P R E F A C E

This report of hospitals in Canada for the care of the sick covers the year 1938 together with comparative figures in similar tables for the years 1934 - 38. Comparative figures for the years previous to 1934 were given in earlier reports. Statistics on hospitals for the mentally sick, feeble minded and epileptic appear in the Annual Report of Mental Institutions while those for tuberculous patients under care in sanatoria appear in the Annual Report of Tuberculosis Institutions.

This report is divided into three sections. Section I, under the heading "General Information", gives the number, types and distribution of public and private hospitals operating in Canada in 1938, their bed capacities, personnel, medical and social services, schools of nursing, organized out-patient departments and other data dealing with the internal administration of the hospitals.

Under "Movement of Population" is shown the number of admissions, live and still births, total under care, discharges, deaths, collective days' stay, and average days' stay in the general division of public hospitals, also in contagious and tuberculosis units of public hospitals as well as the movement of population in private hospitals.

Section II presents statistics on hospitals operated and controlled by the Dominion Government of Canada.

Section III shows the activities of the Victorian Order of Nurses for Canada and of the Canadian Red Cross Society.

A list of all hospitals with their location and bed capacities which operated in Canada in 1938 appear at the end of this report.

The Dominion Bureau of Statistics wishes to extend its thanks to all who contributed data for this report.

P R E F A C E

Ce rapport sur les hôpitaux du Canada affectés au soin des malades porte sur l'année 1938 et donne dans ses tableaux des chiffres comparatifs pour les années 1934 - 38. Les chiffres comparatifs des années qui précèdent 1934 paraissent dans des rapports antérieurs. Les statistiques sur les hôpitaux pour maladies mentales, faibles d'esprit et épileptiques sont publiées dans le rapport annuel sur les Institutions pour Maladies Mentales. Celles des tuberculeux dans les sanatoria paraissent dans le rapport annuel sur les Institutions pour Tuberculeux.

Ce rapport se divise en trois sections. Sous la rubrique "renseignements généraux", la section I donne le nombre, le type et la distribution des hôpitaux publics et privés du Canada en 1938, leur capacité en lits, leur personnel, leurs services médicaux et sociaux, leurs écoles d'infirmérie, leurs départements organisés pour patients externes et autres détails sur la régie interne.

Sous l'en-tête "mouvement de la population" paraît le nombre d'admissions, les nés vivants et les mort-nés, le nombre de patients sous soins, les sorties, les décès, le séjour collectif et le séjour moyen dans la division générale des hôpitaux publics, les unités de ces hôpitaux affectées aux maladies contagieuses et la tuberculose, de même que le mouvement de la population dans les hôpitaux privés

La section II donne les statistiques sur les hôpitaux administrés et contrôlés par le gouvernement fédéral.

La section III porte sur les activités de l'Ordre des Infirmières Victoria et la Société Canadienne de la Croix Rouge.

Une liste de tous les hôpitaux du Canada en 1938, comprenant leur localité et leur capacité en lits, paraît à la fin de ce rapport.

Le Bureau Fédéral de la Statistique désire remercier tous ceux qui ont collaboré à ce rapport en fournissant des données.

## INTRODUCTION

In previous years, tuberculosis institutions were included in the report on hospitals for the sick but the increased amount of information now being collected concerning patients in sanatoria through the individual card system now in use in all sanatoria made it necessary to issue a separate report for tuberculosis institutions.

Owing to the increase in the number of public hospitals with units or annexes set apart for the care and treatment of tuberculous patients, it was considered advisable to show the movement of patients in these units separately in this report. In Table 34 the location and names of hospitals having such units are shown together with the number of beds set apart for tuberculous patients and the movement of population. As the length of stay of tuberculous patients in hospital is considerably longer than that of patients in the general division of the hospital, the movement of patients in these units is not included in any of the previous tables showing movement of population but the beds set apart for tuberculous patients are included in the bed capacity as shown in Table 1.

The classified information appearing in the various tables of Part I of this report was obtained from the annual reports submitted by the hospitals to the Dominion Bureau of Statistics. The Departments of Pensions and National Health, National Defence, and Mines and Resources supplied the information for the statistics appearing in Part II, and the Canadian Red Cross Society and the Victorian Order of Nurses supplied the information given under Part III.

For statistical purposes hospitals in Canada are divided into five main groups. The number of hospitals in each group together with their total bed capacities for the year under review were as follows:

<u>Group</u>	<u>Number</u>	<u>Capacities</u>
Public	611	50,074
Private	267	2,704
Dominion	32	3,422
Sanatoria	39	8,026
Mental	57	38,671
Totals	<u>1,006</u>	<u>102,897</u>

Only the first three classes of hospitals are dealt with in this report. Statistics covering mental hospitals and tuberculosis institutions are published in separate annual reports.

For statistical purposes a public hospital is defined as one not operated for profit and which accepts the various classes of the community regardless of their ability to pay for the treatment received.

Of the 611 Public hospitals mentioned above, 486 were General, that is, they provide medical and surgical care and treatment for all ordinary cases of illness; 11 were Women's hospitals, 11 Paediatric, 16 Isolation, 11 Convalescent, 39 Red Cross, 20 Incurable, and 17 which do not lend themselves to classification under the above headings.

The distribution of hospitals and their available bed capacities have great social significance and in Table 1 we show the number and type of hospitals operating in each province, and the beds, cribs and bassinets available.

The number of hospitals operating in 1938 was 878, an increase of 53 over the previous year. Public hospitals showed an increase of 27, and Private hospitals an increase of 26, thus increasing the bed capacity of all hospitals by 1,622 over those of the previous year.

The most important facts in hospital services for the year 1938 are set out below.

### Patients under care -

The number of persons under care in these hospitals during the year was 940,337 distributed as follows:

Public and private hospitals .....	920,362
Tuberculosis units in public hospitals .....	3,332
Dominion hospitals .....	16,643

Admissions -

The number of admissions totalled 903,141 distributed as follows:

Public and private hospitals .....	886,644
Tuberculosis units in public hospitals ..	2,195
Dominion hospitals .....	14,302

Of the total number of admissions in public and private hospitals 792,297 were adults and children and 94,347 were infants born in hospital. Still births totalled 3,206 and formed 3.4 per cent of the total live births reported.

Discharges and deaths -

Discharges totalled 868,388 distributed as follows:

Public and private hospitals .....	852,770
Tuberculosis units in public hospitals ..	1,559
Dominion hospitals .....	14,059

Deaths totalled 33,712 distributed as follows:

Public and private hospitals .....	32,857
Tuberculosis units in public hospitals ..	519
Dominion hospitals .....	336

Total deaths formed 3.6 per cent of the total patients under care and 3.9 per cent of the total discharges.

Patient Days -

The total patient days reported totalled 14,073,171 distributed as follows:

Public and private hospitals .....	13,535,605
Tuberculosis units in public hospitals ..	432,286
Dominion hospitals .....	105,280

The eight hospitals under the Department of Pensions did not report collective days' stay.

The average daily number of patients in all public and private hospitals during the year was 35,937.9 showing an increase of .9 per cent over the daily average for the previous year.

The average daily stay of patients in public hospitals was 15.1 days for adults and children and 12.0 days for newborn. Similar figures for private hospitals are 13.9 and 9.8.

Personnel -

The total personnel of all hospitals reporting this information was 38,289 distributed as follows:

Personnel	Public Hospitals	Private Hospitals	Dominion * Hospitals
Salaried Doctors .....	585	75	39
Interns .....	782	-	-
Graduate Nurses .....	7,205	459	45
Student Nurses and Probationers ..	9,448	19	-
Graduate and Student Dietitians ..	389	-	-
Others .....	18,414	676	153
Totals .....	36,823	1,229	237

Approved schools of nursing were conducted by 179 hospitals, of which number 177 were in public hospitals and 2 in private hospitals. These schools had a total of 9,467 student nurses and probationers showing an average of 52.6 per school, with an average of 2.6 patients to each student nurse.

The following supplementary table gives the chief data concerning approved schools of nursing in Canada.

\* Eight Pension hospitals not included.

Province	Number of approved schools	Beds, cribs and bassinets	Student Nurses	Average Capacity	Daily average number of patients	Average patients per student nurse
Prince Edward Island ..	3	275	75	91.7	159.1	2.1
Nova Scotia .....	14	1,547	540	110.5	1,096.9	2.0
New Brunswick .....	12	1,381	426	115.0	835.8	2.0
Quebec .....	38	10,360	1,962	272.6	7,466.0	3.8
Ontario .....	64	13,018	3,359	203.4	7,748.6	2.3
Manitoba .....	18	3,135	885	174.2	2,038.6	2.3
Saskatchewan .....	10	1,910	645	191.0	1,419.9	2.2
Alberta .....	11	2,323	781	211.2	1,686.3	2.2
British Columbia .....	9	3,049	794	338.8	2,034.9	2.6
CANADA .....	179	36,998	9,467	206.7	24,466.1	2.6

#### Organized Medical Staffs and Services -

An organized medical staff is one with duly elected officers, through which the doctors working in a hospital exercise supervision over the clinical work of the hospital, hold monthly meetings, discuss the clinical work performed, provide for the setting up of services or, in the case of small hospitals, of clinical committees. The number of such organized staffs was 268. The number of staff doctors on these organized staffs was 8,274.

The number of hospitals with unorganized staffs was 542, of which number 233 were private hospitals. The number of doctors in attendance at these hospitals was 3,752.

The number of organized services in general public hospitals under the supervision of a director or head responsible for the work of his department was 1,665, an increase of 6.7 per cent over 1937 and of 19.4 per cent over 1934. X-Ray, general surgery, general medicine, clinical laboratory and obstetrics were the most highly organized services in public hospitals. Table 11 shows by provinces the number of X-Ray, clinical laboratories and physio-therapy departments in each type of hospital. The compilation revealed that out of the 877 public and private hospitals reporting, 519 had X-Ray departments, 333 clinical laboratories and 241 physio-therapy departments. Out of the 610 public hospitals 458 or 75.1 per cent had X-Ray Departments, 293 or 48.0 per cent had clinical laboratories and 200 or 32.8 per cent had physio-therapy departments.

#### Organized Out-patient Department's and Social Service Departments -

Since the definition of an organized public out-patient was promulgated, the number of hospitals reporting organized out-patient departments has been considerably reduced from the number given in previous years. Before this definition was established, many hospitals through misunderstanding the question reported having such a department when, strictly speaking, they had only a non-organized out-patient service. Only hospitals with completely organized departments are shown in Table 12. Although the figures on organized public out-patient departments are rather complete, nevertheless they lack full statistical value as the figures are not reported on a uniform basis. Out of the 58 organized public out-patient departments, only 39 supply full information giving the number of patients as also the number of treatments given. Seven supply the number of patients who attended but do not keep records of the treatments given, while 12 keep records of treatments only. The 39 hospitals that reported treatments and patients show that 416,669 patients received 1,337,439 treatments or an average of 3.2 treatments per patient.

The number of hospitals reporting social service departments in 1938 was 41. General public hospitals had 56.1 per cent of the total social service departments reported. The number of paid social service workers in connection with these services was 103.

#### DOMINION HOSPITALS

The Department of Pensions and National Health operates and maintains eight hospitals for the treatment of disability pensioners and war veterans. These hospitals had a total capacity of 2,620 beds. The number of admissions was 7,153, discharges 7,054 and deaths 245. (See Table 35.)

Veterans' care cases in departmental and other institutions totalled 831 veterans, of which 320 were discharged and 104 died leaving 407 on strength March 31, 1938. (See Table 36.)

The National Health section of the Department of Pensions and National Health controls Leper, Marine, Quarantine and Immigration hospitals. The leading data on these hospitals are shown in Tables 37 and 38.

- x -

The Department of Mines and Resources operates eight hospitals having a total bed capacity of 266 and a total personnel of 88. Leading data on these hospitals are shown in Table 39.

The Department of National Defence operates nine hospitals with a total bed capacity of 352 and a total personnel of 120. The total number under care in these hospitals during the year ending March 31, 1938 was 3,471 with a collective days' stay of 36,586 days. (See Table 40.)

The distribution by provinces of Dominion Hospitals by type is shown in the following table:

Province	Total	Department of Pensions and National Health			Department of Mines and Resources		Department of National Defence	
		War Veterans <sup>1</sup>	Quarantine (x)	Marine	Leper	Indians	Military	
Nova Scotia .....	4	1	1	1	-	-	1	
New Brunswick .....	3	1	1	-	1	-	-

British Columbia ...	4	1	1	-	1	-	1	
CANADA .....	32	8	4	1	2	8	9	

(x) Includes one Immigration hospital.

VICTORIAN ORDER OF NURSES

AND

THE CANADIAN RED CROSS SOCIETY

Victorian Order of Nurses -

In 1938 the Victorian Order of Nurses operated 89 branches distributed throughout Canada as follows: Nova Scotia, 15; New Brunswick, 6; Quebec, 5; Ontario, 49; Manitoba, 1; Saskatchewan, 3; Alberta, 2; and British Columbia, 8. The number of staff hours on duty in the various branches totalled 699,980 hours. Total cases attended, 84,697; visits, 765,969; live births attended, 15,006 and still births 313.

Canadian Red Cross Society -

Statistics of in-patients in Red Cross hospitals are included in the movement of population tables under "Red Cross". In Table 40 is shown the number of out-patients treated at Red Cross hospitals, in clinics, and at home, together with the number of births attended in homes, schools visited, children examined and total individuals attended in each province in which the Society operated. The number of out-patients treated was 38,154; births attended at home, 190; schools visited, 570; children examined, 18,796; giving a total of 57,140 individuals receiving care during the year.

## INTRODUCTION

Les années passées, les institutions pour tuberculeux étaient comprises dans le rapport sur les hôpitaux effectués au soin des malades, mais la somme croissante de renseignements, qui sont maintenant colligés sur les sanatoriums au moyen d'un système de fiches particulières en usage dans toutes ces maisons, exige la publication d'un rapport séparé.

En raison de l'augmentation du nombre d'hôpitaux publics ayant des unités ou annexes séparées pour le soin et le traitement des tuberculeux, il a été jugé préférable d'indiquer séparément dans ce rapport le mouvement des patients dans ces unités. Dans le tableau 34 sont indiqués la localité et le nom des hôpitaux ayant de ces unités, le nombre de lits réservés aux tuberculeux et le mouvement des patients. Comme le séjour des tuberculeux à l'hôpital est beaucoup plus long que celui des patients des divisions générales, le mouvement des patients dans les unités n'est indiqué dans aucun autre tableau antérieur montrant le mouvement des patients; par contre toutefois, les lits réservés aux tuberculeux sont compris dans la capacité en lits telle que donnée au tableau 1.

Les renseignements classifiés tels qu'ils paraissent aux différents tableaux de la partie I de ce rapport ont été puisés aux rapports annuels soumis par les hôpitaux au Bureau Fédéral de la Statistique. Les ministères des Pensions et de la Santé Nationale, de la Défense Nationale et des Mines et Ressources ont fourni les renseignements pour les statistiques de la partie II, tandis que la Croix Rouge et l'Ordre des Infirmières Victoria ont fourni ceux de la partie III.

Pour fins statistiques les hôpitaux du Canada sont divisés en cinq groupes principaux. Le nombre d'hôpitaux dans chaque groupe de même que leurs capacités en lits pour l'année sous revue sont les suivants:

<u>Groupe</u>	<u>Nombre</u>	<u>Capacité</u>
Hôpitaux publics	611	50,074
Hôpitaux privés	267	2,704
Hôpitaux fédéraux	32	3,422
Sanatoriums	39	8,026
Hôpitaux pour aliénés	57	38,671
Totaux	1,006	102,897

Seulement les trois premières classes d'hôpitaux sont comprises dans ce rapport. Les statistiques couvrant les hôpitaux pour aliénés et les institutions pour tuberculeux sont publiées dans des rapports annuels séparés.

Pour les fins statistiques un hôpital public est défini comme un établissement exploité sans profit et qui accepte les diverses classes de la population sans égard à leur capacité de payer pour les soins reçus.

Les 611 hôpitaux publics mentionnés ci-dessus se divisent comme suit: généraux, c.-à-d. fournissant des soins et traitements médicaux et chirurgicaux pour tous les cas ordinaires de maladie, 486; pour femmes, 11; de pédiatrie, 11; d'isolation, 16; de convalescence, 11; de la Croix Rouge, 39; pour incurables, 20; et 17 qui ne se prêtent pas à la classification des en-têtes susmentionnés.

La distribution des hôpitaux et leur capacité en lits ont une grande importance sociale. Le tableau 1 donne le nombre et le type des hôpitaux opérant dans chaque province avec leur capacité en lits, lits d'enfants et berceaux.

Le nombre d'hôpitaux en 1938 est de 878, augmentation de 53 sur l'année précédente. Les hôpitaux publics montrent une augmentation de 27 et les hôpitaux privés une augmentation de 26, ce qui élève la capacité en lits de tous les hôpitaux de 1,622 lits sur l'année précédente.

Les faits les plus importants dans les services hospitaliers en 1938 sont donnés ci-dessous.

### Patients en soins -

Les nombre de personnes en soins dans ces hôpitaux durant l'année est de 940,337, ainsi réparties:

Hôpitaux publics et privés .....	920,362
Unités pour tuberculeux dans les hôpitaux publics ....	3,332
Hôpitaux fédéraux .....	16,643

Admissions -

Le nombre d'admissions s'établit à 903,141, ainsi réparties:

Hôpitaux publics et privés .....	886,644
Unités pour tuberculeux dans les hôpitaux publics ..	2,195
Hôpitaux fédéraux .....	14,302

Du nombre total d'admissions dans les hôpitaux publics et privés, 792,297 étaient des adultes et des enfants et 94,347 des bébés nés à l'hôpital. Les mort-nés s'établissent à 3,206 et constituent 3.4 p.c. du total des naissances.

Sorties et décès -

Les sorties s'élèvent à 868,388, ainsi réparties:

Hôpitaux publics et privés .....	852,770
Unités pour tuberculeux dans les hôpitaux publics ..	1,559
Hôpitaux fédéraux .....	14,059

Les décès dans les hôpitaux atteignent 33,712, ainsi répartis:

Hôpitaux publics et privés .....	32,857
Unités pour tuberculeux dans les hôpitaux publics ..	519
Hôpitaux fédéraux .....	336

Le total des décès constitue 3.6 p.c. du total des patients en soins et 3.9 p.c. du total des sorties.

Jours-patient -

Le total de jours-patient s'établit à 14,073,171, ainsi répartis:

Hôpitaux publics et privés .....	13,535,605
Unités pour tuberculeux dans les hôpitaux publics ..	432,286
Hôpitaux fédéraux .....	105,280

Les huit hôpitaux qui relèvent du ministère des Pensions et de la Santé Nationale n'ont pas déclaré leurs séjour collectif.

La moyenne quotidienne de patients dans tous les hôpitaux publics et privés au cours de l'année est de 35,937.9, augmentation de .9 sur la moyenne quotidienne de l'année précédente.

Le séjour moyen quotidien des patients dans les hôpitaux publics est de 15.1 jours pour les adultes et les enfants et de 12.0 pour les nouveau-nés. Les chiffres correspondants pour les hôpitaux privés sont de 13.9 et 9.8.

Personnel -

Le personnel global de tous les hôpitaux ayant fourni ce renseignement est de 38,289, ainsi réparti:

Personnel	Hôpitaux publics	Hôpitaux privés	Hôpitaux fédéraux *
Médecins touchant traitement ....	585	75	39
Internes .....	782	-	-
Infirmières diplômées .....	7,205	459	45
Infirmières élèves et stagiaires ..	9,448	19	-
Diététiciens diplômés et élèves ..	389	-	-
Autres .....	18,414	676	153
Totaux .....	36,823	1,229	237

Il y a des écoles reconnues d'infirmérie dans 179 hôpitaux, dont 177 hôpitaux publics et 2 hôpitaux privés. Ces écoles ont un total de 9,467 infirmières élèves et stagiaires, ce qui donne une moyenne de 52.6 par école et une moyenne de 2.6 patients par infirmière élève.

\* Les huit hôpitaux du ministère des Pensions ne sont pas compris.

Le tableau supplémentaire suivant donne les renseignements principaux sur les écoles d'infirmierie reconnues au Canada.

Province	Nombre d'écoles reconnues	Lits, lits d'enfants et berceaux	Infirmières élèves	Capacité moyenne	Moyenne quotidienne de patients	Moyenne de patients par infirmière élève
Île du Prince-Edouard .....	3	275	75	91.7	159.1	2.1
Nouvelle-Ecosse .....	14	1,547	540	110.5	1,096.9	2.0
Nouveau-Brunswick .....	12	1,381	426	115.0	835.8	2.0

#### Services et personnels médicaux organisés -

Un personnel médical organisé est un personnel dont les officiers sont dûment élus et au moyen duquel les médecins attachés à un hôpital exercent la surveillance sur le travail de clinique, tiennent des réunions mensuelles, étudient le travail de clinique, pourvoient à l'organisation de services ou, dans le cas de petits hôpitaux, de comités de clinique. Le nombre de ces personnels organisés est de 268 et le nombre de médecins qui en font partie, de 8,274.

Le nombre d'hôpitaux n'ayant pas de personnel organisé est de 543, dont 233 sont des hôpitaux privés. Le nombre de médecins qui y soignent les malades est de 3,752.

Le nombre de services organisés dans les hôpitaux généraux publics sous la surveillance d'un directeur ou d'un chef responsable de son service est de 1,665, augmentation de 6.7 p.c. sur 1937 et de 19.4 p.c. sur 1934. La radiologie, la chirurgie générale, la médecine générale, le laboratoire clinique et l'obstétrique sont les services les mieux organisés des hôpitaux publics. Le tableau 11 indique, par province, le nombre d'appareils de radiologie, de laboratoires cliniques et de services de physiothérapie dans chaque genre d'hôpital. La compilation révèle que sur 877 hôpitaux publics et privés faisant rapport, 519 ont des services radiologiques, 333 des laboratoires cliniques et 241 des départements de physiothérapie. Des 610 hôpitaux publics, 458 ou 75.1 p.c. ont des services de radiologie, 293 ou 48.0 p.c. des laboratoires cliniques et 200 ou 32.8 p.c. des services de physiothérapie.

#### Dispensaires organisés pour patients externes et aispensaires de bienfaisance -

Depuis la promulgation de la définition d'un patient externe public, le nombre d'hôpitaux déclarant des dispensaires organisés pour patients externes a considérablement diminué comparativement aux années antérieures. Avant l'adoption de cette définition, plusieurs hôpitaux, ayant mal interprété la question, avaient déclaré de tels dispensaires quand ils n'avaient en réalité que des services non organisés pour patients externes. Seuls les hôpitaux ayant des dispensaires complètement organisés figurent au tableau 12. Bien que les chiffres sur les dispensaires organisés pour patients externes soient assez complets, ils n'ont pas toute leur valeur statistique parce qu'ils ne sont pas déclarés sur une base uniforme. Des 58 dispensaires organisés pour patients externes, 39 seulement donnent des renseignements complets comprenant le nombre de patients et le nombre de traitements donnés. Sept donnent le nombre de patients qui se sont présentés mais ne tiennent pas registre des traitements donnés, tandis que 12 autres ne tiennent compte que de ces traitements. Les 39 hôpitaux ayant déclaré le nombre de traitements et le nombre de patients rapportent 416,669 patients reçus et 1,337,439 traitements donnés ou en moyenne 3.2 traitements par patient.

Le nombre d'hôpitaux ayant des dispensaires de bienfaisance (service social) en 1938, est de 41. Les hôpitaux généraux publics ont 56.1 p.c. de tous les dispensaires de bienfaisance déclarés. Le nombre de personnes rémunérées au service de ces dispensaires est de 103.

#### HOPITAUX FEDERAUX

Le ministère des Pensions et de la Santé Nationale administre et maintient huit hôpitaux pour le traitement des pensionnés infirmes et des anciens combattants. Ces hôpitaux ont une capacité totale de 2,620 lits. Les admissions s'établissent à 7,153, les sorties à 7,054 et les décès à 245. (Voir tableau 35.)

Les institutions de l'Etat et autres ont pourvu au soin de 831 anciens combattants dont 320 ont été libérés des hôpitaux et 104 sont décédés, ce qui au 31 mars 1938 laisse un total de 407 dans ces hôpitaux. (Voir tableau 36.)

La section de la Santé Nationale du ministère des Pensions et de la Santé Nationale administre les hôpitaux pour lépreux, de la Marine, de Quarantaine et d'Immigration. Les données principales sur ces hôpitaux sont indiquées aux tableau 37 et 38.

Le ministère de Mines et Ressources entretient huit hôpitaux d'une capacité totale de 266 lits et ayant un personnel global de 88. Les détails principaux à ce sujet sont donnés au tableau 39.

Le ministère de la Défense Nationale maintient neuf hôpitaux d'une capacité totale de 352 lits et ayant un personnel de 120. Le nombre de patients soignés dans ces hôpitaux au cours de l'année terminée le 31 mars 1938, est de 3,471, avec séjour collectif de 36,586 jours. (Voir tableau 40.)

Le tableau suivant donne le nombre d'hôpitaux fédéraux, classifiés par province et par type:

Province	Totaux	Ministère des Pensions et de la Santé Nationale			Ministère des Mines et Ressources	Ministère de la Défense Nationale	
		Anciens combattants	Quaran- taine (x)	Marins	Lépreux		
Nouvelle-Ecosse .....	4	1	1	1	-	-	1
Nouveau-Brunswick .....	3	1	1	-	1	-	-
Québec .....	4	1	1	-	-	-	2
Ontario .....	7	2	-	-	-	1	4
Manitoba .....	4	1	-	-	-	2	1
Saskatchewan .....	1	-	-	-	-	1	-
Alberta .....	5	1	-	-	-	4	-
Colombie Britannique ..	4	1	1	-	1	-	1
CANADA .....	32	8	4	1	2	8	9

(x) Y compris un hôpital d'immigration.

**ORDRE DES INFIRMIERES VICTORIA**

ET

**SOCIETE CANADIENNE DE LA CROIX ROUGE**

Ordre des infirmières Victoria -

En 1938, l'Ordre des Infirmières Victoria administre 89 succursales ainsi réparties à travers le Canada: Nouvelle-Ecosse, 15; Nouveau-Brunswick, 6; Québec, 5; Ontario, 49; Manitoba, 1; Saskatchewan, 3; Alberta, 2; et Colombie Britannique, 8. Le nombre d'heures en devoir du personnel dans les diverses succursales s'établit à 699,980. Les infirmières ont été appelées auprès de 84,697 cas; elles ont fait 765,969 visites; assisté à 15,006 naissances vivantes et à 313 cas de mortalité.

Société Canadienne de la Croix Rouge -

Les statistiques des patients hospitalisés dans les hôpitaux de la Croix Rouge sont comprises dans les tableaux du mouvement de la population sous l'en-tête "Croix Rouge". Le tableau 40 montre le nombre de patients externes traités dans ces hôpitaux, dans les cliniques et à la maison, de même que le nombre de naissances assistées à domicile, le nombre d'écoles visitées, d'enfants examinés et de personnes assistées dans chaque province où il y a des succursales de la Croix Rouge. Le nombre de patients externes traités est de 38,154; de naissances assistées à domicile, 190; d'écoles visitées, 570; d'enfants examinés, 18,796; ce qui donne un total de 57,140 personnes ayant reçu des soins au cours de l'année.
