine.

La présente édition contient des statistiques financières portant sur tous les niveaux de l'enseignement: primaire et secondaire, postsecondaire et professionnel.

Cette publication a été préparée par M. A. Horvath en collaboration avec Mmes D. Proc et E. Sattlegger, tous les trois membres de la Section des projections.

Pour tout commentaire ou suggestion au sujet du contenu ou de la présentation, on voudra bien s'adresser au directeur de la Division de l'éducation, des sciences et de la culture, ou au chef de la Section des projections.

Le statisticien en chef du Canada,
PETER G. KIRKHAM.

SYMBOLS

The following standard symbols are used in Statistics Canada publications:

- .. figures not available.
- ... figures not appropriate or not applicable.
- nil or zero.
- amount too small to be expressed.
- p preliminary figures.
- r revised figures.
- x confidential to meet secrecy requirements of the Statistics Act.

SIGNES CONVENTIONNELS

Les signes conventionnels suivants sont employés uniformément dans les publications de Statistique Canada:

- .. nombres indisponibles.
- ... n'ayant pas lieu de figurer.
- néant ou zéro.
- nombres infimes.
- p nombres provisoires.
- r nombres rectifiés.
- x confidentiel en vertu des dispositions de la Loi sur la statistique relatives au secret.

INTRODUCTION

This survey gives financial statistics on Canadian education for 1974-75. Historical tables presenting only aggregate figures for Canada and the provinces from 1950-51 are also included. Detailed historical data were published in *Decade of Education Finance, 1960-1969* (Catalogue 81-560). Information for 1969-70 was revised and shown with that of 1970-71 in *Financial Statistics of Education, 1969 and 1970* (Catalogue 81-208); the next edition of the latter presented data from 1971-72 to 1973-74.

For the years after 1974-75, projected financial information by province is available in *Advance Statistics of Education* (Catalogue 81-220) (Tables 12 to 14).

All tables show provincial breakdowns. Since a meaningful cross-tabulation by educational level is not possible in a single section, detailed breakdowns for each level, as well as definitions, are presented later in the appropriate sections. Here, overall expenditures on education are analyzed in relation to a number of socio-economic indicators for Canada and the provinces.

Most tables in this and later chapters show expenditures in two forms: (a) by level or type of education and by function, and (b) by source of funds. Generally, expenditures and sources of funds are equal, although it is seldom possible to exactly match receipts with disbursements. Therefore, some adjustments had to be made when showing expenditures, by source of funds. If all revenue was not spent in one year, only the amount actually spent is shown and the surplus is included as a negative item in "other sources". If expenditures exceeded revenue, it was presumed that the deficit was made up from "other sources", so this item may include money obtained by assuming liabilities, or by transfers from reserves.

Table 1 shows that of the total 1974-75 expenditures, 65.1% was spent on elementary and secondary education, 28.6% on post-secondary education (7.2% non-university, 21.4% university) and the remaining 6.3% on vocational (trades) training. Although

Cette publication présente des statistiques financières sur l'enseignement au Canada pour 1974-75. Nous y avons fait figurer également des tableaux chronologiques, qui ne comportent que des données globales sur le Canada et les provinces à partir de 1950-51. Les données chronologiques détaillées ont été publiées dans le bulletin intitulé: *Une décennie des finances de l'éducation, 1960-1969* (n° 81-560 au catalogue). Les données de 1969-70 ont été révisées et présentées avec celles de 1970-71 dans le bulletin intitulé: *Statistiques financières de l'éducation, 1969 et 1970* (n° 81-208 au catalogue); l'édition suivante de cette dernière publication présentait les données de 1971-72 à 1973-74.

Pour les années postérieures à 1974-75, on trouvera les estimations financières projetées par province dans *Statistique de l'enseignement - Estimations* (n° 81-220 au catalogue) (tableau 12 à 14).

Tous les tableaux donnent des ventilations à l'échelon provincial. Comme il est impossible de présenter en une seule section un tableau significatif de données recoupées pour chaque niveau d'enseignement, des ventilations détaillées pour chaque niveau ainsi que des définitions seront présentées plus loin dans les sections pertinentes. Les dépenses globales au titre de l'enseignement sont analysées ici en fonction d'un certain nombre d'indicateurs socio-économiques, pour l'ensemble du Canada et pour les provinces.

Dans ce chapitre et dans les chapitres suivants, la plupart des tableaux indiquent les dépenses des deux manières suivantes: a) selon le niveau ou le type d'enseignement et selon la fonction, et b) selon la provenance des fonds. En général, les dépenses et les fonds obtenus s'équivalent, bien qu'il soit rarement possible d'établir une correspondance exacte entre les recettes et les versements. Il a donc fallu faire certaines rectifications pour présenter les dépenses, selon la provenance des fonds. Si toutes les recettes n'ont pas été employées au cours d'une année, seul le montant effectivement dépensé figure et l'excédent est classé comme poste négatif dans "autres provenances". Si les dépenses dépassaient les recettes, on suppose alors que le déficit a été comblé au moyen des "autres provenances"; ainsi, ce poste peut comprendre des fonds obtenus en contractant des dettes ou par des transferts à partir des réserves.

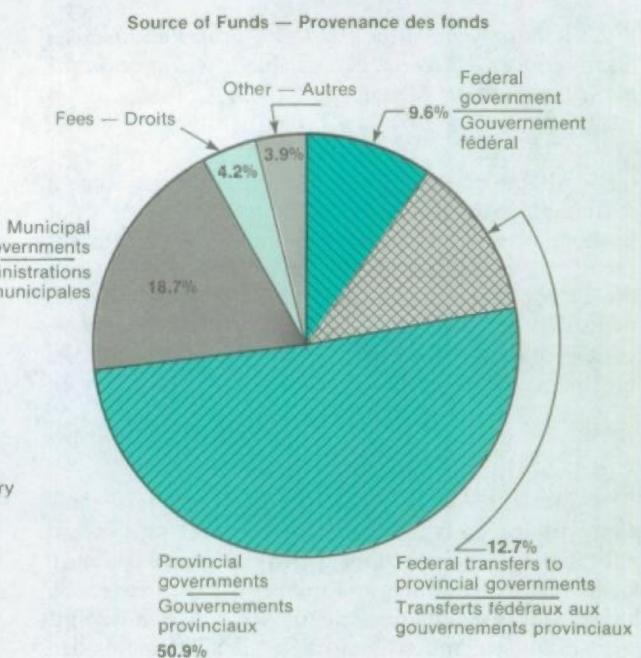

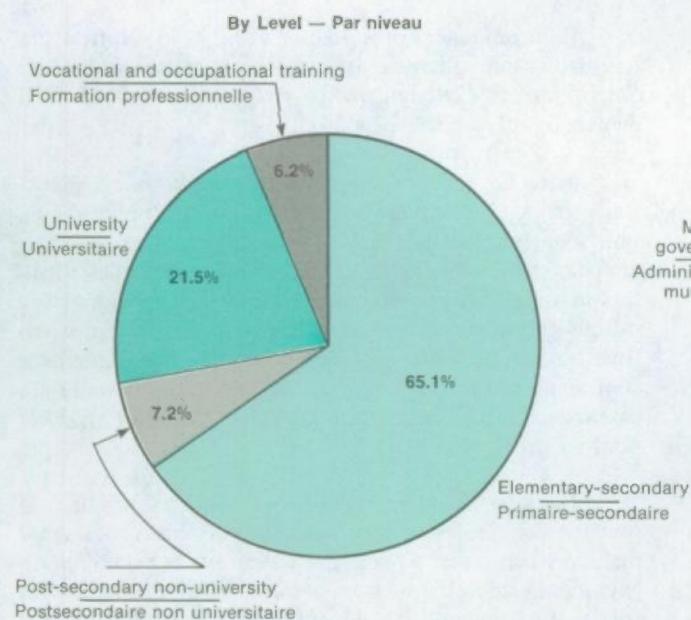

Le tableau 1 montre que 65.1 % des dépenses globales au titre de l'enseignement en 1974-75 ont été consacrées à l'enseignement primaire-secondaire, 28.6 % à l'enseignement postsecondaire (7.2 % non universitaire, 21.4 % universitaire) et les 6.3 % restants à la formation

elementary and secondary education still accounts for close to two thirds of all expenditures, the post-secondary level is growing. Provincially, the proportion of expenditures at the elementary and secondary level ranges from 60% to 68%, except for the Yukon and the Northwest Territories where this level takes more than 79%.

Chart — 1

Expenditures on Education, by Level and by Source of Funds, for Canada, 1974-75

Dépenses au titre de l'enseignement, selon le niveau et la provenance des fonds, Canada, 1974-75

The relationship of education expenditures to several socio-economic indicators is presented historically in Table 7. In 1974, spending on education amounted to 7.5% of the Gross National Product (GNP) and 9.4% of total personal income. These percentages were apt to decrease slightly after 1970 as the declining birth rate reduced enrolment. In the Atlantic Provinces these percentages averaged 11.5%, in Quebec 11.3%, in Ontario 8.6% and in the Western Provinces 8.7%. The relatively low percentages in the West are attributable partly to higher Gross Provincial Product (GPP) per capita (\$6,783 in the West versus \$4,295 in the Atlantic Provinces) and partly to a higher labour force participation rate in the West than in the East (43.1% versus 36.5%).

"Expenditure per capita of population" is a measure of the burden of education expenditures on each citizen. But "expenditure per capita of labour force" is a more appropriate indicator, as labour force

professionnelle (métiers). Bien que l'enseignement primaire et secondaire figure encore pour près des deux tiers de l'ensemble des dépenses, le niveau postsecondaire prend de plus en plus d'importance. Au niveau provincial, la proportion des dépenses au niveau primaire et secondaire varie entre 60 % et 68 %, sauf au Yukon et dans les Territoires du Nord-Ouest où elle dépasse 79 %.

Graphique — 1

Expenditures on Education, by Level and by Source of Funds, for Canada, 1974-75

Dépenses au titre de l'enseignement, selon le niveau et la provenance des fonds, Canada, 1974-75

Le rapport entre les dépenses au titre de l'enseignement et plusieurs facteurs socio-économiques est indiqué de façon chronologique au tableau 7. En 1974, les dépenses consacrées à l'enseignement représentaient 7.5 % du Produit national brut (P.N.B.) et 9.4 % du revenu personnel global. On s'attendait à une baisse légère après 1970 en raison de la diminution de la natalité, qui a pour effet de réduire les effectifs. Dans les provinces de l'Atlantique, les pourcentages s'établissent en moyenne à 11.5 %, au Québec à 11.3 %, en Ontario à 8.6 % et dans les provinces de l'Ouest à 8.7 %. Le pourcentage relativement faible de l'Ouest s'explique d'une part par le niveau plus élevé du Produit provincial brut (P.P.B.) par habitant (\$6,783 contre \$4,295 dans les provinces de l'Atlantique) et d'autre part par le niveau plus élevé du taux d'activité de la population (43.1 % contre 36.5 % dans l'Est).

Le montant des "dépenses par habitant" constitue une mesure de la contribution de chaque citoyen aux dépenses de l'enseignement. Toutefois, les "dépenses par personne active" constituent un meilleur indicateur, étant

participants bear the cost of living and so, education expenditures as well. As shown in Table 1, the average cost per capita of labour force was \$1,144 in Canada, but the variation from East to West was similar to education expenditures related to GPP. The cost of education per capita of labour force was \$1,188 in the Atlantic Provinces, \$1,228 in Quebec, \$1,088 in Ontario and \$1,066 in the West.

As shown in Table 2, about 92% of education expenditures are financed by the three levels of government. Provincial and municipal contributions made up about 82% of the total, while the federal contribution amounted to about 10% in all three years.

But the federal contributions shown on lines 5 and 28 do not reflect federal transfers to the provinces for post-secondary education or for minority language programs. Adjustments taking account of these transfers are presented by province in the footnote to Table 2: the revised federal contribution rose to about 22% while the provincial share fell to 51%. More details on these programs will be given in the appropriate sections on pages 22, 23 and 24.

Fees and other income, each accounting for about 4% of total spending on education, are relatively insignificant, since a great proportion of Canadian education is public. No fees are charged for such education at the elementary and secondary levels in public schools except for evening and correspondence courses. Income from fees covers tuition and other fees, whenever they are identifiable. Other income includes miscellaneous revenue from services, rental, ancillary enterprises, sale of assets, donations, etc.

Tables 4, 5 and 6 present a comprehensive picture of federal, provincial and municipal government expenditures on all levels of education, by function.

Tables 9 and 10 display historical data of expenditures on education by level and by source of funds. No attempt has been made to convert figures in current dollar to constant dollar since the price indexes were not made for education purposes. Instead, Chart 2 gives an extensive analysis of indexes of expenditures on education, total and per capita of population and per pupil and GNP, total and per capita. The table following it shows these data in absolute figures, the

donné que ce sont les personnes actives qui supportent le coût de la vie et, par le fait même, les dépenses de l'enseignement. Comme il est indiqué au tableau 1, le coût moyen par personne active est de \$1,144 pour l'ensemble du Canada, mais l'écart observé entre l'Est et l'Ouest est semblable à l'écart entre les dépenses au titre de l'enseignement et le P.P.B. Le coût de l'enseignement par personne active est de \$1,188 dans les provinces de l'Atlantique, \$1,228 au Québec, \$1,088 en Ontario et \$1,066 dans l'Ouest.

Comme l'indique le tableau 2, environ 92 % des dépenses de l'enseignement sont financées par les trois paliers de gouvernement. Les contributions provinciales et municipales s'élèvent à environ 82 % du total et la contribution fédérale à environ 10 % pour les trois années.

Toutefois, les contributions fédérales indiquées aux lignes 5 et 28 ne tiennent pas compte des transferts du gouvernement fédéral aux provinces au titre de l'enseignement postsecondaire ou des programmes de la langue minoritaire. Les rectifications pour tenir compte de ces transferts sont présentées par province dans la note au bas du tableau 2: le montant rectifié de la contribution fédérale est monté à environ 22 %, alors que la part provinciale est tombée à environ 51 %. On trouvera plus de détails concernant ces programmes dans les sections pertinentes aux pages 22, 23 et 24.

Les droits et autres recettes, qui représentent chacun environ 4 % des dépenses totales de l'enseignement, sont d'une importance relativement négligeable du fait qu'une grande partie de l'enseignement au Canada est publique. L'enseignement public au primaire et au secondaire est gratuit, sauf dans le cas des cours du soir et des cours par correspondance. Le revenu provenant des droits comprend les frais de scolarité et autres droits, lorsqu'il est possible de les identifier. Les autres revenus comprennent des recettes diverses provenant des services, de la location, des entreprises auxiliaires, de la vente d'actifs, des dons, etc.

Les tableaux 4, 5 et 6 présentent une ventilation complète des dépenses des administrations fédérale, provinciales et municipales pour tous les niveaux d'enseignement, selon la fonction.

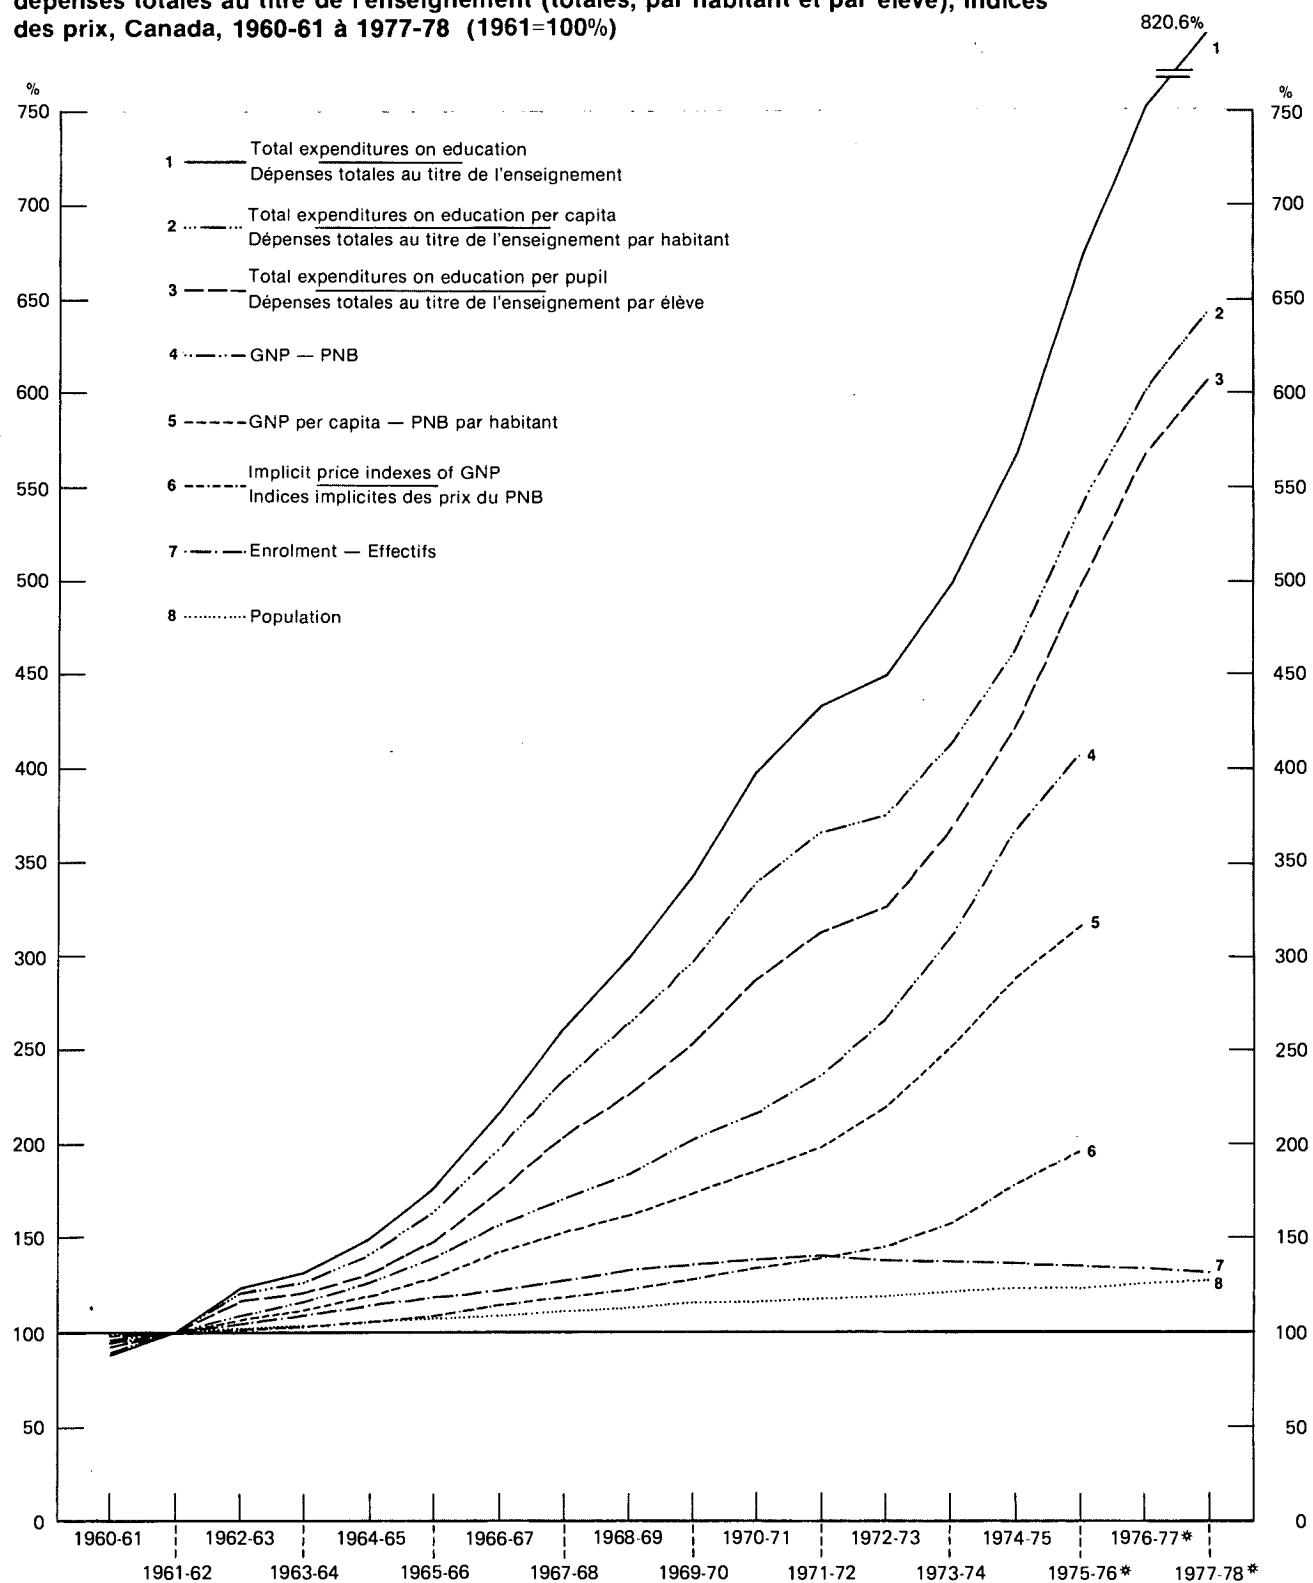

Les tableaux 9 et 10 présentent des statistiques chronologiques des dépenses au titre de l'enseignement selon le niveau et la provenance des fonds. On n'a pas tenté de convertir les chiffres exprimés en dollars courants en chiffres exprimés en dollars constants, puisque les indices des prix n'ont pas été établis aux fins de la statistique de l'enseignement. On a plutôt établi un graphique (graphique 2) qui présente une analyse générale des indices des dépenses au titre de l'enseignement (montant

Chart — 2

¹ Excludes vocational training. — Exclut la formation professionnelle.

² Estimate. — Estimation.

³ Projection.

Consumer Price Indexes and Implicit Price Indexes (the latter indexes are calculated on a more complete basis comprising all elements of the GNP). If the 1961 figures are considered to represent 100%, by 1974 the GNP per capita of population increased to 296.4%, the cost of education per capita to 464.2% and cost per pupil to 435.6%. Meanwhile the Implicit Price Index rose to 181.1%. In other words, the cost per pupil increased at about twice the rate of the price indexes.

Tables 8 and 11 reflect the magnitude of all governmental spending on education, which took up 21.0% of the budgets of the three levels in 1971. As such, education was the most costly single function of governments, although it decreased to 17.1% by 1974. Education is being overtaken by welfare as the primary area of government social concern.

Financial data consolidated in this publication are reported by institution and government source for a variety of financial periods — calendar year, academic year, fiscal year.

The detailed statistical information in this publication should be used with caution, because of the variety of sources and different forms of presentation in the public accounts and reports. For example, in some cases the departmental overhead of post-secondary education was not identifiable and separable from other levels of education and had to be estimated.

Enrolment data in this publication correspond to the financial coverage and do not necessarily agree with other publications.

International Comparison

An international comparison of data on education finance is presented for 21 countries (including Canada) for 1965, 1971 and 1972.

A lack of comparable information limits the details that can be shown. Only public expenditures could be compared; private sources of funds for education in foreign countries are not known.

total et montant par habitant et par élève), ainsi que du P.N.B. (montant total et par habitant). Le tableau qui les suit indique ces données en chiffres absolus, les Indices des prix à la consommation et les Indices implicites des prix. Ces derniers sont calculés sur une base plus complète, qui comprend tous les éléments du P.N.B. Si l'on considère que les chiffres de 1961 représentent 100 %, en 1974 le P.N.B. par habitant a grimpé à 296.4 %, le coût de l'enseignement par habitant à 464.2 % et le coût par élève à 435.6 %. Durant la même période, l'Indice implicite des prix est monté à 181.1 %. En d'autres mots, le coût par élève a augmenté deux fois plus rapidement environ que les indices des prix.

Les tableaux 8 et 11 reflètent l'ampleur des dépenses que l'ensemble des administrations publiques consacre à l'enseignement: 21.0 % des budgets des trois paliers d'administration en 1971. L'enseignement constitue donc le plus important poste des dépenses des administrations publiques; la proportion devait cependant tomber, en 1974, à 17.1 %. L'enseignement est en voie d'être supplanté par le bien-être à la section des préoccupations sociales des administrations publiques.

Les données financières réunies dans cette publication ont été fournies par les établissements et par les administrations publiques et portent sur diverses périodes financières — année civile, année scolaire, année financière.

Il faut utiliser avec prudence les renseignements statistiques détaillés qui figurent ici, en raison de la diversité des provenances et des différences dans les formes de présentation des comptes publics et des rapports. Par exemple, les frais généraux pris en charge par le ministère de l'Éducation au titre de l'enseignement postsecondaire n'ont pas pu être identifiés et isolés de ceux des autres niveaux d'enseignement et il a donc fallu faire une estimation.

Les données sur les effectifs contenus dans cette publication correspondent au champ d'observation sur le plan financier et ne sont pas nécessairement identiques à celles qui figurent dans d'autres publications.

Comparaison internationale

On a présenté une comparaison internationale pour 21 pays (y compris le Canada) pour 1965, 1971 et 1972.

Certains détails ne peuvent cependant pas être indiqués faute de renseignements comparables. Seules les dépenses publiques ont pu être comparées; dans les pays étrangers, la provenance des fonds consacrés à l'enseignement, lorsqu'il s'agit de sources privées, n'est pas connue.

The accuracy and uniformity of the information about some selected foreign countries depend on the reliability of reports summarized in the UNESCO *Statistical Yearbook* and the UN *Statistical Yearbook*.

Despite the weakness of these statistics, this table deserves attention. This analysis shows that, in regard to school attendance and public spending per pupil, Canada is one of the leading countries of the world, with an enrolment of about 29% of the population, a far higher cost per pupil than that of other developed countries and greater public expenditures on education per capita.

Data on some countries are slightly different from those in the former edition due to revised information obtained from source publications. In this publication, all exchange rates were obtained from the UN *Statistical Yearbook*.

L'exactitude et l'uniformité des renseignements concernant certains pays étrangers dépendent de la fiabilité des rapports résumés dans l'*Annuaire statistique* de l'UNESCO et dans l'*Annuaire statistique* des Nations Unies.

En dépit des limites de ces données statistiques, le tableau présente un intérêt. On peut constater en effet que, pour ce qui concerne la fréquentation scolaire et les dépenses publiques par élève, le Canada est l'un des premiers pays au monde: ses effectifs scolaires représentent environ 29 % de sa population, le coût par élève est considérablement plus élevé que dans tout autre pays industrialisé et les dépenses publiques par habitant au titre de l'enseignement sont également plus importantes.

Les données relatives à certains pays sont légèrement différentes de celles de l'édition précédente en raison de renseignements revisés obtenus des publications de référence. Dans cette publication, tous les taux de change ont été extraits de l'*Annuaire statistique* des Nations Unies.

INTRODUCTION

Spending on elementary and secondary education shown in Table 12 covers:

- (a) public schools, consisting of expenditures for school boards, for services provided by provincial departments of education and for schools maintained by the Department of National Defence (whose enrolment is included with that of public school boards);
- (b) federal schools for Indians and Eskimos;
- (c) special education consisting of spending on schools for the handicapped, government correspondence courses, provincial reform schools and academic training in federal penitentiaries;
- (d) administration costs of provincial departments of education; and
- (e) private academic schools.

The elementary and secondary levels received about 65% of all education expenditures. In absolute figures, this was \$7,191 million in 1974-75 (\$6,313 million in 1973-74), representing 4.9% of the GNP (5.1% in 1973-74).

These expenditures were allocated in the following manner:

Les dépenses au titre de l'enseignement primaire et secondaire qui figurent au tableau 12 concernent:

- a) les écoles publiques, c'est-à-dire les dépenses pour les conseils scolaires, pour les services fournis par les ministères provinciaux de l'Éducation et pour les écoles administrées par le ministère de la Défense nationale (dont les effectifs sont compris avec ceux des conseils scolaires publics);
- b) les écoles fédérales pour les Indiens et les Esquimaux;
- c) l'enseignement spécial, c'est-à-dire les dépenses à l'égard des écoles pour les handicapés, les cours par correspondance du gouvernement, les écoles provinciales de rééducation et la formation scolaire dans les pénitenciers fédéraux;
- d) les frais d'administration des ministères provinciaux de l'Éducation; et
- e) les écoles de formation générale.

Environ 65 % de toutes les dépenses au titre de l'enseignement ont été effectuées au niveau primaire-secondaire. En chiffres absolus, elles s'établissent à \$7,191 millions en 1974-75 (\$6,313 millions en 1973-74), soit 4.9 % (5.1 % en 1973-74).

Voici la répartition de ces dépenses:

| | 1973 - 74 | 1974 - 75 |
|---|--------------|--------------|
| | % | |
| School boards – Conseils scolaires | 84.6 | 83.5 |
| Other departmental expenditures on public schools – Autres dépenses des ministères pour les écoles publiques. | 8.3 | 9.1 |
| Total | 92.9 | 92.6 |
| Federal schools for Indians and Eskimos – Écoles fédérales pour les Indiens et les Esquimaux | 2.1 | 2.2 |
| Special education – Enseignement spécial | 0.7 | 0.7 |
| Administration | 1.1 | 1.0 |
| Private schools – Écoles privées. | 3.2 | 3.5 |
| Total | 100.0 | 100.0 |

Table 13 presents expenditures on elementary-secondary education by source of funds. These statistics came from:

- (a) public school boards (lines 1 to 9);
- (b) private elementary and secondary schools (lines 11 to 16);
- (c) provincial governments (lines 17 to 21);
- (d) federal government (total line 22).

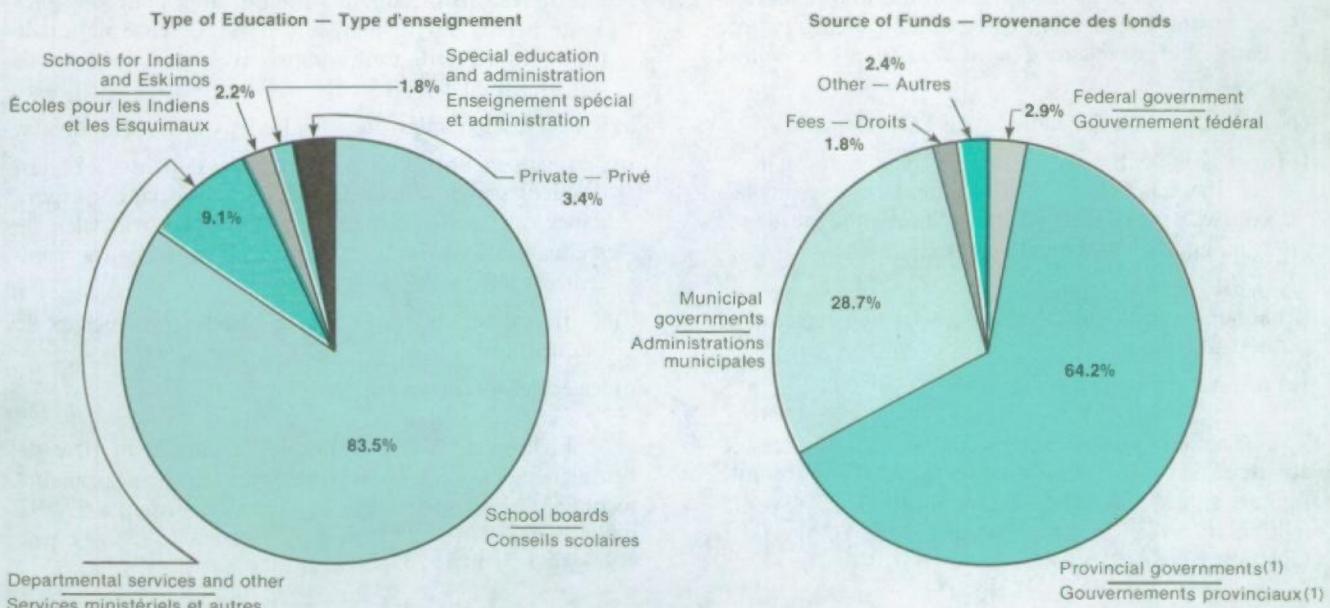

Le tableau 13 donne les dépenses au titre de l'enseignement primaire-secondaire selon la provenance des fonds. Ces données statistiques proviennent de:

- a) conseil scolaires publics (lignes 1 à 9);
- b) écoles primaires et secondaires (lignes 11 à 16);
- c) gouvernements provinciaux (lignes 17 à 21);
- d) gouvernement fédéral (total ligne 22).

Chart — 6

**Expenditures on Elementary-Secondary Education by Type of Education
and by Source of Funds, for Canada, 1974-75**

Dépenses au titre de l'enseignement primaire-secondaire selon le type d'enseignement et la provenance des fonds, Canada, 1974-75

(1) Includes federal transfer payments of \$75,261,000 for the minority language programme. — Comprend des transferts fédéraux de \$75,261,000 au titre du programme de la langue minoritaire.

Federal grants received by school boards and private schools (lines 1 and 11), as well as federal reimbursements to the provincial governments (line 17) are included in total federal spending (line 22); likewise provincial grants received by school boards and private schools (lines 2 and 12) are included in total provincial expenditures (line 21); these duplications are eliminated on lines 23 and 24. Total federal and provincial spending covers the costs of special federal and provincial schools, as well as other direct expenditures and departmental administration.

Les subventions fédérales accordées aux conseils scolaires et aux écoles privées (lignes 1 et 11) ainsi que les remboursements du gouvernement fédéral aux provinces (ligne 17) sont pris en compte dans les dépenses totales du gouvernement fédéral (ligne 22); de même, les subventions provinciales accordées aux conseils scolaires et aux écoles privées (lignes 2 et 12) sont comprises dans les dépenses totales des gouvernements provinciaux (ligne 21); ces doubles comptes ont été éliminés aux lignes 23 et 24. Les dépenses totales des gouvernements fédéral et provinciaux englobent les coûts des écoles spéciales du gouvernement fédéral et des provinces, de même que d'autres dépenses directes et frais d'administration des ministères.

The Federal Role in Financing Elementary and Secondary Education

Data about federal financing of elementary-secondary education have been assembled from reports prepared by numerous departments and agencies. Table 4 gives details of federal activities in education.

The Department of National Defence (DND) maintains schools for dependants of service personnel in nine provinces and several European countries.

Rôle du gouvernement fédéral dans le financement de l'enseignement primaire et secondaire

Les données sur le financement de l'enseignement primaire - secondaire par le gouvernement fédéral ont été réunies à partir de relevés établis par un grand nombre de ministères et organismes. Le tableau 4 donne des renseignements détaillés sur l'activité fédérale dans le domaine de l'enseignement.

Le ministère de la Défense nationale (M.D.N.) assure le fonctionnement des écoles destinées aux personnes à la charge des militaires dans neuf provinces et dans plusieurs pays européens.

* Estimate — Estimation

The Department of Indian and Northern Affairs, which is responsible for the education of Indians and Eskimos, operates day and residential schools in many areas.

If there is no federal school in the region and armed services' dependants or native students attend public schools, the provinces are reimbursed by the federal government on a per-pupil basis. Conversely, provinces pay the federal government for the education of non-native or non-military dependant children who use federal facilities where there is no public school. Construction costs of new public schools are often shared by the federal and provincial governments according to the proportion of each category of pupil expected to attend.

Through the National Film Board (NFB) and the Canadian Broadcasting Corporation (CBC), the federal government supports the audio-visual field. The item "films, filmstrips and school broadcasts" consists of production costs of NFB films and filmstrips made for use in schools and the cost of school broadcasts.

Several other federal government departments make financial contributions to education. The Canadian International Development Agency (CIDA), which is part of the Department of External Affairs, spent \$10 to \$12 million each year on education in developing countries. The Department of Regional Economic Expansion spends considerable amounts on school facilities; the Department of Health and Welfare contributed a small sum to the cost of school health services and, in addition, there are several other minor items of federal expenditure.

Minority Language Program

Under the "Federal-Provincial Program of Co-operation for the Development of Bilingualism in Education", the federal and provincial governments seek to ensure that insofar as it is feasible, Canadians have the opportunity to educate their children in the official language of their choice.

The arrangements are designed to make federal support of these objectives possible without infringing on provincial jurisdiction over education. Funds help pay supplementary costs of providing minority language education or second-language instruction.

Federal funds transferred to provincial governments for the minority language program (\$75,261,000 in 1974-75) are not included in lines 22 or 32 of Table

Le ministère des Affaires indiennes et du Nord, qui est chargé de l'enseignement des Indiens et des Esquimaux, administre des externats et des internats dans diverses régions.

S'il n'y a pas d'école fédérale dans la région et que les personnes à la charge des militaires ou les élèves autochtones fréquentent les écoles publiques, les provinces sont remboursées par le gouvernement fédéral sur une base individuelle. Inversement, les provinces paient le gouvernement fédéral pour l'enseignement dispensé à des enfants non autochtones ou non à la charge de militaires qui utilisent les services du gouvernement fédéral là où il n'y a pas d'école publique. Les coûts de construction de nouvelles écoles publiques sont souvent partagés par le gouvernement fédéral et par la province intéressée, selon la proportion de chaque catégorie d'élève prévue.

Les productions audiovisuelles de l'Office national du film (O.N.F.) et de la Société Radio-Canada constituent une autre forme d'aide du gouvernement fédéral. Le poste "films, films fixes et émissions radiophoniques scolaires" comprend les coûts de production des films et des films fixes de l'O.N.F. destinés à l'utilisation dans les écoles, ainsi que le coût des émissions radiophoniques scolaires.

Plusieurs autres ministères fédéraux contribuent financièrement à l'enseignement. L'Agence canadienne de développement international (A.C.D.I.), qui relève du ministère des Affaires extérieures, dépense chaque année entre \$10 à \$12 millions pour l'enseignement dans les pays en voie de développement. Le ministère de l'Expansion économique régionale consacre des sommes considérables à l'équipement scolaire; le ministère de la Santé et du Bien-être social dépense un petit montant pour les services sanitaires dans les écoles et en outre plusieurs autres postes moins importants de dépenses fédérales.

Programme de la langue minoritaire

Dans le cadre du programme fédéral-provincial de collaboration pour la promotion du bilinguisme dans l'enseignement, les gouvernements fédéral et provinciaux s'efforcent dans la mesure du possible d'offrir aux Canadiens la possibilité de faire instruire leurs enfants dans la langue officielle de leur choix.

Les arrangements permettent au gouvernement fédéral d'aider à la réalisation de ces objectifs sans empiéter sur les prérogatives provinciales en matière d'enseignement. Les fonds aident à payer les coûts supplémentaires de l'enseignement de la langue minoritaire ou dans la langue seconde.

Les fonds fédéraux transférés aux provinces dans le cadre du programme de la langue minoritaire (\$75,261,000 en 1974-75) ne sont pas pris en compte aux lignes 22 ou

13, but are shown only in the footnote to this table. Therefore, federal expenditures are understated, as is the percentage of federal contributions to total elementary and secondary costs.

The adjusted federal contribution is \$286,610,000 or 4.0% of total expenditure for this level.

In this program, French is considered the second language outside Quebec and English within Quebec. The federal government reimburses the provincial governments on a cost-per-pupil basis. This cost includes school board expenditures and departmental disbursements for services to school boards (supervision, inspection, curriculum, guidance, textbooks, audio-visual education, contribution to teachers' pension funds, etc.). Cost per pupil is calculated separately for the elementary and the secondary levels. Under this arrangement, the federal government transfers to the provincial governments:

- (a) Five per cent of the cost per pupil for full-time "equivalent" pupils who are taught less than 75% of the teaching time in the second language at the elementary level and less than 60% of the teaching time at the secondary level.
- (b) Nine per cent of the cost per pupil for the full-time "equivalent" pupils who are taught in the second language more than 75% and 60% of the time, respectively.
- (c) There is an additional contribution for administrative costs incurred by the provinces in providing the possibility of training all members of the minority language group in the second language. This contribution is calculated as 1.5% of the elementary and secondary cost per pupil for the total minority population aged 5 to 11 and 12 to 17 respectively.

The Provincial Role in Financing Elementary and Secondary Education

Under the provisions of the British North America Act, 1867, the provinces have primary responsibility for education. Therefore, provincial expenditures on public elementary and secondary education exceed those of other levels of government. More detailed information about provincial spending is contained in Table 5, Section I.

Provincial participation differs from one province to another because provincial and municipal responsibility for education, set by provincial authorities, is not

32 du tableau 13, mais figurent dans la note au bas de ce tableau. Par conséquent, les dépenses fédérales sont sous-estimées, tout comme le pourcentage de la contribution fédérale au coût total de l'enseignement primaire et secondaire.

La contribution fédérale rectifiée s'élève à \$286,610,000 ou 4.0 % des dépenses totales à ce niveau.

Dans le cadre de ce programme, le français est considéré comme la langue seconde en dehors du Québec et l'anglais à l'intérieur du Québec. Le gouvernement fédéral rembourse les provinces au prorata de la population étudiante. Le montant comprend les dépenses des conseils scolaires et les dépenses des ministères pour les services offerts aux conseils scolaires (surveillance, inspection, programmé d'études, orientation, manuels, enseignement audiovisuel, cotisations aux fonds de pensions des enseignants, etc.). Le coût par élève est calculé séparément pour le primaire et pour le secondaire. Aux termes de ces dispositions, le gouvernement fédéral transfère aux provinces:

- a) Cinq pour cent du coût par élève pour les élèves en "équivalent" à plein-temps qui reçoivent moins de 75 % de leur enseignement dans la langue seconde au niveau primaire, et moins de 60 % au niveau secondaire.
- b) Neuf pour cent du coût par élève pour les élèves en "équivalent" à plein-temps qui reçoivent respectivement plus de 75 % et plus de 60 % de leur enseignement dans la langue seconde.
- c) Il existe une contribution supplémentaire pour les frais d'administration engagés par les provinces afin d'offrir à tous les membres du groupe de la langue minoritaire la possibilité de recevoir un enseignement dans la langue seconde. Ce montant est calculé à raison de 1.5 % du coût par élève au primaire et au secondaire pour l'ensemble de la population de langue minoritaire âgée de 5 à 11 ans et de 12 à 17 ans respectivement.

Rôle du gouvernement provincial dans le financement de l'enseignement primaire et secondaire

Aux termes de l'Acte de l'Amérique du Nord britannique de 1867, l'enseignement relève essentiellement des provinces. Par conséquent, les dépenses provinciales au titre de l'enseignement public primaire et secondaire dépassent celles des autres paliers de gouvernement. Le tableau 5 de la section I contient des renseignements plus détaillés au sujet des dépenses provinciales.

La participation provinciale diffère d'une province à l'autre, car la répartition des responsabilités en matière d'enseignement entre les autorités municipales et les

uniform. In New Brunswick, the provincial government took full control of public elementary and secondary education. There, school taxes on property owners are provincial income, not municipal revenue. Financial arrangements in Prince Edward Island and Newfoundland are similar.

Table 13 shows that the provincial (and territorial) share of expenditures on elementary and secondary education was 64.2% in 1974-75 (60.9% in 1973-74). In absolute figures, this was \$4.6 billion (\$3.8 billion in 1973-74). Of these amounts, provincial grants to public school boards accounted for \$4.0 billion (\$3.4 billion in 1973-74). The balance consisted mainly of expenditures by departments of education for services to school boards, administration and special education.

Services provided to public school boards by the various provincial departments of education are not the same across the country. They may include: inspection, supervision, curriculum, guidance, textbooks, audio-visual material, registrars' offices, teachers' examinations, teachers' superannuation, direct capital expenditures and other expenditures paid directly by provincial governments. Other departmental expendi-

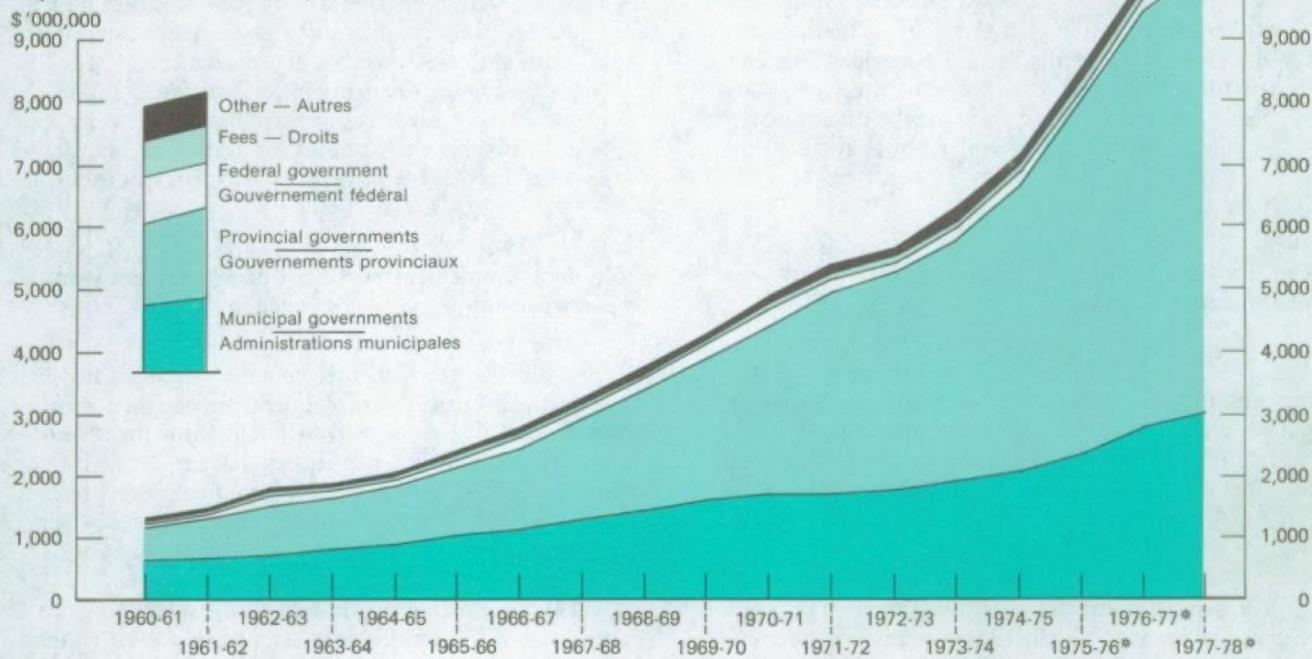

autorités provinciales, établie par la province, n'est pas uniforme. Au Nouveau-Brunswick, le gouvernement provincial assume l'entièr responsabilité de l'enseignement public primaire et secondaire. Dans cette province, les impôts fonciers constituent une forme de revenu provincial, non pas municipal. L'Île-du-Prince-Édouard et Terre-Neuve ont un système analogue.

Le tableau 13 montre que la part provinciale (et territoriale) des dépenses au titre de l'enseignement primaire et secondaire est 64.2 % en 1974-75 (60.9 % en 1973-74). Le montant correspondant en chiffres absolus est: \$4.6 milliards (\$3.8 milliards en 1973-74). De cette somme, les subventions aux conseils scolaires publics figurent pour \$4.0 milliards (\$3.4 milliards en 1973-74). Le reste représente surtout des dépenses des ministères de l'Éducation au titre des services fournis aux conseils scolaires, de l'administration et de l'enseignement spécial.

Les services fournis aux conseils scolaires publics par les divers ministères provinciaux de l'Éducation ne sont pas les mêmes dans tout le Canada. Ils peuvent comprendre: inspection, surveillance, programme d'études, orientation, manuels, matériel audiovisuel, services de secrétariat général, examens pour les enseignants, régime de retraite des enseignants, dépenses directes en immobilisations et autres dépenses assumées directement par les

Graphique — 8

tures include differences between grants given by provincial governments and received by public school boards. In addition, there are expenditures for schools for the handicapped, provincial correspondence reform schools and departmental administration.

As these tables reveal, the provinces also make grants to private schools. Such grants were particularly significant in Quebec, amounting to \$56 million in 1974-75.

Most data on provincial and territorial expenditures were taken from public accounts. Figures for reform schools came from a special survey.

The Municipal Role in Financing Elementary and Secondary Education

As demonstrated in Tables 6 and 13, the municipal share of the cost of elementary and secondary education was almost 28.7% in 1974-75 (30.5% in 1973-74). This contribution — apart from one school for the handicapped in Nova Scotia — is restricted to public schools.

autorités provinciales. Les autres dépenses des ministères comprennent les différences entre les subventions accordées par les gouvernements provinciaux et celles reçues par les conseils scolaires publics. De plus, on enregistre des dépenses à l'égard des écoles pour les handicapés, des cours provinciaux par correspondance, des écoles de rééducation et de l'administration des ministères.

Comme le montre ces tableaux, les provinces accordent également des subventions aux écoles privées. Ces subventions sont particulièrement importantes au Québec où elles se chiffrent à \$56 millions en 1974-75.

Les données sur les dépenses provinciales et territoriales ont été extraites pour la plupart des comptes publics. Les chiffres concernant les écoles de rééducation proviennent d'une enquête spéciale.

Rôle de l'administration municipale dans le financement de l'enseignement primaire et secondaire

Comme l'indiquent les tableaux 6 et 13, la part du coût de l'enseignement primaire et secondaire assumée par les municipalités s'établit à près de 28.7% en 1974-75 (30.5% en 1973-74). Cette contribution — sauf dans le cas d'une école pour les handicapés en Nouvelle-Écosse — se limite aux écoles publiques.

| | A. Provincial and municipal expenditures on elementary and secondary education as a percentage of total provincial and municipal budget | B. Provincial and municipal expenditures on elementary and secondary education related to personal income | | |
|--|--|---|---------|---------|
| | A. Dépenses provinciales et municipales au titre de l'enseignement primaire et secondaire en pourcentage de l'ensemble du budget provincial et municipal | B. Dépenses provinciales et municipales au titre de l'enseignement primaire et secondaire en fonction du revenu personnel | % | |
| | 1973-74 | 1974-75 | 1973-74 | 1974-75 |
| Newfoundland — Terre-Neuve | 16.4 | 16.0 | 7.0 | 7.2 |
| Prince Edward Island — Île-du-Prince-Édouard | 18.1 | 18.6 | 8.0 | 8.2 |
| Nova Scotia — Nouvelle-Écosse | 18.3 | 18.1 | 6.2 | 6.1 |
| New Brunswick — Nouveau-Brunswick | 18.4 | 18.2 | 6.5 | 6.6 |
| Québec | 22.1 | 20.7 | 7.3 | 7.1 |
| Ontario | 21.2 | 19.5 | 5.6 | 5.4 |
| Manitoba | 20.2 | 17.6 | 5.8 | 5.4 |
| Saskatchewan | 19.4 | 17.2 | 5.7 | 5.3 |
| Alberta | 19.0 | 16.4 | 5.9 | 5.7 |

| Yukon and Northwest Territories — Yukon et Territoires du Nord-Ouest | 19.3 | 17.6 | 15.3 | 12.5 |
| Canada | 20.4 | 18.9 | 6.0 | 5.8 |

Tables 3 and 11 indicate the size of these expenditures in relation to total municipal spending. The percentage dropped to 15.8% in 1974 from 17.2% in 1973.

Table 3 presents an analysis of government expenditures on education as percentage of the total government budget and Table 31 presents total expenditures on the elementary and secondary level per capita of population. The following tabulations focus only on the provincial sources of funds (including local taxation) devoted to elementary and secondary education, which represents the bulk of the expenditures.

Fees

Fees for elementary and secondary education come from several sources. Those paid to school boards represent almost exclusively adult education (Table 13, line 4); fees paid to the provincial governments include teacher certification fees and other miscellaneous fees (e.g., correspondence courses) and those paid to private academic schools are for tuition and boarding (line 14). Together, all types of fees represented 1.8% of total expenditures in 1974-75 (1.7% in 1973-74).

Other Income

This item consists of all other miscellaneous sources of revenue, such as school auditorium rental, sale of books or assets, income from ancillary enterprises, etc. These amounted to 2.4% in 1974-75 (4.0% in 1973-74) of total spending at the elementary and secondary level.

Financial Period

In most provinces school boards operate on a calendar year basis. School board data in Newfoundland, Prince Edward Island, the Yukon and the Northwest Territories pertain to the fiscal year (ending March 31), while in New Brunswick and Quebec the academic year is used. To be consistent, all school board data in this publication have been converted to the calendar year. Data from private schools are reported for various financial periods. No conversion has been attempted, since it would be arbitrary and would not facilitate trend analysis.

Provincial and federal expenditures are based on the fiscal year.

Les tableaux 3 et 11 indiquent l'ampleur de ces dépenses par rapport à l'ensemble des dépenses municipales. Le pourcentage tombe à 15.8 % en 1974 de 17.2 % en 1973.

Le tableau 3 présente une analyse des dépenses gouvernementales au titre de l'enseignement en pourcentage de l'ensemble du budget gouvernemental, et le tableau 31 donne les dépenses totales à l'égard du niveau primaire-secondaire par habitant. Les totalisations suivantes portent essentiellement sur les sources provinciales de fonds (entre autres l'imposition locale) consacrées à l'enseignement primaire et secondaire, fonds qui constituent la majeure partie des dépenses.

Droits

Les droits relatifs à l'enseignement primaire et secondaire proviennent de plusieurs sources. Ceux qui sont versés aux conseils scolaires se rapportent presque exclusivement à l'éducation permanente (tableau 13, ligne 4), ceux qui sont versés aux gouvernements provinciaux comprennent les frais d'obtention du brevet d'enseignement et d'autres frais divers (par ex., cours par correspondance) et ceux qui sont versés aux écoles privées recouvrent les frais de scolarité et de pension (ligne 14). Au total, tous ces genres de droits représentent 1.8 % de l'ensemble des dépenses en 1974-75 (1.7 % en 1973-74).

Autres recettes

Ce poste comprend toutes les autres sources de recettes diverses, par exemple, la location de l'amphithéâtre de l'école, la vente de livres ou d'objets, les recettes provenant d'entreprises auxiliaires, etc. Ces montants constituent 2.4 % en 1974-75 (4.0 % en 1973-74) de l'ensemble des dépenses au niveau primaire et secondaire.

Période financière

Dans la plupart des provinces, l'activité des conseils scolaires s'inscrit dans l'année civile. Dans le cas de Terre-Neuve, de l'Île-du-Prince-Édouard, du Yukon et des Territoires du Nord-Ouest, les données concernant les conseils scolaires se rapportent à l'année financière (se terminant le 31 mars), tandis que dans le cas du Nouveau-Brunswick et du Québec on utilise l'année scolaire. Pour assurer l'uniformité, toutes les données sur les conseils scolaires figurant dans cette publication ont été calculées en fonction de l'année-civile. Les données des écoles privées sont déclarées en fonction de diverses périodes financières. On n'a pas tenté d'effectuer la conversion, étant donné que le résultat serait arbitraire et ne faciliterait pas l'analyse des tendances.

Les dépenses provinciales et fédérales sont fondées sur l'année financière.

Historical Tables

The Historical Tables 15 to 24 contain public school board data. Tables 25 and 26 refer to private academic schools and kindergartens. Historical information about all types of elementary and secondary education is presented in Tables 27 to 36.

Further details on elementary and secondary school finance are available in another Statistics Canada publication *Elementary and Secondary Education – Financial Statistics* (Catalogue 81-250).

Tableaux chronologiques

Les tableaux chronologiques 15 à 24 renferment des données sur les conseils scolaires publics. Les tableaux 25 et 26 portent sur les écoles de formation générale et les maternelles privées. Les données chronologiques sur toutes les formes d'enseignement primaire et secondaire sont présentées aux tableaux 27 à 36.

Des renseignements plus détaillés sur les finances des écoles primaires et secondaires figurent dans une autre publication de Statistique Canada intitulée *Enseignement élémentaire et secondaire – Statistiques financières* (nº 81-250 au catalogue).

¹ Expenditures of school boards refer to calendar year.

² The territorial government expenditures are reimbursed by general purpose grants of the federal government.

³ All federal schools were amalgamated with the school board system.

⁴ Private kindergartens are excluded.

⁵ Includes deficit.

⁶ Besides grants to school boards (line 2) and private schools (line 12), includes direct expenditures on services for public schools, contributions to teachers' pension funds and other direct expenditures on special education and departmental administration.

⁷ Includes fees for tuition, certification, etc., wherever identifiable.

⁸ Besides grants to school boards (line 1), to private schools (line 11) and reimbursements to provincial governments (line 17), the total of federal expenditures also includes direct expenditures on National Defence schools, Indian and Eskimo schools and other direct spending on elementary and secondary education.

¹ Les dépenses des conseils scolaires se rapportent à l'année civile.

² Les dépenses du gouvernement territorial sont remboursées par les transferts généraux du gouvernement fédéral.

³ Toutes les écoles fédérales étaient amalgamées avec le système de commission scolaire.

⁴ Les maternelles privées sont exclues.

⁵ Déficit inclus.

⁶ En outre les subventions aux conseils scolaires (ligne 2), et aux écoles privées (ligne 12), y compris les dépenses directes aux fins des services pour les écoles publiques, les contributions aux régimes de pension des enseignants et les autres dépenses directes au titre de l'enseignement spécial et de l'administration ministérielle.

⁷ Comprend les frais de scolarité, de certification, etc., lorsqu'il sont identifiables.

⁸ En outre les subventions aux conseils scolaires (ligne 1), aux écoles privées (ligne 11), et les remboursements aux gouvernements provinciaux (ligne 17), le total des dépenses fédérales comprend aussi les dépenses directes aux fins des écoles de la Défense nationale, des écoles des Indiens et des Esquimaux et les autres dépenses directes au titre de l'enseignement primaire et secondaire.

INTRODUCTION

Financial statistics for the post-secondary level are given for:

- (a) non-university education: (i) teachers' colleges, (ii) community colleges and similar institutions, and (iii) nurses diploma courses and hospital technology training (Tables 37 and 38 and Historical Tables 44 to 47);
- (b) university education (Tables 39 to 41 and Historical Tables 48 to 58), and
- (c) all post-secondary education (Tables 42 and 43 and Historical Tables 59 and 60).

Les statistiques financières du niveau postsecondaire portent sur:

- a) l'enseignement non universitaire, c'est-à-dire (i) les écoles normales, (ii) les collèges communautaires et établissements analogues, et (iii) les cours de sciences infirmières et de technologie hospitalière (tableaux 37 et 38 et données chronologiques aux tableaux 44 à 47);
- b) l'enseignement universitaire (tableaux 39 à 41 et données chronologiques aux tableaux 48 à 58); et
- c) l'ensemble de l'enseignement postsecondaire (tableaux 42 et 43 et données chronologiques aux tableaux 59 et 60).

Analysis of Total Spending on Post-secondary Education

Analyse des dépenses totales au titre de l'enseignement postsecondaire

| | 1973 - 74 | 1974 - 75 |
|--|-----------|-----------|
| Spending on post-secondary level Dépenses au niveau postsecondaire | | % |
| A. Related to total expenditures on education – Par rapport aux dépenses totales au titre de l'enseignement: | | |
| Atlantic Provinces – Provinces de l'Atlantique | 25.9 | 29.7 |
| Québec | 25.9 | 28.0 |
| Ontario | 30.4 | 30.4 |
| Western Provinces – Provinces de l'Ouest | 26.6 | 27.1 |
| Canada | 27.9 | 28.6 |
| B. Percentage of GNP, GPP – En pourcentage du P.N.B., P.P.B. | | |
| Atlantic Provinces – Provinces de l'Atlantique | 2.6 | 2.7 |
| Québec | 2.5 | 2.7 |
| Ontario | 2.2 | 2.1 |
| Western Provinces – Provinces de l'Ouest | 1.8 | 1.8 |
| Canada | 2.2 | 2.2 |
| C. Cost per capita of population – Coût par habitant: | | \$ |
| Atlantic Provinces – Provinces de l'Atlantique | 96 | 116 |
| Québec | 120 | 147 |
| Ontario | 136 | 150 |
| Western Provinces – Provinces de l'Ouest | 105 | 124 |
| Canada | 122 | 141 |

These comparisons should be interpreted with caution because of regional and provincial disparities in many factors affecting post-secondary education.

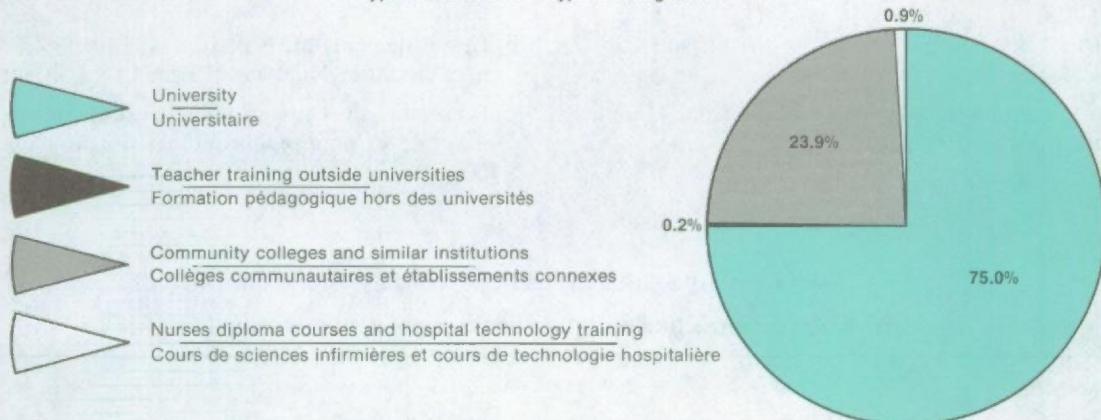

Il faut interpréter ces comparaisons avec prudence, du fait que les nombreux facteurs qui influent sur l'enseignement postsecondaire varient selon les régions et selon les provinces.

Chart — 9

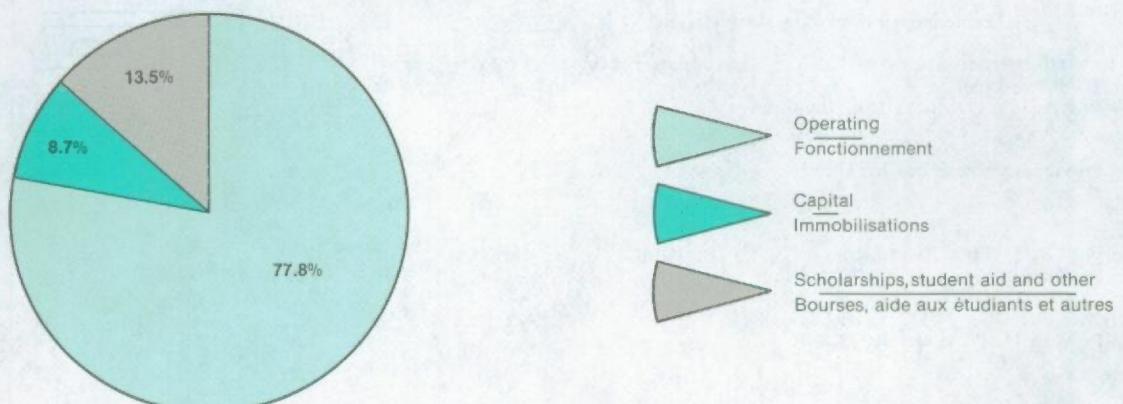

Expenditures on Post-secondary Education by Type of Education, by Function and by Source of Funds, for Canada, 1974-75

par type d'enseignement, Canada, 1960-61 à 1977-78**

Expenditures by Function — Dépenses par fonction

Full-time Enrolment — Effectifs à plein temps

* Estimate — Estimation.

Expenditures on post-secondary education have been grouped in four categories:

- (a) operating expenditures of institutions or courses;
- (b) capital;
- (c) scholarships and student assistance; and
- (d) other direct departmental expenditures wherever separable and identifiable.

A. Non-university

(i) Teacher training outside universities – Teacher training outside universities is provided only in Nova Scotia and Ontario. In the other provinces, this kind of post-secondary education has been integrated into the university system. Teacher training is entirely supported by provincial funds except for a relatively small amount of fees in some provinces. Fractional federal contributions are made only in the form of student aid, the cost of student loans and contribution to vocational teacher training.

Information about this type of education came from the provincial public accounts:

(ii) Community colleges – The term “community college” applies not only to institutions with this name but also to institutes of technology, colleges of applied arts and technology, agricultural colleges, CEGEP's in Quebec and some institutions previously called “junior colleges”. Most of these establishments offer post-secondary education as well as vocational courses which do not require junior matriculation. Expenditures for these vocational courses have been allocated to trades-training and are excluded from post-secondary level.

According to the Federal-Provincial Fiscal Arrangements Act of 1967, post-secondary education is defined as every course of study that:

- (1) requires at least junior matriculation for admission;
- (2) lasts not less than 24 weeks, and
- (3) is certified as a post-secondary course.

In Quebec's CEGEP system and in some community colleges in the Western Provinces, post-secondary courses are classified into two main groups:

- (a) academic courses (usually two years) at the pre-university level; and
- (b) technical courses (two to three years).

Les dépenses au titre de l'enseignement postsecondaire ont été groupées en quatre catégories:

- a) dépenses de fonctionnement des établissements ou des cours;
- b) immobilisations;
- c) bourses d'études et aide aux étudiants; et
- d) autres dépenses directes des ministères lorsqu'elles ont pu être isolées et identifiées.

A. Non universitaire

(i) Formation pédagogique hors des universités – Ce n'est qu'en Nouvelle-Écosse et en Ontario que la formation des enseignants est dispensée en dehors des universités. Dans les autres provinces, ce type d'enseignement postsecondaire a été intégré au système universitaire. La formation des enseignants est entièrement financée par des fonds provinciaux, sauf que dans certaines provinces vient s'ajouter un faible montant provenant des droits. La contribution fédérale se fait exclusivement sous forme d'aide aux étudiants, de prise en charge des prêts aux étudiants et de participation au financement de la formation des enseignants de l'enseignement professionnel.

Les données concernant ce type d'enseignement sont tirées des comptes publics des provinces:

(ii) Collèges communautaires – Cette désignation ne s'applique pas uniquement aux établissements qui portent ce nom, mais également aux instituts de technologie, aux collèges de technologie et d'arts appliqués (CAAT), aux collèges d'enseignement agricole, aux CEGEP du Québec et à certains établissements appelés autrefois “junior colleges”. La plupart de ces établissements offrent un enseignement postsecondaire ainsi que des cours de formation professionnelle qui n'exigent pas de diplôme de fin d'études secondaires. Les dépenses au titre de ces cours de formation professionnelle ont été groupées avec les dépenses au titre de l'enseignement des métiers et sont exclues des dépenses de l'enseignement postsecondaire.

Selon la Loi de 1967 sur les arrangements fiscaux entre le gouvernement fédéral et les provinces, on entend par enseignement postsecondaire tout cours qui:

- (1) exige à l'admission au moins le diplôme de fin d'études secondaires;
- (2) ne dure pas moins de 24 semaines, et
- (3) est reconnu comme cours postsecondaire.

Dans le système de CEGEP du Québec, et dans certains collèges communautaires des provinces de l'Ouest, les cours postsecondaires sont classés en deux grandes catégories:

- a) enseignement de formation générale (généralement de deux ans) au niveau pré-universitaire; et
- b) cours de formation technique (de deux à trois ans).

In general, post-secondary non-university education is financed directly by the provincial governments, as shown in Table 38; however, the federal government "transfers to the provinces, financial resources equal to either 50% of operating costs, as defined by the Act and Regulations, or \$15 per capita of population, whichever is greater".

Sources of Funds

The federal contribution shown in Table 38 includes scholarships and bursaries and student loans. Also, the Canadian International Development Agency (CIDA) sponsors students from developing countries studying in Canada and Canadian students studying abroad.

(iii) Nurses' diploma courses and hospital technology training – Nursing diploma (R.N.) courses, laboratory and radiology technician and other post-secondary training courses provided by hospitals are included in the tables of this section. Expenditures for training nursing assistants and nurses' aides are classified at the vocational level (Section IV).

Expenditures for these courses have been taken from hospital reports, which show data for nursing diploma courses and training nursing assistants. Sometimes, expenditures for the two categories are combined in the hospital reports. The separation of the expenditures for each was estimated, using enrolment figures of the institution concerned and per-student cost figures of other institutions. Generally, expenditures shown for nursing diploma courses include salaries of instructional and related staff, student services and the cost of supplies. Administrative and maintenance expenditures are not included since they could not be disaggregated from those for hospital operation.

In some provinces academic training for students enrolled in R.N. diploma courses is provided by community colleges (Section III, Table 37), but practical training is still provided by hospitals, the cost of which is shown in this part of the survey. Therefore, it is not possible to compare the cost of the entire program with enrolment.

Enrolment shown for this type of post-secondary non-university training in Table 37, line 34, includes, besides students in nurses' diploma courses, those

En général, l'enseignement postsecondaire non universitaire est financé directement par les gouvernements provinciaux (tableau 38); toutefois, le gouvernement fédéral verse aux provinces des montants équivalant soit à 50 % des coûts de fonctionnement, selon la définition de la Loi et du Règlement, soit à \$15 par habitant, selon le montant le plus élevé.

Provenance des fonds

La contribution fédérale indiquée au tableau 38 englobe les bourses d'études, les bourses d'entretien et les prêts aux étudiants. En outre, l'Agence canadienne de développement international (A.C.D.I.) aide des étudiants originaires de pays en voie de développement qui étudient au Canada et des Canadiens qui étudient à l'étranger.

(iii) Cours de sciences infirmières et de technologie hospitalière – Les cours de sciences infirmières (diplôme d'infirmier(ère) autorisé(e)), les cours de technicien en laboratoire et de technicien radiologue, ainsi que d'autres cours de formation postsecondaire dispensés par les hôpitaux sont compris dans les tableaux de cette section. Les dépenses au titre de la formation des infirmiers(ères) auxiliaires et des aides-infirmiers(ères) sont classées au niveau de l'enseignement de formation professionnelle (section IV).

Les dépenses relatives à ces cours sont tirées des déclarations des hôpitaux, qui indiquent les données pour les cours de sciences infirmières (diplôme d'infirmier(ère) autorisé(e)) et pour les cours d'infirmier(ères) auxiliaires. Les dépenses pour ces deux catégories sont parfois groupées dans les déclarations des hôpitaux. Les chiffres indiqués séparément pour chacune des catégories représentent donc une estimation, établie à partir des effectifs de l'établissement en cause et du coût par élève déclaré par d'autres établissements. De façon générale, les dépenses indiquées pour les cours de sciences infirmières comprennent les traitements du personnel enseignant et connexe, les salaires des étudiants, ainsi que le coût des fournitures. Les dépenses d'administration et d'entretien ne sont pas comprises, car il est impossible de les isoler des dépenses de fonctionnement de l'hôpital.

Dans certaines provinces, la formation théorique des élèves inscrits aux cours de sciences infirmières est dispensée par les collèges communautaires (section III, tableau 37), mais la formation pratique continue d'être dispensée par les hôpitaux et le coût de cette formation pratique figure dans cette partie-ci. Il est donc impossible de faire une comparaison entre le coût du programme entier et les effectifs.

Les effectifs indiqués pour ce type d'enseignement postsecondaire non universitaire dans le tableau 37, ligne 34, comprennent, outre les élèves des cours de sciences

enrolled for technician training. The latter are not included in enrolment figures of other Statistics Canada publications.

Operating grants are received indirectly from the provincial and federal (Health and Welfare, Canada) governments through the hospitals. Some direct contributions are made in the form of student aid or student loans.

Federal Transfer Payments

Transfer payments are not shown in Table 38 because they cover all post-secondary education including university and cannot be separated according to the level to which they are to be allocated. However, they are presented in the footnote to Table 43 which shows combined data for all types of post-secondary education. Transfer payments for the minority language program in post-secondary institutions are also presented in the footnote.

Sources of Information

Data on the post-secondary non-university level have been compiled from institutional reports and from provincial public accounts. Most figures on post-secondary non-university education are based on the fiscal year.

B. University

Financial information about university education applies to degree-granting institutions. To determine which ones should be covered, the publication *Fall Enrolment in Universities and Colleges* (Catalogue 81-204) was used as a guide, even though some institutions offer a fractional number of non-university diploma courses of which the expenditures are not separable.

The amount spent on university education represented 21.4% of expenditures on all levels of education in Canada in 1974-75 (21.1% in 1973-74). In relation to expenditures on the post-secondary level, universities accounted for 75.0% in 1974-75, compared to 75.6% in 1973-74. The slight downward shift is due to the rapid growth of the non-university sector and the decline of capital expenditures for university education.

infirmières, ceux qui étudient en vue de devenir technicien. Ce dernier groupe n'est pas pris en compte dans les effectifs indiqués dans d'autres publications de Statistique Canada.

Des subventions de fonctionnement sont fournies indirectement par les gouvernements provinciaux et fédéral (Santé et Bien-être Canada) par l'intermédiaire des hôpitaux. Certaines contributions directes sont effectuées sous forme d'aide ou de prêts aux étudiants.

Transferts fédéraux

Les transferts ne sont pas indiqués dans le tableau 38 parce qu'ils visent l'ensemble de l'enseignement postsecondaire, y compris les universités et qu'il est impossible de les répartir en fonction du niveau auquel ils sont destinés. Toutefois, on les indique dans la note au bas du tableau 43, qui présente des données groupées pour tous les types d'enseignement postsecondaire. Sont également indiqués dans la note les transferts au titre du programme de la langue minoritaire dans les établissements postsecondaires.

Sources de renseignements

Les statistiques concernant le niveau postsecondaire non universitaire ont été élaborées à partir des rapports des établissements et des comptes publics provinciaux. Les chiffres concernant l'enseignement postsecondaire non universitaire sont fondés pour la plupart sur l'année financière.

B. Universitaire

Les renseignements financiers portant sur l'enseignement universitaire concernent les établissements décernant des grades. Pour déterminer les établissements qui devaient être retenus, on s'est servi de la publication *Inscriptions d'automne aux universités et collèges* (n° 81-204 au catalogue), même si certains établissements offrent un petit nombre de cours menant à un diplôme non universitaire, dont les dépenses ne peuvent pas être isolées.

Les sommes dépensées au titre de l'enseignement universitaire représentent 21.4 % des dépenses totales au titre de tous les niveaux d'enseignement au Canada en 1974-75 (21.1 % en 1973-74). Par rapport aux dépenses pour l'ensemble du niveau postsecondaire, celles relatives aux universités figurent pour 75.0 % en 1974-75, comparativement à 75.6 % en 1973-74. La légère baisse est attribuable à la croissance rapide du secteur non universitaire et à la réduction des dépenses d'immobilisations au titre de l'enseignement universitaire.

Statistics on university finance are based on the following sources of information:

Les statistiques sur les finances des universités sont fondées sur les sources de renseignements suivantes:

| Reports Déclarations | Number of reports Nombre de déclarations | Enrolment Effectifs scolaires | Operating expenditures Dépenses de fonctionnement | |
|--|---|-------------------------------------|--|-------|
| | | | \$'000 | % |
| 1973 - 74 | | | | |

| Total | ... | 347,260 | 1,837,964 | 100.0 |

Note: CAUBO stands for Canadian Association of University Business Officers. – Nota: A.C.P.A.U.: Association canadienne du personnel administratif universitaire.

The financial periods used by these institutions to report operating and capital expenditures vary. No attempt was made to convert financial data to calendar year or any other financial period, because it would be arbitrary and possibly inaccurate. Moreover for charting year-to-year changes of expenditures, such conversion is unnecessary. Scholarships and other departmental expenditures, from government sources, are reported on a fiscal year basis.

Les périodes financières utilisées par ces établissements pour déclarer leurs dépenses de fonctionnement et d'immobilisations varient. On n'a pas tenté d'établir les données financières en fonction de l'année civile ou de tout autre exercice financier, étant donné que le résultat serait arbitraire et peut-être inexact. De plus, cette opération n'est pas nécessaire lorsqu'on veut comparer les variations d'une année à l'autre. Les bourses d'études et autres dépenses des ministères, de provenance gouvernementale, sont établies selon l'année financière.

Expenditures by Function

Table 39 presents expenditures on university education classified as:

- (a) operating including sponsored research;
- (b) capital;
- (c) scholarships, bursaries, student aid, cost of student loans, overseas assistance; and
- (d) other departmental expenditures.

Assisted and sponsored research is not itemized by function, but available on special request.

Operating expenditures include ancillary enterprises, but only their net profit or loss, as indicated in Tables 39 and 40. Gross expenditures and income from

Dépenses par fonction

Le tableau 39 présente les dépenses au titre de l'enseignement universitaire classées comme suit:

- a) fonctionnement, y compris la recherche subventionnée;
- b) immobilisations;
- c) bourses d'études, bourses d'entretien, aide aux étudiants, prêts aux étudiants, aide aux étudiants outremer; et
- d) autres dépenses des ministères.

Les dépenses au titre de la recherche subventionnée ne sont pas détaillées par fonction, mais elles peuvent être obtenues sur demande.

Les dépenses de fonctionnement visent entre autres les entreprises auxiliaires, mais uniquement pour ce qui concerne leur profit ou perte nette, comme indiqué aux

ancillary enterprises are shown only in the footnote to Tables 39 and 40.

In Table 39 full- and part-time enrolment are shown. Full-time "equivalent" enrolment is shown as well, but only for Canada. The "equivalents" are composed of full-time enrolment plus part-time enrolment converted to full-time (3.5 to 1). Although this procedure is not perfect, it is more realistic to relate operating expenditures to full-time equivalent enrolment than to full-time enrolment, since operating expenditures include the costs for part-time students.

Sources of Funds

Table 40 shows sources of funds of university education separately for operating and capital expenditures, scholarships and student aid, other direct departmental expenditures and in lines 21 to 35, a summary of these items.

The Federal-Provincial Fiscal Arrangements Act of 1967 (see page 76) regulates the financing of all post-secondary education including universities. However, the federal government does not support post-secondary education directly, but indirectly, in the form of transfer payments to the provincial governments.

Although Table 40 does not include federal transfer payments, the federal contribution was 12.9% in 1974-75. This support, amounting to \$304.7 million in 1974-75, consisted almost exclusively of research grants and operating grants to the three military colleges; it also included some capital grants, scholarships, student aid, overseas assistance, cost of student loans and a few more direct departmental expenditures. Table 41 shows that about two thirds of the assisted research in universities is financed by federal departments. The largest grants are given by: Health and Welfare, Canada; the Health Resources Fund; the National Research Council; the Defence Research Board and the Medical Research Council.

Scholarships, bursaries and student aid, shown in Table 39, lines 16 and 19 and Table 40, part of lines 15 and 16, consist of all kinds of aid to full- and part-time students.

tableaux 39 et 40. Les dépenses et recettes brutes provenant des entreprises auxiliaires ne figurent que dans la note au bas des tableaux 39 et 40.

Le tableau 39 indique les effectifs à plein-temps et à temps partiel, de même que les effectifs en "équivalent" à plein-temps pour l'ensemble du Canada seulement. Les "équivalents" représentent la somme des effectifs à plein-temps et des effectifs à temps partiel exprimée sous forme d'effectifs à plein-temps (3.5 pour 1). Bien que cette méthode ne soit pas parfaite, il est plus réaliste d'exprimer les dépenses de fonctionnement selon les effectifs en équivalent à plein-temps plutôt que selon les effectifs à plein-temps, étant donné que les dépenses de fonctionnement visent également les effectifs à temps partiel.

Provenance des fonds

Le tableau 40 indique la provenance des fonds destinés à l'enseignement universitaire, par fonction: fonctionnement et immobilisations, bourses d'études et aide aux étudiants, autres dépenses directes des ministères et, aux lignes 21 à 35, un résumé de ces postes.

La Loi de 1967 sur les arrangements fiscaux entre le gouvernement fédéral et les provinces (voir page 76) régit le financement de l'enseignement postsecondaire, universités comprises. Toutefois, le gouvernement fédéral ne supporte pas l'enseignement postsecondaire directement, mais indirectement sous forme de transferts aux provinces.

Le tableau 40 ne tient pas compte des transferts fédéraux, dont les proportions sont les suivantes: 12.9 % en 1974-75. Cette participation, qui se chiffre à \$304.7 millions en 1974-75, se compose presque exclusivement de subventions de recherche et de subventions de fonctionnement aux trois collèges militaires; elle comprend également des subventions d'immobilisations, des bourses d'études, de l'aide aux étudiants (au Canada et outre-mer), le coût des prêts aux étudiants et quelques autres dépenses directes des ministères. Le tableau 41 montre que les deux tiers environ de la recherche subventionnée dans les universités sont financés par des ministères fédéraux. Les plus importantes subventions sont fournies par: Santé et Bien-être Canada, la Caisse d'aide à la santé, le Conseil national de recherches, le Conseil de recherches pour la défense et le Conseil de recherches médicales.

Les bourses d'études, les bourses d'entretien et l'aide aux étudiants, indiquées dans le tableau 39, lignes 16 et 19 et dans le tableau 40, partie de la lignes 15 et 16, représentent toutes les formes d'aide aux élèves à temps plein et à temps partiel.

(1) Includes municipal expenditures which are too small to be shown separately. — Comprend les dépenses municipales trop réduites pour être indiquées séparément.

(2) Federal transfers to provincial governments are included in provincial governments' expenditures. — Les transferts fédéraux aux gouvernements provinciaux sont inclus dans les dépenses des gouvernements provinciaux.

(3) Not available before 1962-63. — Non disponible avant 1962-63.

* Estimate. — Estimation.

The cost of student loans covers only interest, default costs and service charges. Expenditures by CIDA include federal government assistance to foreign students studying in Canada and aid to Canadian students studying abroad.

Federal transfer payments to the provincial governments are disregarded in Tables 40 and 41. They are shown in the footnotes to Table 43 and cover federal transfers for post-secondary education according to the Federal-Provincial Fiscal Arrangements Act and for the Minority Language Program.

The provincial contribution to university education amounted to \$1,583 million in 1974 - 75, including federal transfer payments. These provincial funds consisted of operating and capital grants, scholarships, student aid and departmental expenditures. The provincial share of assisted research, as Table 41 indicates, was much smaller (only 14.0%) than the federal contribution (63.1%). Other departmental expenditures, in addition to departmental administration costs wherever identifiable and separable, also included some capital items financed directly by the provincial departments and not reported by the universities.

Le coût des prêts aux étudiants ne couvrent que les intérêts, les défauts de paiement et les frais de service. Les dépenses de l'A.C.D.I. comprennent l'aide fédérale aux étudiants étrangers qui étudient au Canada et l'aide aux étudiants canadiens qui étudient à l'étranger.

Les transferts fédéraux aux provinces ne sont pas pris en compte dans les tableaux 40 et 41. Ils sont indiqués dans les notes au bas du tableau 43 et couvrent les transferts fédéraux au titre de l'enseignement postsecondaire prévus par la Loi sur les arrangements fiscaux entre le gouvernement fédéral et les provinces, et dans le cadre du programme de la langue minoritaire.

La contribution provinciale à l'enseignement universitaire s'établit à \$1,583 millions en 1974 - 75 (transferts fédéraux compris). Ces fonds provinciaux comprennent les subventions de fonctionnement et d'immobilisations, les bourses d'études, l'aide aux étudiants et les dépenses des ministères. La participation provinciale à la subvention de la recherche, comme l'indique le tableau 41, est de beaucoup inférieure (seulement 14.0 %) à la participation fédérale (63.1 %). Les autres dépenses des ministères, outre les frais d'administration lorsqu'on a pu les identifier et les isoler, comprennent également certaines immobilisations financées directement par les ministères provinciaux et non déclarées par les universités.

Fees

Fees represented 15.1% of operating expenditures in 1973 - 74 but dropped to 13.8% in 1974 - 75. The slight decrease occurred because fees did not increase as rapidly as the total expenditures for university operation. Fees related to total expenditures on university education (including capital and other expenditures) is indicated in Table 40.

Droits

Les droits représentent 15.1 % des dépenses de fonctionnement en 1973 - 74, mais ils ont diminué à 13.8 % en 1974 - 75. La légère baisse provient du fait que les droits n'ont pas augmentés aussi rapidement que les dépenses totales destinées au fonctionnement des universités. Le tableau 40 indique les droits en fonction des dépenses totales au niveau de l'enseignement universitaire (dépenses d'immobilisations et autres dépenses comprises).

Other Income

Other income consists of donations, endowments, income from services, etc. Assisted research was also financed by private sources to the extent of 22.9%. A large portion of these funds came from industrial enterprises. Assisted research is conducted almost exclusively by large institutions because the smaller institutions lack the necessary facilities.

Autres recettes

Les autres recettes comprennent les dons, les dotations, les recettes provenant des services, etc. La recherche a également été financée par des sources privées dans une proportion de 22.9 %. Une grande partie de ces fonds provient d'entreprises industrielles. La recherche subventionnée s'effectue presque exclusivement dans les grands établissements, car les petits ne disposent pas de l'équipement nécessaire.

Table 42 summarizes total expenditures on all post-secondary education by type of expenditure. This table gives sub-totals for (a) operating expenditures, (b) capital expenditures, (c) scholarships and student aid,

Le tableau 42 résume les dépenses totales au titre de l'enseignement postsecondaire, selon le genre. Il donne des totaux partiels pour a) les dépenses de fonctionnement, b) les dépenses d'immobilisations, c) les bourses d'études et

and (d) other direct departmental expenditures. Further details are provided in Tables 37 and 39. Total full-time enrolment is also summarized. However, part-time enrolment is not shown, due to the lack of data for the non-university level.

Table 43 summarizes the same data by source of funds. In lines 1 to 39, federal transfers to the provincial governments are disregarded, as in Tables 38 and 40. In the footnote, the summary of sources of funds is adjusted for these transfers by increasing the federal contribution shown on lines 1 to 6 and by reducing the provincial share by the same amount. Total expenditures are not affected. This footnote indicates that after the adjustment, the federal contribution was 53.1% and the provincial 29.3% in 1974-75.

Beginning in 1970-71, the federal government contributed to the cost of teaching in the second language at the post-secondary level. This transfer payment is calculated as 10% of the operating grants given to the institutions and utilized in teaching in the second language, plus an additional 8.5% on the 10% as an allowance for capital expenditures.

l'aide aux étudiants, et d) les autres dépenses directes des ministères. Des renseignements plus détaillés figurent dans les tableaux 37 et 39. On y trouve également un résumé des effectifs à plein-temps. Toutefois, les effectifs à temps partiel ne sont pas indiqués, faute de données pour le niveau non universitaire.

Le tableau 43 présente un résumé des mêmes données selon la provenance des fonds. Aux lignes 1 à 39, les transferts fédéraux aux provinces ne sont pas pris en compte, comme c'est le cas dans les tableaux 38 et 40. Dans la note, on a rectifié le résumé de la provenance des fonds pour tenir compte de ces transferts en augmentant la contribution fédérale indiquée aux lignes 1 à 6 et en réduisant la participation provinciale d'un montant équivalent. Les dépenses totales ne s'en trouvent pas modifiées. Cette note indique qu'après rectification, la contribution fédérale s'établit à 53.1 % et la contribution provinciale à 29.3 % en 1974-75.

Depuis 1970-71, le gouvernement fédéral contribue au coût de l'enseignement dans la langue seconde au niveau postsecondaire. Ce transfert est calculé à raison de 10 % des subventions de fonctionnement accordées aux établissements et utilisées pour l'enseignement dans la langue seconde, plus 8.5 % sur les 10 % à titre de provision pour les dépenses d'immobilisations.

TABLE 37. Expenditures on Post-secondary Non-university Education, by Type of Education and Function, Showing Enrolment,
Canada and Provinces, 1974-75

| 47 | Total % | 100.0 | 100.0 | 100.0 | 100.0 | 100.0 | 100.0 | 100.0 |

¹ Includes \$212,000 for residence fees in Nova Scotia and \$470,000 fees for professional development courses in Ontario.

² Estimate.

³ Includes all fees identified in public accounts.

⁴ Includes all miscellaneous items identified in public accounts.

⁵ Includes negative value for excess of revenue over expenditures (overfunding).

⁶ Excludes overhead. Data on fees and other revenue are not available; distribution of source of funds from governments is estimated.

⁷ Includes cost of loans and estimates for scholarships and student aid.

⁸ Excludes federal transfers to provincial governments for post-secondary and minority language teaching.

¹ Estimation.

² Comprend l'aide aux étudiants canadiens à l'étranger et aux étudiants étrangers au Canada.

³ Comprend les dépenses en immobilisations effectuées par le ministère provincial des Travaux publics, l'administration ministérielle et les autres dépenses directes des ministères provinciaux et fédéraux aux fins de l'enseignement universitaire.

⁴ Comprend les subventions accordées à un établissement en dehors de la province.

⁵ Comprend les étudiants à temps partiel convertis en équivalents à plein temps à raison de 3.5 pour 1.

¹ Figures different from those shown in other Statistics Canada publications result from inclusion of some transfer (university level) students in non-university institutions. — Les données sont différentes de celles montrées dans d'autres publications de Statistique Canada parce qu'elles incluent quelques étudiants dans les cours de transfert universitaires dans des instituts non universitaires.

INTRODUCTION

Expenditures on vocational training amounted to \$693.4 million in 1974-75. In relation to total expenditures on education, this represented 6.3%.

Expenditures on vocational training cover:

(a) Government-sponsored manpower training programs.

These programs are provided by public trade schools, community colleges, institutes of technology, etc. Community colleges and institutes of technology usually offer courses at the post-secondary non-university level as well. Total expenditures of these institutions were established by using data from provincial public accounts and reports of the institutions. Segregation of such expenditures by level was based on these and previous years' reports, as well as enrolment and the statement of the Department of Manpower and Immigration.

Spending on manpower programs also includes apprenticeship and training in industry and allowances paid to trainees.

Expenditures for vocational high schools are included at the elementary-secondary level, since their finances cannot be separated from those of school boards.

(b) Nursing assistants training.

Besides nurses' diploma (R.N.) courses, hospitals offer training for nursing assistants and nurses' aides. Costs pertaining to the trades level only are shown in this section. The cost of nurses' diploma courses are allocated to the post-secondary level (Section III). If hospital reports did not distinguish between expenditures on the two types of programs, separate costs were estimated as described in Section III.

(c) Language courses.

Data shown for language courses cover expenditures made by federal departments and agencies on language courses for federal employees and immigrants and some provincial expenditures.

(d) Trades-training in provincial reform schools and federal penitentiaries.

Les dépenses au titre de la formation professionnelle se sont chiffrées à \$693.4 millions en 1974-75. En proportion des dépenses totales au chapitre de l'enseignement, ce montant représentait 6.3 %.

Les dépenses au titre de la formation professionnelle comprennent:

a) Les programmes de formation de la main-d'oeuvre subventionnés par le gouvernement.

Ces programmes sont offerts par les écoles publiques de métiers, les collèges communautaires, les instituts de technologie, etc. En général, les collèges communautaires et les instituts de technologie offrent également des cours de niveau postsecondaire non universitaire. Les dépenses totales de ces établissements ont été calculées à l'aide des données extraites des comptes publics provinciaux et des rapports des établissements. La ventilation de ces dépenses selon le niveau d'enseignement a été faite en fonction des inscriptions des rapports des établissements et des données des bulletins pour les années précédentes, ainsi que d'après le rapport du ministère de la Main-d'oeuvre et de l'immigration.

Les dépenses affectées aux programmes de formation de la main-d'oeuvre comprennent également l'apprentissage et la formation dans l'industrie, ainsi que les allocations de formation.

Les dépenses concernant les écoles secondaires de formation professionnelle sont prises en compte avec celles du niveau primaire-secondaire, étant donné que les chiffres ne peuvent pas être isolés de ceux des conseils scolaires.

b) Formation des infirmiers(ères) auxiliaires.

Outre les cours de sciences infirmières (diplôme d'infirmier(ère) autorisé(e)), les hôpitaux dispensent des cours de formation des infirmiers(ères) auxiliaires et des aide-infirmiers(ères). Ne sont mentionnés dans cette section que les coûts de la formation au niveau des métiers. Le coût de la formation en sciences infirmières (diplôme d'infirmier(ère)) est pris en compte au niveau postsecondaire (section III). Lorsque, dans leurs déclarations, certains hôpitaux n'avaient pas fait la distinction entre les dépenses concernant les deux types de programme, on a fait des estimations distinctes suivant la méthode décrite à la section III.

c) Cours de langue.

Les données relatives aux cours de langue couvrent les dépenses effectuées par des ministères et des organismes fédéraux au titre des cours de langue à l'intention des fonctionnaires fédéraux, des immigrants, ainsi que certaines dépenses des provinces.

d) Formation au niveau des métiers dans les écoles de réhabilitation et dans les pénitenciers fédéraux.

- (e) Other trades-training and staff training outside the manpower programs.
- (f) Private business colleges and trade schools, as well as other private schools (e.g., dance, music, driving, etc.).

Sources of Funds

For analytical purposes, the sources of funds are classified in three groups: (a) manpower training programs, (b) all other federal and provincial occupational training programs, and (c) private institutions.

- (a) Financing manpower training programs is in accordance with the terms of the Adult Occupational Training Act of 1967. The federal Department of Manpower and Immigration "purchases" training courses from institutions, most of which are operated by provincial governments, industry or private establishments, for students who have been selected by local manpower centres. While taking courses these students are paid living allowances by the Department. In these manpower programs, the federal government contributes 75.7% and the provincial governments, 21.8% of the necessary funds. The rest comes from fees and other sources.
- (b) In the other federal and provincial programs, the federal share is less but still dominant (70.1%) and the provincial governments' contribution is more significant than in the manpower programs (29.1%).
- (c) In the private sector, fees and other sources cover all expenditures.

Overall, the federal government is the most significant contributor (70.2%) in the trades-training field, while the provincial share accounts for 22.1%.

Municipal governments, having no responsibilities for this type of education, did not make any contribution for vocational training.

Fees and other income, which were identified and included in this report, were insignificant and generally represented 6.7% of the total expenditures on vocational training.

Source of Data

Data on training costs in public institutions and direct government expenditures on vocational training were obtained from the report of the federal Department of Manpower and Immigration, as well as reports

e) Autre formation au niveau des métiers et formation du personnel en dehors des programmes de formation de la main-d'oeuvre.

f) Collèges commerciaux privés et écoles de métiers privées, et autres écoles privées (par ex., écoles de danse, de musique, de conduite, etc.).

Provenance des fonds

Pour les besoins de l'analyse, la provenance des fonds est répartie entre les trois groupes suivants: a) les programmes de formation de la main-d'oeuvre, b) tous les autres programmes de formation professionnelle des gouvernements fédéral et provinciaux, et c) les établissements privés.

- a) Le financement des programmes de formation de la main-d'oeuvre se fait conformément aux dispositions de la Loi de 1967 sur la formation professionnelle des adultes. Le ministère fédéral de la Main-d'oeuvre et de l'Immigration "achète" des cours de formation à des établissements, dont la plupart relèvent des gouvernements provinciaux, de l'industrie ou d'institutions privées, à l'intention des personnes choisies par les centres de main-d'oeuvre locaux. Les personnes qui suivent ces cours reçoivent des allocations de subsistance du ministère. Le gouvernement fédéral contribue pour 75.7 % des fonds nécessaires à ces programmes de formation de la main-d'oeuvre, et la part des gouvernements provinciaux représente 21.8 %. Le reste provient des droits et d'autres sources.
- b) Pour ce qui est des autres programmes fédéraux et provinciaux, la contribution du gouvernement fédéral est légèrement inférieure mais reste prépondérante (70.1%); celle des gouvernements provinciaux est supérieure à celle qu'ils versent aux programmes de formation de la main-d'oeuvre (29.1%).
- c) Dans le secteur privé, ce sont les droits et autres sources qui couvrent toutes les dépenses.

Au total, c'est le gouvernement fédéral qui est le contribuable le plus important (70.2 %) dans le domaine de l'enseignement des métiers; la contribution provinciale représente 22.1 %.

Les administrations municipales, qui n'ont aucune compétence en ce qui concerne ce type d'enseignement, n'ont pas du tout contribué à la formation professionnelle.

Les droits et autres recettes identifiées et prises en compte dans ce bulletin sont très peu élevés et représentent en général moins de 6.7 % des dépenses totales au chapitre de la formation professionnelle.

Provenance des données

Les données sur les coûts de formation dans les établissements publics et sur les dépenses directes des gouvernements au titre de la formation professionnelle proviennent du rapport du ministère fédéral de la Main-

of provincial departments responsible for these establishments, from provincial public accounts and from numerous reports of federal departments and agencies. Data on expenditures for training nursing assistants and nurses' aides were taken from hospital reports.

Financial statistics of private business colleges, private trade schools and other private schools (dance, ballet, driving, etc.) were estimated using reports of previous years collected by the Education, Science and Culture Division and the Business Finance Division of Statistics Canada.

d'œuvre et de l'Immigration ainsi que des déclarations des ministères provinciaux de l'Éducation qui sont responsables de ces établissements, des comptes publics des provinces, et d'un grand nombre de rapports des ministères et organismes provinciaux. Les données sur les dépenses au titre de la formation des infirmiers(ères) auxiliaires et des aide-infirmiers(ères) ont été extraites des déclarations des hôpitaux.

On a calculé la statistique financière des collèges commerciaux privés, des écoles privées de métiers et d'autres écoles privées (danse, ballet, conduite, etc.) au moyen des déclarations présentées au cours des années précédentes à la Division de l'éducation, des sciences et de la culture et à la Division des finances des entreprises de Statistique Canada.
