## LA STATISTIQUE HOSPITALIÈRE

1965

### INTRODUCTION

Source of the data contained in this Preliminary Report is the Annual Return of Hospitals (parts HS-1 and HS-2), which is submitted to the Dominion Bureau of Statistics by all general and allied special hospitals in Canada. The Report does not include any information concerning mental institutions or tuberculosis sanatoria.

In order to provide as current data as possible for all hospitals in operation, estimates of selected items were made in cases where hospitals did not report in time for tabulation purposes. However, the number and size of hospitals that required estimation was very small so that any error of the estimate would be minimal in its effect on reported totals.

The format of this Report remains basically unchanged from previous years and historical comparability has been maintained. A number of new tables dealing with chronic and rehabilitation patient-days, raw food cost, distribution of paid hours and salaries and wages by service areas of the hospital have been added to the contents for 1965. The Summaries (Table 1) are intended to portray the basic trends in hospital facilities and finances in Canada from the year 1960.

#### Facilities and Services

The total of general and allied special hospitals (public, private and federal) operating in Canada in 1965 numbered 1,302, an increase of 33 over the previous year. Rated bed capacity of these institutions advanced to 134,500 from 131,300 a year earlier. At the same time, the ratio of beds per 1,000 population amounted to 6.9 as against 6.8 in 1964. Public general and allied special hospitals, which accept all patients regardless of their ability to pay, accounted for 117,000 beds or 87.0 per cent of the total. In

Les données contenues dans le présent Rapport préliminaire proviennent du Rapport annuel (parties HS-1 et HS-2) que soumettent tous les hôpitaux généraux et spéciaux divers du Canada au Bureau fédéral de la statistique. Le Rapport ne comprend pas de renseignements touchant les établissements psychiatriques ou les sanatoriums pour tuberculeux.

Afin que les données soient aussi à jour que possible pour tous les hôpitaux en activité, les estimations de certains postes ont été faites dans les cas où les hôpitaux n'ont pas fait rapport à temps, aux fins de l'exploitation des données. Toutefois, le nombre et la taille des hôpitaux pour lesquels il a fallu faire une estimation étaient assez réduits pour que toute erreur d'estimation n'ait que peu d'effet sur les chiffres déclarés.

La présentation du présent Rapport demeure fondamentalement la même que les années précédentes et la comparabilité chronologique a été préservée. De nouveaux tableaux touchant les journées d'hospitalisation pour maladies chroniques et réadaptation, le coût des aliments nature, la répartition des heures rémunérées, et les traitements et salaires par genre de services hospitaliers s'ajoutent au contenu pour 1965. Le sommaire (Tableau 1) vise à décrire les principales tendances des installations et finances hospitalières au Canada depuis 1960.

#### Installations et services

L'ensemble des hôpitaux généraux et spéciaux divers (publics, privés et fédéraux) en activité au Canada en 1965 s'est chiffré par 1,302, hausse de 33 sur l'année précédente. La capacité théorique en lits de ces établissements s'est élevée à 134,500 au regard de 131,300 l'année précédente. D'autre part, le quotient des lits pour 1,000 habitants a été de 6.9 contre 6.8 en 1964. Les hôpitaux publics généraux et spéciaux divers, qui acceptent tous les malades sans égard à leur capacité de payer, ont répondu pour 117,000 lits ou 87 p. 100 du total. Dans ces hôpitaux,

these hospitals, estimated beds actually set up and in use at year-end were 118,300, a ratio of 1.01 in comparison with the rated bed capacity (1.01 in 1964).

Patient-days of adults and children in public hospitals in 1965 were estimated at 34,874,900, which was equivalent to an average of 95,550 patients in hospital per day (92,900 in 1964). Provincial Hospital Insurance Plans paid for 95.4 per cent of total patient-days in public hospitals or the same proportion as in 1964. Patient-days classified as chronic, convalescent, geriatric and rehabilitation represented 15.0 per cent of the total, compared with 15.9 per cent in 1964. Occupancy rate in public hospitals in 1965 was 81.7 per cent (based on rated beds), a slight increase over the 1964 rate of 81.1 per cent.

The average duration of stay of adults and children separations (discharges and deaths) from public hospitals in 1965 amounted to 11.5 days, no change in comparison with the 1964 average. The average length of stay in general hospitals was 10.2 days (10.2 in 1964) and increased with hospital size from 7.2 days in the 10-24 bed group to 13.5 days in the 1,000 or more bed hospitals.

Full-time employment accounted for 89.0 per cent of the total persons working compared with 89.7 per cent in 1964. Nursing staff were the largest single group of employees, amounting to 55.9 per cent of the full-time workers (56.2 per cent in 1964).

The average number of paid hours of work per patient-day by all personnel in public hospitals amounted to 13.0, which was an increase of 2.4 per cent in comparison with the 1964 ratio of 12.7 hours. Of this total ratio, nursing staff accounted for 7.2 hours (7.1 hours in 1964). Total paid hours worked were distributed among the main service areas of the hospital as follows: 43.7 per cent General and Special Nursing Services (41.8); 9.6 per cent Other Special Services (9.1); 14.7 per cent Supplemental Services (16.9); 32.0 per cent General Services (32.2).

le nombre estimatif de lits réellement dressés et occupés à la fin de l'année a été de 118,300, quotient de 1.01 (1.01 en 1964) en comparaison avec la capacité théorique.

Les journées d'hospitalisation des adultes et enfants dans les hôpitaux publics en 1965 ont été évaluées à 34,874,900, ce qui correspond à une moyenne de 95,550 (92,900 en 1964) malades hospitalisés par jour. Les régimes provinciaux d'assurance-hospitalisation ont payé 95.4 p. 100 de toutes les journées d'hospitalisation dans les hôpitaux publics, soit la même proportion qu'en 1964. Les journées d'hospitalisation classées journées de soins pour maladies chroniques, convalescence, gériatrie et réadaptation ont représenté 15 p. 100 du total au regard de 15.9 p. 100 en 1964. Le taux d'occupation (fondé sur la capacité théorique) dans les hôpitaux publics en 1965 a été de 81.7 p. 100 ou un peu plus que celui de 81.1 p. 100 en 1964.

La durée moyenne du séjour des adultes et enfants qui ont quitté (sorties et décès) les hôpitaux publics en 1965 s'est élevée à 11.5 jours, soit la même moyenne qu'en 1964. Le séjour moyen dans les hôpitaux généraux a été de 10.2 jours (10.2 en 1964) et a augmenté avec la taille de l'hôpital, soit de 7.2 jours dans le groupe de 10-24 lits à 13.5 jours dans les établissements de 1,000 lits ou plus.
