## PREFACE

An extensive array of hospital statistics relating to facilities available, services provided, personnel employed, educational facilities and finances of general and allied special hospitals, mental institutions and tuberculosis sanatoria operating in Canada is prepared by the Hospital Unit of the Institutions Section, Health and Welfare Division of Statistics Canada. A series of one quarterly and twelve annual reports are published, to provide users with a comprehensive presentation of these statistics.

Statistics on hospitals have been compiled by Statistics Canada since 1931 and have since been published in varying degrees of detail. The current list of publications specifically related to hospitals is as follows:<sup>1</sup>

Statistics Canada wishes to express its indebtedness to the individual hospitals across the nation which have prepared and submitted data for inclusion in this national statistical program; to the provincial hospital plan authorities for the collection of the data, and; to the provincial hospital associations and the Canadian Hospital Association in their promotion of uniform accounting and recording practices.

The reader's attention is drawn to the fact that not all of the collected and tabulated data appear in published form. Inquiries with respect to data of this nature or to data contained in this publication are invited and should be forwarded to the Institutions Section of the Health and Welfare Division of Statistics Canada.

<sup>1</sup> In addition to these publications, the Manpower Unit of the Institutions Section prepares and publishes one annual and twelve occasional publications dealing with health manpower.

#### Statistical Measurements

**First Quartile (Q1)**—That value where 25% of the hospitals have a ratio of this amount or less and 75% have a higher ratio.

**Second Quartile (Q2)**—That value where 50% of the hospitals have a ratio of this amount or less and 50% have a higher ratio.

**Third Quartile (Q3)**—That value where 75% of the hospitals have a ratio of this amount or less and 25% have a higher ratio.

#### Notes:

1. Medians are not presented in the tables of this publication unless there are 3 or more hospitals reporting data for the indicators to which they relate. Similarly, there must be 8 or more reporting hospitals for the inclusion of first and third quartile values. No such limitations apply to the calculation of the mean.
2. Indicator values for hospitals located in the Yukon and Northwest Territories, notably Federal hospitals, do not appear as such in tabular presentations due to the constraints imposed by tabular planning requirements—these values, however, are implicit in the Canada total.

### Taux d'occupation

Nombre de journées d'hospitalisation enregistrées au cours de l'année en pourcentage du potentiel d'hospitalisation durant cette même année, basé sur la capacité en lits théorique sur le nombre de lits dressés.

#### Mesures statistiques

**Premier quartile (Q1)**—Valeur où 25 % des hôpitaux ont une proportion de ce montant ou moins, et 75 % ont une proportion plus élevée.

**Deuxième quartile (Q2)**—Valeur où 50 % des hôpitaux ont une proportion de ce montant ou moins, et 50 % ont une proportion plus élevée; communément appelée médiane.

**Troisième quartile (Q3)**—Valeur où 75 % des hôpitaux ont une proportion de ce montant ou moins, et 25 % ont une proportion plus élevée.

#### Remarques:

1. Les tableaux de ce bulletin ne contiennent pas les médianes, à moins que 3 hôpitaux ou plus ne fournissent des données sur les indicateurs en question. De même, pour qu'ils comprennent les premiers et les troisièmes quartiles, il faut que 8 hôpitaux ou plus fournissent les données correspondantes. Le calcul de la moyenne ne fait toutefois pas l'objet de restrictions semblables.
2. Les indicateurs des hôpitaux situés au Yukon et dans les Territoires du Nord-Ouest, notamment ceux des hôpitaux fédéraux, n'apparaissent pas comme tels dans les tableaux à cause des exigences de la planification des tableaux; ces données sont toutefois comprises dans le total pour le Canada.

## INTRODUCTION

This publication presents statistical information pertaining to the utilization of hospital beds and movement of patients in Canadian general and allied special hospitals during the year 1969. While comprehensive coverage for mental institutions and tuberculosis sanatoria are presented in other Statistics Canada publications,<sup>1</sup> limited data relating to these particular institutions have been included in Part I (General Tabular Presentation—1969—All Hospitals) in order to provide an aggregate portrait of the hospital industry.

This edition of the publication marks the first year in which data for this report have been derived from the revised Annual Return of Hospitals—Part I (HS-1, Facilities and Services) which contains substantial changes and improvements over 1968 and earlier Annual Returns of Hospitals.

It is to be noted that 1969 also represents the first year in which publication contents, for the most part, have been presented in computerized format. The introduction of this method of presentation did require previously unencountered, time consuming exercises; consequently, in order to minimize the resulting untimeliness aspect, the statistical analysis, tabular statements and graphical illustrations prefacing tabular presentations in previous years' publications have been purposefully omitted; these features, however, should be reinstated in future editions since the problems associated with the adoption of a new program occur principally in the year of inception.

### General Notes

It is to be remarked that, in conjunction with the various physical changes made to the publication, 1969 was also a year of conversion to a substantially reorganized hospital classification structure. In essence the new classification—as utilized in the computerized format—makes a distinction, previously not made, between public general, teaching and non-teaching hospitals. Within the general, non-teaching category, hospitals are divided into those with and without long-term units, both of which are further subdivided into reorganized bed size groupings; within the general, teaching category, hospitals are divided into full and partial teaching hospitals, which are also subdivided into bed size groupings.

Secondly, the 1969 hospital classification structure has discontinued the convention of including children's hospitals in the general hos-

Le présent bulletin contient des renseignements statistiques sur l'utilisation des lits d'hôpitaux et le mouvement des malades dans les hôpitaux généraux et spéciaux divers du Canada en 1969. D'autres bulletins de Statistique Canada contiennent des données détaillées sur les hôpitaux pour malades mentaux et pour tuberculeux<sup>1</sup>; les quelques données sur ces établissements ont été indiquées dans la Partie I (Présentation générale sous forme de tableaux, 1969, tous hôpitaux) en vue de donner une vue d'ensemble des hôpitaux.

Cette année, pour la première fois, les données publiées dans ce bulletin sont extraites du Rapport d'activité des hôpitaux (révisé) Partie I, (formule HS-1—Installations et services). Ce dernier renferme d'importantes modifications et améliorations comparativement au Rapport d'activité des hôpitaux de 1968 et à ceux des années précédentes.

Il convient de noter que 1969 inaugure aussi la présentation de la majeure partie du contenu du bulletin sous forme d'imprimés d'ordinateur. Il a fallu consacrer beaucoup de temps à l'introduction de ce nouveau mode de présentation. C'est pourquoi, afin de diminuer le manque d'actualité qui en découle, on a omis à dessein l'analyse statistique, certains états présentés sous forme de tableaux et illustrations graphiques qui précédaient les tableaux dans les publications antérieures. Ces éléments devront toutefois être réintroduits dans les prochains bulletins vu que les problèmes qui découlent de l'adoption d'un nouveau programme apparaissent surtout la première année.

### Généralités

Il faut remarquer qu'en plus des diverses transformations extérieures apportées au bulletin, 1969 a aussi été l'année d'adoption d'une profonde restructuration de la classification des hôpitaux. En substance, cette classification,—sous forme d'état mécanographique—fait une nouvelle distinction entre les hôpitaux généraux publics d'enseignement et les autres hôpitaux généraux publics. Les "autres hôpitaux généraux" sont subdivisés en hôpitaux avec ou sans services de maladies chroniques; ces deux catégories d'hôpitaux sont réparties à leur tour selon de nouvelles tranches de taille. Les hôpitaux généraux d'enseignement sont divisés en hôpitaux d'enseignement complet ou partiel, répartis à leur tour selon les tranches de taille.

De plus, d'après la nouvelle classification des hôpitaux de 1969, le groupe des hôpitaux généraux ne comprend plus les hôpitaux pour enfants. Ils

pital group; instead, these hospitals are now treated as a separate category and, on a grouped basis, within the allied special hospital group.

In addition to the aforementioned changes, private and federal hospitals are no longer presented in separate analytical and tabular sections of the report but are now included in the standard classification stub along with public (general and allied special) hospitals.

The reader will observe that an unabbreviated hospital classification stub qualifying the abbreviated stub used in computerized tabulations is presented in the Glossary which appears in the preceding pages.

A general footnote applicable to tables presented in Part II—(Detailed Tabular Presentation and Selected Indicators—Reporting General and Allied Special Hospitals) should be noted at this time: in a number of these tables, no values are shown for hospitals with less than 50 beds due to the fact that in hospitals of this bed size, a detailed information breakdown was not required. This general notation is also applicable to other hospital categories which include hospitals with less than 50 beds, e.g., 1-99 beds, convalescent/rehabilitation, other, etc.

forment plutôt maintenant une catégorie à part et, dans l'ensemble, ils se rattachent aux hôpitaux généraux et spéciaux divers.

Outre ces changements, les hôpitaux privés et fédéraux ne sont plus présentés séparément dans les parties de ce bulletin consacrées à l'analyse et aux tableaux; ils sont maintenant compris, dans la classification type, dans les hôpitaux publics (généraux et spéciaux divers).

On remarquera que les abréviations utilisées dans les tableaux d'ordinateur sont expliquées dans le glossaire (voir pages précédentes).

Il convient de noter le renvoi général qui se rapporte aux tableaux de la Partie II—(Tableaux détaillés et certains indicateurs—Hôpitaux généraux publics et spéciaux divers): certains tableaux ne comportent aucun chiffre pour les hôpitaux de moins de 50 lits étant donné qu'il ne fallait aucun renseignement détaillé sur les hôpitaux de cette taille. C'est aussi le cas des autres catégories d'hôpitaux qui comprennent des établissements de moins de 50 lits (ex., 1-99 lits, convalescence et (ou) réadaptation, autres, etc.).
