OTTAWA CANADA

Dominion Statistician: R. H. Coats, LL.D., F.R.S.C., F.S.S.(Hon.)

Institutional Statistics Branch

Chief: J. C. Brady, M.A.

P R E F A C E

This report of hospitals in Canada for the care of the sick covers the year 1939. Statistics on hospitals for the mentally sick, feeble minded and epileptic appear in the Annual Report of Mental Institutions while those for tuberculous patients under care in sanatoria appear in the Annual Report of Tuberculosis Institutions.

This report is divided into five sections. Section I, under the heading "General Information", gives the number, types and distribution of public hospitals operating in Canada in 1939, their bed capacities, personnel, medical and social services, schools of nursing, organized out-patient departments and other data dealing with the internal administration of the hospitals.

Under "Movement of Population" is shown the number of admissions, live and still births, total under care, discharges, deaths, collective days' stay, and average days' stay in the general division of public hospitals, and in contagious and tuberculosis units of public hospitals.

Section II shows general information and movement of population in private hospitals.

Section III presents statistics on hospitals operated and controlled by the Dominion Government of Canada.

Section IV shows the activities of the Victorian Order of Nurses for Canada and of the Canadian Red Cross Society.

Section V shows a list of all hospitals, with their location and bed capacities, which operated in Canada in 1939.

The Dominion Bureau of Statistics wishes to extend its thanks to all who contributed data for this report.

R.H. Coats.

Branche de la Statistique des Institutions

Chef: J. C. Brady, M.A.

P R E F A C E

Ce rapport sur les hôpitaux du Canada affectés au soin des malades porte sur l'année 1939. Les statistiques sur les hôpitaux pour maladies mentales, faibles d'esprit et épileptiques sont publiées dans le rapport annuel sur les Institutions pour Maladies Mentales. Celles des tuberculeux dans les sanatoria paraissent dans le rapport annuel sur les Institutions pour Tuberculeux.

Ce rapport se divise en cinq sections. Sous la rubrique "renseignements généraux", la section I donne le nombre, le type et la distribution des hôpitaux publics du Canada en 1939, leur capacité en lits, leur personnel, leurs services médicaux et sociaux, leurs écoles d'infirmières, leurs départements organisés pour patients externes et autres détails sur la régie interne.

Sous l'en-tête "mouvement de la population" paraît le nombre d'admissions, les nés vivants et les mort-nés, le nombre de patients sous soins, les sorties, les décès, le séjour collectif et le séjour moyen dans la division générale des hôpitaux publics et les unités de ces hôpitaux affectées aux maladies contagieuses et la tuberculose.

La section II donne des informations générales et le mouvement de la population dans les hôpitaux privés.

La section III donne les statistiques sur les hôpitaux administrés et contrôlés par le gouvernement fédéral.

La section IV porte sur les activités de l'Ordre des Infirmières Victoria et la Société Canadienne de la Croix Rouge.

La section V donne une liste de tous les hôpitaux du Canada en 1939, comprenant leur localité et leur capacité en lits.

Le Bureau Fédéral de la Statistique désire remercier tous ceux qui ont collaboré à ce rapport en fournissant des données.

R.H.Coats.

Statisticien du Dominion.

Liste des hôpitaux en opération au Canada en 1939	68 - 83

The classified information presented in this report covers all Public, Private and Dominion hospitals operating in Canada during the year 1939. Statistical data covering Mental Hospitals and Tuberculosis Institutions are presented in separate reports.

The data compiled for public and private hospitals were obtained from the annual reports submitted by each hospital, while data on Dominion hospitals were supplied by the Departments of Pensions and National Health, Mines and Resources and National Defence and forwarded to the Bureau. Additional information covering the activities of the Victorian Order of Nurses and the Canadian Red Cross Society are also included.

Part one of the report deals exclusively with public hospitals as defined under the various Provincial Hospital Acts. Tables 1 to 16 cover general information while Tables 17 to 37 are devoted to the movement of population. Part two deals with Private hospitals, part three with Dominion hospitals while part four covers activities of the Victorian Order of Nurses and the Red Cross Society. Part five gives a list of hospitals operating in Canada during the year. Although Incurable hospitals come under the class of public hospitals, statistics covering the movement of patients in this latter class of hospitals are shown separately in Tables 35 and 36. Patients admitted to Incurable hospitals are long-stay patients and their inclusion with patients in other Public hospitals, where the average length of stay is considerably shorter, would unduly increase the average length of stay of patients in the general division of public hospitals. Similarly, the movement of patients in tuberculosis units in public hospitals is tabulated separately and is not included in the main tables as this information appears in the Annual Report for Tuberculosis Institutions.

Of the 587 public hospitals which take in general cases, 445 were hospitals of 100 beds or less with an average bed capacity of 39.2 beds, while 142 had over 100 beds with an average bed capacity of 260.

It is gratifying to be able to state that with the exception of two small isolation hospitals all Public and Private hospitals operating in Canada in 1939 forwarded reports to the Dominion Bureau of Statistics.

The following table gives the number of public, private and Dominion hospitals operating during the year. The marked expansion of hospitals operating and those being constructed under the control of the Dominion Government is particularly striking. The number of Dominion hospitals is as existed on September 24, 1940. Further expansion has taken place since that date.

(1) as at September 24, 1940

TABLES 1 to 16 - GENERAL INFORMATION

The total personnel of all public and private hospitals was 37,820. Of this number, 689 were salaried doctors, 815 medical interns, 7,907 graduate nurses, 8,358 student nurses, 1,296 probationers, 396 graduate and student dietitians and all others numbered 18,359.

One hundred and seventy-one public and one private hospitals reported having approved schools of nursing, of which number fifty-four had University affiliation. The number of nurses graduated from these schools during the year was 2,740.

Organized Medical Staffs - Two hundred and fifty-one public hospitals reported having organized medical staffs with 8,809 staff doctors in attendance, while 286 hospitals reported non-organized medical staffs with 1,651 doctors attending. The number of organized services in public hospitals was 1,841, a substantial increase over the number reported in 1938. The most highly organized services in public hospitals were X-ray, general medicine, general surgery, obstetrics and clinical laboratory. Of the total public hospitals, 468 reported having X-Ray, 286 clinical laboratories and 218 physio-therapy facilities, while 66 private hospitals reported X-Ray, 44 clinical laboratory and 37 physio-therapy facilities.

Organized Out-patient Departments - Fifty-one public and six private hospitals reported having organized out-patient departments. Considering the increasing demands on the services rendered by these hospitals, statistics showing the scope and volume of this work have high social value. It is to be regretted, however, that up to the present the figures submitted cannot be considered satisfactory. A study is being made at present of the methods in use in recording patients attending public out-patient departments and it is expected that this study will lead to the obtaining of uniform statistics.

The number of public hospitals reporting social service departments was twenty-seven with sixty-eight paid social service workers.

TABLES 17 to 37 - MOVEMENT OF POPULATION

Bed complement and bed occupancy - 581 public hospitals reported fully on bed complement and movement of patients. The total bed complement, beds and cribs, of above hospitals was 44,749, of which total 38,140 were in General Public Hospitals. The percentage of the bed complement occupied in all public hospitals was 65.0. The percentage of beds occupied varied with the different types of hospitals as the following will show: - General, 66.9; Women's, 65.1; Children's, 85.1; Contagious Diseases, 38.7; Convalescent, 63.4; Incurable, 84.8; Red Cross, 48.7 and Public Hospitals unclassified, 40.2. The percentage of beds occupied in private hospitals was 44.1.

Tables 18 to 37 deal with the movement of patients in public hospitals. The movement of patients in Private and Dominion hospitals is shown under Part two and Part three respectively. The following remarks have reference to public hospitals other than Hospitals for Incurables.

Patients in hospital at beginning of year - In the 581 hospitals that gave complete information covering movement of patients, there were under care at the beginning of the year 28,713 persons, of which number 13,638 were males and 15,075 were females. Of this number, 22,336 or 93 per cent were in General Public Hospitals.

Admissions - The number of admissions during the year to public hospitals was 853,025, of which number 373,095 were males and 479,930 were females. The number of infants born in public hospitals was 92,350, of whom 47,473 were males and 44,877 were females.

Total under care - The total under care in public hospitals during the year was 881,738, of whom 386,733 were males and 495,005 were females.

Discharges and deaths - 1,851 persons were discharged alive from public hospitals during the year, of which number 354,845 were males and 467,006 were females. Of infants under care, 89,714 were discharged, 45,961 being males and 43,751 being females.

Deaths totalled 31,059, of which number 18,133 were males and 12,926 were females. Deaths within 48 hours after admission totalled 8,473 or 27.3 per cent of total deaths. Of those who died within 48 hours after admission, 5,035 were males and 3,438 were females, while of those who died after 48 hours, 13,098 were males and 9,488 were females.

Of infants born in hospital, 1,733 died within 48 hours after admission and 921 after 48 hours or more after admission.

The gross death rate, based on total patients under care during the year was 3.5 per 100 patients under care, while the percentage of institutional deaths more than 48 hours after admission was 2.5.

In hospital at end of year - The number of patients remaining in public hospitals at end of the year was 28,828, of which 13,755 were males and 15,073 were females. Of infants remaining in hospital, 1,346 were males and 1,262 were females.

Days of hospitalization - The total days' stay of all separations (discharges and deaths) was 11,301,910 days, giving an average days' stay of 13.1 days. For adults and children, the average days' stay was 13.4 days and for infants born in hospital 10.4 days.

The total days' stay of all patients under care in public hospitals during the year was 11,532,466 days. The daily average number of patients during the year was 31,560 and the average stay 13.4 days.

The average days' stay during the year of all patients under care in the different types of public hospitals were as follows:-

Class of Public Hospital	Adults and children	Newborn
General	12.7	10.3
Women's	11.1	10.8
Children's	19.1	-
Contagious Diseases	23.7	-
Convalescent	37.3	-
Red Cross	8.3	9.9
Not Classified	47.3	11.3

Births in Public Hospitals -

The total live births in Canada in 1939 was 235,420, of which number 95,214 were in public hospitals, and 6,275 in private hospitals. Total still births in Canada during the year was 6,357, of which number 3,176 were in hospitals. Forty-three per cent of all live births took place in hospitals during the year. Still births formed 3.1 per cent of total births in hospitals.

Hospitals for Incurables - The bed capacity of the twenty incurable hospitals was 3,074. The number of patients under care during the year was 4,081 and the number of admissions 1,518. Discharges totalled 625 and deaths 732. The collective days' stay of patients under care was 947,717 days and the average days' stay 232.2. The total personnel was 1,048, of whom 12 were salaried doctors and 133 were graduate nurses. Attending doctors totalled 146.

Tuberculosis Units in Public Hospitals - Twenty-one public hospitals had tuberculosis units. The movement of patients in these units are in addition to that shown in the general division of public hospitals in Tables 17 to 36. The total capacity in these units was 1,264 beds and the number of patients under care during the year was 2,925. There were 1,922 admissions, 1,398 discharges and 433 deaths during the year. The total patient days' was 388,279 and the average stay 128.3 days.

PRIVATE HOSPITALS

The number of private hospitals operating during the year was 276 with a total capacity of 3,915 beds. The total number of patients under care during the year was 36,766, of which number 6,229 were newborn. The number of admissions during the year was 35,294. Discharges totalled 34,132 and deaths 998. The total collective days' stay of patients was 597,915. The average stay of adults was 18.4 days and of infants born in hospital 12.5 days. The total personnel was 1,485, of which number 76 were salaried doctors and 511 were graduate nurses while 2,485 visiting doctors attended patients during the year.

DOMINION HOSPITALS -

Omitting hospitals under construction and construction approved, the number of Dominion hospitals operating as on September 24, 1940 was 91. The Dominion Government deemed it expedient that hospital facilities should be available for the prompt and treatment of members of the Canadian forces. Accordingly steps were taken to increase the number of Military hospitals by the Department of National Defence. This accounts for the very large increase in the number of Military hospitals which rose from 9 in 1938 to 67 in 1939 - 40. Besides above operating hospitals, 27 more were under construction and 43 in process of organization. It is expected that by the end of 1941 there will be 166 Military hospitals with a bed capacity of 7,220 beds.

VICTORIAN ORDER OF NURSES AND CANADIAN RED CROSS SOCIETY -

During 1939 the Victorian Order of Nurses operated 89 branches in Canada. The total number of cases treated was 85,249 and the number of visits 741,134. The number of live births under care was 17,027 and still births 324.

The Red Cross, besides operating 45 public hospitals, also operated 2,088 services throughout Canada. The Society conducted 1,231 classes for Home Nursing having an attendance of 30,174 pupils. They also conducted 80 Highway First Aid Posts. The number of persons receiving treatment at clinics and at home was 22,156. Births attended by Red Cross nurses in the home totalled 115, schools visited 622 and children examined 21,789.

INTRODUCTION

L'information classifiée présentée dans ce rapport porte sur tous les hôpitaux publics, privés et fédéraux au Canada en 1959. Les statistiques sur les hôpitaux pour maladies mentales et les institutions pour tuberculeux sont présentées comme rapports séparés.

Les données sur les hôpitaux publics et privés proviennent des rapports annuels de chaque hôpital tandis que celles des hôpitaux fédéraux sont fournies au Bureau par les Ministères des Pensions et de la Santé Nationale, des Mines et des Ressources et de la Défense Nationale. Le rapport comprend aussi d'autres renseignements sur l'œuvre de l'Ordre des Infirmières Victoria et de la Société de la Croix Rouge du Canada.

La première partie du rapport traite exclusivement des hôpitaux publics tels que définis d'après les diverses lois provinciales sur les hôpitaux. Les tableaux 1 à 16 contiennent des informations générales tandis que les tableaux 17 à 37 sont consacrés au mouvement de la population. La deuxième partie s'occupe des hôpitaux privés; la troisième partie des hôpitaux fédéraux; tandis que la quatrième partie porte sur l'œuvre de l'Ordre des Infirmières Victoria et de la Société de la Croix Rouge. La partie cinq donne la liste des hôpitaux en opération au Canada durant l'année. Bien que les hôpitaux pour incurables comptent parmi les hôpitaux publics, la statistique sur le mouvement des patients de cette dernière classe d'hôpitaux paraît aux tableaux 35 et 36. Les patients admis dans les hôpitaux pour incurables y restent longtemps et s'ils comptaient parmi les patients des autres hôpitaux publics, où le séjour moyen est considérablement plus court, le séjour moyen des patients dans la division générale des hôpitaux publics serait indûment allongé. De même, le mouvement des patients dans les sections pour tuberculeux des hôpitaux publics fait l'objet d'une tabulation séparée et n'entre pas dans les tableaux principaux comme cette information paraît dans le Rapport Annuel des Institutions pour Tuberculeux.

Sur les 587 hôpitaux publics à admettre des cas généraux, 445 sont des hôpitaux de 100 lits ou moins et d'une capacité moyenne de 39,2 lits; 142 ont plus de 100 lits et une capacité moyenne de 260 lits.

Il est agréable de noter que, à l'exception de deux petits hôpitaux d'isolation, tous les hôpitaux publics et privés en opération au Canada en 1959 ont envoyé des rapports au Bureau Fédéral de la Statistique.

Le tableau suivant donne le nombre d'hôpitaux publics, privés et fédéraux en opération durant l'année. L'expansion marquée des hôpitaux en opération et de ceux en construction sous le contrôle du Gouvernement Fédéral est particulièrement frappante. Le nombre d'hôpitaux fédéraux est donné tel qu'au 24 septembre 1940. Il y a eu d'autre expansion depuis lors.

TABLEAUX 1 à 16 - INFORMATION GENERALE

Le personnel global de tous les hôpitaux publics et privés est de 37,820 personnes. Sur ce nombre, il y a 689 médecins à salaire, 815 internes, 7,907 infirmières graduées, 8,358 infirmières-élèves, 1,296 stagiaires, 396 diététiciennes diplômées et élèves diététiciennes, et 18,359 toutes autres personnes.

Cent soixante et un hôpitaux publics et un hôpital privé déclarent avoir des écoles d'infirmierie approuvée parmi lesquelles 54 sont affiliées à une université. Le nombre d'infirmières graduées de ces écoles en 1939 est de 2,740.

Personnels médicaux organisés - Il y a un personnel médical organisé dans 251 hôpitaux publics comprenant 8,809 médecins attachés; les 286 hôpitaux avec personnel non organisé comptent 1,651 médecins visiteurs. Les services organisés dans les hôpitaux publics se chiffrent à 1,841, soit une importante augmentation sur 1938. Les services le plus hautement organisés dans les hôpitaux publics sont la radiographie, la médecine générale, la chirurgie générale, l'obstétrique et le laboratoire de clinique. Parmi tous les hôpitaux privés ont la radiographie, 468 déclarent la radiographie, 286 le laboratoire de clinique et 218 les facilités de physio-thérapie, tandis que 66 hôpitaux privés ont la radiographie, 44 un laboratoire de clinique et 37 des facilités de physio-thérapie.

Dispensaires organisés pour patients externes - Cinquante et un hôpitaux publics et six hôpitaux privés déclarent des dispensaires organisés pour patients externes. En raison de la demande croissante pour les services que rendent ces hôpitaux, la statistique sur la portée et l'ampleur de cette œuvre possède une haute valeur sociale. Il est à regretter, cependant, qu'on ne puisse pas jusqu'à présent considérer comme satisfaisants les chiffres soumis. On est à étudier les méthodes en usage pour l'enregistrement des patients des dispensaires pour externes et l'on s'attend que cette étude permettra d'obtenir des statistiques uniformes.

Le nombre d'hôpitaux publics avec département de service social est de 27; il y a 68 zélateurs du service social payés.

TABLEAUX 17 à 37 - MOUVEMENT DE LA POPULATION

Nombre de lits et lits occupés - 581 hôpitaux publics déclarent pleinement le nombre de lits et le mouvement des patients. Le nombre total de lits, lits et lits d'enfants des hôpitaux ci-dessus est de 44,749 dont 38,140 se trouvent dans les hôpitaux publics généraux. Le pourcentage de lits occupés dans tous les hôpitaux publics est de 65.0. Le pourcentage de lits varie suivant les différents types d'hôpitaux comme on peut le voir:- généraux, 66.9; pour femmes, 65.1; pour enfants, 85.1; de contagieux, 38.7; de convalescents, 65.4; pour incurables, 84.8; de la Croix Rouge, 48.7; et hôpitaux publics non classifiés, 44.1.

Les tableaux 18 à 37 traitent du mouvement des patients dans les hôpitaux publics. Le mouvement des patients dans les hôpitaux privés et fédéraux paraît aux parties II et III respectivement. Les remarques suivantes ont trait aux hôpitaux publics, autres qu'hôpitaux pour incurables.

Patients dans les hôpitaux au commencement de l'année - Dans les 581 hôpitaux à donner de complètes informations sur le mouvement des patients, il y a 28,713 patients dont 13,638 hommes et 15,075 femmes. De ce nombre, 22,356 ou 95 p.c. sont dans les hôpitaux publics généraux.

Admissions - Les admissions durant l'année aux hôpitaux publics se chiffrent à 853,025 dont 375,095 hommes et 479,930 femmes. Le nombre d'enfants nés dans les hôpitaux publics est de 92,350, dont 47,473 garçons et 44,877 filles.

Total des patients - Le total de patients dans les hôpitaux publics en 1939 est de 881,758 dont 386,753 hommes et 495,005 femmes.

Sorties et décès - Le nombre de sorties des hôpitaux publics s'élève à 821,851 et compte 354,845 hommes et 467,006 femmes. Il y a 89,714 sorties d'enfants, dont 45,961 garçons et 43,753 filles.

Les décès s'élèvent à 31,059, dont 18,133 décès d'hommes et 12,926 de femmes. Les décès dans les 48 heures après l'admission se chiffrent à 8,473 ou 27.3 p.c. de tous les décès. Parmi les personnes à mourir dans les 48 heures après l'admission, 5,035 sont des hommes et 3,438 des femmes; parmi les personnes à mourir après les 48 heures, 13,098 sont des hommes et 9,488 des femmes.

Sur le nombre d'enfants nés dans l'hôpital, 1,733 meurent dans les 48 heures après l'admission et 921 après 48 heures ou plus.

La mortalité brute, d'après tous les patients de l'année, est de 3.5 p.c., tandis que le pourcentage des décès après plus de 48 heures après l'admission est de 2.5.

Dans l'hôpital à la fin de l'année - Le nombre de patients dans les hôpitaux à la fin de l'année est de 28,828 dont 13,755 hommes et 15,073 femmes. Parmi les enfants, il y a 1,346 garçons et 1,262 filles.

Jours d'hospitalisation - Le séjour global de toutes les séparations (sorties et décès) est de 11,301,910 jours, soit une moyenne de 13.1 jours. Le séjour moyen des adultes et des enfants est de 13.4 jours et celui des personnes nées à l'hôpital, de 10.4 jours.

Le séjour global d'hospitalisation de tous les patients dans les hôpitaux publics durant l'année est de 11,532,466 jours. Le nombre moyen quotidien de patients est de 31,560 et le séjour moyen de 13.4 jours.

Le séjour moyen en jours de tous les patients dans les différents types d'hôpitaux publics est le suivant:

Classe d'hôpitaux publics	Adultes et enfants	nouveau-nés
Généraux	12.7	10.3
Pour femmes	11.1	10.8
Pour enfants	19.1	-
De contagieux	25.7	-
De convalescents	37.3	-
De la Croix Rouge	8.8	9.9
Non classifié	47.3	11.3

Naissances dans les hôpitaux publics -

Le total des naissances vivantes au Canada en 1939 est de 235,420; les hôpitaux publics en comptent 95,214, et les hôpitaux privés 6,275. Il y a la même année 6,357 morts-nés dont 3,176 dans les hôpitaux. Quarante-trois p.c. des naissances vivantes se produisent dans les hôpitaux. Les morts-nés forment 3.1 p.c. de toutes les naissances dans les hôpitaux.

Hôpitaux pour incurables - La capacité de vingt hôpitaux pour incurables est de 3,074. Le nombre de patients durant l'année est de 4,081 et les admissions se chiffrent à 1,518. Les sorties sont de 625 et les décès de 732. Le séjour global des patients est de 947,- 717 jours et le séjour moyen, de 232.2 jours. Le personnel global est de 1,048, dont 12 médecins à salaire et 133 infirmières diplômées. Le nombre de médecins visitants est de 146.

Sections pour tuberculeux dans les hôpitaux publics - Vingt et un hôpitaux publics ont des sections pour tuberculeux. Le mouvement des patients dans ces sections s'ajoute à celui de la division générale des hôpitaux publics, aux tableaux 17 à 36. La capacité totale de ces sections est de 1,264 lits et le nombre de patients hospitalisés durant l'année est de 2,925. Il y a 1,922 admissions, 1,398 sorties et 433 décès. Le total des jours-patients est de 388,279 et le séjour moyen est de 128.3 jours.

HOPITAUX PRIVES

Le nombre d'hôpitaux privés en opération en 1939 est de 276 d'une capacité globale de 3,915 lits. Le nombre global de patients est de 36,766 dont 6,229 nouveau-nés. Il y a 35,294 admissions, 34,132 sorties et 998 décès. Le séjour global collectif des patients est de 597,915 jours. Le séjour moyen des adultes est de 18.4 jours et celui des enfants nés dans l'hôpital est de 12.5 jours. Le personnel est de 1,485 dont 76 médecins à salaire et 511 infirmières diplômées; 2,485 médecins visitants ont soigné les patients durant l'année.

HOPITAUX FEDERAUX

En dehors des hôpitaux en construction ou dont la construction est approuvée, le nombre d'hôpitaux fédéraux au 24 septembre 1940 est de 91. Le Gouvernement fédéral a jugé opportun qu'il y ait des facilités pour l'hospitalisation et le traitement rapides des membres des Forces canadiennes et, en conséquence, des mesures ont été prises pour augmenter le nombre d'hôpitaux militaires par le Ministère de la Défense Nationale; ceci explique la très grande augmentation du nombre d'hôpitaux militaires qui passe de 9 en 1938 à 67 en 1939-40. En dehors de ces hôpitaux actuellement en opération, il y en a 27 en construction et 43 en voie d'organisation. On s'attend qu'à la fin de 1941 il y ait 166 hôpitaux militaires d'une capacité de 7,220 lits.

ORDRE DES INFIRMIERES VICTORIA ET SOCIETE DE LA CROIX ROUGE DU CANADA -

En 1939 l'Ordre des Infirmières Victoria maintient 89 branches au Canada. Le total des cas traités est de 85,249 et le nombre de visites, de 741,134. Le nombre des naissances vivantes est de 17,027 et celui des morts-nés, de 324.

La Croix Rouge, en plus de maintenir 45 hôpitaux publics, assure aussi 2,088 services au Canada. La Société conduit 1,251 classes sur le soin des malades à domicile, qui sont fréquentées par 30,174 élèves. La Société maintient aussi 80 postes de secourisme sur les grandes routes. Le nombre de personnes à recevoir des soins aux cliniques et à domicile s'élève à 22,156. Les naissances à domicile assistées par la Croix Rouge se chiffrent à 115; 622 écoles ont été visitées et 21,789 enfants ont été examinés.
