PREFACE

The Dominion Bureau of Statistics has been publishing hospital statistics since 1932. Up until 1951 the data collected was published in one volume portraying the entire activity of hospitals. From 1952 to 1958 two volumes were required to present the information obtained. In 1959, with the advent of the federal-provincial hospital insurance program, seven volumes were required to present the increased amount of collected data necessary for the administration and evaluation of the new program. For this, new reporting forms were designed to accommodate the needs of the provincial hospital insurance plan authorities, the Department of National Health and Welfare and the Dominion Bureau of Statistics. The following are the sub-titles of the Annual report of Hospital Statistics, 1960:

Volume I—Hospital Beds	
Volume II—Hospital Services	
Volume III—Hospital Personnel	
Volume IV—Hospital Balance Sheet Statistics	
Volume V—Hospital Revenues	
Volume VI—Hospital Expenditures	
Volume VII—Summary of Hospital Statistics	

The Bureau is grateful for the co-operation of hospitals in making their 1960 statistics available for publication in this report; to the provincial departments of health and/or the hospital insurance commissions of the province through whose facilities the returns were collected; to the Canadian Hospital Association and the provincial hospital associations for promoting uniformity of records for the collecting of hospital statistics; and to the Department of National Health and Welfare.

The Report was prepared in the Institutions Section of the Health and Welfare Division of the Dominion Bureau of Statistics.

WALTER E. DUFFETT,
Dominion Statistician.

PRÉFACE

Le Bureau fédéral de la statistique publie depuis 1932 une statistique hospitalière. Jusqu'à 1951, les données recueillies étaient publiées en un seul volume qui décrivait l'activité entière des hôpitaux. De 1952 à 1958, la présentation des renseignements obtenus a nécessité deux volumes. En 1959, l'avènement d'un régime fédéral-provincial d'assurance-hospitalisation a requis sept volumes pour présenter la somme accrue de données recueillies qui sont nécessaires pour l'administration et l'évaluation du nouveau régime. C'est pourquoi de nouvelles formules ont été établies en vue de répondre aux besoins des autorités provinciales en matière d'assurance-hospitalisation, du ministère de la Santé nationale et du Bien-être social et du Bureau fédéral de la statistique. Voici les sous-titres des volumes du Rapport annuel sur la statistique des hôpitaux, 1960:

Catalogue number
— Lits hospitaliers 83-210
— Services hospitaliers 83-211
— Personnel hospitalier 83-212
— Statistique des bilans hospitaliers 83-213
— Recettes hospitalières 83-214
— Dépenses hospitalières 83-215
— Résumé de la statistique hospitalière 83-216

Le Bureau remercie les hôpitaux dont la collaboration a rendu possible la publication de leurs statistiques de 1960, les ministères provinciaux de la Santé et les commissions provinciales d'assurance-hospitalisation par l'entremise desquels les données ont été recueillies, l'Association canadienne des hôpitaux et les associations provinciales d'hôpitaux qui ont encouragé l'uniformité des formules servant à la collecte des statistiques hospitalières, ainsi que le ministère de la Santé nationale et du Bien-être social.

C'est la Section des institutions (Division de la santé et du bien-être) du Bureau fédéral de la statistique qui a rédigé le présent rapport.

WALTER E. DUFFETT,
Statisticien du Dominion.

PART I — TEXT AND GRAPHS

PARTIE I — TEXTE ET GRAPHIQUES

HOSPITAL EXPENDITURE

Statistical returns on hospital expenditure in 1960 were received from 980 Canadian public hospitals. This includes 865 general and allied special hospitals, 63 mental institutions and 52 tuberculosis sanatoria. This publication deals mainly with general and allied special hospitals but certain data is included in Section A for 63 mental institutions and 52 tuberculosis sanatoria. Federal hospitals as well as private institutions are not included in these statistics. Detailed data on mental institutions and tuberculosis sanatoria can be found in other Dominion Bureau of Statistics publications.¹ Further, this volume is limited to Revenue Fund expenditure only.

ALL PUBLIC HOSPITALS

The 980 hospitals reporting had Revenue Fund expenses of 741 million dollars in 1960 or 2 percent of the gross national expenditure. These same hospitals provided the general public with 57 million patient-days (Graph 1). The average cost per patient-day ranged from \$4.94 in mental institutions to \$20.61 in general hospitals, showing deviations from the average of all hospitals (\$12.99) of plus \$7.62 and minus \$8.05 (Graph 2).

Since 1947 the ratio of patient-day expenses in general hospitals to those in mental institutions has been 4.1 or 4.2 to 1 in all years except in 1950 (3.9 : 1), 1955 (4.4 : 1) and 1959 (3.5 : 1). In 1959 Quebec mental institutions did not report. At the same time the ratio of patient-day expenses in general hospitals to those in tuberculosis sanatoria went up from 1.7 : 1 to 2.0 : 1.

For the past 10 years the following general trends in number of reported patient-days and their cost are observed: general hospitals registered a steady upward trend in patient-days reaching 55 percent over the 1950 level, and the cost per patient-day climbed 137 percent in the same period (Graph 3). Chronic and convalescent hospitals moved up 74 percent in patient-days and 140 percent in cost per patient-day. For mental institutions the upward trend reached 22 percent and 122 percent respectively. In tuberculosis sanatoria the number of patient-days declined by 27 percent but the cost per patient-day almost doubled (increase of 99 percent).

Of all public hospitals reporting, general hospitals incurred 75 percent of the total expenditure while they comprised only 54 percent of rated bed capacity and 47 percent of recorded patient-days. Allied special hospitals spent 5 percent of total expenditure, represented 6 percent of rated bed capacity and 6 percent of patient-days. Mental institutions accounted for 16 percent of total expenditure, 34 percent of rated bed capacity and 41 percent of patient-days. At the same time, tuberculosis sanatoria incurred 4 percent of the total expenditure, 6 percent of rated bed capacity and 5 percent of patient-days (Graph 4).

DÉPENSES HOSPITALIÈRES

Des rapports statistiques sur les dépenses hospitalières en 1960 sont parvenus de 980 hôpitaux publics du Canada (865 hôpitaux généraux et spéciaux divers, 63 institutions pour maladies mentales, et 52 sanatoriums pour tuberculeux). La présente publication traite tout particulièrement des hôpitaux généraux et spéciaux divers, mais certaines données figurent à la section A à l'égard de 63 institutions pour maladies mentales et 52 sanatoriums. Les hôpitaux fédéraux et les institutions privées ne figurent pas dans les chiffres. Des données détaillées sur les institutions pour maladies mentales et les sanatoriums figurent dans d'autres publications du Bureau fédéral de la statistique¹. En outre, le présent volume se limite aux dépenses du fonds d'administration générale.

HÔPITAUX PUBLICS

Les dépenses du fonds d'administration des 980 hôpitaux répondants se sont établies à 741 millions de dollars en 1960, soit 2 p. 100 de la dépense nationale. Ces hôpitaux ont fourni au public 57 millions de journées d'hospitalisation (graphique 1). Le coût moyen d'une journée d'hospitalisation a varié de \$4.94 (institutions pour maladies mentales) à \$20.61 (hôpitaux généraux), soit \$7.62 de plus à \$8.05 de moins, respectivement, que la moyenne de l'ensemble des hôpitaux (\$12.99) (graphique 2).

Depuis 1947, le rapport du coût d'une journée d'hospitalisation dans les hôpitaux généraux à celle des institutions pour maladies mentales a été de 4.1 ou 4.2 à 1 à chaque année sauf en 1950 (3.9 à 1), 1955 (4.4 à 1) et 1959 (3.5 à 1). En 1959, les institutions pour maladies mentales du Québec n'ont pas fourni de rapports. En même temps, le rapport des dépenses des hôpitaux généraux à celles des sanatoriums pour tuberculeux, par journée d'hospitalisation, a monté de 1.7 : 1 à 2 : 1.

Depuis les 10 dernières années, voici la tendance générale qui a été observée à l'égard du nombre de journées d'hospitalisation déclarées et de leur coût: les hôpitaux généraux ont enregistré une hausse constante des journées d'hospitalisation et ont atteint 55 p. 100 de plus qu'en 1950, et le coût d'une journée d'hospitalisation a grimpé de 137 p. 100 durant la même période (graphique 3). Les hôpitaux pour affections chroniques et convalescence ont augmenté leurs journées d'hospitalisation de 74 p. 100 et le coût d'une journée d'hospitalisation de 140 p. 100. Pour ce qui est des institutions pour maladies mentales, les hausses se sont établies à 22 et à 122 p. 100 respectivement. Dans les sanatoriums pour tuberculeux, le nombre de journées d'hospitalisation a baissé de 27 p. 100, mais le coût par journées d'hospitalisation a presque doublé (augmentation de 99 p. 100).

Sur tous les hôpitaux répondants, les hôpitaux généraux ont répondu pour 75 p. 100 de la dépense totale, bien qu'ils ne représentent que 54 p. 100 de la capacité théorique (en lits) et 47 p. 100 des journées d'hospitalisation inscrites. Les hôpitaux spéciaux divers ont dépensé 5 p. 100 de la dépense totale, et ils représentent 6 p. 100 de la capacité théorique et 6 p. 100 des journées d'hospitalisation. Les institutions pour maladies mentales ont répondu pour 16 p. 100 de la dépense totale (34 et 41 p. 100). En même temps, les sanatoriums pour tuberculeux ont répondu pour 4 p. 100 de la dépense totale (6 et 5 p. 100) (graphique 4).

PUBLIC GENERAL AND ALLIED SPECIAL HOSPITALS

Of the 936 general and allied special hospitals operating in 1960, the expenditure statistics presented in the tables of this volume covered 865 or 92.4 percent of this group of hospitals with 92,526 beds or 94.4 percent of the rated bed capacity (Graph 5). Total revenue fund expenditure reported was 593 million dollars. In 1959, 852 hospitals with 91,083 beds had expenses amounting to 510 million dollars.

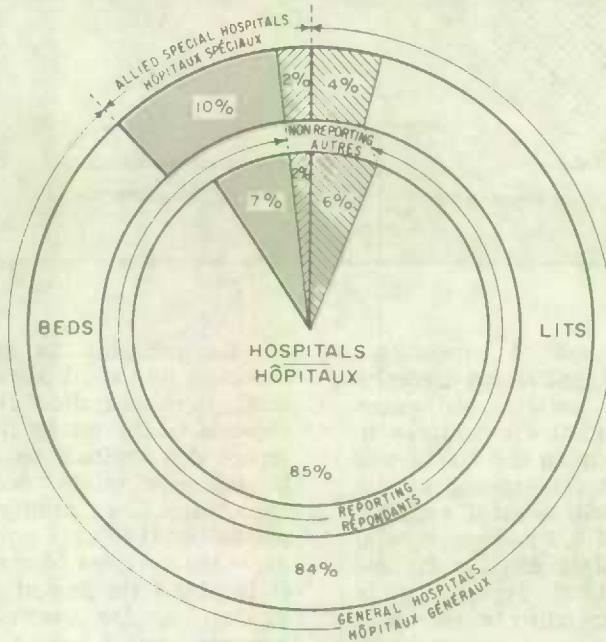

HÔPITAUX GÉNÉRAUX PUBLICS ET SPÉCIAUX DIVERS

Sur les 936 hôpitaux généraux et spéciaux divers qui ont fonctionné en 1960, la statistique des dépenses présentée dans les tableaux du présent volume en couvre 865, soit 92.4 p. 100 du groupe, qui comptent 92,526 lits ou 94.4 p. 100 de la capacité théorique (graphique 5). Les recettes totales du fonds d'administration générale déclarées se sont établies à 593 millions de dollars. En 1959, 852 hôpitaux (91,083 lits) ont déclaré des dépenses de 510 millions de dollars.

PERCENTAGE OF PUBLIC GENERAL AND ALLIED SPECIAL HOSPITALS REPORTING REVENUE IN 1960 POURCENTAGE DES HÔPITAUX PUBLICS GÉNÉRAUX ET SPÉCIAUX DIVERS DÉCLARANT DES REVENUS EN 1960

Expenditure by Type

Salaries and wages were the largest component of total expenditure in public general and allied special hospitals. Of every dollar spent during the year 63.6¢ (62.1¢)² were paid out for salaries and wages, 3.4¢ (3.6¢)² for medical and surgical supplies, 4.5¢ (4.8¢)² for drugs and 28.5¢ (29.5¢)² for other supplies and operating expenses (Graph 6).

Dépenses suivant l'affectation

La rémunération a été l'élément le plus important de la dépense totale des hôpitaux généraux publics et spéciaux divers. Sur chaque dollar dépensé durant l'année, 63.6c. (62.1c.)² ont été versés en rémunération, 3.4c. (3.6c.)² sont allés aux fournitures médicales et chirurgicales, 4.5c. (4.8c.)² aux médicaments et 28.5c. (29.5c.)² à d'autres fournitures et dépenses de gestion (graphique 6).

² 1959 figures in brackets.

² Chiffres de 1959 entre parenthèses.

MAJOR COMPONENTS OF REVENUE FUND EXPENDITURE, 1960
 (PUBLIC GENERAL AND ALLIED SPECIAL HOSPITALS)

PRINCIPAUX ÉLÉMENTS DES DÉPENSES DU FONDS D'ADMINISTRATION BUDGÉTAIRE, 1960
 (HÔPITAUX GÉNÉRAUX ET SPÉCIAUX DIVERS)

BY TYPE OF EXPENSE
 SUIVANT LE GENRE DE DÉPENSES

BY DEPARTMENTS
 SUIVANT LES SERVICES

The variation in the type of expenditure reflects the character of the hospital and diversity of its activities; for example, salaries and wages account for 63.5 percent of total expenditures in general hospitals (57.2 percent in the 10-24 bed group) and 65.9 percent of total expenditures in chronic hospitals. Medical and surgical supplies show the lowest proportion of 0.9 percent of total expenditure in chronic hospitals and the highest proportion 4.2 percent of total expenditure in maternity hospitals. Drug expenditures vary from 2.1 percent of total expenditure in convalescent hospitals to 4.7 percent in general hospitals (5.4 percent in the 10-24 bed group). All other supplies and expenses, including all non-specified operating expenses, vary from 28.3 percent of total expenditure in general hospitals to 35.3 percent of total expenditure in public special hospitals other than chronic and maternity.

Expenditure by Department

Of every dollar spent, 48.3¢ (41.1¢)² went for nursing units and special services, 5.4¢ (4.7¢)² for supplementary services, 38.3¢ (38.3¢)² for general services, 0.1¢ (8.1¢)² were undistributed as to departments and 7.9¢ (7.9¢)² for other Revenue Fund expenses.

La variation du genre de dépense reflète le caractère de l'hôpital et la diversité de ses activités; ainsi, la rémunération a répondu pour 63.5 p. 100 de la dépense totale des hôpitaux généraux (57.2 p. 100 du groupe des hôpitaux de 10-24 lits) et 65.9 p. 100 de la dépense totale des hôpitaux pour affections chroniques. Les fournitures médicales et chirurgicales ont eu la plus faible proportion, soit 0.9 p. 100 de la dépense totale des hôpitaux pour affections chroniques et la plus forte proportion (4.2 p. 100 de la dépense totale) dans les maternités. Les dépenses en médicaments varient de 2.1 p. 100 de la dépense totale dans les hôpitaux de convalescence à 4.7 p. 100 dans les hôpitaux généraux (5.4 p. 100 dans le groupe des hôpitaux de 10-24 lits). Toutes les autres fournitures et dépenses, y compris toutes les dépenses de gestion non réparties, varient de 28.3 p. 100 de la dépense totale, dans les hôpitaux généraux, à 35.3 p. 100 dans les hôpitaux spéciaux publics autres que ceux pour affections chroniques et maternité.

Dépenses suivant le service

Sur chaque dollar dépensé, 48.3c. (41.1)² sont allés aux services infirmiers et aux services spéciaux, 5.4c. (4.7)² aux services supplémentaires, 38.3c. (38.3)² aux services généraux, 0.1c. (8.1)² non répartis suivant les services et 7.9c. (7.9)² aux autres dépenses du fonds d'administration générale.

² 1959 figures in brackets.

² Chiffres de 1959 entre parenthèses.

As far as the breakdown of expenses by department is concerned the reader should be aware of the fact that hospitals in the 1-49 bed groups generally experience some difficulty in providing detailed breakdowns for nursing administration, operating room, central supply room, delivery room, and emergency unit. Quite often corresponding expenditures were reported combined under nursing care units. Therefore, comparisons between bed groups are indicative while provincial and Canada totals must be considered slanted to a degree determined by the weight the hospitals with less than 50 beds carry in the individual province (less than 75 beds in B.C.). However, the combination of nursing units with special services will provide comparable data for the same bed groups of all provinces.

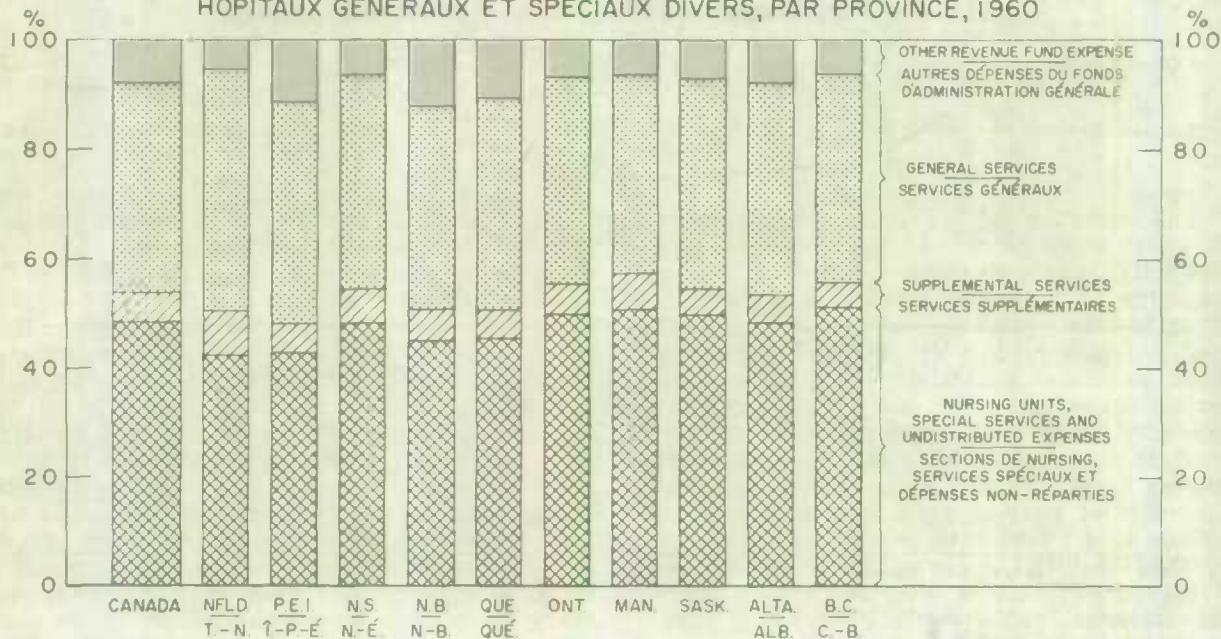

Pour ce qui est de la ventilation des dépenses suivant le service, le lecteur doit noter que les hôpitaux des groupes de 1-49 lits éprouvent généralement de la difficulté à fournir des ventilations détaillées pour ce qui est de l'administration du service infirmier, les salles d'opération, le service central de distribution, la salle d'accouchement, et les services d'urgence. Assez souvent, les dépenses correspondantes ont été déclarées ensemble dans les services de soins infirmiers. Par conséquent, les comparaisons entre groupes de lits sont significatives, tandis que les totaux provinciaux et nationaux doivent être considérés comme influencés suivant l'importance que les hôpitaux de moins de 50 lits représentent dans la province en particulier (moins de 75 lits en Colombie-Britannique). Toutefois, la réunion des services infirmiers avec les services spéciaux fourniront des données comparatives à l'égard des mêmes groupes de lits de toutes les provinces.

GRAPH-7

GRAPHIQUE-7

PERCENTAGE DISTRIBUTION OF DEPARTMENTAL EXPENDITURE OF PUBLIC GENERAL AND ALLIED SPECIAL HOSPITALS, BY PROVINCE, 1960

RÉPARTITION PROCENTUELLE SUIVANT LES DÉPENSES PAR SERVICES DANS LES HÔPITAUX GÉNÉRAUX ET SPÉCIAUX DIVERS, PAR PROVINCE, 1960

Provincially (Graph 7) the expenditure for nursing units, special services, and undistributed expenses, range from 42.3 percent in Newfoundland to 51.0 percent in British Columbia. Supplemental services deviated from the Canadian average (5.4 percent) by a maximum 2.7 percentage points above in Newfoundland and 1.3 points in Manitoba, to 0.7 points below in Saskatchewan and British Columbia. Expenses for general service departments ranged from 44.1 percent in Newfoundland to 36.3 percent in Manitoba, due to above average

A l'échelon provincial (Graphique 7), la dépense pour les services infirmiers, les services spéciaux, et les dépenses non réparties varient de 42.3 p. 100 (Terre-Neuve) à 51 p. 100 (Colombie-Britannique). Les services supplémentaires se sont écartés de la moyenne canadienne (5.4 p. 100) d'un maximum de 2.7 décimales au-dessus à Terre-Neuve et 1.3 p décimales au-dessus au Manitoba à 0.7 décimales au-dessous en Saskatchewan et en Colombie-Britannique. Les dépenses pour les services de soins généraux ont varié de 44.1 p. 100 à Terre-Neuve à 36.3 p. 100

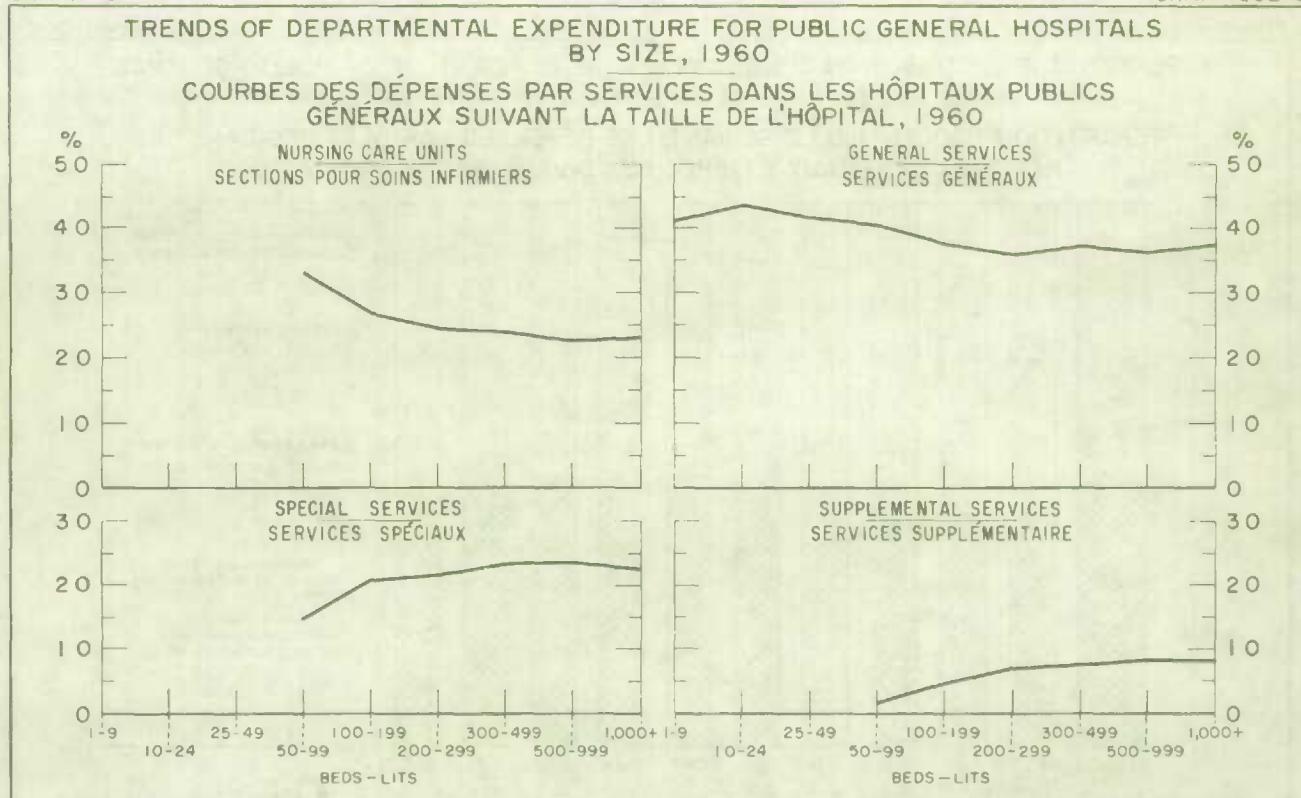

expenditure in Newfoundland in the dietary departments and for operation and maintenance of physical plant, and below average expenditure in Manitoba in general administration and dietary departments. Other revenue fund expenses ranged from 12.1 percent in New Brunswick to 5.5 percent in Newfoundland.

Expenditure for **nursing care units** in general hospitals of 50 beds and over covers a range from 32.9 percent to 22.6 percent, decreasing with increasing hospital size. In the allied special hospitals it was 36.0 percent for chronic hospitals, 27.9 percent and 27.1 percent for maternity and convalescent hospitals respectively, and 23.4 percent for other allied special hospitals.

au Manitoba, à cause des dépenses supérieures à la moyenne à Terre-Neuve, dans les services d'alimentation ainsi que de gestion et d'entretien des immeubles et matériel et inférieures à la moyenne, au Manitoba, dans l'administration générale et dans les services d'alimentation. Les autres dépenses du fonds d'administration générale ont varié de 12.1 p. 100 au Nouveau-Brunswick à 5.5 p. 100 à Terre-Neuve.

Les dépenses pour les **soins infirmiers** dans les hôpitaux généraux de 50 lits et plus ont varié de 32.9 p. 100 à 22.6 p. 100, la diminution se faisant avec l'accroissement de la taille de l'hôpital. Dans les hôpitaux spéciaux divers, la proportion a été de 36 p. 100 dans les hôpitaux pour affections chroniques, 27.9 et 27.1 p. 100 dans les maternités et les maisons de convalescence respectivement, et 23.4 p. 100 dans les autres hôpitaux spéciaux divers.

GRAPH-8

The proportion of total expenditure attributed to **special services** in general hospitals with 50 beds or more was 22.6 percent. Of the total cost of special services 20.3 percent was for the operating room, 9.5 percent for central supply, 10.7 percent for pharmacy, 5.5 percent for delivery room, 21.9 percent for laboratory, 20.3 percent for radiology, 2.5 percent for physiotherapy, 3.9 percent for emergency, 2.7 percent for organized outpatient departments, 2.7 percent for non-specified expenditure. For special services in general

La proportion de la dépense totale attribuée aux **services spéciaux** dans les hôpitaux généraux de 50 lits et plus s'est établie à 22.6 p. 100. Sur le coût total des services spéciaux, 20.3 p. 100 sont allés à la salle d'opération, 9.5 au service central de distribution, 10.7 à la pharmacie, 5.5 à la salle d'accouchement, 21.9 au laboratoire, 20.3 à la radiologie, 2.5 à la physiothérapie, 3.9 à la salle d'urgence, 2.7 aux services organisés des malades externes, et 2.7 en dépenses non réparties. Pour ce qui est des services spéciaux dans les hôpitaux

hospitals an opposite trend to that for nursing care units is observed; i.e., the percentage of expenditure for special services generally increased with the size of hospital. However, the peak of this trend was not always reached by the largest hospital but sometimes before. For example, delivery room expenses had the highest expenditure in the 100-199 bed group; for pharmacy and emergency services, the maximum percentage was reached in the 300-499 bed hospitals. Expenses for the operating room, laboratory, radiology and physiotherapy reached the maximum in the 500-999 bed group.

The major component of supplemental services (5.4 percent of total expenses) of general and allied special hospitals was education. Of the total cost of supplemental services, 58.6 percent was for nursing education, 19.5 percent for medical education, 16.9 percent for medical records, and the rest (5.0 percent for social services and other expenses).

Over 38.0 percent of total expenditure was spent for general services; of this, 24.0 percent was for general administration expenses, 34.2 percent for dietary, 21.7 percent for laundry, linen and housekeeping and 20.1 percent for operation and maintenance of physical plant. The variation of the components in various bed groups of general hospitals is illustrated in Graph 9.

généraux, on constate une tendance contraire à celle des services de soins infirmiers, car le pourcentage de la dépense pour services spéciaux s'accroît généralement avec la taille de l'hôpital. Toutefois, le sommet de cette tendance n'a pas toujours été atteint par le plus grand hôpital, mais quelquefois avant. Par exemple, les dépenses de la salle d'opération et de la salle d'accouchement ont été les plus élevés dans les groupes des hôpitaux de 100 à 199 lits; pour ce qui est des services de pharmacie et d'urgence, le pourcentage maximum a été atteint dans les hôpitaux de 400 à 499 lits. Les dépenses pour la salle d'opération, le laboratoire, la radiologie, et la physiothérapie ont atteint leur maximum dans le groupe des hôpitaux de 500 à 999 lits.

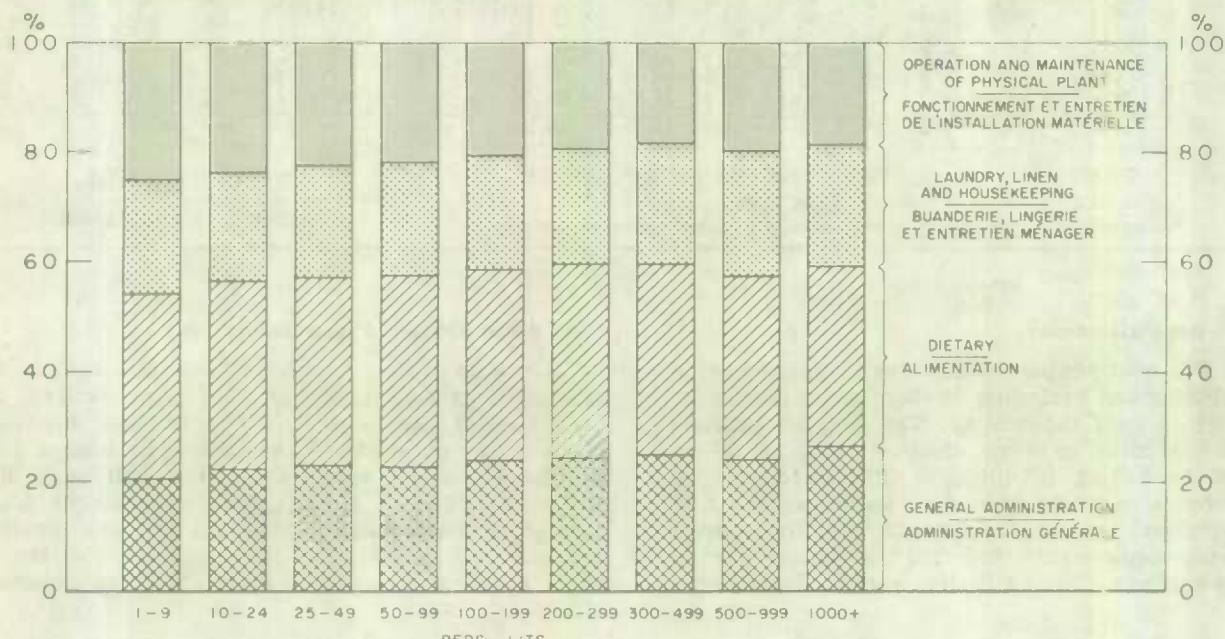

Le principal élément des services supplémentaires (5.4 p. 100 de toutes les dépenses) des hôpitaux généraux et spéciaux divers a été l'enseignement. Sur le coût total des services supplémentaires, 58.6 p. 100 sont allés à l'enseignement des infirmières, 19.5 à l'enseignement médical et 16.9 aux archives médicales, et le reste (5 p. 100) aux services sociaux et autres dépenses.

Plus de 38 p. 100 des dépenses totales sont allés aux services généraux; sur ce pourcentage, 24 p. 100 sont allés à l'administration générale, 34.2 à l'alimentation, 21.7 à la buanderie, à la literie et à l'entretien ménager et 20.1 à la gestion et à l'entretien des immeubles et matériel. La variation des éléments dans les divers groupes de lits des hôpitaux généraux figure au graphique 9.

GRAPHIQUE 9

GRAPHIQUE 9

COMPONENTS OF GENERAL SERVICES IN PUBLIC GENERAL HOSPITALS, 1960 ÉLÉMENTS DES SERVICES GÉNÉRAUX DANS LES HÔPITAUX PUBLICS GÉNÉRAUX, 1960

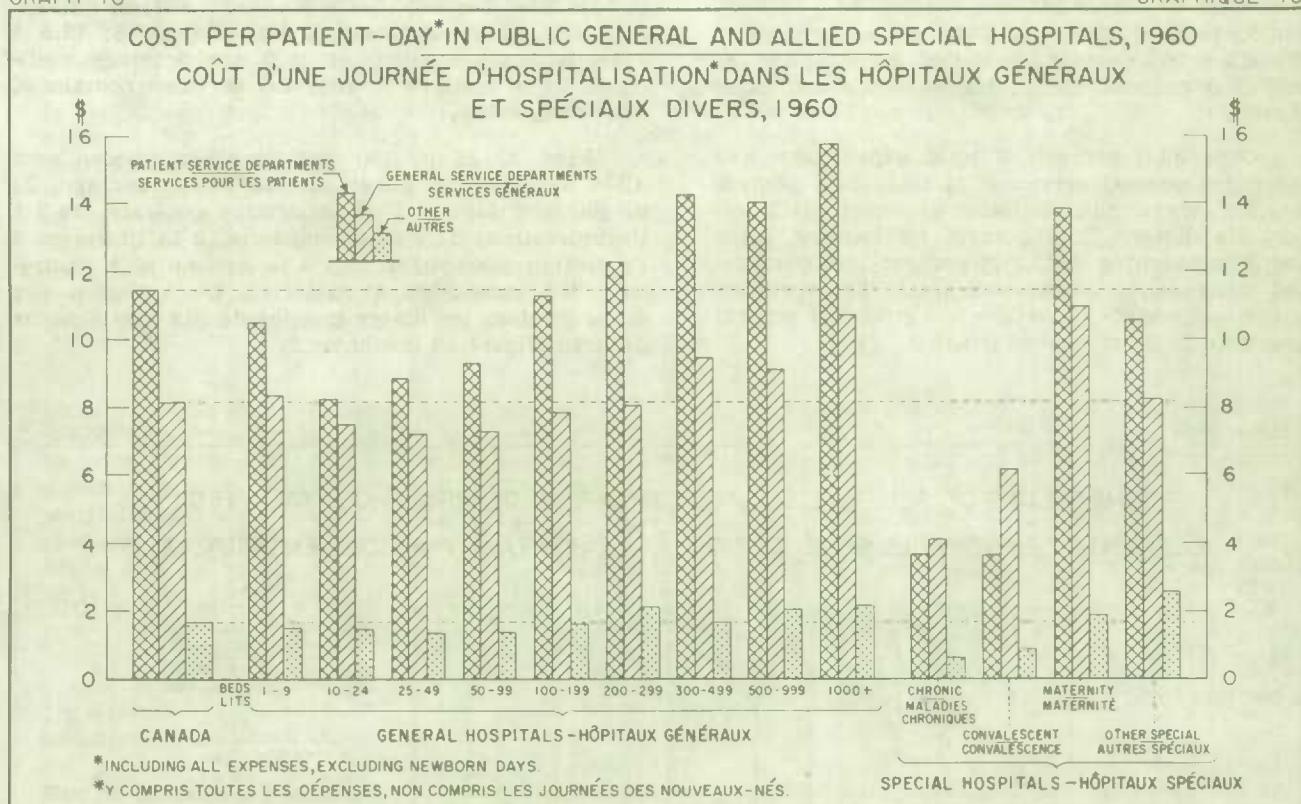

Included in general administration expense were employees' benefits amounting to 8.0 million dollars or 2.1 percent of total salaries. Comparison with 1959 shows that at that time benefits amounted to 1.5 percent of the payroll. General administration was 9.2 percent of total operating expenditure compared with 8.5 percent the year before.

Included in other Revenue Fund expenses were expenditures on special research, ambulance service, loss on ancillary operations, interest, depreciation and miscellaneous expenses. All these together amounted to 7.9 percent of total operating expenditure.

La dépense de l'administration générale comprenait les avantages des employés, soit 8 millions de dollars ou 2.1 p. 100 de toute la rémunération. Si on compare ces chiffres avec ceux de 1959, les avantages s'établissaient alors à 1.5 p. 100 de la paye. L'administration générale a représenté 9.2 p. 100 de toute la dépense de gestion, comparativement à 8.5 p. 100 l'année précédente.

Les dépenses du fonds d'administration générale comprenaient celles sur les recherches spéciales, les services ambulanciers, la perte sur les opérations accessoires, l'intérêt, l'amortissement et les dépenses diverses. Toutes ces dépenses se sont élevées à 7.9 p. 100 de toutes les dépenses de gestion.

GRAPH-10

Cost per Patient-day

The cost per patient-day was calculated twice (including and excluding newborn days) (Table 7), based on total expenditure. The cost per patient-day excluding newborn changed from \$18.88 in 1959 to \$21.32 in 1960, or 12.9 percent. The difference of \$2.44 came from increases of \$1.56 for patient service departments, 69¢ for general service departments and 19¢ for other revenue fund expense. Cost for patient service departments

Coût d'une journée d'hospitalisation

Le coût d'une journée d'hospitalisation a été calculé deux fois (avec et sans les journées des nouveau-nés) (tableau 7), d'après les dépenses totales. Le coût d'une journée d'hospitalisation sans les nouveau-nés a monté de 12.9 p. 100 de 1959 à 1960 (de \$18.88 à \$21.32). La différence de \$2.44 provient d'augmentations de \$1.56 pour les services de soins aux malades, de 69c. pour les services de soins généraux et de 19c. pour les autres dépenses

amounted to \$11.49 (\$10.48),³ or 53.9 percent (53.8 percent)³ of total cost in 1960; for general service departments \$8.15 (\$7.45)³ or 38.3 percent (38.3 percent),³ and for other revenue fund expenses \$1.68 (\$1.54),³ or 7.9 percent (7.9 percent)³ (Graph 10). In comparison with the previous year cost per patient-day (including newborn days) moved from \$17.21 to \$19.47, an increase of 13.1 percent. The difference of \$2.26 consisted of increases of: \$1.43 for the cost of patient service, 65¢ for general service departments and 18¢ for other revenue fund expenses.

Generally, the cost per patient-day increased with the size of the hospital. For general hospitals with more than 10 beds, per diem costs ranged from \$17.20 (\$15.34)³ to \$28.64 (\$26.78).³ The increase seems to depend upon the following factors: large hospitals operate and maintain considerable highly specialized equipment and provide a fuller range of services such as organized out-patient clinics, research, medical education, radiotherapy, complex laboratory tests and similar health services. They usually are situated in locations with higher salary indices and higher cost of living standards. They act as referral centres for patients requiring highly intensive care.

Provincially, cost per patient-day was lowest in Prince Edward Island, \$16.74 (15.15)³ followed by Alberta, \$18.84 (\$16.70)³ and highest in Ontario \$22.49 (\$20.45).³ Newfoundland, Prince Edward Island, Quebec, Manitoba, Saskatchewan and Alberta, had costs per patient-day below the Canadian average of \$21.32 (\$19.47).³

Cost per Bed (Graph 12)

The calculation of cost per bed based on the rated bed capacity is presented (Table 9), including and excluding bassinets. For all reporting hospitals the operating cost per bed moved from \$5,601.30 (\$4,840.58)⁴ in 1959 to \$6,407.30 (\$5,526.74)⁴ in 1960, an increase of 14.4 percent (14.2 percent).⁴

³ Calculation including newborn days, in brackets.

⁴ Figures in brackets including bassinets.

du fonds d'administration générale. Le coût des services de soins aux malades s'est élevé à \$11.49 (\$10.48)³, soit 53.9 p. 100 (53.8 p. 100)³ du coût total en 1960; pour les services de soins généraux, à \$8.15 (\$7.45)³ ou 38.3 p. 100 (38.3 p. 100)³, et pour les autres dépenses du fonds d'administration générale, à \$1.68 (\$1.54)³ ou 7.9 p. 100 (7.9 p. 100)³ (graphique 10). Comparativement à l'année précédente, le coût d'une journée d'hospitalisation (y compris les journées de nouveau-nés) a passé de \$17.21 à \$19.47, soit une augmentation de 13.1 p. 100. La différence de 2.26 consistait en avances de: \$1.43 pour le coût des services de soins aux malades, 65c. pour les services de soins généraux et 18c. pour les autres dépenses du fonds d'administration générale.

En général, le coût d'une journée d'hospitalisation s'est accru avec la taille de l'hôpital. Pour ce qui est des hôpitaux généraux de plus de 10 lits, le coût a varié de \$17.20 (\$15.34)³ à \$28.64 (\$26.78)³. La hausse semble tenir aux facteurs suivants: les grands hôpitaux exploitent et maintiennent une quantité considérable d'équipement hautement spécialisé et fournissent une plus grande variété de services (dispensaires organisés pour malades externes, recherches, enseignement médical, radiothérapie, épreuves de laboratoire compliquées et services de santé). Ils sont ordinairement situés dans des endroits où les traitements et le coût de la vie sont plus élevés. Ils agissent aussi comme centre de références pour les malades qui nécessitent des soins hautement spécialisés.

A l'échelon provincial, le coût d'une journée d'hospitalisation a été le plus faible dans l'Île-du-Prince-Édouard, soit \$16.74 (\$15.15)³, suivi de l'Alberta \$18.84 (\$16.70)³ et le plus élevé en Ontario, \$22.49 (\$20.45)³. Le coût d'une journée d'hospitalisation à Terre-Neuve, Île-du-Prince-Édouard, au Québec, au Manitoba, en Saskatchewan et en Alberta a été inférieur à la moyenne canadienne, soit \$21.32 (\$19.47)³.

Coût par lit (graphique 12)

Le calcul du coût par lit, fondé sur la capacité théorique, figure au tableau 9, avec et sans les berceaux. Pour tous les hôpitaux répondants, le coût d'exploitation par lit a monté de \$5,601.30 (\$4,840.58)⁴ en 1959 à \$6,407.30 (\$5,526.74)⁴ en 1960, soit une augmentation de 14.4 p. 100 (14.2)⁴.

¹ Territories excluded throughout; Newfoundland excluded 1932-1952; chronic hospitals excluded 1947-1949; figures may not cross-check because of rounding; cost per patient-day is based on total patient-days and includes out-patient expenditure. Comparable figures for 1942-1946 are given in Table 2, Volume II, 1955. — Sauf pour les hôpitaux des Territoires pour toutes les années observées et ceux de Terre-Neuve pour 1932-1952. On exclut les hôpitaux pour maladies chroniques pour 1947-1949. Vu l'arrondissement des chiffres, la contre-épreuve peut être impossible. Le frais du jour-malade se base sur l'ensemble des jours-malades et inclut les dépenses relatives aux malades externes. Le tableau 2 du volume II (1955) donne les chiffres comparables pour 1942-1946.

¹ In Ontario 9 Red Cross Outpost Hospitals having 1-9 beds were included in the 10-24 bed group to correspond with the financial reporting. One financial schedule was received for 16 Red Cross Outpost Hospitals having an average bed capacity in the 10-24 bed group. — En Ontario, neuf hôpitaux d'avant-poste de la Croix-Rouge comptant de un à neuf lits ont été inclus dans le groupe des 10-24 lits, pour fins de concordance avec le questionnaire financier. Un questionnaire financier a été reçu pour 16 hôpitaux d'avant-poste de la Croix-Rouge réunissant une capacité moyenne de 10-24 lits.
