Chief: J. C. Brady

---

P R E F A C E

This report of hospitals in Canada for the care of the sick covers the year 1937 together with comparative figures in similar tables for the years 1933 - 36. Statistics on hospitals for the mentally sick, feeble minded and epileptic are published in the Annual Report of Mental Institutions while those for tuberculosis patients under care in Sanatoria will appear in the Annual Report of Tuberculosis Institutions.

This report is divided into three sections. Section I gives, under general information, the number, types and distribution of public and private hospitals operating, their bed capacities, personnel, medical and social services, schools of nursing, organized out-patient departments and other data dealing with the internal administration of the hospitals.

Under movement of population is shown the number of admissions, live and still births, total under care, discharges, deaths, collective days' stay, average days' stay, etc.

Section II presents statistics on hospitals operated and controlled by the Dominion Government of Canada.

Section III shows the activities of the Victorian Order of Nurses for Canada and of the Canadian Red Cross Society.

The Dominion Bureau of Statistics wishes to extend its thanks to all who contributed data for this report.

Dominion Statistician.

BUREAU FEDERAL DE LA STATISTIQUE

Statisticien de Dominion

R. H. Coats, LL.D., F.R.S.C., F.S.S.(Hon.)

Branche de la statistique des institutions

Chef:

J. C. Brady

P R E F A C E

Ce rapport sur les hôpitaux du Canada affectés au soin des malades porte sur l'année 1937 et donne dans ses tableaux, des chiffres comparatifs pour les années 1933 - 36. Les statistiques sur les hôpitaux pour maladies mentales, faibles d'esprit et épileptiques sont publiées dans le rapport sur les Institutions pour Maladies Mentaless. Celles des tuberculeux dans les sanatoria paraîtront dans le rapport annuel sur les institutions pour tuberculeux.

Ce rapport se divise en trois sections. La section I donne sous "renseignements généraux", le nombre, le type et la distribution des hôpitaux publics et privés, leur capacité en lits, leur personnel, leurs services médicaux et leurs dispensaires, leurs écoles d'infirmérie, leurs départements organisés pour patients externes et autres détails sur la régie interne.

Sous l'en-tête "mouvement de la population" paraît le nombre d'admissions, les naissances et les mort-nés, le nombre de patients sous soins, le séjour collectif, le séjour moyen, etc.

La section II donne les statistiques sur les hôpitaux administrés et contrôlés par le gouvernement fédéral.

La section III porte sur le travail accompli par l'Ordre des Infirmières Victoria et la Société Canadienne de la Croix Rouge.

Le Bureau Fédéral de la Statistique désire remercier tous ceux qui ont collaboré à ce rapport en fournissant des données.

*R.H. Coats.*

Le statisticien du Dominion.

TABLE OF CONTENTS

PARTIE IV - LISTE DES HOPITAUX EN OPERATION AU CANADA EN 1937

## INTRODUCTION

In previous years, tuberculosis institutions were included in the report on hospitals for the sick but the increased amount of information now being collected concerning patients in sanatoria through the individual card system now in use in all sanatoria made it necessary to issue a separate report for tuberculosis institutions.

Owing to the increase in the number of public hospitals with units or annexes set apart for the care and treatment of tuberculous patients, it was considered advisable to show the movement of patients in these units separately in this report. In Table 34 the location and names of hospitals having such units are shown together with the number of beds set apart for tuberculous patients and the movement of population. As the length of stay of tuberculous patients in hospital is considerably longer than that of patients in the general division of the hospital, the movement of patients in these units is not included in any of the previous tables showing movement of population but the beds set apart for tuberculous patients are included in the bed capacity as shown in Table 1.

The classified information as appears in the various tables was obtained from the annual reports filled in by a responsible officer or owner of public and private hospitals. The Departments of Pensions and National Health, National Defence and Mines and Resources supplied the information for Dominion hospitals and that for the Canadian Red Cross and Victorian Order of Nurses from their respective head offices.

The following paragraphs will present some of the most important facts in hospital services for the year 1937:

Exclusive of the 58 mental hospitals with a bed capacity of 37,798 and 38 sanatoria with 9,053 beds, there were 858 other hospitals in operation during the year. Of this total, 584 were public, distributed as follows: General Public, 469; Women's, 11; Paediatric, 11; Isolation, 16; Convalescent, 9; Red Cross, 36; Incurable, 18; Other, 14. Besides the public hospitals there were 32 hospitals operated by the Dominion Government and 241 private hospitals.

Of these 858 hospitals, returns were received from 857 or 99.9 per cent.

### Bed Capacities -

These 857 hospitals had a bed capacity of 54,574 beds and cribs distributed as follows:

Public hospitals .....	48,345
Private hospitals .....	2,811
Dominion hospitals .....	3,418

### Patients under care -

The number of persons under care in these hospitals during the year was 907,305 distributed as follows:

Public and private hospitals .....	889,049
Tuberculosis units in public hospitals ...	3,284
Dominion hospitals .....	14,972

One person in every thirteen of the general population received hospital care in above hospitals during 1937.

### Admissions -

The number of admissions totalled 872,519 distributed as follows:

Public and private hospitals .....	856,630
Tuberculosis units in public hospitals ...	2,249
Dominion hospitals .....	13,640

Of the total number of admissions 786,751 were adults and children and 85,768 were infants born in hospital. Still births totalled 2,968 and formed 3.4 per cent of the total live births reported.

Discharges and deaths -

Discharges totalled 836,062 distributed as follows:

public and private hospitals .....	821,640
Tuberculosis units in public hospitals ...	1,526
Dominion hospitals .....	12,896

Deaths totalled 34,744 distributed as follows:

Public and private hospitals .....	33,844
Tuberculosis units in public hospitals ...	560
Dominion hospitals .....	340

Total deaths formed 3.8 per cent of the total patients under care and 4.1 per cent of the total discharges.

Patient Days -

The total patient days reported totalled 13,731,309 distributed as follows:

Public and private hospitals .....	13,237,353
Tuberculosis units in public hospitals ...	405,345
Dominion hospitals .....	88,611

The fifteen hospitals under the Department of Pensions and National Health did not report collective days' stay.

The average daily number of patients in all public and private hospitals during the year was 36,264.1, showing an increase of 1.2 per cent over the daily average for the previous year.

The average daily stay of patients in public hospitals was 15.2 days for adults and children and 12.3 days for newborn. Similar figures for private hospitals are 12.1 and 10.5.

Personnel -

The total personnel of all hospitals reporting this information was 37,036, distributed as follows:

Personnel	Public Hospitals	Private Hospitals	Dominion Hospitals
Salaried Doctors .....	536	68	96
Interns .....	733	-	-
Graduate Nurses .....	6,742	485	213
Student Nurses and Probationers .	8,788	107	-
Graduate and Student Dietitians .	394	-	10
Others .....	17,262	863	729
TOTALS .....	<u>34,465</u>	<u>1,523</u>	<u>1,048</u>

Approved schools of nursing were conducted by 180 hospitals, of which number 176 were in public hospitals and 4 in private hospitals. These schools had a total of 8,895 student nurses and probationers showing an average of 49.4 per school, with an average of 2.8 patients to each student nurse.

The following supplementary table gives the chief data concerning approved schools of nursing in Canada.

Province	Number of approved schools	Beds, cribs and bassinets	Student Nurses	Average Capacity	Daily average number of patients	Average patients per student nurse
Prince Edward Island	3	273	67	91.0	152.5	2.3
Nova Scotia .....	15	1,660.	505	110.7	1,161.4	2.3
New Brunswick ....	12	1,360	383	113.3	883.2	2.3
Quebec .....	38	9,960	1,722	262.1	7,503.2	4.4
Ontario .....	65	12,701	3,282	195.4	8,216.4	2.5
Manitoba .....	18	3,104	809	172.5	1,940.5	2.4
Saskatchewan .....	10	1,957	627	195.7	1,403.7	2.2
Alberta .....	11	2,301	718	209.2	1,632.2	2.3
British Columbia ..	8	3,019	782	377.4	2,387.8	3.1
CANADA .....	<u>180</u>	<u>36,335</u>	<u>8,895</u>	<u>201.9</u>	<u>25,280.9</u>	<u>2.8</u>

Organized Medical Staffs and Services -

An organized medical staff is one with duly elected officers, through which the doctors working in a hospital exercise supervision over the clinical work of the hospital, hold monthly meetings, discuss the clinical work performed, provide for the setting up of services or, in the case of small hospitals, of clinical committees. The number of such organized staffs was 248. The number of staff doctors on these organized staffs was 6,775.

The number of hospitals with unorganized staffs was 529, of which number 216 were private hospitals. The number of doctors in attendance at these hospitals was 3,858.

The number of organized services under the supervision of a director or head responsible for the work of his department was 1,561, an increase of 1.0 per cent over 1936 and of 25.8 per cent over 1933. X-Ray, general surgery, general medicine, clinical laboratory and obstetrics were the most highly organized services in public hospitals. Table 11 shows by provinces the number of X-Ray, clinical laboratories and physio-therapy departments in each type of hospital. The compilation revealed that out of the 825 public and private hospitals reporting, 495 had X-Ray departments, 311 clinical laboratories and 239 physio-therapy departments. Out of the 584 public hospitals 439 or 74.8 per cent had X-Ray Departments, 267 or 45.7 per cent had clinical laboratories and 198 or 33.9 per cent had physio-therapy departments.

Organized Out-patient Departments and Social Service Departments -

Since the definition of an organized public out-patient was promulgated, the number of hospitals reporting organized out-patient departments has been considerably reduced from the number given in previous years. Before this definition was established, many hospitals through misunderstanding the question reported having such a department when, strictly speaking, they had only a non-organized out-patient service. Only hospitals with completely organized departments are shown in Table 12. Although the figures on organized public out-patient departments are rather complete, nevertheless they lack full statistical value as the figures are not reported on a uniform basis. Out of the 62 organized public out-patient departments, only 34 supply full information giving the number of patients as also the number of treatments given. Eleven supply the number of patients who attended but do not keep records of the treatments given, while 17 keep records of treatments only. The 34 hospitals that reported treatments and patients show that 219,084 patients received 630,174 treatments or an average of 2.9 treatments per patient.

The number of hospitals reporting social service departments in 1937 was 41. General public hospitals had 56.1 per cent of the total social service departments reported. The number of paid social service workers in connection with these services was 103.

DOMINION HOSPITALS

The Department of Pensions and National Health operates and maintains eight hospitals for the treatment of disability pensioners and war veterans. These hospitals had a total capacity of 2,620 beds. The number of admissions was 6,224, discharges 6,258 and deaths 223. (See Table 35.)

Veterans' care cases in departmental and other institutions totalled 713 veterans, of which 271 were discharged and 65 died leaving 377 on strength March 31, 1937. (See Table 36.)

The National Health section of the Department of Pensions and National Health controls Leper, Marine, Quarantine and Immigration hospitals. The leading data on these hospitals are shown in Tables 37 and 38.

The Department of Mines and Resources operates eight hospitals having a total bed capacity of 231 and a total personnel of 79. Leading data on these hospitals are shown in Table 39.

The Department of National Defence operates nine hospitals with a total bed capacity of 352 and a total personnel of 114. The total number under care in these hospitals during the year ending March 31, 1937 was 2,928 with a collective days' stay of 29,363 days. (See Table 40.)

The distribution by provinces of Dominion Hospitals classified by type is shown in the following table:

Province	Total	Department of Pensions and National Health				Department of Mines and Resources	Department of National Defence
		War Veterans <sup>1</sup>	Quarantine (x)	Marine	Leper		
Nova Scotia .....	4	1	1	1	-	-	1
New Brunswick ...	3	1	1	-	1	-	-

CANADA .....	32	8	4	1	2	8	9

(x) Includes one Immigration hospital.

VICTORIAN ORDER OF NURSES

AND

THE CANADIAN RED CROSS SOCIETY

Victorian Order of Nurses -

In 1936 the Victorian Order of Nurses operated 84 branches distributed throughout Canada as follows: Nova Scotia, 14; New Brunswick, 6; Quebec, 5; Ontario 46; Manitoba, 1; Saskatchewan, 3; Alberta, 2; and British Columbia, 7. The number of staff in the various branches totalled 59,865. Total cases attended, 84,144; visits, 729,569; live births attended, 14,712 and still births 372.

Canadian Red Cross Society -

Statistics of in-patients in Red Cross hospitals are included in the movement of population tables under "Red Cross". In Table 40 is shown the number of out-patients treated at Red Cross hospitals, in clinics and at home, together with the number of births attended in homes, schools visited, children examined and total individuals attended in each province in which the Society operated. The number of out-patients treated was 29,507; births attended at home, 135; schools visited, 613; children examined, 20,378; giving a total of 50,020 individuals receiving care during the year.

## INTRODUCTION

Les années passées, les institutions pour tuberculeux étaient comprises dans le rapport sur les hôpitaux affectés au soin des malades, mais la somme croissante de renseignements qui sont maintenant colligés sur les sanatoria au moyen d'un système de fiches particulières en usage dans toutes ces maisons, exige la publication d'un rapport séparé.

En raison de l'augmentation du nombre d'hôpitaux publics ayant des unités ou annexes séparées pour le soin et le traitement des tuberculeux, il a été jugé préférable d'indiquer séparément dans ce rapport, le mouvement des patients dans ces unités. Dans le tableau 34 sont indiqués la localité et le nom des hôpitaux ayant de ces unités, le nombre de lits réservés aux tuberculeux et le mouvement des patients. Comme le séjour des tuberculeux à l'hôpital est beaucoup plus long que celui des patients des divisions générales, le mouvement des patients dans les unités n'est pas indiqué dans aucun autre tableau antérieur montrant le mouvement des patients; par contre toutefois, les lits réservés aux tuberculeux sont compris dans la capacité en lits telle que donnée au tableau 1.

Les renseignements classifiés tels qu'ils paraissent aux différents tableaux ont été puisés aux rapports annuels préparés par des officiers responsables ou les propriétaires des hôpitaux publics et privés. Les ministères des Pensions et de la Santé Nationale, de la Défense Nationale et des Mines et des Ressources ont fourni les renseignements sur les hôpitaux fédéraux tandis que les données relatives à la Société Canadienne de la Croix Rouge et à l'Ordre des Infirmières Victoria ont été obtenues des bureau-chefs de ces deux institutions.

Les paragraphes qui suivent présentent certains des renseignements les plus importants sur les services hospitaliers au cours de 1937.

En plus des 58 établissements pour aliénés, lesquels ont une capacité globale de 37,798 lits et des 38 sanatoria qui disposent de 9,053 lits, il y a 858 autres hôpitaux en opération durant l'année. De ce total, 584 sont des hôpitaux publics ainsi répartis: généraux publics, 469; pour femmes, 11; de pédiatrie, 11; pour contagieux, 16; de convalescence, 9; de la Croix Rouge, 36; pour incurables, 18; autres 14. En plus des hôpitaux publics il y a 32 hôpitaux administrés par gouvernement fédéral et 241 hôpitaux privés.

De ces 858 hôpitaux, 857 ou 99.9 per cent ont fait rapport.

### Capacité en lits -

Ces 857 hôpitaux ont une capacité globale de 54,574 lits d'adultes et d'enfants, ainsi distribués:

Hôpitaux publics .....	48,345
Hôpitaux privés .....	2,811
Hôpitaux fédéraux .....	3,418

### Patients en soins -

Le nombre de personnes en soins dans ces hôpitaux durant l'année est de 907,305 ainsi réparties:

Hôpitaux publics et privés .....	889,049
Unités pour tuberculeux dans les hôpitaux publics .....	3,284
Hôpitaux fédéraux .....	14,972

Une personne sur treize de la population en général a reçu des soins dans les hôpitaux ci-dessus mentionnés en 1937.

### Admissions -

Le nombre d'admissions s'établit à 872,519, ainsi réparties:

Hôpitaux publics et privés .....	856,630
Unités pour tuberculeux dans les hôpitaux publics .....	2,249

Du nombre d'admissions, 786,751 étaient des adultes et des enfants et 85,768 des bébés nés à l'hôpital. Les mort-nés s'établissent à 2,968 et constituent 3.4 p.c. du total des naissances.

Sorties et décès -

Les sorties s'élèvent à 836,062 ainsi réparties:

Hôpitaux publics et privés .....	821,640
Unités pour tuberculeux dans les hôpitaux publics .....	1,526
Hôpitaux fédéraux .....	12,896

Les décès dans les hôpitaux s'élèvent à 34,744, ainsi répartis:

Hôpitaux publics et privés .....	34,844
Unités pour tuberculeux dans les hôpitaux publics .....	560
Hôpitaux fédéraux .....	340

Le total des décès constitue 3.8 p.c. du total des patients en soins et 4.1 du total des sorties.

Jours-patient -

Le total de jours-patient s'établit à 13,731,309 ainsi répartis:

Hôpitaux publics et privés .....	13,237,353
Unités pour tuberculeux dans les hôpitaux publics .....	405,345
Hôpitaux fédéraux .....	88,611

Les quinze hôpitaux qui relèvent du ministère des Pensions et de la Santé Nationale n'ont pas rapporté leurs séjours collectifs.

La moyenne quotidienne de patients dans tous les hôpitaux publics et privés au cours de l'année est de 36,264.1, soit une augmentation de 1.2 p.c. sur la moyenne quotidienne de l'année précédente.

Le séjour moyen quotidien des patients dans les hôpitaux publics est de 15.2 jours pour les adultes et les enfants et de 12.3 pour les nouveau-nés. Les mêmes chiffres pour les hôpitaux privés sont de 12.1 et de 10.5.

Personnel -

Le personnel global de tous les hôpitaux ayant fourni ce renseignement est de 37,036 ainsi réparti:

Personnel	Hôpitaux publics	Hôpitaux Privés	Hôpitaux fédéraux
Médecins touchant traitement .....	536	68	96
Internes .....	733	-	-
Infirmières diplômées .....	6,742	485	213
Infirmières élèves et stagiaires ..	8,788	107	-
Diététiciens diplômés et élèves ..	394	-	10
Autres .....	<u>17,262</u>	<u>863</u>	<u>729</u>
TOTAUX .....	<u>34,465</u>	<u>1,523</u>	<u>1,048</u>

Il y a des écoles reconnues d'infirmierie dans 180 hôpitaux, dont 176 hôpitaux publics et 4 hôpitaux privés. Ces écoles ont un total de 8,895 infirmières élèves et stagiaires, ce qui donne une moyenne de 49.4 par école et une moyenne de 2.8 patients par infirmière élève.

Le tableau supplémentaire suivant donne les renseignements principaux sur les écoles d'infirmierie reconnues au Canada:

Province	Nombre d'écoles reconnues	Lits, lits d'enfants et berceaux	Infirmières élèves	Capacité moyenne	Moyenne quotidienne de patients	Moyenne de patients par infirmière élève
Ile du P.-Edouard . . .	3	273	67	91.0	152.5	2.3
Nouvelle-Ecosse . . . .	15	1,660	505	110.7	1,161.4	2.3

Services et personnels médicaux organisés -

Un personnel médical organisé est un personnel dont les officiers sont dûment élus et au moyen duquel les médecins attachés à un hôpital exercent la surveillance sur le travail de clinique, tiennent des réunions mensuelles, étudient le travail de clinique, pourvoient à l'organisation de services ou, dans le cas de petits hôpitaux, de comités de cliniques. Le nombre de ces personnels organisés est de 248 et le nombre de médecins qui en font partie, de 6.775.

Le nombre d'hôpitaux n'ayant pas de personnels organisés est de 529 dont 216 sont des hôpitaux privés. Le nombre de médecins qui y soignent les malades est de 3,858.

Le nombre de services organisés sous la surveillance d'un directeur ou d'un chef responsable de son service est de 1,561, augmentation de 1.0 p.c. sur 1936 et de 25.8 sur 1933. La radiologie, la chirurgie générale, la médecine générale, la laboratoire clinique et l'obstétrique sont les services les mieux organisés des hôpitaux publics. Le tableau 11 indique, par province, le nombre d'appareils de radiologie, de laboratoires cliniques et de services de physiothérapie dans chaque genre d'hôpital. La compilation révèle que sur 825 hôpitaux publics et privés faisant rapport, 495 ont des services radiologiques, 311 des laboratoires cliniques et 239 des départements de physiothérapie. Des 584 hôpitaux publics, 439 ou 74.8 p.c. ont des services de radiologie, 267 ou 45.7 p.c. des laboratoires cliniques et 198 ou 33.9 p.c. des services de physiothérapie.

Dispensaires organisés pour patients externes et dispensaires de bienfaisance -

Depuis la promulgation de la définition d'un patient externe public, le nombre d'hôpitaux déclarant des dispensaires organisés pour patients externes a considérablement diminué comparativement aux années antérieures. Avant l'adoption de cette définition, plusieurs hôpitaux ayant mal interprété la question, avaient déclaré de tels dispensaires quand ils n'avaient en réalité que des services non organisés pour patients externes. Seuls les hôpitaux ayant des dispensaires complètement organisés figurent au tableau 12. Bien que les chiffres sur les dispensaires organisés pour patients externes soient assez complets, ils n'ont pas toute leur valeur statistique parce qu'ils ne sont pas rapportés d'après une base uniforme. Des 62 dispensaires organisés pour patients externes, 34 seulement donnent des renseignements complets comprenant le nombre de patients et le nombre de traitements donnés. Onze donnent le nombre de patients qui se sont présentés mais ne tiennent pas registre des traitements donnés, tandis que 17 autres ne tiennent compte que de ces traitements. Les 34 hôpitaux ayant déclaré le nombre de traitements et le nombre de patients, rapportent 219,084 patients reçus et 630,174 traitements donnés ou une moyenne de 2.9 traitements par patient.

Le nombre d'hôpitaux ayant des dispensaires de bienfaisance (service social) en 1937, est de 41. Les hôpitaux généraux publics ont 56.1 p.c. de tous les dispensaires de bienfaisance déclarés. Le nombre de personnes rémunérées au service de ces dispensaires est de 103.

HOPITAUX DU DOMINION

Le ministère des Pensions et de la Santé Nationale administre et maintient huit hôpitaux pour le traitement des pensionnés infirmes et des anciens combattants. Ces hôpitaux ont une capacité totale de 2,620 lits. Les admissions s'établissent à 6,224, les sorties à 6,258 et les décès à 223. (Voir tableau 35.)

Les institutions de l'Etat et autres ont pourvu au soin de 713 anciens combattants dont 271 ont été libérés des hôpitaux et 65 sont décédés, ce qui au 31 mars 1937, laisse un total de 377 dans ces hôpitaux. (Voir tableau 36.)

La section de la Santé Nationale du ministère des Pensions et de la Santé Nationale administre les hôpitaux pour lépreux, de la Marine, de Quarantaine et d'Immigration. Les données principales sur ces hôpitaux sont indiquées aux tableau 37 et 38.

Le ministère des Mines et Ressources entretient huit hôpitaux d'une capacité totale de 231 lits et ayant un personnel global de 79. Les détails principaux à ce sujet sont donnés au tableau 39.

Le ministère de la Défense Nationale maintient neuf hôpitaux d'une capacité totale de 352 lits et ayant un personnel global de 114. Le nombre de patients soignés dans ces hôpitaux au cours de l'année terminée le 31 mars 1937, est de 2,928, avec séjour collectif de 29,363 jours. (Voir tableau 40.)

La tableau suivant donne le nombre d'hôpitaux du Dominion, classifiés par province et par type:

Province	Totaux	Ministère des Pensions et de la Santé Nationale				Ministère des Mines et Ressources	Ministère de la Défense Nationale
		Anciens combattants (x)	Quarantine	Marins	Lépreux

(x) Y compris un hôpital d'immigration.

ORDRE DES INFIRMIERES VICTORIA  
ET  
SOCIETE CANADIENNE DE LA CROIX ROUGE

Ordre des infirmières Victoria -

En 1936, l'Ordre des Infirmières Victoria administre 84 succursales ainsi réparties à travers le Canada: Nouvelle-Ecosse, 14; Nouveau-Brunswick, 6; Québec, 5; Ontario, 46; Manitoba, 1; Saskatchewan, 3; Alberta, 2; Colombie Britannique, 7. Le personnel global de ces succursales est de 59,865. Les infirmières ont été appelées auprès de 84,144 cas; elles ont fait 729,569 visites; assisté à 14,712 naissances vivantes et à 372 cas de mortalité.

Société Canadienne de la Croix Rouge -

Les statistiques des patients hospitalisés dans les hôpitaux de la Croix Rouge sont comprises dans les tableaux du mouvement de la population sous l'en-tête "Croix Rouge". Le tableau 40 montre le nombre de patients externes traités dans ces hôpitaux, dans les cliniques et à la maison, de même que le nombre de naissances assistées à domicile, le nombre d'écoles visitées, d'enfants examinés et de personnes assistées dans chaque province où il y a des succursales de la Croix Rouge. Le nombre de patients externes traités est de 29,507; de naissances assistées à domicile, 135; d'écoles visitées, 613; d'enfants examinés, 20,378; ce qui donne un total de 50,020 personnes ayant reçu des soins au cours de l'année.
