## PREFACE

Hospital statistics in Canada are published in a series of eight annual reports, each of which is concerned with a specific topic. These statistics are provided so that the reader may assess the facilities and services available, the labour force involved and the financial situation in Canadian hospitals.

Statistics on hospitals have been collected by the Dominion Bureau of Statistics since 1931 and have been published since then in varying degrees of detail. Until 1951, one volume contained the entire hospital statistical data. From 1952 to 1958 there were two, 1959-1960 there were six, and since 1961, eight volumes have been required to portray data of the hospital scene. These volumes are as follows:

Volume I	- Hospital Beds
Volume II	- Hospital Services
Volume III	- Hospital Personnel
Volume IV	- Balance Sheets
Volume V	- Hospital Revenues
Volume VI	- Hospital Expenditures
Volume VII	- Hospital Indicators
	Preliminary Annual Report

The Hospital Indicators publication (Volume VII) follows the pattern set for 1962, i.e., the arithmetic mean (group indicator) is shown for the entire standard classification, while the quartiles and median are shown for the general hospitals in total. Additional information is available on request regarding minimum and maximum values and the standard deviation of each indicator. Also certain indicators are produced but not published in Volume VII.

The Dominion Bureau of Statistics is indebted to the individual hospitals across the nation which have prepared their data for inclusion in a national statistical program; to the provincial hospital plan authorities for the collection of the data; to the provincial hospital associations and the Canadian Hospital Association for their promotion of uniform accounting and recording.

The report was prepared in the Institutions Section of the Health and Welfare Division of the Dominion Bureau of Statistics. Any inquiries with respect to data contained in this report or to unpublished data should be forwarded to this Section.

WALTER E. DUFFETT,

## PRÉFACE

La statistique des hôpitaux du Canada est publiée dans une série de huit rapports annuels dont chacun traite d'un sujet déterminé. Ces publications permettront au lecteur d'apprécier les installations et services disponibles, la main-d'œuvre employée et la situation financière des hôpitaux canadiens.

Depuis 1931, le Bureau fédéral de la statistique recueille la statistique sur les hôpitaux et la présente en publications plus ou moins détaillées. Jusqu'en 1951, toutes les données statistiques afférentes aux hôpitaux tenaient en un seul volume. De 1952 à 1958, il est paru deux volumes, en 1959-1960 six, et depuis 1961, huit volumes sont nécessaires pour tracer un tableau complet de l'activité hospitalière. En voici les titres:

	Catalogue No.
	Nº de catalogue
- Lits d'hôpital	83- 210
- Services hospitaliers	83- 211
- Personnel hospitalier	83- 212
- Bilans hospitaliers	83- 213
- Revenus hospitaliers	83- 214
- Dépenses hospitalières	83- 215
- Indicateurs hospitaliers	83- 216
- Rapport annuel préliminaire	83- 217

La publication consacrée aux indicateurs hospitaliers (Volume VII) suit le plan établi en 1962, à savoir que la moyenne arithmétique (indicateur collectif) est indiquée pour la classification type entière, tandis que les quartiles et la médiane sont donnés pour l'ensemble des hôpitaux généraux. On peut obtenir sur demande des renseignements supplémentaires concernant les valeurs minimales et maximales et la déviation moyenne de chaque indicateur. Certains autres indicateurs sont également calculés mais ne figurent pas au Volume VII.

Le Bureau fédéral de la statistique doit sa reconnaissance aux hôpitaux du pays qui ont préparé les données en vue de leur incorporation au programme national de statistique, aux administrateurs provinciaux de l'assurance-hospitalisation pour la collecte des données; aux associations hospitalières provinciales et à l'Association canadienne des hôpitaux pour leurs efforts en faveur de l'uniformité dans la comptabilité et la tenue des registres.

La Section des institutions (Division de la santé et du bien-être) du Bureau fédéral de la statistique a rédigé le présent rapport. On doit adresser à cette section les demandes de renseignements à l'égard des données contenues dans le présent rapport ou de données inédites.

WALTER E. DUFFETT,  
*Statisticien fédéral.*

## **SYMBOLS**

The following standard symbols are used in Dominion Bureau of Statistics publications:

- .. figures not available.
- ... figures not appropriate or not applicable.
- nil or zero.
- amount too small to be expressed.
- P preliminary figures.
- R revised figures.

A and C - Adults and children.

NB - Newborn.

## **SIGNES CONVENTIONNELS**

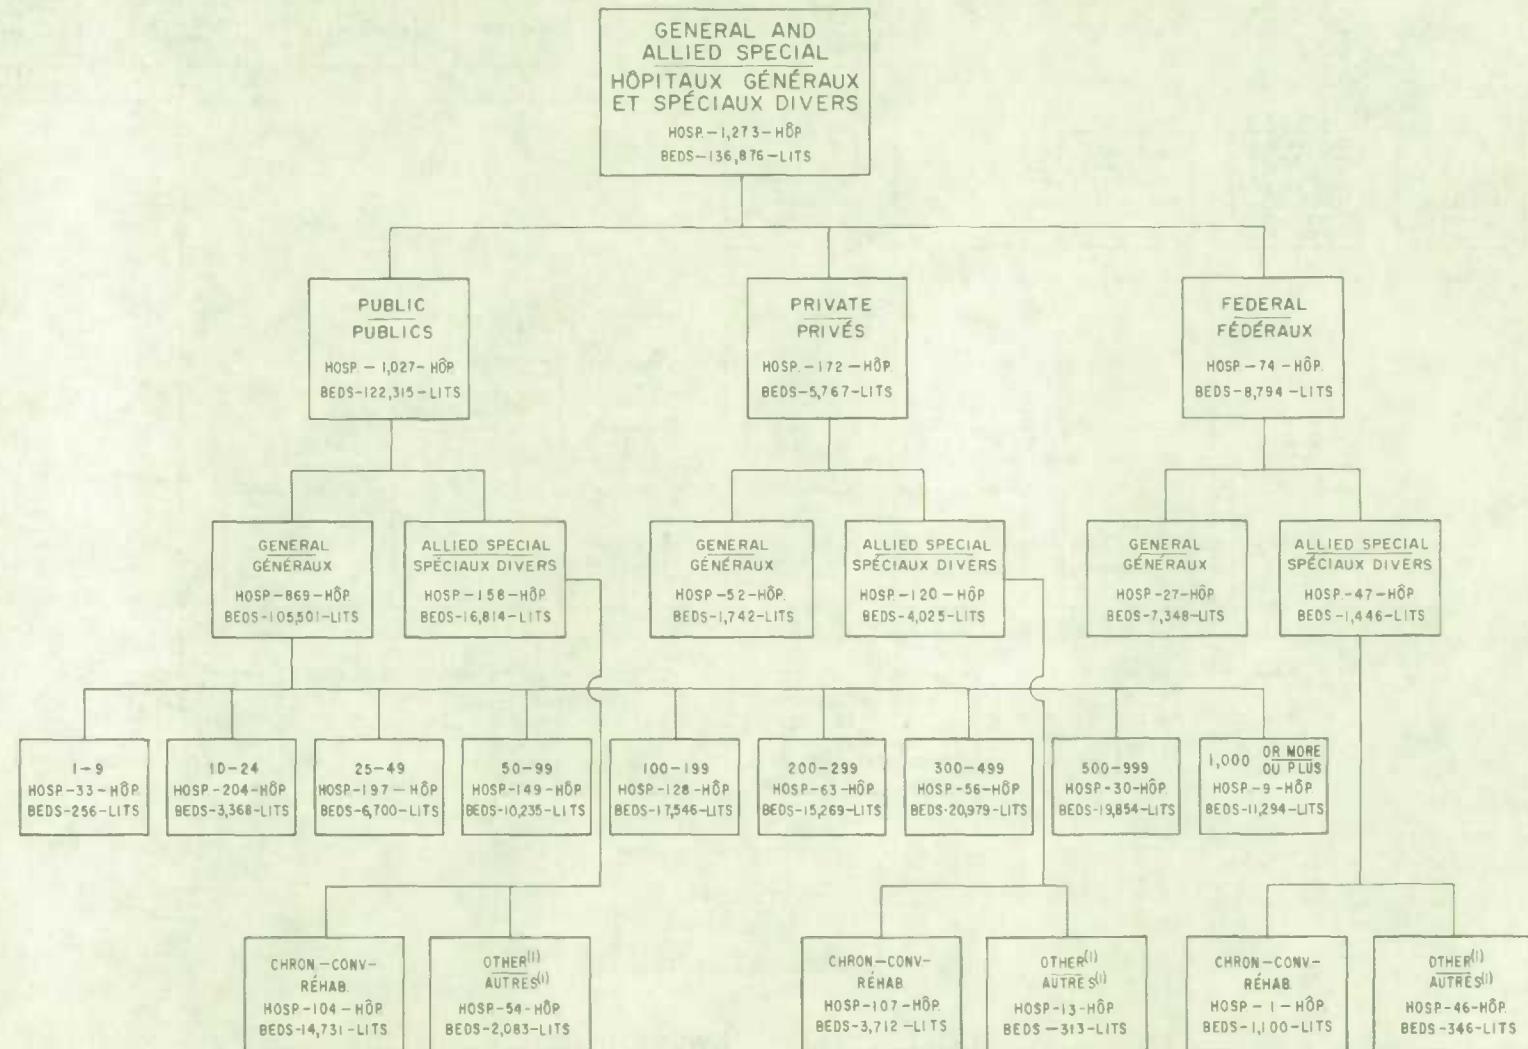

Les signes conventionnels suivants sont employés uniformément dans les publications du Bureau fédéral de la statistique.

- .. nombres indisponibles.
- ... n'ayant pas lieu de figurer.
- néant ou zéro.
- nombres infimes.
- P nombres provisoires,
- R nombres rectifiés.

A. et E. - Adultes et enfants.

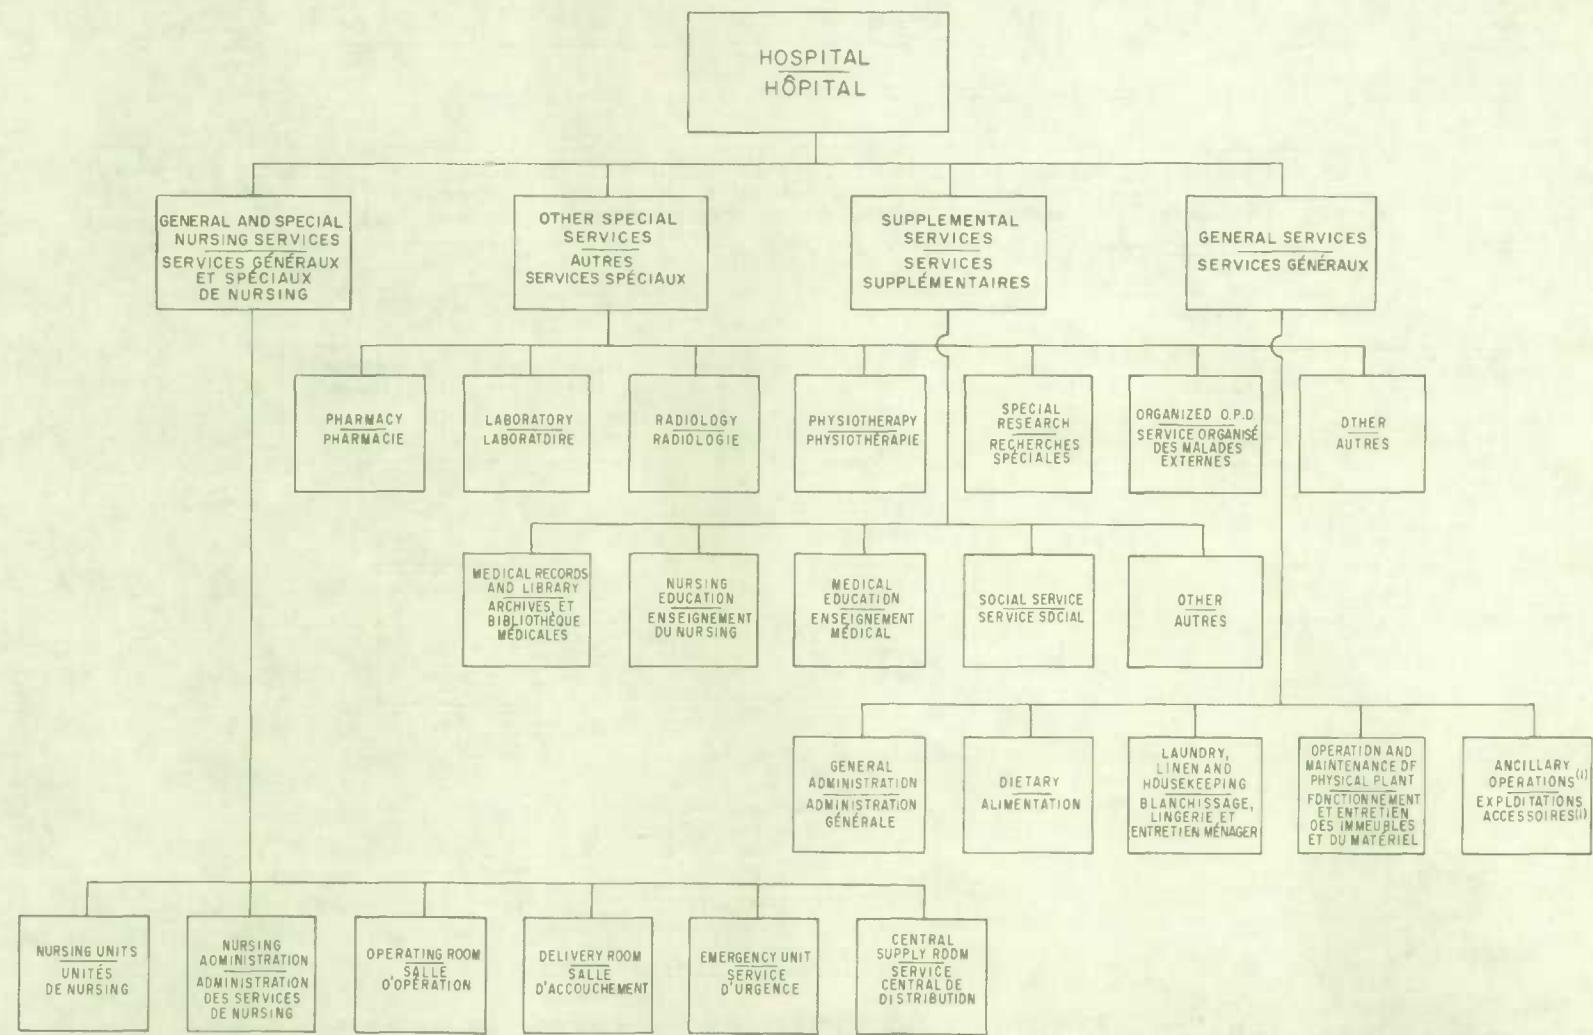

N.-N. - Nouveau-nés.

**ORGANIGRAMME — STATISTIQUE**

(1) INCLUDES GIFT SHOP, BARBER SHOP, FARM DR GARDEN.—Y COMPRIS BOUTIQUES DE CADEAUX, DE BARBIER, FERMES OU JARDIN

## GLOSSARY

### Type of Hospital

#### Hospital

An institution which is operated for the medical, surgical and/or obstetrical care of in-patients, and which is licensed or approved as a hospital by the federal and/or a provincial government, or by a municipality duly authorized under the laws of the province. Specifically excluded are institutions primarily for tuberculosis, mental disease and mental defect.

#### Public Hospital

Recognized by the province as a "public hospital" which is not operated for profit and accepts all patients regardless of ability to pay.

#### Private Hospital

Recognized by the province as a "private hospital" which generally restricts its admissions to patients paying for the care provided at rates determined by the management.

#### Federal Hospital

A hospital owned and operated by the Government of Canada; operation will either be by the Department of National Health and Welfare, the Department of National Defence, or the Department of Veterans Affairs.

#### General Hospital

A hospital which provides for the treatment and care of all types of diseases or at least a wide range of conditions.

#### Chronic, Convalescent and Rehabilitation Hospital

Hospitals which primarily provide for the treatment of conditions requiring long-term care or for treatment of patients who are considered to be in the recovery stage of an illness, especially where this is a long-term process, and for those patients who are being rehabilitated.

#### Other Hospital

A hospital which primarily provides for the treatment of a particular type of disease, condition or case such as maternity, communicable disease, orthopaedic, neurological and cancer; or a hospital which provides a combination of various types of service which cannot be classified into chronic, convalescent or rehabilitation.

## TERMINOLOGIE

### Affectation de l'hôpital

#### Hôpital

Établissement donnant des soins médicaux, chirurgicaux ou obstétriques aux hospitalisés et détenant un permis ou une approbation du gouvernement fédéral ou provincial ou d'une municipalité autorisée à le faire par la province. Sont exclus, les établissements destinés avant tout à la tuberculose, aux maladies mentales et à la déficience mentale.

#### Hôpital public

Hôpital reconnu comme tel par la province et établi dans un but non lucratif; il accepte tous les malades sans égard à leur capacité de payer.

#### Hôpital privé

Hôpital reconnu comme tel par la province et réservant d'ordinaire l'admission des malades à ceux qui paient pour les soins fournis suivant les taux déterminés par la direction.

#### Hôpital fédéral

Hôpital que possède et dirige le gouvernement du Canada; d'ordinaire, l'administration relève du ministère de la Santé nationale et du Bien-être social, du ministère de la Défense nationale ou du ministère des Anciens combattants.

#### Hôpital général

Hôpital qui traite et soigne toutes sortes de maladies ou, au moins, un grand nombre d'états pathologiques.

#### Établissements de maladies chroniques, de convalescence et de réadaptation

Hôpitaux qui traitent, avant tout des états requérant des soins de longue durée ou des malades qui relèvent d'une maladie, surtout de longue durée, ou qui ont besoin de réadaptation.

#### Autres hôpitaux

Hôpitaux qui se spécialisent dans le traitement de maladies, d'états pathologiques ou de cas d'un genre particulier, notamment maternité, maladies contagieuses, orthopédie, neurologie, cancer; ce sont encore les hôpitaux à affectations diverses qui ne peuvent être classés parmi les hôpitaux généraux, les hôpitaux de maladies chroniques, les maisons de convalescence ou de réadaptation.

### Allied Special Hospitals

Includes chronic, convalescent, rehabilitation and "other" hospitals.

### Rated Bed Capacity

The number of beds or of bassinets for newborn, that the hospital (or unit of the hospital) is designed to accommodate as at December 31 of the reporting year.

### Patient Movement

#### In-patient

A patient who is duly admitted to the hospital and to whom a bed, crib or bassinet has been allocated. (This category excludes stillbirths as well as patients attending a day or night centre).

**Adults and Children (A and C).** — All in-patients except newborn.

**Newborn (NB).** — An infant in-patient born alive in the hospital, or postnatal newborn admitted with mother for maternity care.

**Admission.** — The formal acceptance and reception of a person as an in-patient (including infants born alive in the hospital).

**Discharge.** — The official release by the hospital of a live in-patient.

**Death.** — The cessation of life of an in-patient after admission and before discharge (excludes stillbirths).

**Separation.** — The discharge or death of an in-patient.

**Patient-day.** — The period of service to an in-patient between the census-taking hours on two successive days; the day of admission is counted as a patient-day but the day of separation is not.

### Out-patients

Patients who receive services of the hospital in attendance at the hospital, under the direction of the professional personnel of the hospital, but who are not admitted as in-patients. This category includes patients attending a day or night centre.

### Services

#### Laboratory Standard Unit

A measure of the workload of the laboratory — basically ten minutes of time, comprising seven minutes for technical procedures and three for other preparatory services (e.g., stenographic, glass washing, etc.).

### Autres hôpitaux spéciaux

Ces hôpitaux comprennent les institutions de maladies chroniques et de convalescence, de réadaptation et les "autres hôpitaux".

### Capacité théorique en lits

Le nombre de lits ou de berceaux que l'hôpital (ou quartier de l'hôpital) est censé loger, au 31 décembre de l'année.

### Mouvement hospitalier

#### Hospitalisé

Malade dûment admis à l'hôpital et auquel on y a réservé un lit ou berceau. N'entrent pas dans cette catégorie, les mort-nés, ni les malades qui visitent un centre de nuit ou de jour.

**Adultes et enfants (A. et E.)** — Tous les hospitalisés, sauf les nouveau-nés.

**Nouveau-né (N. - N.)** — Bébé né vivant à l'hôpital, ou nouveau-né admis après la naissance avec sa mère pour soins maternels.

**Admission.** — Acceptation formelle et réception d'une personne comme hospitalisée (y compris le bébé né vivant à l'hôpital).

**Sortie.** — Congé officiel accordé à un hospitalisé vivant par l'hôpital.

**Décès.** — Cessation de la vie chez un hospitalisé après l'admission et avant sa sortie (exclure la mortinaissance).

**Départ.** — Sortie ou décès d'un hospitalisé.

**Journée d'hospitalisation.** — Période de soins à un hospitalisé entre les heures de vérification du rôle de deux jours consécutifs; le jour d'admission compte comme une journée d'hospitalisation, mais non le jour de départ.

### Malades externes

Malades qui, sous la direction d'un personnel professionnel, reçoivent des soins dans un hôpital où ils se présentent sans y être hospitalisés. Cette catégorie comprend les malades qui se rendent à un service de nuit ou de jour.

### Services

#### Unité normalisée de laboratoire

Mesure du travail fait en laboratoire; la base est dix minutes, dont sept pour la technique et trois pour le travail préparatoire (ex.: sténographie, lavage des lamelles, etc.).

## Radiology

**Examination.** — The procedure involving one completed film or series of films, or one or more exposures for fluoroscopy, directed at one anatomical site or region of the body during one attendance of the patient at the X-ray department.

**Standard Films.** — Exposures of standard size X-ray film.

**Miniature Films.** — Fluorographic (photo fluoroscopic) film.

## Surgical

**Operation.** — Any major or minor surgical or other operative procedures performed on one or more anatomical sites or regions of a patient, or endoscopic procedures performed, or fractures set, during one attendance in an operating room, cystoscopy room, or an emergency unit of the hospital.

## Obstetrical

**Delivery.** — A patient delivered of a single live birth or stillbirth, or multiple live births or stillbirths, or a combination of these, resulting from one pregnancy.

**Live Births.** — Infants (including immatures) born alive in the hospital during the year or as defined in the legislation governing the vital statistics of the province for the year.

**Immature Births.** — Infants born alive in the hospital during the year who weighed five and one-half ( $5\frac{1}{2}$ ) lbs. (2500 grams) or less at birth.

**Neonatal Deaths.** — Deaths of newborn (mature and immature) under 28 days of age.

**Stillbirths.** — Foetal deaths of 28 or more weeks' gestation or as defined in the legislation governing the vital statistics of the province for the year.

## Organized Out-patient Department

A unit set up, equipped and staffed as a separate department of the hospital, under appropriate administrative direction, to receive and to provide care for patients who are not admitted as in-patients to the hospital.

## Emergency Unit

A unit set up to provide emergency care to persons suffering from injury, shock, or other acute conditions requiring emergency treatment.

## Radiologie

**Examen.** — Procédé comportant un film ou une série de films complétés, ou une ou plusieurs expositions à la fluoroscopie, relatifs à un siège anatomique du malade durant une présence au service de radiologie.

**Film ordinaire.** — Films pris sur des appareils radiographiques ordinaires.

**Film petit format.** — Films fluorographiques (photo-fluoroscopiques).

## Chirurgie

**Opération.** — Toute intervention chirurgicale, grave ou légère, pratiquée sur un ou plusieurs sièges anatomiques d'un malade, l'examen à l'endoscope et la réduction de fractures ou cours d'une présence dans une salle d'opération, une salle de cystoscopie ou une salle d'urgence de l'hôpital.

## Obstétrique

**Accouchement.** — Délivrance d'une grossesse donnant naissance à un ou plusieurs enfants, vivants ou morts, ou comportant une combinaison de ces cas.

**Naissance vivante.** — Naissance de bébé vivant (prématuré ou non) à l'hôpital durant l'année, ou telle que définie par la législation provinciale régissant la statistique de l'état civil pour l'année courante.

**Naissance prématurée.** — Naissance de bébé vivant à l'hôpital durant l'année qui pesait cinq livres et demie ( $5\frac{1}{2}$  livres - 2,500 grammes) ou moins à la naissance.

**Mortalité néonatale.** — Décès de bébés (à terme ou prématurés) en moins de 28 jours depuis leur naissance.

**Mortinaissance.** — Expulsion d'un fœtus mort après 28 semaines de gestation ou plus, ou telle que définie par la législation provinciale régissant la statistique de l'état civil pour l'année courante.

## Service des malades externes (organisé)

Service établi, équipé et doté d'un personnel, à titre de service distinct de l'hôpital et sous une administration appropriée, aux fins de recevoir des malades non hospitalisés et de leur procurer des soins.

## Service d'urgence

Service établi pour donner des soins aux personnes souffrant de blessures de choc ou d'autres états aigus nécessitant un traitement urgent.

## Personnel

### **Full-time Staff**

Persons employed on a full-time basis at December 31, i.e., regularly employed throughout the full hospital workweek.

### **Part-time Staff**

Persons employed on a part-time basis at December 31, i.e., regularly employed on selected days or partial days in the hospital workweek.

### **Selected Professional and Technical Staff**

Persons employed as: dietitians, medical record librarians, laboratory technologists, radiological technicians, physiotherapists, occupational therapists, pharmacists, psychologists, social workers. (Includes professionally qualified (see definition below) as well as unqualified persons).

### **Professionally Qualified**

Those persons holding the professional or technical qualifications recognized by the appropriate associations as relevant to those positions specified in "Selected Professional and Technical Staff" above.

### **Nursing Staff**

All staff engaged in nursing, including directors and supervisors, graduate nurses, student nurses, nursing assistants, orderlies, ward aides, clerks and any other nursing staff.

### **Paid Medical Staff**

All physicians, surgeons, interns, residents and dentists receiving remuneration from the hospital.

### **Other Staff**

Any hospital staff not already enumerated, professional or otherwise, employed in the administration, dietary, laundry, linen service and house-keeping departments, or in the operation and maintenance of physical plant.

### **Paid Hours**

#### **General Nursing Services**

Includes paid hours for all staff concerned with the provision of direct care to patients on the ward or nursery and nursing administration.

## Personnel

### **Personnel de plein temps**

Personnes employées à plein temps le 31 décembre, c.-à-d., employées régulièrement durant toute la semaine ouvrable.

### **Personnel de temps partiel**

Personnes employées à temps partiel le 31 décembre, c.-à-d., employées régulièrement certains jours ou certaines journées incomplètes de la semaine ouvrable de l'hôpital.

### **Certain personnel professionnel et technique**

Personnes employées comme diététistes, bibliothécaires et archivistes médicaux, techniciens diplômés de laboratoire, techniciens en radiologie, physiothérapeutes, ergothérapeutes, pharmaciens, psychologues et travailleurs sociaux (qu'ils aient ou non les qualités professionnelles reconnues, ainsi qu'on le définit plus bas).

### **Détenteurs de qualités professionnelles**

Personnes détenant des qualités professionnelles ou techniques qui sont reconnues par les associations dont relèvent professionnellement les emplois dénommés plus haut dans "Certain personnel professionnel et technique".

### **Personnel du nursing**

Ensemble du personnel affecté aux soins infirmiers (nursing), y compris les directrices et surveillantes, infirmières diplômées, élèves-infirmières, assistantes-infirmières, infirmiers, aides de salle, commis et tout autre personnel infirmier.

### **Personnel médical rémunéré**

Tous les médecins, chirurgiens, internes, résidents et dentistes qui touchent une rémunération de l'hôpital.

### **Autre personnel**

Tous les autres membres du personnel hospitalier (professionnels ou non) qui n'ont pas déjà été énumérés et qui sont affectés à l'administration, à l'alimentation, au blanchissage, à la lingerie et à l'entretien ménager, ainsi qu'au fonctionnement ou à l'entretien des immeubles et du matériel (installation matérielle).

### **Heures rémunérées**

#### **Services généraux de nursing**

Comprend les heures rémunérées de tout le personnel qui s'occupe du soin direct des hospitalisés dans les quartiers ou dans la pouponnière et de l'administration du nursing.

### **Special Nursing Services**

Includes paid hours for all staff assignments concerned with the provision of special treatment services in operating room, delivery room, emergency unit and central supply room.

### **Other Special Services**

Includes paid hours for all staff concerned with special diagnostic and therapeutic services such as pharmacy, laboratory, radiology, physiotherapy, special research projects, ambulance, organized out-patient department and other special services.

### **Supplemental Services**

Includes paid hours for all staff in medical records and medical library, nursing education, medical education, social service and other supplemental services.

### **General Services**

Includes paid hours for all staff concerned with the basic services of providing and maintaining the living arrangements of the hospital such as general administration, dietary, laundry, linen service and housekeeping, operation and maintenance of physical plant. Also includes paid hours for all staff engaged in activities not related to the care of patients such as flower, gift and barber shops, farms, etc.

### **Training Facilities**

### **First Year Student Enrolment**

The actual number of new students (first year only) who enrolled during the year.

### **Total Enrolment at December 31**

Includes all students enrolled at the end of the reporting year, including affiliates-out but excluding affiliates-in.

### **Services spéciaux du nursing**

Comprend les heures rémunérées de tout le personnel qui s'occupe des services de traitement spéciaux dans la salle d'opération, dans la salle d'accouchement au service d'urgence et au service central de distribution.

### **Autres services spéciaux**

Les heures rémunérées de l'ensemble du personnel employé aux services spéciaux de diagnostic et de thérapeutique (pharmacie, radiologie, physiothérapie), aux recherches spéciales, au service d'ambulance, au service organisé des malades externes et aux autres services.

### **Services supplémentaires**

Les heures rémunérées de l'ensemble du personnel chargé des archives et de la bibliothèque médicales, de l'enseignement du nursing, de l'enseignement médical, du service social et des autres services supplémentaires.

### **Services généraux**

Les heures rémunérées de l'ensemble du personnel rattaché aux services essentiels qui procurent et entretiennent les installations vitales de l'hôpital, notamment: administration générale, alimentation, blanchissage, lingerie et entretien ménager, fonctionnement et entretien des immeubles et du matériel. Les heures rémunérées de l'ensemble du personnel engagé dans des activités qui ne sont pas rattachées au soin des malades, boutiques de fleuristes, de cadeaux, salons de barbier, fermes et autres.

### **Moyens de formation**

### **Inscriptions à la première année**

Nombre réel de nouvelles étudiantes (première année seulement) inscrites durant l'année.

### **Inscriptions totales au 31 décembre**

Toutes les étudiantes inscrites à la fin de l'année y compris les affiliées ailleurs, sans les affiliées d'ailleurs.

**Balance Sheets****Buildings and Building Service Equipment**

Includes all structures owned by the hospital and used in carrying out normal functions, as well as equipment added, to heat, light, ventilate or otherwise make serviceable.

**Major Equipment**

Includes hospital equipment, other than building service equipment, which has an estimated useful life of 5 years or more and is usually moveable rather than fixed.

**Minor Equipment**

Includes hospital equipment with an estimated life of not more than 5 years, usually small in size, numerous in quantity, relatively low unit cost and no fixed location.

**Depreciation Fund**

Cash and investments held in the Plant Fund as the result of the funding of the Reserve for Depreciation.

**Sinking Fund**

Cash or investments, including bonds, debentures and stocks, held for the purpose of retiring a bond issue at some future date.

**Improvement and Replacement Fund**

Cash or investments set aside for extensions, improvements, or replacement of building, equipment and other plant assets.

**Revenues****Revenue Fund**

The Revenue Fund is set up to record monetary activities associated with the day-to-day operations of the hospital in providing services to patients. It is sometimes called the Current Fund or the Operating Fund.

**Revenue Fund Income.** — Revenue Fund income is all revenue (whether or not actually received) that accrues during the year for the purpose of operation and maintenance of the hospital.

**Bilans hospitaliers****Bâtiments et matériel fixe**

Comprend l'ensemble des bâtiments que possède l'hôpital et qui servent aux fonctions régulières de celui-ci, de même que le matériel ajouté au chauffage, à l'éclairage et à la ventilation, ou mis en service de quelque manière.

**Gros matériel**

Comprend le matériel de l'hôpital autre que le matériel fixe, dont la durée estimative de service est de cinq ans ou plus et qui est habituellement amovible plutôt que fixe.

**Petit matériel**

Comprend le matériel de l'hôpital dont la durée estimative de service ne dépasse pas cinq ans, dont la taille est ordinairement petite, la quantité grande, le prix unitaire modique, et qui n'a pas d'emplacement fixe.

**Fonds d'amortissement de l'installation matérielle**

Encaisse et placements conservés dans le fonds d'immobilisation comme résultat de la consolidation de la réserve pour dépréciation.

**Fonds de remboursement de la dette**

Comprend tout solde en argent et la valeur des placements du fonds de remboursement de la dette, y compris les obligations et (ou) actions conservées en vue de racheter plus tard une émission d'obligations.

**Fonds d'amélioration et de renouvellement**

Comprend tout solde en argent et la valeur des placements (obligations et (ou) actions) mis en réserve pour les rajouts, les améliorations et le remplacement de bâtiments, de matériel ou autre actif du fonds d'immobilisations.

**Revenus****Fonds d'administration générale**

Le fonds d'administration générale sert à enregistrer toute activité reliée au train-train quotidien de l'hôpital en vue de procurer des soins aux malades. Le fonds s'appelle parfois le fonds courant ou le fonds de revenu.

**Revenus du fonds d'administration générale.** — Ce sont tous les revenus (perçus ou non), accumulés durant l'année et servant au fonctionnement et à l'entretien de l'hôpital.

**Gross earnings.**—Gross earnings are the amounts earned by the rendering of services to patients. These amounts are represented by the regular rates charged for such services, regardless of the terms of and contract, agreement, or understanding as to the basis of rates to be paid.

**Net earnings.**—Net earnings comprise the difference between gross earnings and deductions such as courtesy, rebates and free service, and bad debts less recoveries.

**General services.**—General services include the accommodation and meals, at the standard ward level, routine nursing care, and all of the special services provided to in-patients, such as the use of the operating and delivery rooms, laboratory and radiology services, etc., which the hospital includes in its charges at the basic standard ward daily rate.

**Authorized charges.**—An authorized charge is a per diem amount designated by a province to be charged to an insured in-patient for insured services at the standard ward level. This amount is in addition to the regular payment made by the Provincial Plan. Authorized charges apply only in British Columbia, Alberta and the Northwest Territories.

#### Additional Services

Additional services include all in-patient services extended over and above standard ward care, mainly the differential to private and semi-private accommodation, non-benefit drugs and ambulance service.

#### Grants

These are monies received by the hospital from other than private sources, for revenue fund purposes only, such as maintaining services, covering operating deficit and carrying on special research projects. These grants are in addition to and must be distinguished from any earnings derived from Provincial Plans or government departments to pay for the care of patients.

#### Other Revenue Fund Income

This includes donations, investment income, contributed services of personnel, rentals, discounts on purchases, recoveries and sales, income from ancillary operations, and other unallocated income.

**Revenus bruts.**—Sommes acquises par suite de soins aux malades. Ces sommes sont calculées suivant le tarif ordinaire de tels soins, sans égard aux stipulations d'un contrat, d'une entente ou d'un accord quant au tarif à exiger.

**Revenus nets.**—Les revenus nets sont la différence entre les revenus bruts et les déductions, telles que faveurs, rabais et soins gratuits et mauvaises créances, moins les recouvrements.

**Soins généraux.**—Les soins généraux comprennent le logement et les repas, au prix de la salle commune, les soins infirmiers ordinaires et tous les soins spéciaux fournis aux hospitalisés, — comme l'usage des salles d'opération et d'accouchement, les services de laboratoire et de radiologie, etc., dont l'hôpital débite le taux quotidien global de base.

**Frais autorisés.**—Montants quotidiens destinés, par une province, à être débités, au tarif de salle commune, à un hospitalisé assuré pour des soins assurés. Cette somme vient en sus de paiement régulier fait par le régime provincial. Les frais autorisés ne s'appliquent qu'en Colombie-Britannique, en Alberta et dans les Territoires du Nord-Ouest.

#### Soins supplémentaires

Ces soins englobent tous ceux qui n'entrent pas dans la catégorie des soins ordinaires de salle, surtout les suppléments pour chambres privées ou semi-privées, les médicaments non assurés et le service d'ambulance.

#### Subventions

Sommes que l'hôpital a reçues d'autres sources que privées pour les seules fins du fonds d'administration générale, — comme soins d'entretien, — en vue de parer au déficit de gestion et d'effectuer des recherches spéciales. Ces subventions sont en sus et doivent être distinguées de toute recette provenant de régimes ou ministères provinciaux et destinée à payer le soin des malades.

#### Autres revenus du fonds d'administration générale

Sont compris ici: les dons, les revenus de placements, services gratuits du personnel, loyers, escomptes au comptant sur achats, recouvrements et ventes, revenus des exploitations auxiliaires et autres revenus non répartis.

**Contributed services.** — Includes the value of donated services of full-time or part-time personnel (including members of religious orders) but excludes volunteer or campaign fund workers.

**Ancillary operations.** — Includes income from operations such as a farm or garden, barber shop, florist shop, etc.

### Expenditures

#### Revenue Fund Expense

Revenue Fund Expense is the cost, on an accrual basis, of operating and maintaining the hospital during the year, regardless of the amounts of disbursements made during the year.

**Salaries and wages.** — Included are the gross salaries and wages earned during the year by all hospital personnel whether or not actually paid during the year. Gross salaries and wages comprise the following:

(1) Salaries, wages, and other remuneration<sup>1</sup> earned by paid personnel, including special allowances paid and perquisites supplied to such personnel; includes also any earned fees or other remuneration, perquisites, and special allowances to physicians or therapists for services rendered to the hospital.

(2) The value of contributed services of regular staff members working without pay, and of perquisites supplied to such personnel, calculated on the basis of salary scales for similar services in the community and supported by regular payroll records.

The distribution of the gross salaries and wages of an employee working in more than one department of a hospital normally is made proportionately to the numbers of paid hours of work done by the employee in each of the several departments; however, if the employee received separate remuneration for services in each department, these amounts are charged to the departments concerned.

**Other supplies and expense.** — Departmental expenditure other than gross salaries and wages, medical and surgical supplies and drugs.

**Other (non-departmental) expense.** — Non-departmental expenditure such as interest on loans, depreciation, rentals and other miscellaneous expenses.

<sup>1</sup> Since 1963, for purposes of uniformity, remuneration paid radiologists and pathologists is classified as "other supplies and expenses".

**Services gratuits.** — Comprend la valeur des services donnés par le personnel à plein temps ou à temps partiel (y compris les religieux) mais exclut les volontaires ou les participants de campagnes de souscription.

**Exploitations auxiliaires.** — Comprend les revenus provenant d'exploitations telles que ferme ou jardin, salon de coiffure, boutique de fleuriste, etc.

### Dépenses

#### Dépenses du fonds d'administration générale

Ces dépenses représentent le coût, sur une base d'exercice, du fonctionnement et de l'entretien de l'hôpital durant l'année, quels que soient les déboursés effectués.

**Rémunération.** — La rémunération se dit des traitements et salaires bruts gagnés durant l'année par tout le personnel hospitalier. La rémunération comprend ce qui suit:

1) Les traitements, salaires et autres gratifications<sup>1</sup> gagnés par le personnel rémunéré, y compris les indemnités spéciales et les revenants-bons; sont compris aussi, les honoraires et autres gratifications revenants-bons et indemnités spéciales accordés à des médecins, ou thérapeutistes pour services rendus à l'hôpital.

2) La valeur des services gratuits du personnel régulier et de ses revenants-bons, calculée d'après l'échelle de la rémunération pour services semblables dans la localité et s'appuyant sur les entrées ordinaires aux bordereaux de paie.

La répartition de la rémunération brute d'un employé travaillant dans plus d'un service hospitalier doit ordinairement s'effectuer proportionnellement au nombre d'heures de travail rémunéré de l'employé dans chacun des services. Toutefois, si l'employé a reçu une rémunération distincte pour son travail dans chaque service, chacune de ces rémunérations est débitée au service concerné.

**Autres fournitures et dépenses.** — Dépenses des services, autres que frais de rémunération, de fournitures chirurgicales et médicales et de médicaments.

**Autres dépenses non afférentes aux services.** — Les dépenses non afférentes aux services, comme intérêts sur emprunts, amortissement, loyers et autres dépenses.

<sup>1</sup> Pour les besoins de l'uniformité, la rémunération des radiologues et des pathologistes, depuis 1963, est classée sous "autres fournitures et dépenses".

**PARTIE I**  
**TEXTE ET GRAPHIQUES**

## INTRODUCTION

This report, the sixth in an annual series begun in 1961, contains 172 tables of hospital indicators or ratios designed to measure hospital activity in Canada for the reporting year 1966. The Annual Returns of Hospitals—Part 1 (Facilities and Services) and Part 2 (Finances) are the source documents from which the numerators and denominators of the ratios are selected for inclusion in the Institutions Section's computerized indicator program, which in 1966 produced more than 300 ratios covering such areas as hospital utilization, personnel, workloads, revenues and expenditures. All ratios produced in the Section's indicator program are not published in this report, however further information is available on request.<sup>1</sup>

In general, the tables of this report are arranged in sections in keeping with the various services and departments within hospitals as illustrated by the Organization Chart on page 12. Table order within sections follows as closely as possible the logical sequence established in Volumes I-VI of the Section's Hospital Statistics series i.e., beginning with beds and patient movement followed by services, personnel, balance sheets, revenues and expenditures. For each ratio there is an accompanying item count signifying the number of hospitals involved in the calculation. Comparison of this count with the number of operating hospitals (Table 1) indicates the coverage which any given ratio represents.

Hospitals are not included in the ratio program or in certain ratios for a variety of reasons. Hospitals which did not report for the full year in question are excluded from all ratios. Certain hospitals in a group may not possess the facility or service being measured. Hospitals are omitted if they do not report both the numerator and denominator of the ratio since the computer will not accept a zero value in the indicator program. Certain ratios which could involve legitimate zero values are excluded from the indicator program as for example deaths per 1,000 separations which could conceivably involve a zero numerator. This ratio can be manually calculated from summary data contained in Volume 1 of the Hospital Statistics series.

As previously stated, data for the ratios presented in this report were taken from the "Annual Return of Hospitals", Parts I and II. All general and allied special hospitals in Canada are required to submit Part I (Facilities and Services) but only public are required to report on Part II (Finances). Therefore ratios dealing with facilities and services are only calculated for general and allied special hospitals and financial ratios are formulated for public general and allied

<sup>1</sup> Medians and quartiles are available for other sub-groups, as well as the standard deviation (a measure of variability from the mean value), and minimum and maximum values, upon request to the Institutions Section, Dominion Bureau of Statistics, Ottawa.

Le présent rapport est le sixième d'une série annuelle dont la publication a commencé en 1961. Il renferme 172 tableaux des indicateurs ou quotients hospitaliers dont l'objet est de mesurer l'activité des hôpitaux au Canada pour l'année de déclaration 1966. Les Rapports annuels des hôpitaux—Partie I (Installations et services) et Partie II (Finances)—constituent la source des données d'où sont extraits les numérateurs et les dénominateurs des quotients aux fins d'inclusion dans le programme mécanographique de calcul des indicateurs de la Section des institutions, programme qui en 1966 a produit plus de 300 quotients visant des secteurs tels que l'utilisation, le personnel, les volumes de travail, les revenus et les dépenses des hôpitaux. Tous les quotients tirés du programme des indicateurs de la Section ne sont pas publiés ici; cependant on peut obtenir d'autres renseignements sur demande<sup>1</sup>.

En général, les tableaux du présent rapport sont disposés en sections correspondant aux divers soins et services des hôpitaux, ainsi que l'indique l'organigramme de la page 12. L'ordre des tableaux dans les sections suit d'autant près que possible la séquence logique établie dans les volumes I à VI de la série "Statistique hospitalière", c'est-à-dire, qu'on a d'abord les lits et le mouvement des malades, suivis des soins, du personnel, du bilan, des recettes et des dépenses. Pour chaque quotient il y a un total annexe représentant le nombre d'hôpitaux compris dans le calcul. La comparaison de ce total avec le nombre d'hôpitaux en activité (tableau 1) indique le champ observé que représente un quotient donné.

Certains hôpitaux ne sont pas inclus dans le programme de quotients ou dans certains quotients pour des raisons variées. Les hôpitaux qui n'ont pas fait de déclaration toute l'année sont exclus de tous les quotients. Certains hôpitaux faisant partie d'un groupe peuvent ne pas avoir les installations ou les soins pour lesquels on établit un quotient. Sont omis les hôpitaux qui ne déclarent pas le numérateur et le dénominateur du quotient vu que l'ordinateur n'accepte pas de valeur "zéro" dans le programme des indicateurs; certains quotients qui pourraient inclure normalement des réponses zéro sont exclus du programme des indicateurs comme, par exemple, le quotient des décès pour 1,000 départs, qui pourrait, on le conçoit, comprendre un numérateur zéro. Ce quotient peut se calculer selon la méthode classique à partir de données récapitulatives contenues dans le Volume I de la Statistique hospitalière.

Ainsi qu'il a été mentionné plus haut, les données relatives aux quotients présentés ici sont tirées des "Rapports annuels des hôpitaux, Parties I et II". Tous les hôpitaux généraux et spéciaux divers du Canada, sont requis de soumettre la Partie I (Installations et services) et seuls les hôpitaux publics sont requis de remplir la Partie II (Finances). Par conséquent, les quotients ayant trait aux installations et services ne sont calculés que pour les hôpitaux généraux et spéciaux divers et les quotients financiers

<sup>1</sup> La Section des institutions, Bureau fédéral de la statistique, Ottawa, fournit sur demande les médianes et les quartiles d'autres sous-groupes, de même que la déviation moyenne (mesure de la variabilité autour de la valeur médiane) et les valeurs minimums et maximums.

special hospitals only. It should also be noted that many of the smaller hospitals (under 50 beds) are unable to report certain information in sufficient detail for ratio formation. Areas so effected include the departmental breakdowns of General and Special Nursing Services and the distribution of patient-days by type of bed and are designated by blanks in the tables.

For the convenience of the reader, certain tables are footnoted for the purpose of clarification of data, explanation of trends, definition of terms etc. Such a footnote might appear on the first table only of a series but nevertheless apply to subsequent tables of a similar nature. In this regard cross references are made where possible. Further background information can be obtained by reference to the Glossary of terms and the Classification and Organization Charts located in the introductory pages of this report.

For the most part, the data presented in this volume represent the average (i.e., arithmetic mean) values for public general hospitals by province and bed size groups. The majority of these indicators are also published in the appropriate volume or volumes I to VI of the Hospital Statistics series. In addition to providing a consolidation of most published ratios in one document, Volume VII also contains values for the first quartile, the median (or second quartile) and the third quartile. To be eligible for inclusion in the formulation of quartiles, a geographic region must have at least 10 hospitals. Therefore Prince Edward Island and the Territories are excluded. However, these areas are included in the formulation of the quartile values for Canada as a whole. Quartiles are defined as follows:

**First Quartile (Q1).**— That value where 25 per cent of the hospitals have a ratio of this amount or less and 75 per cent have a higher ratio.

**Second Quartile (Q2).**— That value where 50 per cent of the hospitals have a ratio of this amount or less and 50 per cent have a higher ratio — commonly referred to as the median.

**Third Quartile (Q3).**— That value where 75 per cent of the hospitals have a ratio of this amount or less and 25 per cent have a higher ratio.

Chart 1 of this report which is based on Table 43 utilizes quartiles. The chart shows that the inter-quartile range (middle 50 per cent) of Revenue Fund expenditure per patient-day for public general hospitals in 1966 was between \$25.00 (Q1) and \$35.64 (Q3). One half of these hospitals experienced per diem costs of less than \$29.92 (Q2, or the median value) and the other half of these hospitals experienced per diem costs of more than \$29.92. The chart also shows that Revenue Fund expenditure per patient-day in 1966 ranged from a minimum of \$8.62 to a maximum of \$93.09 with a mean average expenditure of \$38.56.

le sont pour les hôpitaux publics généraux et spéciaux divers publics seulement. Il est aussi à remarquer que de nombreux petits hôpitaux (de moins de 50 lits) ne peuvent donner assez de détails pour permettre l'établissement de quotients. Les secteurs ainsi touchés comprennent la répartition par service généraux et spéciaux de soins infirmiers et la répartition des journées d'hospitalisation par genre de lit ou ils sont désignés par des blancs dans les tableaux.

A toutes fins utiles, on a ajouté des renvois à certains tableaux pour éclaircir des données, expliquer des tendances, définir des termes et ainsi de suite. Ces renvois peuvent ne paraître qu'au bas du premier tableau d'une série, mais ils s'appliquent néanmoins aux tableaux suivants de même nature. A cet égard, des recoupements sont faits là où c'est possible. On peut obtenir de plus amples renseignements de base en consultant la Terminologie, le Graphique de la Classification et l'Organigramme figurant aux premières pages du présent rapport.

Les données présentées dans ce volume représentent pour la plupart des valeurs moyennes (c.-à-d. les moyennes arithmétiques) pour les hôpitaux généraux publics, par province et par groupe de capacité théorique. La plupart de ces indicateurs sont aussi publiés dans les volumes I à VI de la Statistique hospitalière. Le Volume VII réunit en un même document la plupart des quotients publiés, mais il contient en outre les valeurs du premier quartile, de la médiane (ou deuxième quartile) et du troisième quartile. Pour être comprise dans la formulation des quartiles, une région géographique doit avoir au moins 10 hôpitaux. L'Île-du-Prince-Édouard et les Territoires du Nord-Ouest sont donc exclus. Toutefois, ces régions sont comprises dans le calcul des valeurs quartiles pour l'ensemble du Canada. Les quartiles sont définis de façon suivante:

**Premier quartile (Q1).**— Valeur que le quotient de 25 p. 100 des hôpitaux ne dépasse pas, mais que le quotient de 75 p. 100 des hôpitaux dépasse.

**Deuxième quartile (Q2).**— Valeur que le quotient de 50 p. 100 des hôpitaux ne dépasse pas, mais que le quotient de l'autre moitié des hôpitaux dépasse; elle est communément dénommée la médiane.

**Troisième quartile (Q3).**— Valeur que le quotient de 75 p. 100 des hôpitaux ne dépasse pas, mais que le quotient de 25 p. 100 des hôpitaux dépasse.

Le graphique 1 du présent rapport, qui a été établi d'après le tableau 43 utilise les quartiles. Le graphique montre que la variation inter-quartiles (moitié centrale) des dépenses du fonds d'administration des hôpitaux généraux publics, par journée d'hospitalisation, en 1966 était de \$25.00 (Q1) à \$35.64 (Q3). La moitié de ces hôpitaux ont eu des frais quotidiens de moins de \$29.92 (Q2, ou la valeur médiane) et l'autre moitié, des frais quotidiens de plus de \$29.92. Le graphique montre aussi les dépenses du fonds d'administration générale par journée d'hospitalisation en 1966 variaient d'un minimum de \$8.62 à un maximum de \$93.09, la moyenne des dépenses étant de \$38.56.

CHART - I

GRAPHIQUE - I

**REVENUE FUND EXPENSE PER A AND C PATIENT-DAY  
PUBLIC GENERAL HOSPITALS, BY PROVINCE, 1966**

**DÉPENSES DU FONDS D'ADMINISTRATION GÉNÉRALE, PAR JOURNÉE D'HOSPITALISATION (A. ET E.)  
HÔPITAUX GÉNÉRAUX PUBLICS, PAR PROVINCE, 1966**

25 per cent of hospitals have value between Q<sub>1</sub> (first quartile) and minimum.

25 p. 100 des hôpitaux indiquent une valeur entre Q<sub>1</sub> (1<sup>er</sup> quartile) et le minimum.

50 per cent of hospitals have value between Q<sub>1</sub> and Q<sub>3</sub> (first quartile and third quartile).

50 p. 100 des hôpitaux indiquent une valeur entre Q<sub>1</sub> et Q<sub>3</sub> (1<sup>er</sup> et 3<sup>e</sup> quartiles).

25 per cent of hospitals have value between Q<sub>3</sub> (third quartile) and maximum.

25 p. 100 des hôpitaux indiquent une valeur entre Q<sub>3</sub> (3<sup>e</sup> quartile) et le maximum.

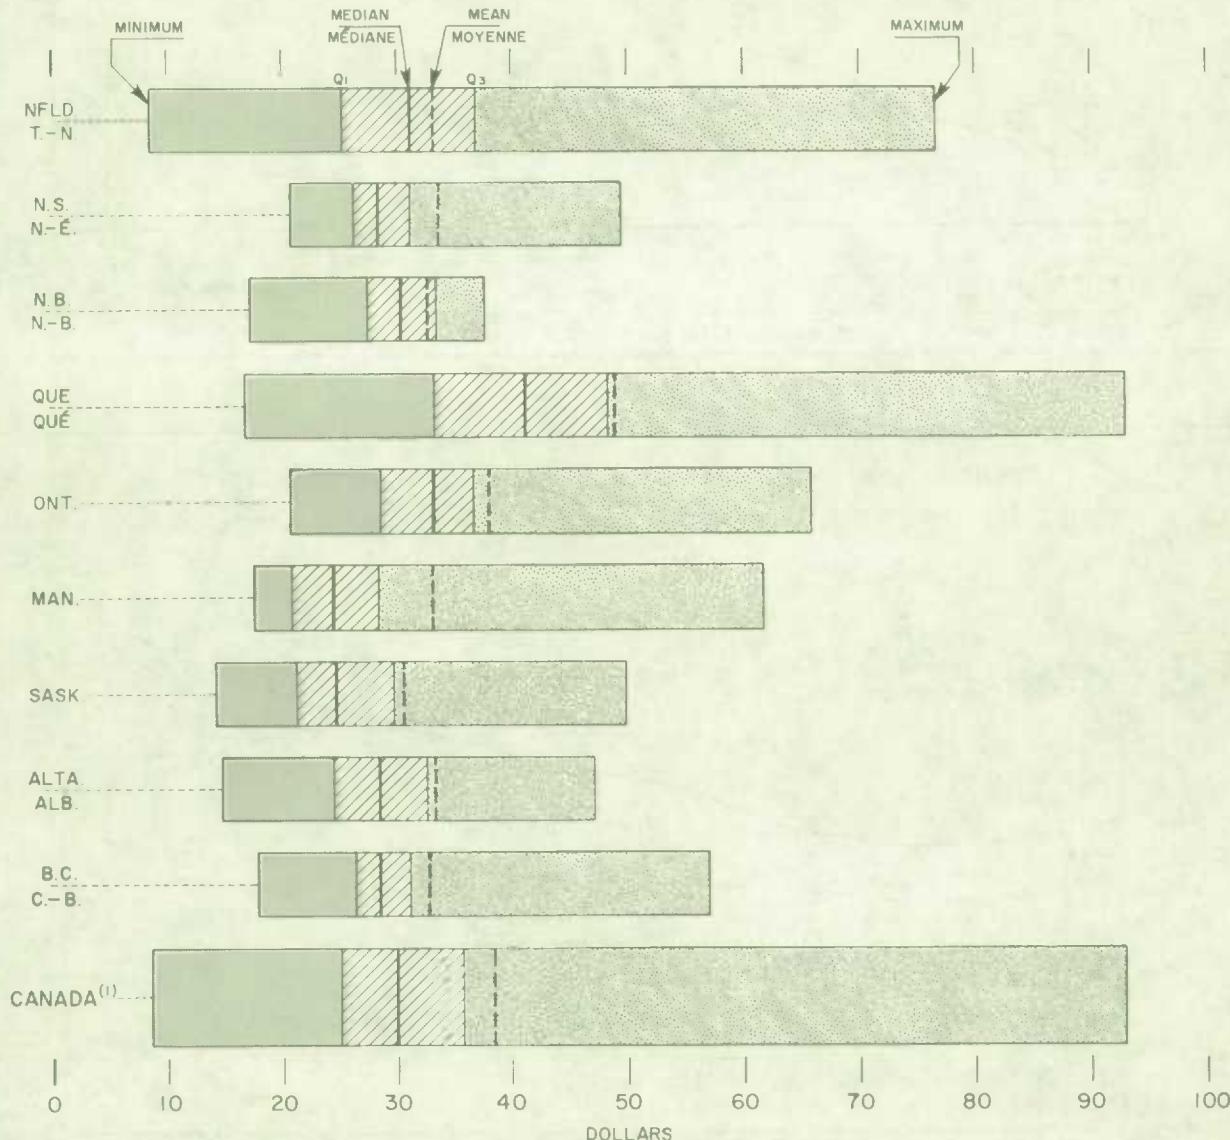

Median — 50 per cent of hospitals have this value or less, while 50 per cent have a higher value.

Médiane — 50 p. 100 des hôpitaux indiquent cette valeur ou moins, alors que 50 p. 100 enregistrent une valeur plus grande.

Mean — common average

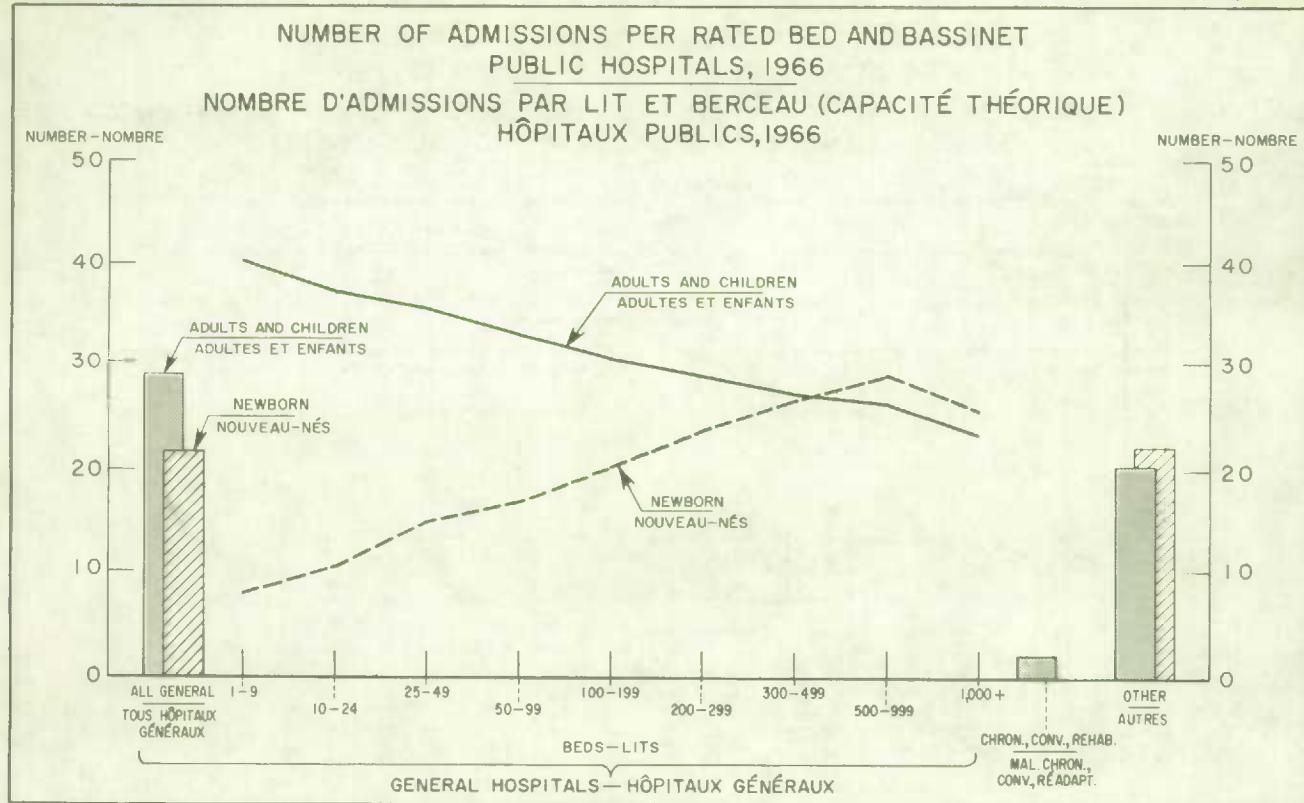

Moyenne — moyenne ordinaire

(1) INCLUDES P.E.I. AND THE TERRITORIES WHICH ARE NOT SHOWN SEPARATELY SINCE THESE MEASUREMENTS ARE NOT PROVIDED FOR PROVINCES WHERE FEWER THAN 10 HOSPITALS ARE INVOLVED IN CALCULATION — Y COMPRIS L'Î.-P.-É. ET LES TERRITOIRES QUI N'ENTRENT PAS DANS LE CALCUL DE L'INDICATEUR SÉPARÉMENT, CAR CES MESURES N'INTÉRESSENT PAS LES PROVINCES OÙ MOINS DE 10 HÔPITAUX FONT L'OBJET DES CALCULS.

Note: The trend in general hospitals is for the length of stay to increase as the size of hospital increases. This is due to larger hospitals admitting more complex cases and acting as referral centres.

Note: Dans les hôpitaux généraux, la durée de l'hospitalisation tend à s'accroître avec la taille de l'hôpital, car les plus grands hôpitaux reçoivent des cas plus compliqués et servent de centres de renvoi.

<sup>1</sup> Average number.

Note: This ratio reflects the effect the holiday season has on the hospital patient-load at year-end.

<sup>1</sup> Nombre moyen.

Nota: Ce rapport reflète l'effet, sur la population hospitalière, des fêtes saisonnières de fin d'année.

Note: In certain areas lower occupancy rates may be due to large areas under renovation.

Note: Dans certains secteurs, les taux d'occupation plus bas sont peut-être dus à de vastes travaux de rénovation.

<sup>1</sup> Average number.

Note: Ratio tends to increase with size of hospital due to more specialized and additional services available.

<sup>1</sup> Nombre moyen.

Nota: Le rapport tend à s'accroître avec la taille de l'hôpital, étant donné que des services plus spécialisés et supplémentaires sont disponibles.

Note: Values may be higher in Newfoundland, Yukon and the Northwest Territories due to the remoteness of these areas from supply depots.

Nota: Les valeurs peuvent être plus élevées à Terre-Neuve, Yukon et dans les Territoires du Nord-Ouest à cause de la grande distance qui sépare ces régions des centres d'approvisionnement.

Note: Depreciation expense in larger hospitals may be lower than expected due to older buildings which may be fully depreciated.

Note: Les frais d'amortissement de grands hôpitaux peuvent être moins élevés qu'on pourrait s'y attendre à cause de plus vieux bâtiments qui seraient complètement amortis.

Note: Reason for relatively high value in 1-9 bed hospitals may be due to lack of departmentalization as found in larger hospitals. In such cases, these services would probably be included as general and special nursing. Also low occupancy rates, which nevertheless require basic standby service, may have an effect.

Note: Si les hôpitaux de 1-9 lits accusent des chiffres relativement élevés, c'est peut-être que leurs données ne se répartissent pas suivant divers services, comme dans le cas des grands hôpitaux. En occurrence ces services seraient compris dans les services généraux et spéciaux de nursing. Interviennent peut-être aussi les taux d'occupation moins élevés, qui exigent néanmoins la présence d'un service élémentaire.

<sup>1</sup> Operations are defined as any major or minor surgical or other operative procedures performed on one or more anatomical sites or regions of a patient, or cystoscopy procedures performed, or fractures set during one attendance in the operating room of the hospital.

<sup>1</sup> L'opération se définit comme "l'intervention chirurgicale, grave ou légère, pratiquée sur un ou plusieurs sièges anatomiques du corps d'un malade, l'examen à l'endoscope et la réduction de fractures au cours d'une présence dans une salle d'opération de l'hôpital".

<sup>1</sup> Obstetrical patients who during the year were delivered of a single live birth or stillbirth, or multiple live births or stillbirths or a combination of these resulting from one pregnancy. The distribution of beds by type of unit was not available for the Province of Nova Scotia.

<sup>1</sup> Celles qui, à la suite d'une seule grossesse, ont accouché durant l'année d'un ou de plusieurs nés vivants ou (et) mort-nés. La Nouvelle-Ecosse ne fournit pas la répartition des lits suivant leur affectation.

Note: This ratio includes work done for in-patients and out-patients both in the hospital and referred out as well as work referred in and procurement and handling of specimens.

Certain ratios are not suitable in the case of Saskatchewan where most hospitals do not report work referred out.

Hospitals in the provinces of Prince Edward Island, Nova Scotia and New Brunswick do not use the Federal schedule of unit values for clinical laboratory procedures.

Note: Le rapport comprend le travail fait à l'hôpital pour les hospitalisés et les malades externes, le travail confié ailleurs et d'ailleurs, l'acquisition et la manutention des spécimens.

Certains rapports ne s'appliquent pas à la Saskatchewan, où la plus grande partie des hôpitaux ne déclarent pas le travail confié ailleurs.

Les hôpitaux de l'Ile-du-Prince-Édouard, de la Nouvelle-Écosse et du Nouveau-Brunswick n'utilisent pas la liste fédérale des valeurs unitaires dans le travail clinique du laboratoire.

Note: This ratio is based on laboratory units done in the hospital for the patients of the hospital. It therefore excludes units referred out for the hospitals' patients and units referred in from outside the hospital.

Note: Ce rapport se base sur les unités de laboratoire dans l'hôpital relativement à ses propres malades. Sont donc exclus, le travail fait ailleurs au profit des malades de l'hôpital et le travail confié d'ailleurs à l'hôpital.

Note: Many hospitals in New Brunswick refer much of the laboratory work to the Provincial laboratories. This is probably the reason for the New Brunswick ratio being less than one-half that of the Canada ratio.

Note: Au Nouveau-Brunswick, plusieurs hôpitaux confient une bonne part du travail de laboratoire aux laboratoires du gouvernement provincial. C'est probablement pourquoi le rapport du Nouveau-Brunswick équivaut à moins de la moitié de celui du Canada.

<sup>1</sup> Includes gross salaries and wages of the department and other supplies and expenses. This ratio reflects the effects of the provincial diagnostic centres in Manitoba, the high proportion of out-patient radiology and radiotherapy east of Manitoba and the regional council arrangements in Saskatchewan.

<sup>1</sup> Comprend la rémunération brute du service et les autres fournitures et dépenses. Ce rapport reflète les effets des centres provinciaux de diagnostic au Manitoba, la forte proportion de radiologie et de radiothérapie pour les malades externes des provinces à l'est du Manitoba et les dispositions prises par les conseils régionaux de la Saskatchewan.

<sup>1</sup> These account for a very small proportion of total supplemental services, one example being patient education programs.

<sup>1</sup> Ces services comptent pour peu sur l'ensemble des services supplémentaires; ex., les programmes d'éducation des malades.

## D—GENERAL SERVICES

All General Services  
General Administration  
Dietary  
Laundry, Linen and Housekeeping  
Operation and Maintenance of Physical Plant  
Ancillary Operations

---

## D—SERVICES GÉNÉRAUX

Tous services généraux  
Administration générale  
Alimentation  
Blanchissage, lingeerie et entretien ménager  
Fonctionnement et entretien des immeubles  
et du matériel  
Exploitations accessoires

## HOSPITAL INDICATORS
