## INTRODUCTION

The 1982-83 quarterly reports, Hospital Indicators, represent the fourteenth full year of operation of the Statistics Canada and Canadian Hospital Association Quarterly Hospital Information System.

The data presented in this publication are derived from questionnaires completed by individual participating hospitals at the end of each quarter, on a cumulative basis, from April 1, 1982 to September 30, 1982.

Tabulations are compiled from data received from the hospitals which report during a given quarter. The tabulations, therefore, represent the statistics for a particular type, size and province to the extent reported by the participating hospitals. The indicators are presented in the form of standard deviations, quartiles, and arithmetic mean values which provide statistical measures of utilization, cost and productivity.

Data for hospitals located in the Yukon and Northwest Territories, notably federal hospitals, do not appear as such in tabular presentations due to the constraints imposed by tabular planning requirements but are included in the Canada total.

It should be noted that the indicators shown in this report are selected ones and that a substantial number of indicators which do not appear in published form are available from the Institutional Statistics section. These indicators are described in the Statistics Canada Quarterly Hospital Information System, 1978-79, a guide prepared by the Institutional Statistics section.

## INTRODUCTION

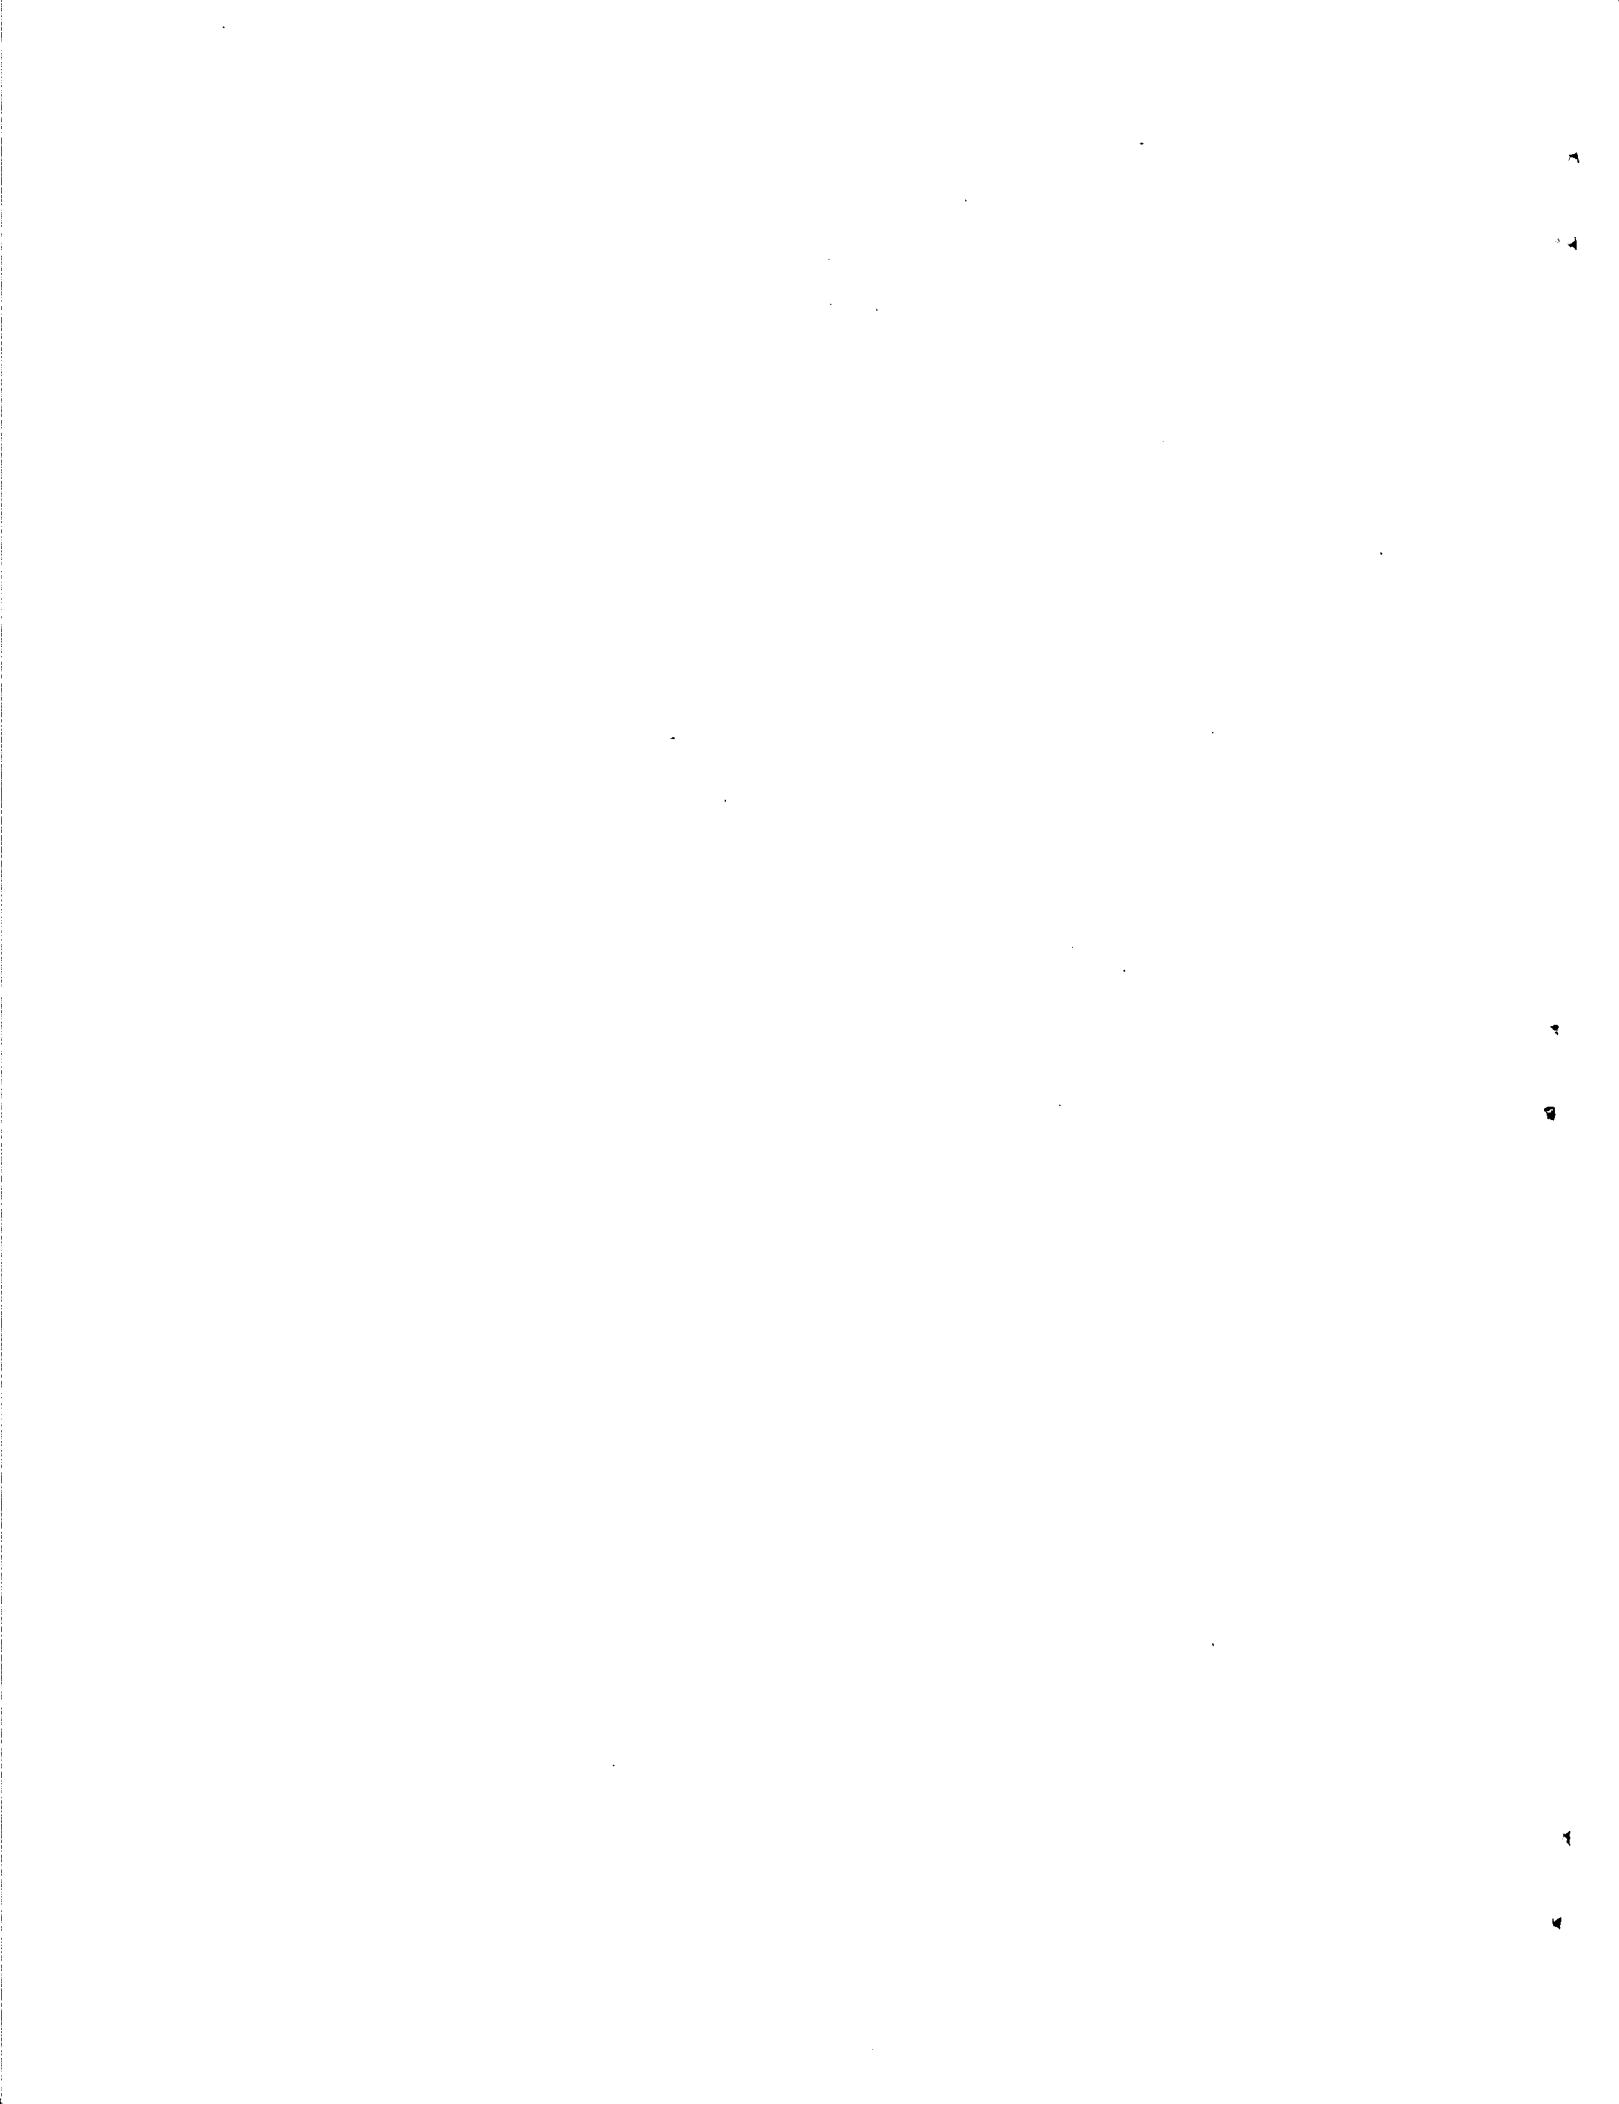

Les rapports trimestriels de 1982-83, sur les Indicateurs d'hôpitaux, représentent la quatorzième année d'activité du Programme de renseignements hospitaliers trimestriels de Statistique Canada et de l'Association des hôpitaux canadiens.

Les données contenues dans ces publications viennent des questionnaires complétés par les hôpitaux participants à la fin de chaque trimestre et sur une base cumulative, c'est-à-dire du 1 avril 1982 au 30 septembre 1982.

Les totalisations sont compilées à partir des données reçues des hôpitaux pour un trimestre déterminé. Les totalisations représentent les statistiques pour un genre, une grandeur et une province en particulier, relevées par les hôpitaux participants. Les indicateurs sont présentés sous forme d'écart-types, de quartiles et de moyennes arithmétiques qui fournissent des mesures d'utilisation, de coût et de productivité.

Les données pour les hôpitaux situés dans le Yukon et les Territoires du Nord-Ouest, notamment des hôpitaux fédéraux, ne sont pas présentées dans les tableaux par suite des contraintes imposées par les exigences de la planification tabulaire mais sont inclus dans le total pour le Canada.

Il est à noter que les indicateurs, montrés dans ce rapport, ont été choisis et qu'un plus grand nombre d'indicateurs n'apparaissant pas dans cette publication sont disponibles à la Section de la statistique des établissements. Ces indicateurs sont décrits dans le Guide du programme de renseignements hospitaliers trimestriels, édition de 1978-79, rédigé par la Statistique des établissements.

**Note:** Quartiles and standard deviations are not present in the tables unless there are four or more hospitals in any particular group. No such limitations apply to the calculation of the mean.

## Terminologie -fin

**Écart-type.** Caractéristique de dispersion autour de la moyenne indiquant à quel point on peut s'attendre qu'une valeur soit voisine de la moyenne.

**Nota:** Les tableaux présentés dans cette publication ne contiennent ni les écart-type, ni les quartiles à moins qu'il y ait quatre hôpitaux ou plus inclus dans le groupe, afin de présenter les premier et troisième, quartiles. Cependant cette règle ne s'applique pas aux calculs de la moyenne.
