PREFACE

Hospital statistics have been collected by the Dominion Bureau of Statistics since 1932. Annual reports were published in a single volume from 1932 to 1952. From 1953 to 1958 the compiled data were presented in two volumes with Volume I containing information on accommodation, facilities, utilization and personnel and Volume II information on finances. In 1959 with the advent of the federal provincial hospital insurance program, six volumes were required to present the increased amount of collected data necessary for the administration and evaluation of this program. With the acquisition of an electronic computer by the Bureau it has been possible to produce a seventh volume for the 1961 reporting year, entitled "Hospital Indicators". This volume portrays a number of rates and ratios which previously had not been available or possible to obtain. These rates and ratios represent a comprehensive set of measures of workload utilization, staffing, quality of care costs and other aspects of hospital activity. The following are the sub-titles of the annual reports of Hospital Statistics, 1961:

Volume I—Hospital Beds	— Lits hospitaliers	83-210
Volume II—Hospital Services	— Services hospitaliers	83-211
Volume III—Hospital Personnel	— Personnel hospitalier	83-212
Volume IV—Hospital Balance Sheet Statistics	— Statistique des bilans hospitaliers	83-213
Volume V—Hospital Revenues	— Revenus hospitaliers	83-214
Volume VI—Hospital Expenditures	— Dépenses hospitalières	83-215
Volume VII—Hospital Indicators	— Indices hospitaliers.	83-216

This report shows a substantial reduction in tabular material from that published in previous years. This has been obtained by revealing most tables in percentage distribution terms along with an absolute total, thus, enabling the reader to determine the absolute figure if such is desired.

The Dominion Bureau of Statistics is grateful for the cooperation received from the hospitals in making their 1961 statistics available for publication in this report; to the provincial departments of health and/or the hospital insurance commissions of the province through whose facilities the returns were collected; the Canadian Hospital Association and the provincial hospital associations for promoting uniformity of records for the collecting of hospital statistics; and to the Department of National Health and Welfare.

The report was prepared in the Institutions Section of the Health and Welfare Division of the Dominion Bureau of Statistics.

WALTER E. DUFFETT,

Dominion Statistician.

PRÉFACE

Le Bureau fédéral de la statistique recueille, depuis 1932, la statistique hospitalière. De 1932 à 1952, les rapports annuels étaient publiés en un seul volume. De 1953 à 1958, la statistique obtenu a nécessité deux volumes; le premier contenait des renseignements sur le logement, l'utilisation des services et le personnel et le second, des renseignements sur les finances. En 1959, l'avènement d'un régime fédéral-provincial d'assurance-hospitalisation a requis six volumes pour présenter la somme accrue des données nécessaires à l'administration et à l'évaluation du nouveau régime. Par suite de l'acquisition d'un calculateur électronique, le Bureau publiera un septième volume pour l'année de déclaration 1961, "Indices hospitaliers". Ce dernier volume décrit certains taux et rapports qu'on ne pouvait obtenir autrefois. Ces taux et rapports représentent un ensemble de mesures du travail accompli, du personnel, du coût des soins et d'autres aspects de l'activité hospitalière. Voici les sous-titres des volumes du rapport annuel sur la statistique des hôpitaux, 1961:

Volume VI—Hospital Expenditures	— Dépenses hospitalières	83-215
Volume VII—Hospital Indicators	— Indices hospitaliers.	83-216

Le présent rapport, au regard des précédents, marque une réduction sensible de la matière tabulaire, ce résultat ayant été obtenu par la présentation, dans la plupart des tableaux, de données procentuelles accompagnées du total absolu; de la sorte, le lecteur qui le désire déterminera lui-même les chiffres absolus.

Le Bureau remercie les hôpitaux dont la collaboration a rendu possible la publication de leurs statistiques de 1961, les ministères provinciaux de la Santé et les commissions provinciales d'assurance-hospitalisation par l'entremise desquels les données ont été recueillies, l'Association canadienne des hôpitaux et les associations provinciales d'hôpitaux qui ont encouragé l'uniformité des formules servant à la collecte des statistiques hospitalières, ainsi que le ministère de la Santé nationale et du Bien-être social.

C'est la Section des institutions (Division de la santé et du bien-être) du Bureau fédéral de la statistique qui a rédigé le présent rapport.

WALTER E. DUFFETT,

Statisticien du Dominion.

GLOSSARY

TERMINOLOGIE

Hospital

An institution which is operated for the medical, surgical and/or obstetrical care of in-patients, and which is licensed or approved as a hospital by the federal and/or a provincial government, or by a municipality duly authorized under the laws of the province. Specifically excluded are institutions primarily for tuberculosis, mental disease, and mental defect.

Public Hospital

Recognized by the province as a "public hospital" which is not operated for profit and accepts all patients regardless of ability to pay.

General Hospital

A hospital which provides for the treatment and care of all types of diseases or at least a wide range of conditions.

Chronic Hospital

A hospital which primarily provides for the treatment of conditions requiring long-term care.

Convalescent Hospital

A hospital which primarily provides for the treatment of patients who are considered to be in the recovery stage of an illness, especially where this is a long-term process.

Maternity Hospital

A hospital which primarily provides for the treatment and care of obstetrical patients and newborn infants.

Other Hospital

A hospital which primarily provides for the treatment of a particular type of disease, condition or case; example, rehabilitation, geriatric, communicable disease, orthopaedic, neurological, and cancer; or a hospital which provides a combination of various types of service which cannot be classified into chronic, convalescent or maternity.

Allied Special Hospitals

Includes chronic, convalescent, maternity and "other" hospitals.

In-patient

A patient who is duly admitted to the hospital and to whom a bed or bassinet has been allocated. (This category excludes stillbirths as well as patients attending a day or night centre attached to the hospital).

Adults and Children — All in-patients except newborn.

Newborn — An infant in-patient born alive in the hospital.

Hôpital

Institutions s'occupant des soins médicaux, chirurgicaux ou obstétriques des hospitalisés et détenant un permis ou une approbation du gouvernement fédéral ou provincial ou d'une municipalité autorisée à le faire par les lois de la province. Sont exclues, les institutions destinées avant tout à la tuberculose, aux maladies mentales et à la déficience mentale.

Hôpital public

Hôpital reconnu comme tel par la province et établi dans un but non lucratif; il accepte tous les malades sans égard à leur capacité de payer.

Hôpital général

Hôpital qui fournit traitement et soin pour toutes sortes de maladies ou, au moins, pour un grand nombre d'états pathologiques.

Hôpital de maladies chroniques

Hôpital qui fournit, avant tout, le traitement des états requérant des soins de longue durée.

Hôpital de convalescence

Hôpital destiné avant tout, au traitement des malades qui relèvent d'une maladie, surtout si celle-ci a été de longue durée.

Maternité

Hôpital destiné avant tout, aux soins obstétriques ainsi qu'à ceux des nouveau-nés.

Autre hôpital

Hôpital destiné surtout au traitement d'états pathologiques particuliers ou de cas particuliers de maladie, comme réadaptation, gériatrie, maladie contagieuse, orthopédie, neurologie et cancer; c'est encore un hôpital qui a plusieurs affectations diverses ne pouvant être classées à "maladies chroniques", "convalescence" ou "maternité".

Hôpitaux spéciaux divers

Ces hôpitaux comprennent les institutions de maladies chroniques ou de convalescence, les maternités et les "autres" hôpitaux.

Hospitalisé

Malade dûment admis à l'hôpital et auquel on y a réservé un lit ou berceau. N'entrent pas dans cette catégorie les mort-nés, ni les malades qui visitent un centre (la nuit ou le jour) de l'hôpital.

Adultes et enfants — Tous les hospitalisés, sauf les nouveau-nés.

Nouveau-né — Bébé né vivant à l'hôpital.

Patient-day

The period of service to an in-patient between the census-taking hours on two successive days; the day of admission is counted as a patient-day but the day of separation is not.

Revenue Fund

The Revenue Fund is set up to record monetary activities associated with the day-to-day operations of the hospital in providing services to patients. It is sometimes called the Operating Fund.

Revenue Fund Expense

Revenue Fund Expense is the cost, on an accrual basis, of operating and maintaining the hospital during the year, regardless of the amounts of disbursements made during the year.

Salaries and Wages

Included are the gross salaries and wages earned during the year by all hospital personnel except those engaged in Special Research Projects, Ambulance Service, and Ancillary Operations, whether or not actually paid during the year. Gross salaries and wages comprise the following:

- (1) Salaries, wages, and other remuneration earned by paid personnel, including special allowances paid and perquisites supplied to such personnel; include also any earned fees or other remuneration, perquisites, and special allowances to physicians for services rendered to the hospital.
- (2) The value of contributed services of regular staff members working without pay, and of perquisites supplied to such personnel, calculated on the basis of salary scales for similar services in the community and supported by regular payroll records.

The distribution of the gross salary or wages of an employee working in more than one department of a hospital including allowances for student nurses and interns, normally are made proportionately to the numbers of paid hours of work done by the employee in each of the several departments; however, if the employee received separate remuneration for services in each department, these amounts are charged to the departments concerned.

Other Supplies and Expenses

Departmental expenditure other than gross salaries and wages, medical and surgical supplies and drugs.

Other Revenue Fund Expenses

Non-departmental expenditure such as interest on loans, depreciation, expenses for special research projects, ambulance service and other miscellaneous expenses.

Journée d'hospitalisation

La période de soins à un hospitalisé entre les heures de relevé de deux jours successifs; le jour d'admission compte pour une journée d'hospitalisation, mais non le jour de départ.

Fonds d'administration générale

Ce fonds sert à enregistrer toute activité reliée au train-train quotidien de l'hôpital en vue de procurer des soins aux malades. Ce fonds s'appelle parfois le fonds de revenu.

Dépenses du fonds d'administration générale

Ces dépenses représentent le coût, sur une base d'exercice, du fonctionnement et de l'entretien de l'hôpital durant l'année, quel que soit le montant des déboursés effectués au cours de l'année.

Rémunération

La rémunération comprend les traitements et salaires bruts gagnés durant l'année par l'ensemble du personnel hospitalier (sauf celui qui est affecté aux recherches spéciales, au service d'ambulance et aux exploitations accessoires), que cette rémunération ait été ou non réellement versée durant l'année. La rémunération comprend ce qui suit:

- (1) Les traitements, salaires et autre rémunération gagnés par le personnel rémunéré, y compris les indemnités spéciales versées à ce personnel et leurs revenants-bons; sont compris également, tous les honoraires et autres rémunérations versés, revenants-bons et indemnités spéciales accordés à des médecins pour services rendus à l'hôpital.
- (2) La valeur des services gratuits du personnel régulier et des revenants-bons consentis à ce personnel; cette valeur se calcule à partir des échelles de traitements et salaires pour services analogues dans la localité et, pour ce, s'appuie sur les entrées ordinaires aux bordereaux de paie.

La répartition de la rémunération brute d'un employé travaillant dans plus d'un service de l'hôpital, — y compris les allocations aux élèves-infirmières et aux internes, — doit ordinairement s'effectuer proportionnellement au nombre d'heures de travail rémunéré fournies par l'employé dans chacun des services. Toutefois, si l'employé a reçu une rémunération distincte pour son travail dans chaque service, chacune de ces rémunérations est débitée au service concerné.

Autres dépenses en fournitures et autres dépenses

Dépenses des services, autres que frais de rémunération, de fournitures chirurgicales et médicales, et de médicaments.

Autres dépenses du fonds d'administration générale

Les dépenses autres que celles des services, comme intérêts sur emprunts, amortissement, dépenses en recherches spéciales, dépenses du service d'ambulance et autres dépenses diverses.

Patient Service Expenditure

Expenses of all hospital departments directly connected with the medical care of the patient, excluding general service departments and overhead charges like interest on loans, depreciation, special research projects, ambulance service, loss on ancillary operations, etc.

Services include the following departments:

Nursing Service

Nursing Administration

Nursing Units:

Adults and children

Newborn

Adults, children and newborn in cases where hospitals were unable to report separate breakdown

Special Services:

Operating rooms, including recovery rooms, dressing rooms and fracture rooms

Central supply room

Pharmacy

Delivery rooms

Laboratory

Radiology

Physiotherapy

Emergency unit, including dressing rooms, examining rooms and operating rooms which were utilized primarily for emergency treatment

Organized out-patient department

Supplemental Services:

Medical records and library

Nursing education

Medical education

Social service

General Services:

General administration excluding nursing administration

Dietary

Laundry, linen and housekeeping

Operation and maintenance of physical plant.

Dépenses en soins aux malades

Dépenses de tous les services hospitaliers directement reliées au soin médical des malades, sauf des services généraux et hormis les frais généraux comme intérêts sur emprunts, amortissement, recherches spéciales, ambulance, pertes subis par les exploitations accessoires., etc.

Voici les divers services

Services infirmiers

Administration infirmière

Services de soins directs:

aux adultes et enfants

aux nouveau-nés

aux adultes, enfants et nouveau-nés, si la ventilation ne peut être distincte.

Services spéciaux:

Salles d'opération, y compris salles de réveil, de pansement et de fracture

Service central de distribution

Pharmacie

Salles d'accouchement

Laboratoire

Radiographie

Physiothérapie

Service d'urgence, y compris salles de pansement, d'examen et d'opération si elles sont utilisées d'abord pour cas d'urgence

Service des malades externes organisé

Services supplémentaires:

Archives et bibliothèque médicales

Enseignement infirmier

Enseignement médical

Service social

Services généraux:

Administration générale, sauf infirmière

Alimentation

Buanderie, lingerie et entretien ménager

Fonctionnement et entretien des immeubles et du matériel

PART I—TEXT AND GRAPHS

PARTIE I—TEXTE ET GRAPHIQUES

INTRODUCTION

The following expenditure statistics for Canadian hospitals were based on information submitted to the Dominion Bureau of Statistics by the individual hospitals through their provincial hospital authorities. Nine hundred and eighty-six Canadian public hospitals submitted financial returns, of which there were 793 general hospitals, 75 allied special hospitals, 71 mental institutions and 47 tuberculosis sanatoria. The federal hospitals as well as private institutions were not covered.

This publication contains mainly statistics on public general and allied special hospitals. Some basic information on tuberculosis sanatoria and mental institutions has been included in section A, to provide the reader with a broader view of the interrelationship of these three types of institutions. Other publications provide a more detailed report on these institutions. "Tuberculosis Statistics: Financial Supplement", DBS Catalogue No. 83-207; "Mental Health Statistics: Financial Supplement", DBS Catalogue No. 83-205.

ALL PUBLIC HOSPITALS

Estimated Expenditure

Total operating expenses during 1961 for all Canadian Public Hospitals¹ were estimated² at 903 million dollars:

699 million dollars were expended by general and allied special hospitals,

170 million dollars by mental institutions and

34 million dollars by tuberculosis sanatoria.

Altogether the estimated expenditure amounted to 2.4 per cent of the gross national expenditure or an expense of 50 dollars for every man, woman and child in Canada.

Reported Expenditure

Financial data were received from 91.8 per cent (868 out of 946) of all public general and allied special hospitals, 88.8 per cent (71 out of 80) of public mental institutions and 100.0 per cent (48) of public tuberculosis sanatoria. They reported expenditure details on 845 million dollars covering 59 million patient-days (Chart 1).

¹ Private and federal institutions were excluded.

² Estimates of expenditure for non-reporting hospitals were based on the number of rated beds in non-reporting hospitals by province, type and size, multiplied by the cost per bed rates shown in Table 17. For tuberculosis sanatoria and mental institutions the average cost per bed of all reporting institutions was used for estimating the total expense.

Les statistiques sur les dépenses des hôpitaux canadiens se basent, ici, sur les renseignements fournis au Bureau fédéral de la statistique par chacun des hôpitaux par l'intermédiaire des autorités hospitalières de sa province. Neuf cent quatre-vingt-six hôpitaux publics du Canada ont présenté un rapport financier, dont 793 hôpitaux généraux, 75 hôpitaux divers, 71 institutions psychiatriques et 47 sanatoriums de tuberculose. Les hôpitaux fédéraux et les institutions privées ne figurent pas à ces rapports.

La présente publication contient surtout des statistiques sur les hôpitaux généraux et spéciaux divers. Quelques renseignements de base sur les sanatoriums de tuberculose et sur les institutions psychiatriques paraissent à la section A afin de donner au lecteur une vue d'ensemble des relations entre ces trois genres d'hôpitaux. D'autres publications donnent plus de détails sur ces institutions "La statistique de la tuberculose, supplément financier," B.F.S., n° de cat. 83-207 et "La statistique de l'hygiène mentale, supplément financier", B.F.S., n° de cat. 83-205).

HÔPITAUX PUBLICS

Estimation des dépenses

Le total des dépenses de gestion, en 1961, de l'ensemble des hôpitaux publics¹ du Canada a été estimé² à 903 millions de dollars, soit:

699 millions pour les hôpitaux généraux et spéciaux divers,

170 millions pour les institutions psychiatriques et

34 millions pour les sanatoriums de tuberculose.

L'estimation de l'ensemble des dépenses s'est établie à 2.4 p. 100 de toutes les dépenses nationales brutes, ou \$50 par habitant canadien.

Dépenses déclarées

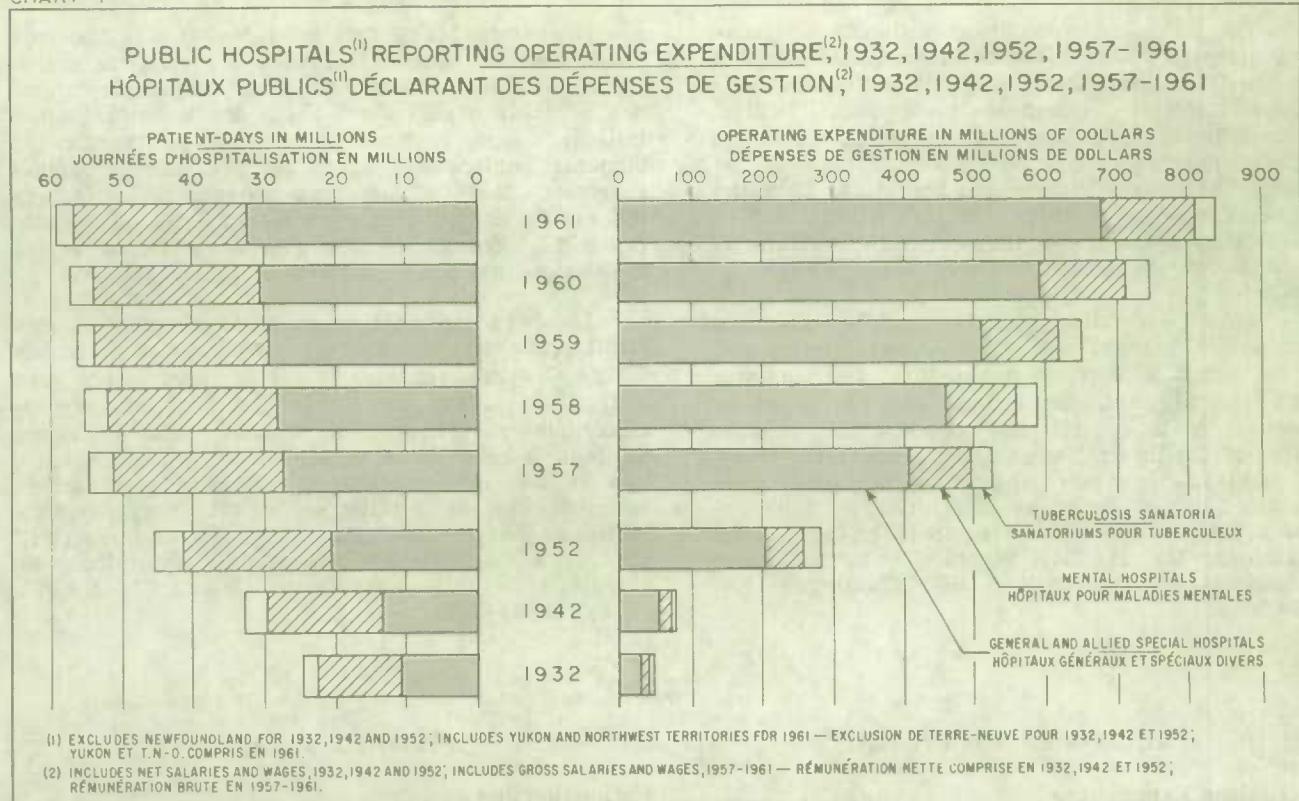

Ont présenté des données financières, 91.8 p. 100 des hôpitaux généraux et spéciaux divers (868 sur 946), 88.8 des institutions psychiatriques (71 sur 80) et 100.0 des sanatoriums de tuberculose (48). Ces statistiques portaient sur 845 millions de dollars et 59 millions de journées d'hospitalisation (graphique 1).

¹ A l'exclusion des hôpitaux fédéraux et privés.

² Les estimations des dépenses des hôpitaux non répondants se basent sur le nombre de lits (capacité théorique) suivant la province, l'affection et la taille, multiplié par le coût du lit (capacité théorique) figurant au tableau 17. Quant aux sanatoriums de tuberculose et aux institutions psychiatriques, on a utilisé le coût moyen par lit, dans les hôpitaux répondants, pour estimer les dépenses totales.

CHART - I

GRAPHIQUE - I

The following figures were summarized for comparison:

En voici un résumé aux fins de comparaison:

Type of institution Classes d'hôpitaux	Rated bed capacity Capacité théorique (lits)	Operating expenditure (in millions) Frais de gestion (en millions)	Patient-days Journées d'hospitalisation		Cost per patient-day Coût de la journée d'hospitalisation	
			Including newborn (in thousands) Nouveau-nés compris (en milliers)	Excluding newborn (in thousands) Nouveau-nés exclus (en milliers)	Including newborn (in dollars) Nouveau-nés compris (en dollars)	Excluding newborn (in dollars) Nouveau-nés exclus (en dollars)
General and allied special hospitals — Hôpitaux généraux et spéciaux divers	100,506	679	32,113	29,400	21.14	23.07
Mental institutions — Institutions psychiatriques	66,546	132	24,630	24,630	5.37	5.37
Tuberculosis sanatoria — Sanatoriums de tuberculose	10,157	34	2,620	2,620	12.77	12.77
Total	177,209	845	59,363	56,650	14.23	14.90

Of the total expenditure quoted, general and allied special hospitals expended 80.4 per cent, mental institutions 15.6 per cent and tuberculosis sanatoria 4.0 per cent. At the same time they provided 51.9 per cent, 43.5 per cent and 4.6 per cent of the patient-days for adults and children (Chart 2).

De toutes les dépenses mentionnées, les hôpitaux généraux et spéciaux divers en ont compté 80.4 p. 100, les institutions psychiatriques 15.6 et les sanatoriums de tuberculose 4.0. Dans le même ordre, ces institutions ont accusé 51.9, 43.5 et 4.6 p. 100 des journées d'hospitalisation d'adultes et d'enfants (graphique 2).

CHART-2

GRAPHIQUE-2

PERCENTAGE DISTRIBUTION OF BASIC HOSPITAL DATA, 1961
RÉPARTITION PROCENTUELLE DES DONNÉES HOSPITALIÈRES DE BASE, 1961

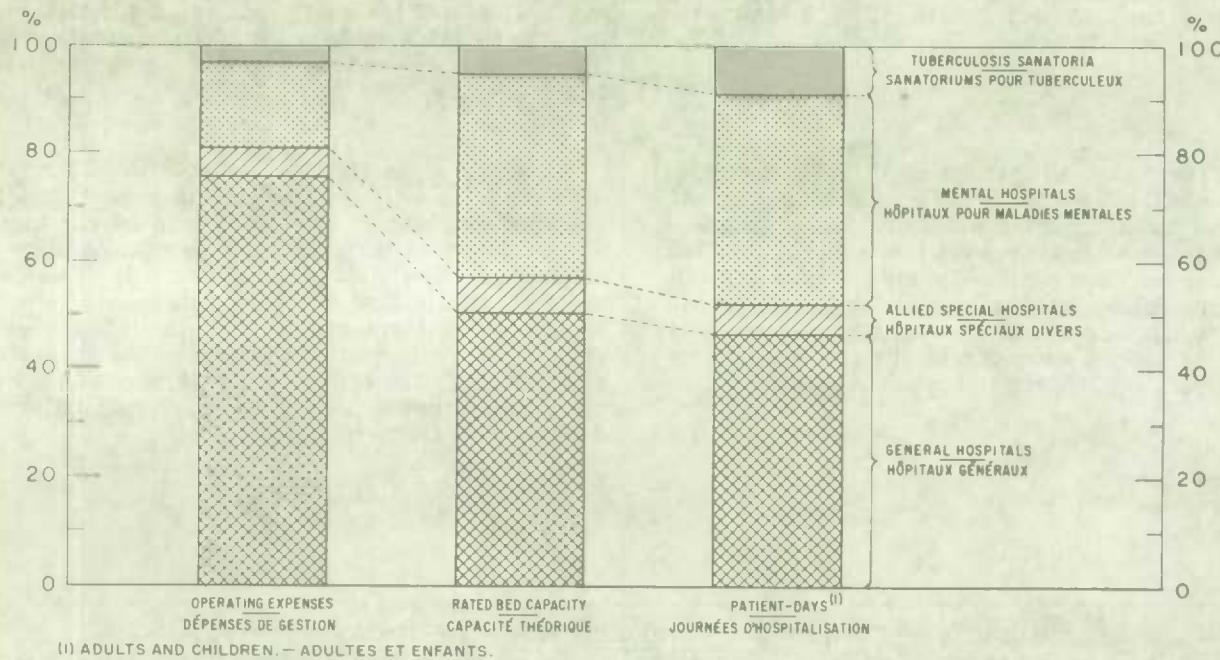

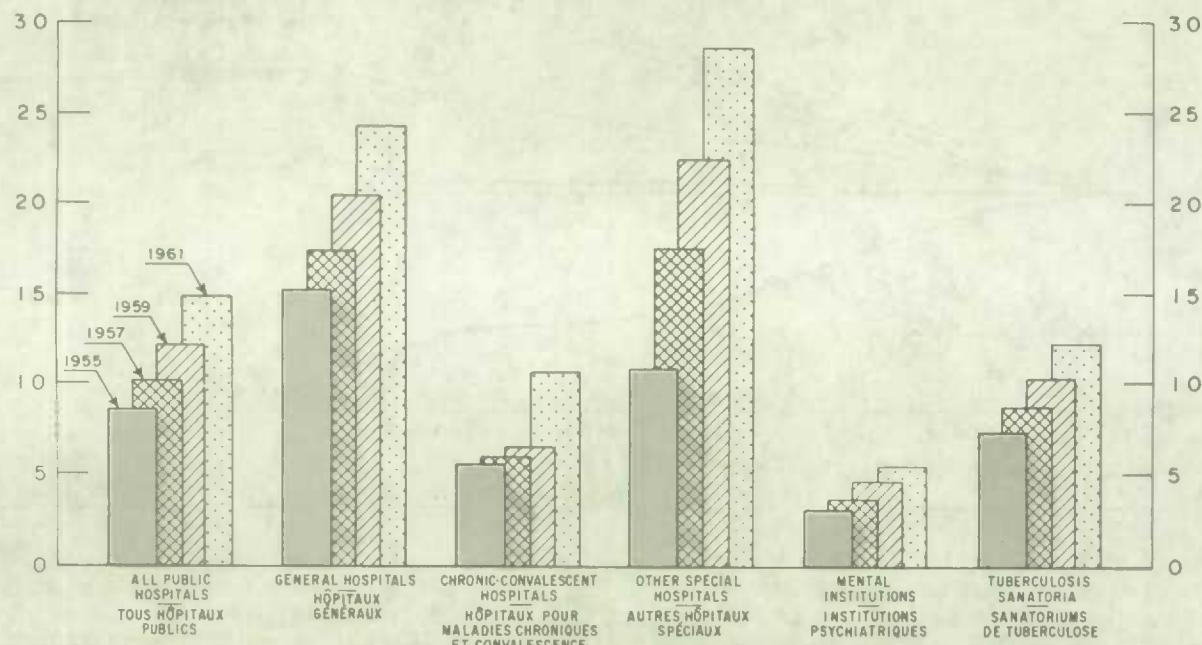

CHART-3

GRAPHIQUE-3

COST PER PATIENT-DAY⁽¹⁾, 1955, 1957, 1959 AND 1961
COÛT DE LA JOURNÉE D'HOSPITALISATION⁽¹⁾, 1955, 1957, 1959 ET 1961

The cost per patient-day³ increased steadily over the past six years in all types of hospitals. The dollar range which in 1955 amounted to \$12.16 (from \$3.05 in mental institutions to \$15.21 in general hospitals) amounted to \$23.32 in 1961 (from \$5.37 in mental institutions to \$24.32 in general and \$28.69 in other allied special hospitals) (Chart 3).

The index of patient-days⁴, 1955 to 1961, shows an upward trend in general hospitals and mental institutions and a downward trend in tuberculosis sanatoria. However the index of cost per patient-day rises continually for all types of institutions. Rising per diem costs over this period are due to the increase of prices, higher salary costs and the general extension of specific services for diagnosis and treatment of patients (Chart 4).

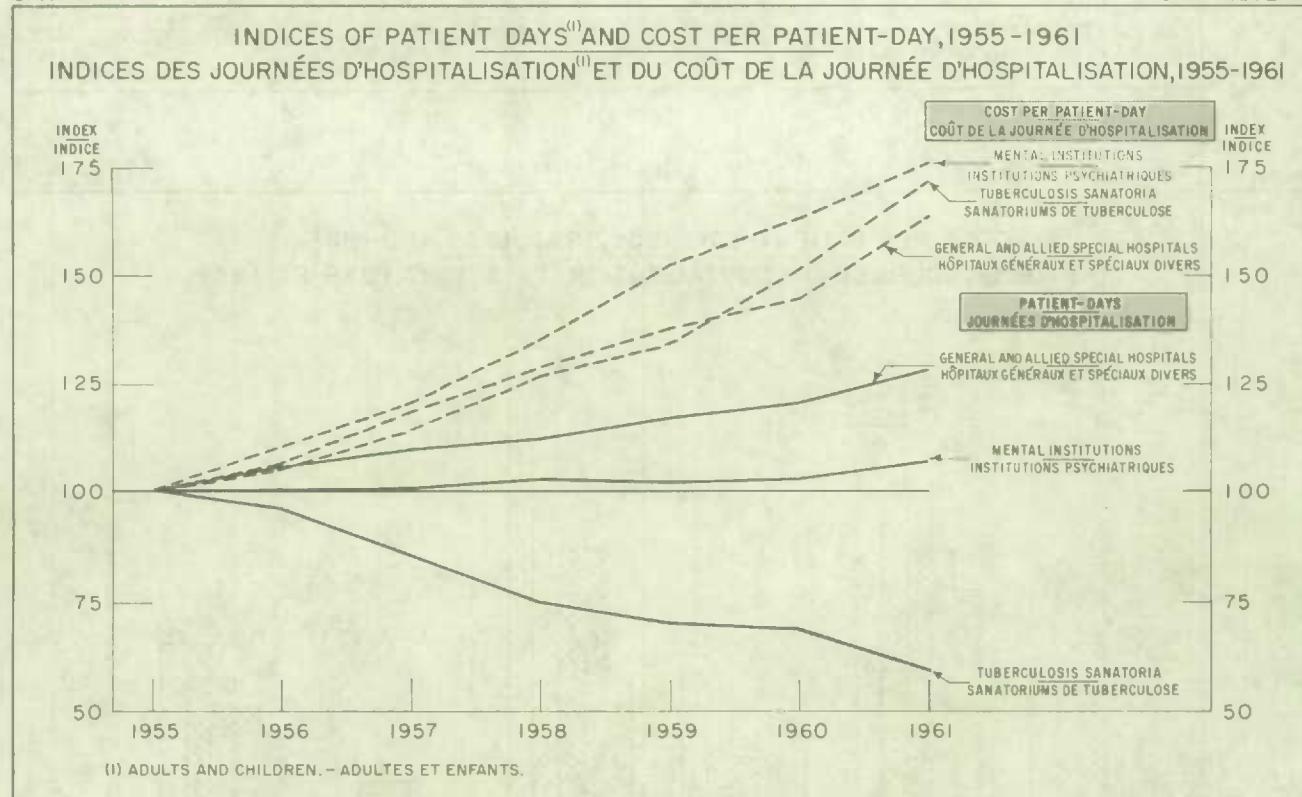

Au cours de six dernières années, tous les genres d'hôpitaux ont constamment accusé une hausse du coût de la journée d'hospitalisation³. Ces frais de la journée d'hospitalisation qui, en 1955, s'établissaient à \$12.16 (de \$3.05 dans les institutions psychiatriques à \$15.21 dans les hôpitaux généraux) ont atteint, en 1961, \$23.32 (de \$5.37 dans les institutions psychiatriques à \$24.32 dans les hôpitaux généraux et à \$28.69 dans les autres hôpitaux spéciaux divers) (graphique 3).

L'indice des journées d'hospitalisation⁴, de 1955 à 1961, décrit une courbe à la hausse dans les hôpitaux généraux et les institutions psychiatriques et une courbe à la baisse dans les sanatoriums de tuberculose. Toutefois, l'indice du coût de la journée d'hospitalisation s'élève constamment dans tous les genres d'institutions. Durant la période observée, la montée du coût quotidien provient de la hausse des prix et de la rémunération et de l'extension générale des services destinés au diagnostic et au traitement des malades (graphique 4).

³ Adults and children.

⁴ D'adulte et d'enfant.

SPECIAL HOSPITALS**

Total Revenue Fund Expenditure (Estimate)

It is estimated that 699 million dollars were spent by the 946 general and allied special hospitals in operation in Canada during 1961. The following breakdown presents expenditure estimates by province, type of hospital and bed group:

**HÔPITAUX GÉNÉRAUX PUBLICS ET SPÉCIAUX
DIVERS**

Dépenses totales du fonds d'administration générale

On estime que les 946 hôpitaux généraux et spéciaux divers qui ont été en activité au Canada en 1961 ont dépensé 699 millions de dollars. Voici la répartition de ces dépenses suivant la province, l'affectation et la taille de l'hôpital:

**Estimate of Revenue Fund Expenditure of All Public, General and Allied Special Hospitals
(based on rated bed capacity⁴), 1961**

Estimations des dépenses du fonds d'administration générale dans tous les hôpitaux publics, généraux et spéciaux divers, suivant la capacité théorique (lit.⁴), 1961

⁴ Beds and cribs.

⁴ D'adultes et d'enfants.

This estimate amounts to a per capita expense of \$38.32, ranging from \$45.25 in Saskatchewan to \$11.84 in the Yukon. No adjustment was made for patients residing in one province but entering hospital in another province.

Ces estimations totalisent \$38.32 par tête et varient de \$45.25 en Saskatchewan à \$11.84 au Yukon. On n'a pas tenu compte des malades qui résident dans une province et sont hospitalisés dans une autre.

Per Capita Expenditure of General and Allied Special Hospitals, by Province, 1961

Dépenses, par tête, des hôpitaux généraux et spéciaux divers, suivant la province, 1961

Provinces	Dollars
CANADA	38.32
Newfoundland — Terre-Neuve	25.39
Prince Edward Island — Île-du-Prince-Édouard	30.85
Nova Scotia — Nouvelle-Écosse	33.76
New Brunswick — Nouveau-Brunswick	40.07
Québec	34.34
Ontario	41.76
Manitoba	39.09
Saskatchewan	45.25
Alberta	38.50
British Columbia — Colombie-Britannique	39.49
Yukon	11.84
Northwest Territories — Territoires du Nord-Ouest	24.22

Total Revenue Fund Expenditure Reported

Financial returns for 1961 were received from 91.8 per cent (868) of all public general and allied special hospitals, representing 96.1 per cent (96,636) of the total rated bed capacity (Chart 5). This compares with a coverage of 92.4 per cent of hospitals and 94.4 per cent of beds in 1960.

Total revenue fund expenditure reported for general and allied special hospitals was 679 million dollars, an increase of 86 million dollars (or 14.5%) from the year before. Of the difference of 86 million dollars, half a million was incurred by general hospitals in the Yukon and Northwest Territories, which were included in the summaries for the first time in 1961. General hospitals in the provinces increased their expenditure by 14.4 per cent (from 555.8 million dollars to 635.7 million dollars) and the allied special hospitals by 15.7 per cent (from 37.0 million dollars to 42.8 million dollars).

Expenditure by Type

In 1961, 64.7¢ of every dollar spent were paid for salaries and wages, 3.2¢ for medical surgical supplies, 4.3¢ for drugs and 27.8¢ went for other supplies and operating expenses (including departmental and non-departmental expenses). The distribution of expenses by type differed considerably between the different regions of the nation (Chart 6). Salaries and wages in proportionate terms consumed some 10.0 per cent less in the hospitals of the Atlantic provinces (57.7%) than in British Columbia (68.0%). Drugs and medical and surgical supplies combined were responsible for between 7.2 per cent (British Columbia) and 7.9 per cent (Atlantic Provinces and Quebec).

Dépenses totales du fonds d'administration générale déclarées

De tous les hôpitaux publics, généraux et spéciaux divers, 91.8 p. 100 (868) ont envoyé un rapport financier pour 1961 et ces répondants ont figuré pour 96.1 p. 100 (96,636 lits) de la capacité théorique (graphique 5). A comparer aux 92.4 p. 100 des hôpitaux et leurs 94.4 p. 100 de lits, en 1960.

Le total des dépenses du fonds d'administration générale des hôpitaux généraux et spéciaux divers s'est établi à 679 millions de dollars, hausse de 86 millions (14.5 p. 100) sur l'année précédente. De ces 86 millions, les hôpitaux généraux du Yukon et des Territoires du Nord-Ouest en ont revendiqué un demi-million; les données de ces territoires paraissent aux sommaires pour la première fois, en 1961. Dans les provinces, les hôpitaux généraux ont accru leurs dépenses de 14.4 p. 100 (de \$555,800,000 à \$635,700,000) et les hôpitaux spéciaux divers, de 15.7 (de 37 millions à \$42,800,000).

Dépenses suivant les postes

Sur chaque dollar dépensé en 1961, 64.7c. l'ont été pour la rémunération, 3.2c. pour les fournitures médicales et chirurgicales, 4.3c. pour les médicaments et 27.8c. pour les autres fournitures et pour autres dépenses (par ou en dehors des services). Cette répartition des dépenses suivant les postes a été considérablement différente suivant les régions du pays (graphique 6). Proportionnellement, la rémunération dans les hôpitaux des provinces atlantiques (57.7 p. 100) a été inférieure de 10 p. 100 à celle (68) de la Colombie-Britannique. Quant aux dépenses en médicaments et fournitures médicales et chirurgicales, elles ont oscillé entre 7.2 p. 100 en Colombie-Britannique et 7.9 dans les provinces atlantiques et au Québec.

ALLIED SPECIAL HOSPITALS
HÔPITAUX SPÉCIAUX DIVERS

⁽ⁱ⁾ INCLUDES OTHER SUPPLIES AND EXPENSES (DEPARTMENTAL) AND OTHER REVENUE FUND EXPENSE (NON-DEPARTMENTAL). — Y COMPRIS LES AUTRES FOURNITURES ET DÉPENSES (SERVICES) ET LES AUTRES DÉPENSES DU FONDS D'ADMINISTRATION GÉNÉRALE (HORS SERVICES).

The salary and wage component in general hospitals ranged from 58.4 per cent in the 10-24 bed group to 66.4 per cent in the 300-499 bed group. Chronic hospitals spent 67.1 per cent of their expenses on salaries and wages (Chart 7). Altogether this component, which accounted for 41.9 per cent of total operating expenses in 1942, has steadily increased and by 1961 had climbed 22.8 percentage points (Chart 8).

In general and allied special hospitals, salaries and wages accounted for 86.8 per cent of the expenses of nursing units, 65.7 per cent of special services, 91.1 per cent of supplemental services and 56.1 per cent of general service expenses.

The cost of medical and surgical supplies and drugs play financially a relatively small role in hospital operations, accounting altogether for 7.5 per cent of all revenue fund expenses. Medical and surgical supplies accounted for a Canadian average of 3.2 per cent of revenue fund expenses, showing a very small range from 3.0 per cent to 3.5 per cent for general hospitals across the provinces. Of the allied special hospitals, maternity hospitals accounted for expenditure on medical surgical supplies of 4.1 per cent of revenue fund expenditure, convalescent hospitals 1.8 per cent, "other" hospitals 1.6 per cent and chronic hospitals 1.0 per cent. Expenditures for drugs (4.3 per cent for all hospitals) ranged from 4.2 per cent to 5.2 per cent in general hospitals and were 2.6 per cent in maternity hospitals, 2.5 per cent

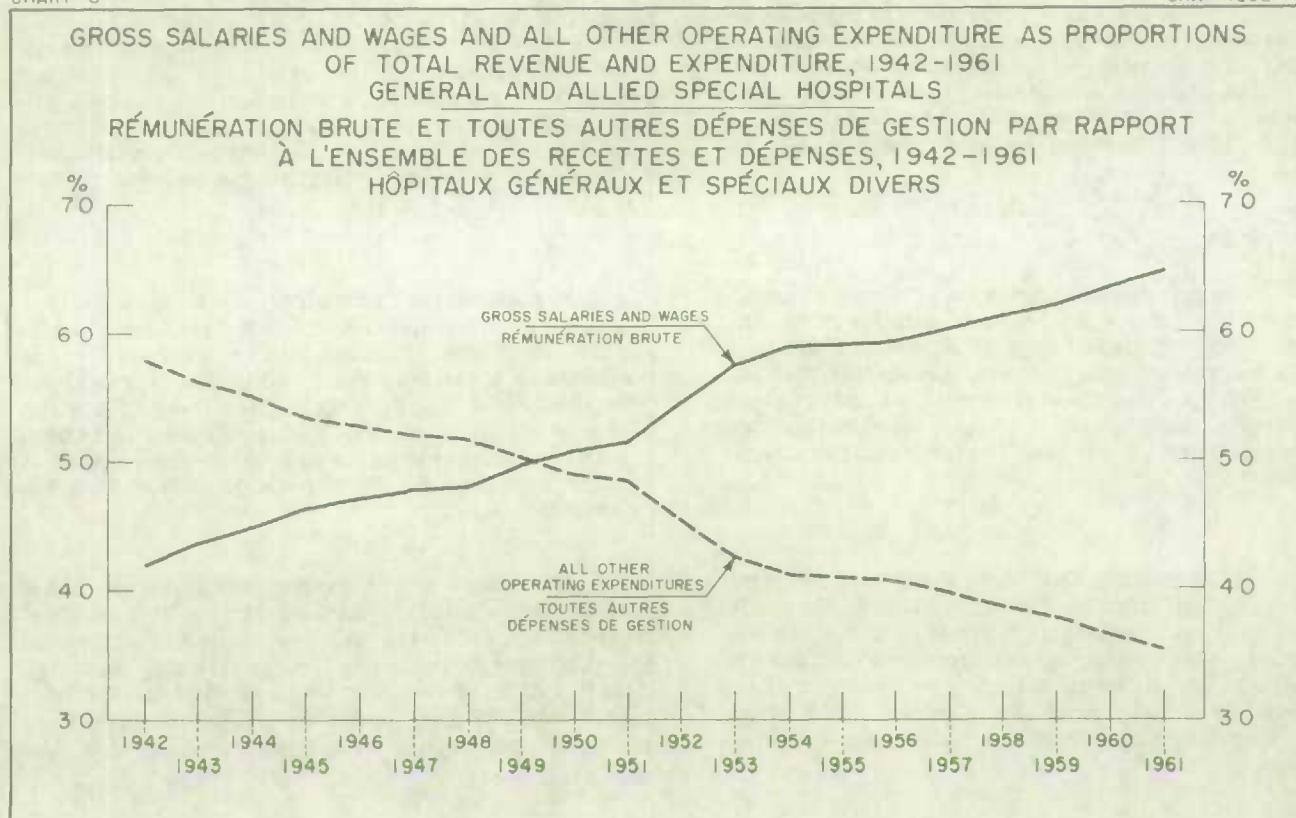

La rémunération dans les hôpitaux généraux s'est échelonnée de 58.4 p. 100 dans le groupe 10-24 lits à 66.4 dans celui de 300-499. Dans les hôpitaux de maladies chroniques, la rémunération a constitué 67.1 p. 100 des dépenses (graphique 7). Cet élément de la dépense, lequel a accusé 41.9 p. 100 de tous les frais de gestion en 1942, a constamment pris de l'importance et, en 1961, il avait grimpé de 22.8 p. 100 (graphique 8).

Dans les hôpitaux généraux et spéciaux divers, la rémunération a compté pour 86.8 p. 100 des dépenses des services de soins directs, pour 65.7 p. 100 de celles des services spéciaux, pour 91.1 p. 100 de celles des services supplémentaires et pour 56.1 p. 100 de celles des services généraux.

Financièrement, le coût des fournitures médicales et chirurgicales et des médicaments a joué un rôle relativement peu important, puisqu'il ne s'est élevé qu'à 7.5 p. 100 de toutes les dépenses du fonds d'administration générale. Dans tout le Canada, les fournitures médicales et chirurgicales ont figuré pour une moyenne de 3.2 p. 100 de ces mêmes dépenses et n'ont guère varié, s'échelonnant de 3 à 3.5 p. 100 dans les hôpitaux généraux. Pour ce qui est des hôpitaux spéciaux divers, les maternités ont dépensé en fournitures médicales et chirurgicales pour 4.1 p. 100 de toutes les dépenses du fonds d'administration générale, les maisons de convalescence pour 1.8, les "autres" hôpitaux pour 1.6 et les hôpitaux de maladies chroniques pour 1.0. Les dépenses en médicaments (4.3 p. 100 dans tous les hôpitaux) ont varié de 4.2 à 5.2 p. 100 dans les hôpitaux généraux, se

CHART - 8

GRAPHIQUE - 8

in chronic hospitals, 2.4 per cent in "other" hospitals and 2.0 per cent in convalescent hospitals.

Other departmental supplies and expenses (20.0%) and other non-departmental revenue fund expenses (7.8%) rounded out revenue fund expenditures. Other departmental supplies and expenses accounted for 0.9 per cent of nursing units expenditure, 13.8 per cent of special services expenditure, 8.1 per cent of supplemental services expenditure and 43.9 per cent of the expenses of general services.

Expenditure by Services

The hospital expenditure dollar of 1961 was distributed among the different hospital services as follows:

1.4¢ for nursing administration
27.1¢ for nursing units
20.4¢ for special services
5.8¢ for supplemental services
37.5¢ for general services
7.8¢ for other revenue fund expense

Small hospitals, mainly those with less than 50 beds, were unable to provide detailed service breakdowns. In many cases the entire expenditure except general services was included in nursing units.

Generally it can be said that expenses for nursing units decreased in percentage terms as the general hospitals became larger, whereas special and supplemental services increased (Chart 9). General services were higher in smaller hospitals showing a difference of 6.1 percentage points (41.5-35.4%) between the 1-9 and 500-999 bed group.

Nursing Administration in general hospitals accounted for 1.4 per cent of total revenue fund expenses, ranging from 0.9 per cent in the 500-999 bed group to 2.0 per cent in hospitals with 50-99 beds. In allied special hospitals nursing administration ranged from 1.4 per cent (convalescent hospitals) to 1.8 per cent (maternity hospitals).

Of the **Nursing Unit** costs in general hospitals 76.9 per cent were for nursing service in the adults and children wards and 6.0 per cent for newborn nursery—the balance was reported for adults, children and newborn nursery combined (for those hospitals which could not separate the newborn nursery expenses from the adults and children wards).

sont établis à 2.6 dans les maternités, à 2.5 dans les hôpitaux de maladies chroniques, à 2.4 dans les "autres" hôpitaux et à 2.0 dans les maisons de convalescence.

Les autres dépenses en fournitures et autres dépenses (20 p. 100) et les autres dépenses (hors services) du fonds d'administration générale (7.8) ont également été un élément important dans les dépenses du fonds d'administration générale. Le premier poste a compté pour 0.9 p. 100 des dépenses des services de soins directs, pour 13.8 de celles des services spéciaux, pour 8.1 de celles des services supplémentaires et pour 43.9 de celles des services généraux.

Dépenses suivant les services

Voici la répartition du dollar de dépenses hospitalières, en 1961, suivant les divers services de l'hôpital:

1.4c. pour l'administration infirmière,
27.1c. pour les services de soins directs,
20.4c. pour les services spéciaux,
5.8c. pour les services supplémentaires,
37.5c. pour les services généraux, et
7.8c. pour les autres dépenses du fonds d'administration générale.

Les petits hôpitaux, surtout ceux de moins de 50 lits, n'ont pu fournir une telle ventilation. Dans plusieurs cas, toutes les dépenses, sauf celles des services généraux, ont été débitées aux services infirmiers de soins directs.

En général, on peut affirmer que, procentuellement, les dépenses des services infirmiers de soins directs ont diminué avec la taille de l'hôpital général, alors qu'augmentaient les dépenses des services spéciaux et supplémentaires (graphique 9). Les services généraux ont accusé une hausse des dépenses dans les petits hôpitaux et la différence s'établissait à 6.1 p. 100 entre le groupe 1-9 lits et celui de 500-999 (de 41.5 à 35.4 p. 100).

L'administration infirmière dans les hôpitaux généraux a enregistré 1.4 p. 100 de toutes les dépenses du fonds d'administration générale, et ce pourcentage a varié de 0.9 p. 100 dans le groupe de 500-999 lits à 2.0 dans celui de 50-99. Dans les hôpitaux spéciaux divers, l'administration infirmière a accusé des pourcentages qui ont oscillé entre 1.4 dans les maisons de convalescence et 1.8 dans les maternités.

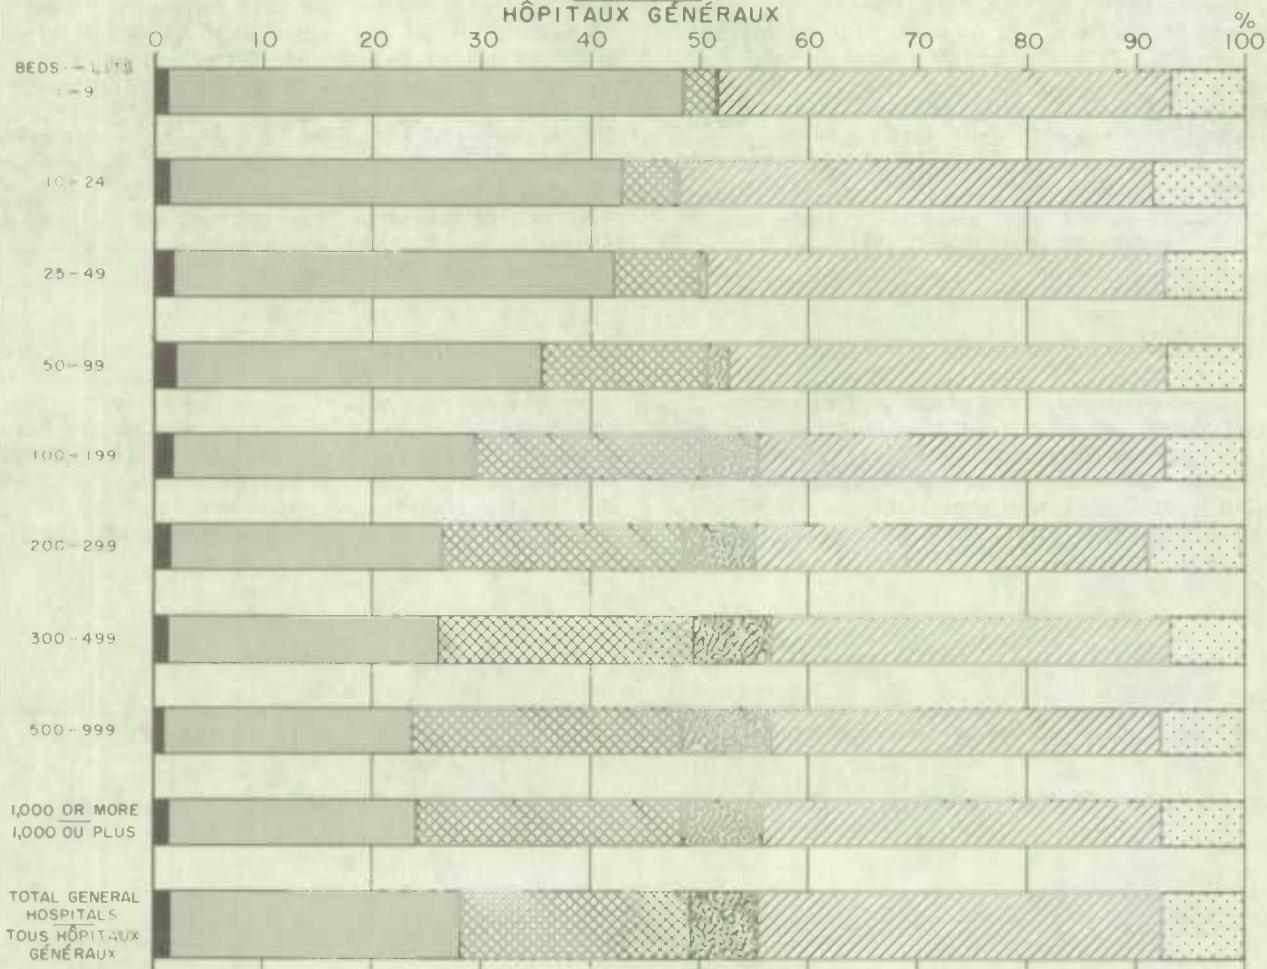

Relativement aux **services infirmiers de soins directs**, des hôpitaux généraux, 76.9 p. 100 de leurs dépenses ont été faites pour les adultes et enfants et 6.0 pour les nouveau-nés (pouponnières); le solde s'appliquait à la fois aux adultes, enfants et bébés, dans le cas d'hôpitaux qui n'ont pas pu distinguer les dépenses pour adultes et enfants de celles des nouveau-nés.

CHART — 9

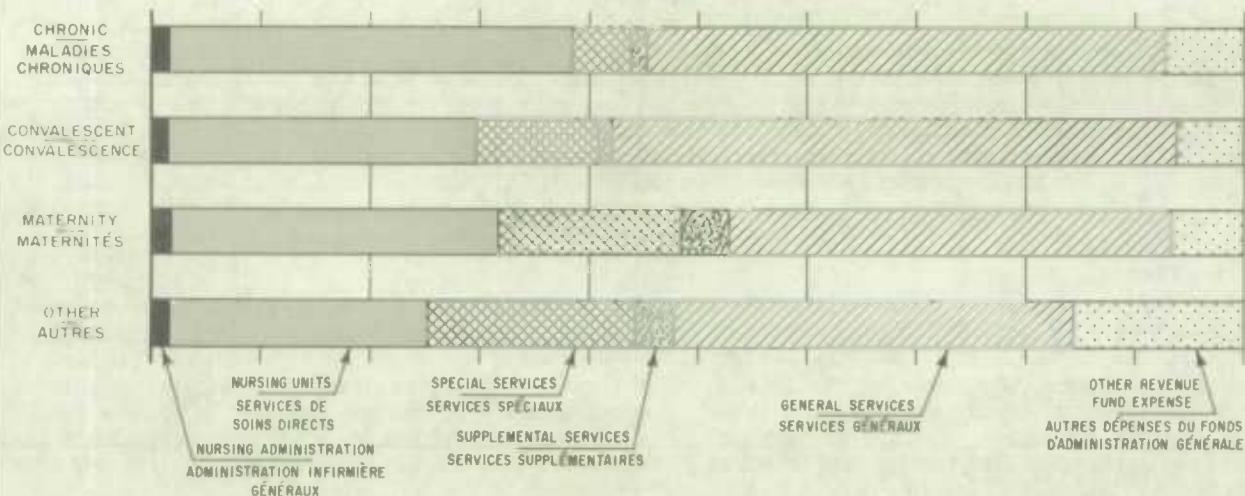

GRAPHIQUE — 9

PERCENTAGE DISTRIBUTION OF EXPENDITURE, BY TYPE OF SERVICE, 1961
 RÉPARTITION PROCENTUELLE DES DÉPENSES, SUIVANT LE SERVICE, 1961

GENERAL HOSPITALS
 HÔPITAUX GÉNÉRAUX

ALLIED SPECIAL HOSPITALS
 HÔPITAUX SPÉCIAUX DIVERS

Expenditure for **Special Services** in general hospitals showed on the average a distribution of 23.4 per cent for the laboratory, 21.7 per cent for radiology and 20.3 per cent for the operating room. Central supply room, pharmacy, delivery room, physiotherapy, emergency, organized out-patient department and other special services, accounted for the balance; each of them for less than 10.0 per cent of the total. There were wide differences (as much as 43.6 percentage points) between bed groups, due to the variety and frequency of services provided by the individual hospitals. Small hospitals, for example, in the 1-9 bed group provided separate data for laboratory, radiology and emergency services only, therefore the percentage distribution showed much higher percentage figures in these various services (Chart 10).

In allied special hospitals the distribution of the expenditure for special service departments follows the characteristic of the particular type of hospital. In maternity hospitals 50.6 per cent of special service expenses were spent for the delivery room. In chronic hospitals physiotherapy was reflected in the expenditure as the most important feature with 41.5 per cent of all special service expenses (Chart 11).

Les dépenses des **services spéciaux** des hôpitaux généraux se sont réparties, en moyenne, entre le laboratoire (23.4 p. 100), la radiologie (21.7) et la salle d'opération (20.3). Le solde s'est divisé entre le service central de distribution, la pharmacie, la salle d'accouchement, la physiothérapie, le service d'urgence, le service organisé des malades externes et les autres services spéciaux dans une proportion inférieure à 10 p. 100 pour chacun de ces services. Réparties suivant les groupes d'hôpitaux par lits, les dépenses ont accusé de fortes différences (jusqu'à 43.6 p. 100), par suite de la variété et de la fréquence des soins fournis par chacun des hôpitaux. Par exemple, les petits hôpitaux de 1-9 lits ont déclaré des données distinctes pour le laboratoire, la radiologie et le service d'urgence, seulement; c'est pourquoi la répartition procentuelle y révèle des taux beaucoup plus élevés (graphique 10).

Dans les hôpitaux spéciaux divers, la répartition des dépenses dans les services spéciaux dépend de la spécialité de l'hôpital. Dans les maternités, 50.6 p. 100 des dépenses en soins spéciaux ont été faites dans les salles d'accouchement. Dans les hôpitaux de malades chroniques, la physiothérapie s'est révélée le plus important élément avec 41.5 p. 100 de toutes les dépenses en soins spéciaux (graphique 11).

CHART-10

GRAPHIQUE -10

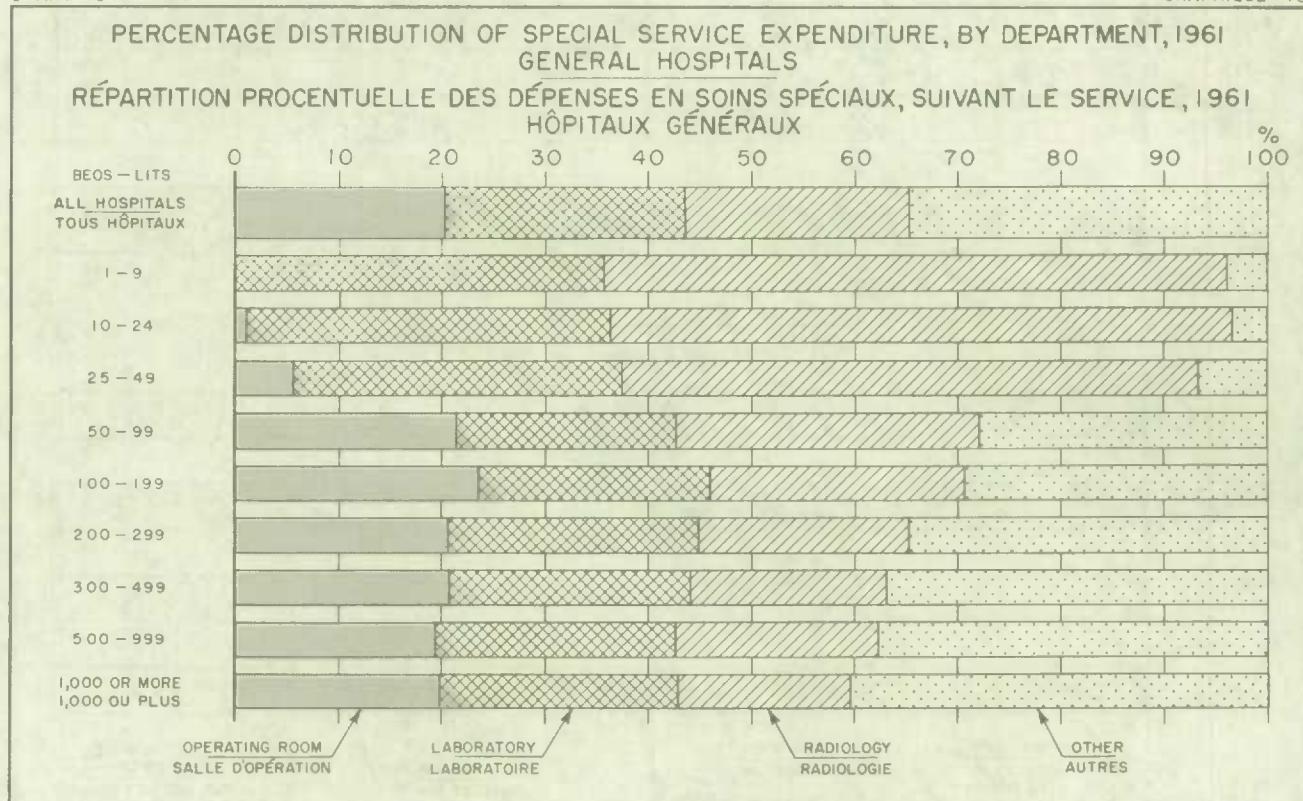

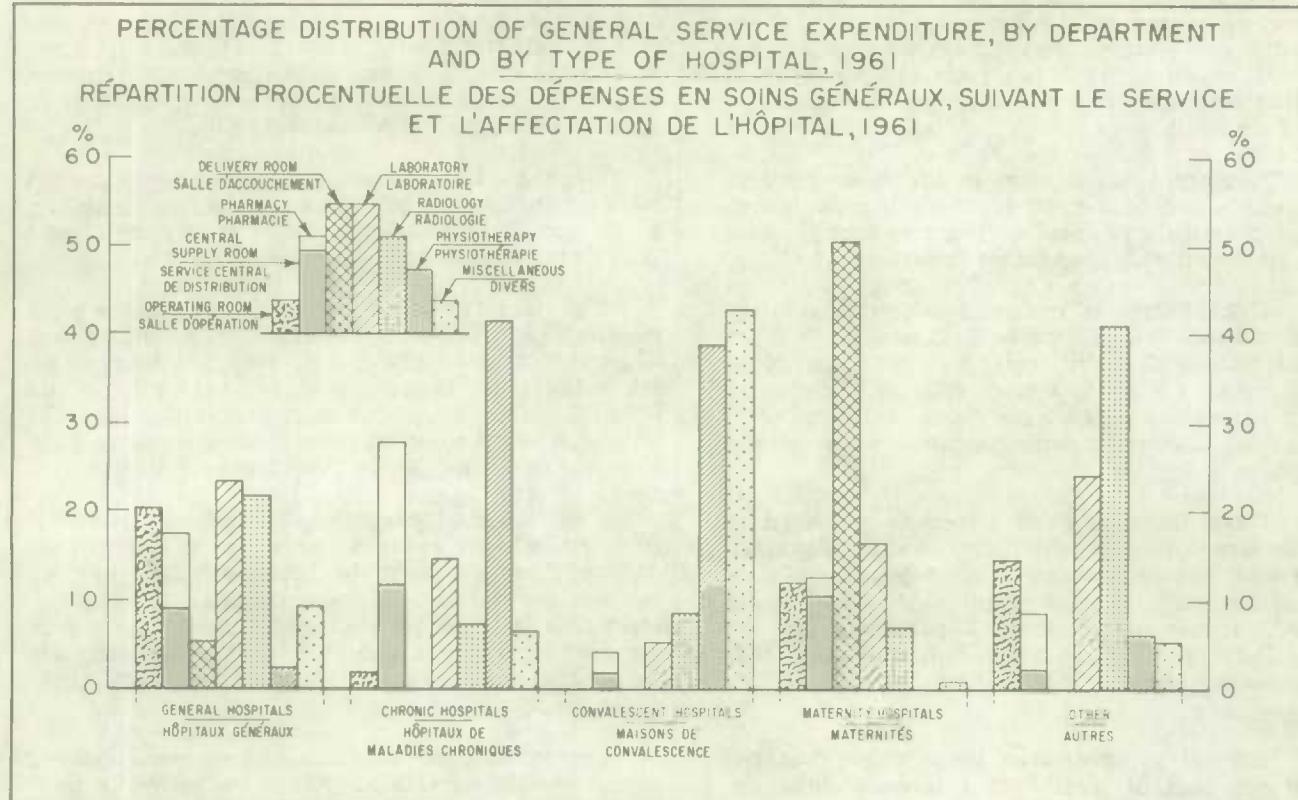

CHART-II

GRAPHIQUE-II

Of almost 40 million dollars expenses for **Supplemental Services** 56.3 per cent were spent on nursing education, 23.1 per cent on medical education, 16.5 per cent for medical records and library, and 3.5 per cent for social services. Of the total revenue fund expenses in 1961 supplemental services accounted for 5.8 per cent, compared to 5.4 per cent a year earlier.

The proportion of revenue fund expenditure for **General Services** decreased from 38.3 per cent in 1960 to 37.5 per cent in 1961. Approximately 1/3 of general service expenditure went for dietary, 1/4 for general administration and 1/5 each for housekeeping, including laundry and linen services, and for operation and maintenance of physical plant.

Raw food accounted for 50.2 per cent of total dietary expenses (85 million dollars) and amounted to approximately \$1.45 per patient-day.

Employment benefits which are part of administration expenses represented an amount equal to 2.5 per cent of the total payroll, ranging from 0.2 per cent in Newfoundland to 4.4 per cent in British Columbia.

Of general administration "other supplies and expense", employment benefits accounted for 42.1 per cent. Purchased services (including bank charges, postage, telecommunications), fees (in-

Sur près de 40 millions de dollars de dépenses des services supplémentaires, 56.3 p. 100 ont servi à l'enseignement infirmier, 23.1 à l'enseignement médical, 16.5 aux archives et bibliothèque médicales et 3.5 au service social. De toutes les dépenses du fonds d'administration générale, en 1961, les services supplémentaires ont figuré pour 5.8 p. 100, comparativement à 5.4 un an plus tôt.

Le pourcentage de dépenses du fonds d'administration générale dans les services généraux a décrû de 38.3 en 1960 à 37.5 en 1961. Environ le tiers des dépenses des services généraux a été affecté à l'alimentation, le quart à l'administration générale et le cinquième à l'entretien ménager (buanderie et lingerie comprises) et au fonctionnement et à l'entretien des immeubles et du matériel.

Les aliments nature ont figuré pour 50.2 p. 100 de toutes les dépenses en alimentation (85 millions de dollars), lesquelles se sont établies à environ \$1.45 par journée d'hospitalisation.

Les avantages sociaux qui font partie des dépenses d'administration représentaient une somme égale à 2.5 p. 100 de toute la rémunération et variaient de 0.2 p. 100 à Terre-Neuve à 4.4 en Colombie-Britannique.

Parmi les "autres" dépenses en fournitures et "autres" dépenses qui relèvent de l'administration générale, les avantages sociaux figuraient pour 42.1 p. 100. Les frais de services rémunérés (y compris

cluding legal and auditing fees) and other related expenses, amounted to 31.5 per cent. The rest was spent on insurance (3.6 per cent), travel (3.9 per cent), memberships and subscriptions (2.1 per cent), supplies (10.7 per cent), maintenance of office equipment (1.5 per cent) and miscellaneous (4.6 per cent).

Laundry, linen service and housekeeping expenses amounted to 55 million dollars, of which 27.9 per cent was spent on laundry, 13.0 per cent on linen and 59.1 per cent on housekeeping.

Expenditure on operation of physical plant (30 million dollars) included insurance (5.4 per cent), taxes (2.6 per cent), fuel (48.3 per cent), electricity (27.8 per cent), water (8.2 per cent) and miscellaneous (7.7 per cent). Maintenance of physical plant required expenditure of 20 million dollars.

Other Revenue Fund Expenses amounted to 53 million dollars, of which depreciation accounted for 64.0 per cent, interest and payment on loans 26.9 per cent, special research projects 4.4 per cent, ambulance service 0.7 per cent, loss on ancillary operations 0.1 per cent, and other miscellaneous expenses 3.9 per cent.

Interest on short term loans which averaged 3.0 per cent of total "other revenue fund expenses" were highest in Quebec (7.1 per cent). Interest on long term loans ranged from 2.1 per cent of total "other revenue fund expenses" in British Columbia and 4.3 per cent in Newfoundland to 40.0 per cent in Alberta and 41.5 per cent in New Brunswick.

Depreciation for buildings and building service equipment ranged from 22.5 per cent of "other revenue fund expenses" in Quebec to 73.8 per cent in Newfoundland. Newfoundland operated with an extraordinary small amount of interest payment on loans and provincially the lowest proportion of depreciation expenses (13.1 per cent) for major equipment (shareable).

Cost per Patient-day⁵

Prerequisites for arriving at a cost per patient-day are the number of patient-days and the corresponding expenditure. The cost per patient-day figures throughout this publication refer in all cases to total expenses incurred in the hospital and to patient-days including or excluding newborn patient-days as stated.

The cost per adult and child patient-day, in general and allied special hospitals, amounted to \$23.07 and ranged from \$18.50 in general hospitals of the 10-24 bed group to \$30.09 in hospitals with 1000 or more beds. It averaged \$10.18

⁵ Based on total expenditure and adults and children patient-days.

frais bancaires, poste, télécommunications, frais du contentieux) et autres frais similaires ont atteint 31.5 p. 100. Le solde a été dépensé pour l'assurance (3.6 p. 100), les déplacements (3.9), les cotisations et abonnements (2.1), les fournitures (10.7), l'entretien et la réparation des machines et fournitures de bureau (1.5) et pour divers postes (4.6).

Les frais de buanderie, de lingerie et d'entretien ménager ont totalisé 55 millions de dollars, dont 27.9 p. 100 pour la buanderie, 13.0 pour la lingerie et 59.1 pour l'entretien ménager.

Les frais de fonctionnement des immeubles et du matériel (30 millions de dollars) comprenaient les dépenses en assurance (5.4 p. 100), les taxes (2.6), les frais de combustible (48.3), les frais d'électricité (27.8), les frais d'aqueduc (8.2) et diverses dépenses (7.7). L'entretien des immeubles et du matériel a occasionné des dépenses de 20 millions de dollars.

Les "autres" dépenses du fonds d'administration générale se sont chiffrées par 53 millions de dollars; l'amortissement y a figuré pour 64 p. 100, les intérêts sur emprunts et l'amortissement de ces derniers pour 26.9, les recherches spéciales pour 4.4, le service d'ambulance pour 0.7, les pertes dans les exploitations accessoires pour 0.1 et les "autres" dépenses pour 3.9.

Les intérêts sur emprunts à court terme, qui ont obtenu une moyenne de 3 p. 100 de toutes les "autres" dépenses du fonds d'administration générale, ont atteint leur point culminant au Québec (7.1). Les intérêts sur emprunts à long terme se sont échelonnés de 2.1 p. 100 en Colombie-Britannique et 4.3 à Terre-Neuve à 40.0 en Alberta et 41.5 au Nouveau-Brunswick.

L'amortissement des bâtiments, agencements et installations a varié de 22.5 p. 100 des "autres" dépenses du fonds d'administration générale au Québec à 73.8 à Terre-Neuve. Cette dernière province a accusé un montant extraordinairement bas d'intérêt sur emprunts et, parmi les provinces, a obtenu le pourcentage le plus bas de frais d'amortissement (13.1 p. 100) pour du gros matériel (coût partageable).

Coût d'une journée d'hospitalisation⁶

Pour trouver le coût de la journée d'hospitalisation, il est pré requis de connaître le nombre des journées d'hospitalisation et les dépenses correspondantes. Les chiffres relatifs à la journée d'hospitalisation, dans la présente publication, se rapportent toujours aux dépenses totales des hôpitaux et aux journées d'hospitalisation avec ou sans celles des nouveau-nés, comme indiqué.

Le coût de la journée d'hospitalisation des adultes et enfants dans les hôpitaux généraux et spéciaux divers s'est établi à \$23.07, et ce chiffre variait de \$18.50 dans les hôpitaux généraux de 10-24 lits à \$30.09 dans ceux de 1,000 lits ou plus. Cette moyen-

⁶ Basé sur toutes les dépenses et les journées d'hospitalisation pour adultes et enfants.

in chronic hospitals, \$15.96 in convalescent hospitals, \$27.08 in maternity hospitals and \$29.72 in the small group of "other" hospitals. Larger hospitals provide more specialized treatment, maintain more elaborate facilities, operate highly complicated equipment, engage in research and education, and therefore the cost per patient-day is found to increase with the size of hospital.

In general, the cost per patient-day was \$1.75 or 8.2 per cent higher than in 1960, due to an increase of \$1.12 for patient services, \$0.50 for general services and \$0.13 for other revenue fund expenses.

A comparison with 1960 shows the following changes for cost per patient-day by size and type of hospital:

ne se fixait à \$10.18 dans les hôpitaux de maladies chroniques, à \$15.96 dans les maisons de convalescence, à \$27.08 dans les maternités et à \$29.72 dans le petit groupe des "autres" hôpitaux. Comme les grands hôpitaux fournissent une plus grande variété de services et des traitements plus spécialisés, maintenant de l'équipement hautement compliqué et s'occupent de la recherche et de l'enseignement, le coût de la journée d'hospitalisation augmente avec la taille de l'hôpital.

En général, le coût de la journée d'hospitalisation a été de \$1.75 ou de 8.2 p. 100 plus élevé qu'en 1960, par suite d'une hausse de \$1.12 dans les services de soins directs aux malades, de 50c. dans les services généraux et de 13c. pour les autres dépenses du fonds d'administration générale.

Par comparaison avec 1960, le tableau suivant indique les changements du coût de la journée d'hospitalisation suivant la classe et la taille de l'hôpital:

	1960	1961	Increase or (decrease) Hausse ou (baisse)
	dollars		
Public — Publics	21.32	23.07	1.75
General — Généraux	22.75	24.32	1.57
1- 9 beds — lits	20.31	19.94	(.37)
10- 24 " "	17.20	18.50	1.30
25- 49 " "	17.47	19.02	1.55
50- 99 " "	17.93	19.53	1.60
100-199 " "	20.77	22.13	1.36
200-299 " "	22.53	24.98	2.45
300-499 " "	25.42	25.21	(.21)
500-999 " "	25.23	27.89	2.66
1,000 beds or more — lits ou plus	28.64	30.09	1.45
Chronic — Maladies chroniques	8.46	10.18	1.72
Convalescent — Convalescence	10.74	15.96	5.22
Maternity — Maternité	26.76	27.08	.32
Other — Autres	21.39	29.72	8.33

From data in Table 16 it can be seen that 20.5 per cent (modal group) of general hospitals had a cost per patient-day within a range of \$17.50 to \$19.99. Fifty-eight point three per cent of hospitals spent from \$15.00 to \$22.49 and 84.4 per cent kept within the range of \$15.00 to \$29.99, leaving 9.7 per cent of general hospitals with a rate below \$15.00 and 5.9 per cent of hospitals with a rate above \$30.00.

With the increase in hospital size, the modal group shifted toward higher cost per patient-day ratios. For general hospitals under 50 beds the modal group was \$15.00-\$17.49. In the 50-99 bed group it was \$17.50-\$19.99, in 100-199 bed group it was \$20.00-\$22.49, while hospitals between 200 and 999 beds had per diem costs in the \$25.00-\$29.99 class.

Les données du tableau 16 révèlent que, dans 20.5 p. 100 (groupe modal) des hôpitaux généraux, le coût de la journée d'hospitalisation se situait entre \$17.50 et \$19.99. Cinquante-huit, point 3, pour cent des hôpitaux ont dépensé de \$15.00 à \$22.49 et 84.4 de \$15.00 à \$29.99; le solde se composait de 9.7 p. 100 qui ont dépensé moins de \$15.00 et de 5.9 qui ont dépensé plus de \$30.00.

Vu l'augmentation de taille des hôpitaux, le groupe modal a accusé un coût proportionnellement plus élevé de la journée d'hospitalisation. Parmi les hôpitaux généraux de moins de 50 lits, le groupe modal accusait de \$15.00 à \$17.49. Le coût variait de \$17.50 à \$19.99 dans le groupe 50-99 lits, de \$20.00 à \$22.49 dans le groupe de 100-199 et de \$25.00 à \$29.99 dans le groupe 200-999.

Cost per Bed

The cost per bed for general and allied special hospitals calculated on the rated capacity for beds and cribs increased by 9.7 per cent from \$6,407.30 in 1960 to \$7,026.41 in 1961. In general hospitals the increase ranged from \$260.13 (5.1%) in hospitals with 25-49 beds to \$964.90 (12.2%) in hospitals with 500-999 beds. On the average the cost per bed in general hospitals was 8.9 per cent higher than in the previous year and twice as high as in 1953.

Cost per rated bed (based on gross expenditures)

1953.....	\$3,550
1955.....	4,368
1957.....	5,054
1959.....	5,601
1961.....	7,026

In chronic hospitals the cost per bed went up 17.4 per cent over the past year; in convalescent hospitals 36.7 per cent; in maternity hospitals 2.1 per cent, and in the group of other hospitals 25.4 per cent. Expenditure per rated bed is shown in Chart 12.

The cost per bed for "other supplies and expenses" and "other Revenue Fund Expenses" amounted to \$1,954.76 or 27.8 per cent of the total cost per rated bed, 20.0 per cent for other (departmental) supplies and expenses and 7.8 per cent for other (non-departmental) Revenue Fund Expenses.

The expenditure pro-rated on beds occupied, which moves in direct relationship with cost per patient-day, amounted to \$8,420.55⁶, ranging from \$7,270.80 in Newfoundland to \$11,756.65 in the Northwest Territories (Chart 13).

⁶ Cost per patient-day x 365.

Coût par lit

Le coût par lit dans les hôpitaux généraux et spéciaux divers, basé sur la capacité théorique en lits (adultes et enfants), s'est élevé de 9.7 p. 100 pour passer de \$6,407.30 en 1960 à \$7,026.41 en 1961. Dans les hôpitaux généraux, la hausse s'est échelonnée de \$260.13 (de 5.1 p. 100) dans le groupe 25-49 lits à \$964.90 (12.2) dans celui de 500-999. En moyenne, le coût par lit dans les hôpitaux généraux a été supérieur de 8.9 p. 100 à celui de l'année précédente et a doublé celui de 1953.

Coût par lit (basé sur les dépenses brutes)

1953.....	\$3,550
1955.....	4,368
1957.....	5,054
1959.....	5,601
1961.....	7,026

Au cours de l'an dernier, le coût par lit a monté de 17.4 p. 100 dans les hôpitaux de maladies chroniques; de 36.7 dans les maisons de convalescence; de 2.1 dans les maternités et de 25.4 dans les "autres" hôpitaux. Le graphique 12 présente les dépenses suivant la capacité théorique.

La part, par lit, des "autres" dépenses en fournitures et des "autres dépenses du fonds d'administration générale s'est établie à \$1,954.76 ou à 27.8 p. 100 du coût total par lit (capac. théor.); ce pourcentage s'est fixé à 20.0 pour les "autres" dépenses en fourniture et "autres" dépenses (dans les services) et à 7.8 pour les "autres" dépenses du fonds d'administration générale (hors services).

Les dépenses par lit occupé (cap. théor.), qui ont reflété le coût de la journée d'hospitalisation, ont totalisé \$8,420.55⁶, soit de \$7,270.80 à Terre-Neuve à \$11,756.65 dans les Territoires du Nord-Ouest (graphique 13).

⁶ Coût de la journée d'hospitalisation x 365.

¹ Newfoundland excluded 1932-1952; chronic hospitals excluded 1947-1949; public general hospitals for women and public general hospitals for children included with "other special" 1932-1951; figures may not cross-check because of rounding; cost per patient-day is based on total patient-days and includes out-patient expenditure. Comparable figures for 1942-1946 are given in Table 1, Volume 11, 1955.

² Includes Territories for the first time.

³ Data for Quebec mental hospitals estimated.

⁴ Includes net expenditures for 1932-1954; and gross expenditures for 1955-1961.

¹ Sans Terre-Neuve en 1932-1952; les hôpitaux pour malades chroniques sont exclus pour 1947-1949; les hôpitaux généraux publics pour femmes ou enfants sont inclus dans "spéciaux autres" pour 1932-1951; vu l'arrondissement des chiffres, la contre-épreuve peut être impossible; le coût par journée d'hospitalisation se base sur l'ensemble des journées d'hospitalisation et inclut les dépenses relatives aux malades externes. Le tableau I du volume 11 (1955) donne les chiffres comparables pour 1942-1946.

² Y compris les Territoires pour la première fois.

³ Estimations pour les hôpitaux pour malades mentaux du Québec.

⁴ Y compris les dépenses nettes de 1932-1954, et les dépenses brutes de 1955-1961.

¹ Newfoundland excluded 1932-1952; chronic hospitals excluded 1947-1949; figures may not cross-check because of rounding. Comparable figures for 1942-1946 are given in Table 1, Volume II, 1955.

² Includes Territories for the first time.

³ Includes net expenditures for 1932-1954; and gross expenditures for 1955-1961.

¹ Sans Terre-Neuve en 1932-1952; les hôpitaux pour malades chroniques sont exclus pour 1947-1949; vu l'arrondissement des chiffres, la contre-épreuve peut être impossible. Le tableau 1 du volume II (1955) donne les chiffres comparables pour 1942-1946.

² Y compris les Territoires pour la première fois.

³ Y compris les dépenses nettes de 1932-1954; et les dépenses brutes de 1955-1961.
